EDS, one of the largest providers of information technology services to the energy industry, will bring its systems-integration experience and global-communications infrastructure to the relationship, while Mincom will contribute its range of software products designed to address the specific needs of capital-intensive industries.

And in Europe, EDS signed contracts with CCM Sulzer and Sulzer Diesel, the French affiliates of the Swiss Sulzer group, to handle all systems information work for the two companies, including maintenance and future applications development.

The Sulzer group manufactures and markets a broad spectrum of products, including textiles, diesel generators, pumping stations and heating and air conditioning units.

Also in the third quarter, EDS signed an agreement to acquire Systems Network Inc., a privately held company based in Ottawa, Canada. Systems Network specializes in providing information technology consulting, systems development, project management and training to the Canadian government.

In the energy area, EDS signed a five-year agreement to provide computer and communication systems, as well as other system-management services, for the Marine Spill Response Corp. (MSRC).

MSRC, a non-profit organization, will use EDS' support to develop systems for coordinating oil spill response efforts and integrating tide, current, weather spill trajectory and environmental data.

The quarter also saw the startup of EDS' development of the Billing and Accounts Receivable Systems Project (BARS) for General Motors. BARS, which will be another of the common integrated systems EDS is developing for GM, will provide a wide variety of functions, including vehicle billing, sales-incentive payment and accounts receivable.

EDS also signed a five-year agreement with GM's Cadillac Motor Car Division to provide general data-processing and telecommunications services.

PROVO, UT (OCT. 30) BUSINESS WIRE - Novell Inc. (NASDAQ: NOVL), developer of NetWare systems software products, Tuesday announced it has certified two new IBM Personal System/2 Micro Channel computers, the PS/2 Model 90 XP 486 and PS/2 Model 95 XP 486, for use as high-performance servers or workstations in the NetWare 386 and System Fault Tolerant (SFT) and Advanced NetWare v2.15 network computing environments.

"Because of our mutual customers, Novell works closely with IBM to ensure that our technologies remain compatible," said Darrell Miller, Novell executive vice president for marketing and services.

"As a result of our continuing mutual development efforts, Novell customers can now take advantage of these powerful new IBM systems to upgrade their existing NetWare networks.

"We're impressed with these systems' performance and NetWare compatibility, and their modular architecture allows them to grow as the needs of NetWare users increase."

The two companies have worked together to provide compatibility between the following new IBM products and the NetWare environment: 16/4 Token-Ring Network Adapter/A interface card; Adapter/A for Ethernet Networks interface card; and Small Computer Systems Interface (SCSI) controllers for 80-, 160- and 320-megabyte fixed disk drives used with the PS/2 Model 90 XP 486 and PS/2 Model 95 XP 486.

This compatibility certification is the result of engineering efforts by the two companies, working within Novell's Strategic Engineering Support (SES) Program, a part of Novell's Independent Manufacturer's Support Program (IMSP).

IMSP is a certification program sponsored by Novell to assure customers that networking components from third-party hardware vendors are compatible with the NetWare network computing environment. More than 400 vendors, offering more than 1,000 products, participate in IMSP.

The SES program is designed to strengthen technical ties between Novell and leading systems vendors. Through SES, Novell and IBM are able to test prototype products together, fixing pre-release problems before products go to market and assuring customers that the latest releases of NetWare systems software and IBM platforms are compatible.

Because the new IBM platforms feature faster disk drive access than AT-bus systems, NetWare users benefit by faster server response. Another advantage for NetWare users is the SCSI bus master disk controller interface, which allows up to seven devices, typically additional hard disk drives or tape backups, to be accessed through a single SCSI adapter card.

#90303b0709 10/30/1990 ~Business Wire

UTICA, N.Y. (OCT. 30) BUSINESS WIRE - Laser Precision Corp. (NASDAQ:LASR) announced Tuesday that income from continuing operations for the third quarter ended Sept. 30 was $222,000, or 6 cents per share, compared to $566,000, or 14 cents per share, for last year's third quarter.

Revenue from continuing operations amounted to $5,063,000 vs. $5,029,000 for the prior year.

For the nine months ended Sept. 30 net income from continuing operations was $843,000, or 21 cents per share, compared to $1,764,000, or 46 cents per share for the first nine months of 1989, as revenue rose to $15,321,000 from $14,798,000.

Chairman and chief executive officer David M. Goodman said that the decline in pre-tax margin from continuing operations for the third quarter and first nine months of 1990 was anticipated in Laser Precision's business plan and reflects an increase in product development, sales and marketing, and other infrastructure costs to support the company's expected growth in the market for fiber optic test equipment.

He added that new bookings for fiber optic test equipment are 31 percent ahead

of bookings in the same quarter last year.

Goodman said that based on the exceptionally positive response to the company's recently-introduced Feature Finder family of fiber optic test equipment for field maintenance and diagnostics and continued strong orders for full-featured optical time domain reflectometers (OTDRs), ''We expect to report improved operating results in the fourth quarter.''

Laser Precision Corp. is a manufacturer of test and measurement instruments combining advanced optical designs with microprocessor technology. The company's products are used in fiber optic telecommunications, data communications and laser research.

#90303b0710 10/30/1990 ~Business Wire

PROVO, UT (OCT. 30) BUSINESS WIRE - Novell Inc. (NASDAQ: NOVL), developer of NetWare systems software products, Tuesday announced a new version of the NetWare Requester for OS/2, which allows workstations running IBM's new OS/2

Version 1.3 to access NetWare services.

This announcement is a result of Novell's long-standing commitment to ensure compatibility with IBM technology. "Novell and IBM have worked together over the years to bring our mutual customers reliable networking solutions," said Darrell Miller, Novell executive vice president for marketing and services.

"The NetWare Requester for OS/2 v1.3 is a result of that mutual commitment to our customers and continues our support of OS/2 workstations as one of the strategically important desktop environments."

NetWare Requester software gives OS/2 users transparent access to all NetWare features, including high-performance file, print, database and communication services, as well as comprehensive fault tolerance, security and resource accounting. OS/2 applications are fully supported without modification.

The NetWare Requester for OS/2 v1.3 includes full support for all OS/2 Application Programming Interfaces (APIs), including Named Pipes. The product allows OS/2-based workstations to act as clients on NetWare networks. It also gives OS/2-based workstations access to OS/2 distributed applications, such as Sybase's SQL Server and Lotus Notes, on OS/2 application servers.

Using the NetWare Requester for OS/2, Novell users can integrate NetWare servers and OS/2 application servers on the same network.

The NetWare Requester for OS/2 v1.3 will be available on NetWire, Novell's on-line electronic information service, two to four weeks after IBM ships OS/2 Version 1.3. It will also be provided to subscribers of Novell's NetWare UpGrade and NetWare UpDate programs.

Novell Inc. develops NetWare systems software products that manage and control the sharing of data across a variety of network computing environments, including computer workgroups, departmental networks and business-wide information systems.

#90303b0713 10/30/1990 ~Business Wire

HOUSTON (OCT. 30) BUSINESS WIRE - Battle Mountain Gold Co. (NYSE:BMG) Monday reported third quarter 1990 net income of $4.3 million, or 5 cents per share, up 89 percent from last year's $2.3 million, or 3 cents per share.

For the first nine months of 1990, net income was $18.1 million, or 24 cents per share, compared with $21.3 million, or 32 cents per share, earned during the same period a year earlier, a decline of 15 percent.

Net sales for the 1990 third quarter were $37 million, up 18 percent from $31.2 million in 1989. Revenues for the first nine months of 1990 were $103.7 million, compared with $101 million in the first nine months of 1989.

The company's net profit margin for the first nine months of 1990 was 17 percent.

BMG Chairman Karl E. Elers said that although revenues and expenses on a line item basis showed marked increases from prior periods, resulting from the consolidation of majority owned subsidiaries, the company's earnings decrease for the nine month period primarily reflects increased provisions for unproven lease abandonments and higher cash operating costs associated with increased stripping ratios at the company's Pajingo mine in Australia.

These factors were partially offset by increased interest income from investment of proceeds from the company's earlier stock and debenture offerings and by lower income tax expense resulting from lower pretax income during the 1990 period and an unfavorable income tax adjustment taken during the 1989 period.

Battle Mountain Gold common stock trades under the symbol BMG on the New York Stock Exchange, the Australian Stock Exchange Ltd., the Frankfurt Stock Exchange, the Swiss Stock Exchanges and the Toronto Stock Exchange.

FORT WORTH, TX (OCT. 30) BUSINESS WIRE - Pier 1 Imports Inc. (NYSE:PIR) announced Tuesday that it has obtained waivers from its lenders of certain loan covenants applicable to the $12 a share cash tender offer it is making through its wholly owned subsidiary, Sun Acquisition Inc. for any and all outstanding shares of common stock of Sunbelt Nursery Group Inc. (ASE:SBN).

In addition to the satisfaction of the financing condition, Sun Acquisition Inc. announced the waiver, with respect to any occurrence known to Sun Acquisition Inc. to be existing as of Oct. 29, 1990, of all other conditions to the consummation of the tender offer.

Sun Acquisition Inc. also announced today that it has extended the expiration date of the tender offer to 12:00 midnight, New York City time, on Tuesday, Nov. 6, 1990. The previously scheduled expiration date of the tender offer had been Oct. 30, 1990.

Through the close of business on Oct. 29, 1990, approximately 578,024 shares of Sunbelt common stock had been tendered into the tender offer.

Sunbelt Nursery Group Inc. is a chain of 96 lawn and garden centers with major market positions in the southwest United States. For the three months ended July 31, 1990, Sunbelt reported sales of $39,438,000 and net income of $4,891,000 or $1.24 per share.

Pier 1 Imports is North America's largest and fastest growing specialty retailer of decorative home furnishings and related items with 541 stores in 44 states and Canada. For the fiscal year ended March 3, 1990, Pier 1 Imports had sales of $517 million and income of $25.5 million.

#90303b0718 10/30/1990 ~Business Wire

MIAMI (OCT. 30) BUSINESS WIRE - Atlantis Group Inc. (AMEX: AGH) announced Tuesday that it has amended its complaint in its pending federal court lawsuit against Rospatch Corp., its outside general counsel and certain of its present and former officers and directors.

Tuesday's amendment to the complaint joins as a defendent Arthur Andersen & Co., the independent public accountants and auditors fomerly retained by Rospatch in connection with the preparation of financial information as presented in filings made by Rospatch with the Securities and Exchange Commission.

The amended complaint alleges that the defendents violated federal securities law, including Securities and Exchange Commission Rule 10b-5, by making material misrepresentations and failing to disclose material information in the operating and financial information filed with the SEC during the period beginning March 30, 1987 and continuing through Aug. 24, 1989.

The complaint alleges that the misrepresentations and omissions had the effect of artificially increasing the price of Rospatch common stock during periods when Atlantis was purchasing Rospatch common stock in the market, resulting in damage to Atlantis.

In addition to these violations of federal securities laws, the amended complaint alleges that the misrepresentations of the defendants resulted in the breach of fiduciary duties owed by the defendents to Atlantis by virtue of Atlantis's status as a Rospatch shareholder and that the misrepresentations of the defendents perpetrated a fraud upon Atlantis.

The amended complaint alleges that independent public accountant and auditor

Arthur Andersen & Co. failed to comply with generally accepted accounting principles when acting as Rospatch's independent auditor with respect to its audited financial statments and, in its opinion as to Rospatch's financial condition, misrepresented the true financial condition of Rospatch.

On Oct. 3, Arthur Andersen & Co. was terminated as the independent public accountant and auditor for Rospatch. As of Tuesday, Arthur Andersen & Co. was terminated as the independent public accountant and auditor for Atlantis.

Atlantis Group Inc. beneficially owns 19.71 percent of the outstanding common stock of Rospatch. There are currently several other litigations pending between Atlantis and Rospatch. Atlantis, headquartered in Miami, is a diversified plastics and furniture company.

IRVING, TX (OCT. 30) BUSINESS WIRE - IMCO Recycling Inc. (NASDAQ:IMRI) Tuesday reported third quarter 1990 net income of $1,675,300, 12 percent above earnings of $1,494,300 in the same quarter a year ago.

Earnings per common share in 1990's third quarter were 15 cents compared with 14 cents in the 1989 quarter.

Revenues in the third quarter this year increased to $14,529,500 from revenues of $8,286,600 in the same period of 1989.

The company's net income in the first nine months of 1990 totaled $4,268,600 or 39 cents per share compared with earnings of $4,064,900 or 42 cents per share in the 1989 period. Net income in the first three quarters of 1989 includes a non-cash charge of $299,900 or 3 cents per share.

IMCO Recycling had a weighted average of 10.9 million common shares outstanding in the first nine months this year, 12 percent above the 9.8 million shares outstanding in the 1989 period.

Revenues in the first three quarters of 1990 were $39,971,300 compared with $27,694,900 in the first nine months last year.

The amount of material processed by IMCO Recycling in 1990's third quarter totaled 107.9 million pounds, 53 percent above the third quarter 1989 level of 70.4 million pounds.

Processing volume in the first nine months this year reached 293.1 million pounds, 31 percent higher than the 223.3 million pounds processed in the same period of 1989. Tolling activity has accounted for 86 percent of volume in

1990 compared with 93 percent in the first three quarters of 1989.

IMCO Recycling is the largest independent recycler of aluminum beverage cans and their by-products in the United States and is the nation's only publicly owned firm whose activities are concentrated in the aluminum can recycling market.

#90303b0727 10/30/1990 ~Business Wire

ACTON, MA (OCT. 30) BUSINESS WIRE - Bechtel Software announces the port of its WalkThru design animation software to Silicon Graphics' new IrisVision graphics board.

For the first time in history, personal computer users have access to the advanced, real-time, animation technology that was once available only on high-end graphics workstations.

According to Bechtel Software President John Lucas, "The IrisVision announcement represents a milestone in the evolution of engineering tools because it allows us to bring a powerful animation and visualization product like WalkThru to the personal computer environment."

WalkThru's complete functionality has been maintained in the new PC version. The software allows users to view 3-D computer models as though they already exist in the real world. By simply loading model files onto WalkThru, users can see the designs in fully shaded images and move around the model in real-time.

WalkThru is used for reviewing designs for correctness before construction to minimize change orders and reduce life cycle costs. It is also a valuable tool for business development, training and maintenance planning applications.

WalkThru's functionality includes the ability to control head and body movement, simulate the operation of objects in the model, and perform static and dynamic design interference checks automatically. When coupled with equipment from StereoGraphics Corp., the software also produces images with full depth perception.

Lucas adds, "Because of WalkThru's unique capability to interface with CAD systems such as AUTOCAD, real-time engineering animation is now available to mass markets. Just a few short years ago, this type of solution would cost more than $100,000. Today, it can be installed on an existing PC with a very small incremental investment."

WalkThru works with the following CAD systems: Bechtel Software's own 3DM, GDS from McDonnell Douglas, CALMA from Prime, IGDS from Intergraph, MicroStation from Bentley Systems, AES from IBM, CADAM from CADAM Inc., CATIA from Dassault Systems, AISYS from IASA, AutoCad from Autodesk, Dimension III from Prime Computervision, Ideas from SDRC, and IGES.

WalkThru runs on Intel-based personal computers with the IrisVision 24 bit graphics board. In addition to the PC, WalkThru runs on Silicon Graphics' Iris 4D series and IBM Risc System/6000 workstations. The PC version of WalkThru will be sold through distributors of CAD software. The software is priced at $3,995.

Headquartered in Massachusetts, Bechtel Software is a wholly-owned subsidiary of engineering/construction giant Bechtel Corp. Bechtel Software markets, sells, and supports integrated, engineering software solutions for plant design and animation, project management and control, electrical component tracking, and expert systems intelligence.

WILMINGTON, MA (OCT. 30) BUSINESS WIRE - UniFirst Corp. (NYSE:UNF), a leader in the garment service business, Tuesday announced record revenues and net income for the fiscal year ending Aug. 25, 1990.

Company revenues for the year ending Aug. 25, 1990 were $226.7 million, an increase of 6.6 percent over revenues of $212.7 million in 1989. Net income increased 23.1 percent to $14.3 million, or $1.40 per primary share and $1.34 per fully diluted share.

For the fourth quarter of fiscal 1990, revenues were $57.5 million compared with $52.4 million the year earlier. Net income was $3.5 million, or 35 cents per primary share, an increase of 17.5 percent over the $3.0 million, or 29 cents per primary share recorded in the same period in 1989. Fully diluted net income was 34 cents per share for the fourth quarter of fiscal 1990 and 29 cents per share for the same period in 1989.

Chairman Aldo Croatti said, ''All segments of UniFirst are performing well and the basic garment service industry continues to grow at a pace exceeding G.N.P.. We expect to maintain our position among the industry leaders.''

UniFirst, a pioneer in the garment service industry, serves more than 100,000 customer locations in 43 states and Canada from 100 facilities. It also operates three garment manufacturing facilities and employs more than 4,000 people.

HOPKINTON, MASS. (OCT. 30) BUSINESS WIRE - EMC Corp. announced the appointment of Daniel Butler to the position of vice president of Customer Service.

Butler assumed the duties of Paul Noble who has been made vice president of OEM Program Management.

Butler is responsible for all aspects of EMC's direct customer service network worldwide. ''We are counting on Dan's expertise to aide in the continued growth of our high-end subsystem business, as well as to support our recent introduction of Symmetrix, a new data storage system manufactured for IBM and

IBM compatible mainframe computers.

''We are confident that he will help provide the level of service our demanding customers require,'' said Jack Egan, executive vice president of EMC.''

Butler came to EMC after serving 10 years with Data General Corp. His most recent position there was that of director of Logistics Plans and Controls. Previous to that he worked for the company as area director, area manager, information systems manager, and regional manager. Butler had worked for IBM for 18 years prior to joining Data General in 1979.

Butler received his Bachelor of Science Degree in Management from Weber State College. He is also a member of the National Honor Society.

EMC Corp. supplies innovative, high performance storage products and related services for midrange and mainframe computers worldwide.

CHARLESTON, SC (OCT. 26) BUSINESS WIRE - First Financial Holdings Holdings Inc. (NASDAQ:FFCH) Tuesday announced improved operating results for its year ended Sept. 30, 1990.

Net income for the year increased to $6,278,432, or $1.89 per share, from $5,835,824, or $1.76 per share a year ago. For the fourth quarter ended Sept. 30, 1990, net income was $1,429,784, or 43 cents per share, compared with $1,410,917, or 43 cents per share in the year earlier period.

It was also announced that at its meeting on Oct. 25, 1990, the board of directors increased its quarterly cash dividend to 14 cents per share payable Nov. 26, 1990 to stockholders of record on Nov. 9, 1990. The previous quarterly cash dividend was 12 cents per share.

Commenting on these announcements, A.L. Hutchinson Jr., president and chief executive officer said: ''Net income for Fiscal 1990 was approximately 26 percent higher than Fiscal 1989 after excluding the approximately $845,000 after tax gain on the sale of Federal Home Loan Mortgage Corp. (FHLMC) preferred stock in March 1989.

Net interest income for the year rose 15.96 percent to $27,811,268 compared with $23,983,695 a year ago. Gross interest margin for the year increased to 2.71 percent from 2.37 percent last year.

The common stock of First Financial Holdings Inc. is traded in the Over-The-Counter National Market System under the NASDAQ Symbol FFCH.

WAYLAND MASS (OCT. 30) BUSINESS WIRE - Candela Laser Corp. (CLZR) announced Tuesday financial results for the first quarter ended Sept. 29, 1990.

The company reported revenue of $8,349,000 for the quarter, an increase of 32 percent over revenue of $6,309,000 for the same quarter one year ago.

Net income for the quarter was $1,459,000, vs. $885,000 last year; an increase of 65 percent. Earnings per share for the first quarter were 27 cents, vs. 19 cents for the same quarter last year; an increase of 42 percent. Earnings for the quarter before the extraordinary item were $950,000, vs. $586,000; an increase of 62 percent.

The extraordinary item results from the tax benefit of a net operating loss carryforward. Earnings per share before extraordinary item were 18 cents, vs. 13 cents; an increase of 38.5 percent.

Dr. Horace W. Furumoto, chairman and CEO, stated, ''The first quarter results were right on target and represent our sixth consecutive profitable quarter. Acceptance of our products continues to be strong and we remain optimistic about the future.''

FORT LAUDERDALE, FL (OCT. 26) BUSINESS WIRE - American Franchise Group Inc.

(NASDAQ:BUCS) announces the appointment of Stephen B. Grubb as president and chief executive officer of American Franchise Group Inc. and Peter T. Gaughn as president of Business Cards Tomorrow Inc.

American Franchise Group Inc. is a holding company which operates franchises throughout the United States and Canada in printing-related businesses.

Its subsidiaries include Business Cards Tomorrow, a franchise network of 93 thermography printing plants, and PrintShack International Inc., a franchise network of 87 quick-print retail stores offering offset printing and selling advertising specialty products.

Steve Grubb has been a director of the corporation since August, 1989. Grubb serves as managing director of Grubb & Williams Ltd., a merchant banking firm located in Atlanta which he co-founded in 1987. Prior to co-founding Grubb & Williams, he had founded and managed since 1982, Grubb & Co., an investment banking firm.

Peter Gaughn joined BCT as vice president of operations in August 1989 and was promoted to senior vice president in April 1990. Prior to that he was with Postal Instant Press for more than eight years as director of operations.

Wilkerson will continue to serve as chairman of the board of the American Franchise Group and will be an active director. He stated: ''I am confident that we have an outstanding management team in place and that the future is bright for our family of companies.

BURLINGTON, MA (OCT. 30) BUSINESS WIRE - Cognos Inc., (TSE:CSN; NASDAQ:COGNF) Tuesday announced its intent to support Digital Equipment Corp.'s RISC-based ULTRIX systems with its PowerHouse application development software.

According to Computer Intelligence, PowerHouse is the leading application development environment in the VAX/VMS marketplace with a 28 percent marketshare. PowerHouse fully supports Digital's Network Application Support (NAS) services and COHESION environment.

''Cognos is pleased to support ULTRIX because it is a strategic component of Digital's NAS program. This will enable our customers to develop applications using the Digital hardware platform of their choice,'' said Steven R. Sommer, Cognos vice president, marketing operations.

Marion Dancy, group manager for Digital's Application Development Systems

Group said, ''Cognos has been a valued Cooperative Marketing Program (CMP) participant for several years. It is important to Digital that Cognos will provide support for PowerHouse on Digital's new RISC-based ULTRIX systems within the COHESION environment,'' Dancy said.

Cognos markets application development software used on mid-range computers. The publicly-held company is headquartered in Ottawa, Canada, with worldwide sales, service and marketing operations in Burlington, Mass. Its PowerHouse product is used at over 16,000 installations in 68 countries.

BOSTON (OCT. 30) BUSINESS WIRE - Citizens Gas Supply Corp. (CGSC) and Seneca Resources, a subsidiary of National Fuel Gas Co. (NYSE:NFG), Tuesday formally disclosed plans for the formation of a joint venture involving long-term purchasing and sales of natural gas and asset acquisitions.

The companies intend to target natural gas gathering systems and underground storage as areas of potential investment, and to pursue long-term transportation opportunities.

The announcement followed an informal one made last night to members of the American Gas Association at a reception held at Boston's John F. Kennedy Library.

Citizens Gas Supply is an independent, Boston-based gas marketer with gas supply operations in Houston, and is a subsidiary of Citizens Energy Corp. Since it began natural gas operations in 1983, Citizens has grown to become one of the top five independent natural gas marketers in the United States.

National Fuel Gas Co., based in Buffalo, N.Y., is a public utility holding company with subsidiaries involved in natural gas pipeline and storage operations, utility distribution and exploration and production. Seneca Resources is engaged in the exploration for, and development of oil and natural gas reserves in California, the Gulf Coast and southwest areas of the United States.

TOKYO (OCT. 30) BUSINESS WIRE - Texas Instruments Japan Ltd. announced Tuesday the establishment of a new Advanced Information Management business unit which will begin the marketing in Japan of TI's Computer Aided Software Engineering (CASE) product.

This advanced software development system is known as the Information Engineering Facility (IEF) TM. The new business unit complements TIJ's current businesses in seminconductors, metallurgical materials and electrical controls.

TI's IEF product is designed primarily for large computing environments which have substantial, continuing requirements for system development and maintenance. The IEF uniquely automates and integrates all stages in the development and use of information systems -- from initial planning through code generation, data base generation and maintenance.

The product's goals are to reduce the cycle time for developing complex software systems by a factor of five, to effect a fivefold increase in the productivity of systems developers, and to significantly enhance overall system quality.

The history of IEF at TI goes back some seven years. At that time, rapidly growing information systems development requirements across the MIS industry and the lack of an integrated set of tools to improve quality and productivity spurred the decision to form a dedicted organization to develop a CASE product.

Applying TI's experience in artifical intelligence and information technology, prototype systems were completed in 1983, and IEF diagramming techniques were demonstrated in 1984, and marketing was begun in 1987.

Currently, IEF has gained broad customer acceptance with more than 200 customer accounts in place worldwide. Commenting on the introduction of IEF in Japan, John Fleming, director of the Asia/Pacific region for TI's Advanced Information Management business unit, said, ''I am very excited to be able to bring TI's CASE product to the Japanese market.

Texas Instruments Inc. (NYSE:TXN), headquartered in Dallas, is a high-technology company with sales and manufacturing operations in more than 30 countries. TI develops, manufactures and markets semiconductors, defense electronics systems, software productivity tools, computer systems, industrial automation and control systems, electrical controls, metallurgical materials and consumer electronics products.

SIERRA VISTA, AZ (OCT. 30) BUSINESS WIRE - Mary Kay Ash, founder of Mary Kay Cosmetics Inc., will personally escort one of her famous pink 18-wheeler trucks on a delivery of 5,000 tubes of sunscreen and other products to the U.S. Army's Fort Huachuca in southern Arizona on Wednesday, Oct. 31.

The sunscreen, Sensitive Skin Waterproof Sunblock (SPF15), along with 1,800 men's travel-size shave creams and 3,000 ''Beauty Shape Up'' product sampler giftpacks have a retail value of more than $50,000.

They will be donated to ''Operation Stocking Stuffer,'' a Christmas project organized by spouses of soldiers already deployed in Operation Desert Shield and by the Sierra Vista Chamber of Commerce.

''We want all of our servicemen and women, especially those overseas at this time, to have as safe and happy a holiday as possible,'' Mary Kay told Fort Huachuca officers and servicemen. ''Our hearts and prayers go out to them for all they're doing for America.''

Mary Kay will be accompanied by company officials including President Richard C. Bartlett and Larry Harley, executive vice-president of Distribution.

The use, distribution and/or mention of the commercial sponsor's name, logo or trademark and the sponsor's services and/or funds by the U.S. Army does not express or imply an endorsement of the sponsor or its products and services by the U.S. Army.

Mary Kay Cosmetics Inc. is an international manufacturer of premium personal care products, which are distributed through a world-wide network of more than 200,000 independent Mary Kay beauty consultants. The privately held Dallas-based company was founded in 1963 by Mary Kay Ash and her son, Richard R. Rogers.

SHREVEPORT, LA (OCT. 30) BUSINESS WIRE - Arkla Inc. (NYSE:ALG) Tuesday reported financial results for its 1990 third quarter and year-to-date.

Net income for the third quarter was $2.3 million compared to a loss of $189.0 million in 1989. After payment of preferred dividends, the third quarter net income available to common stock was $0.3 million compared to a loss of $190.9 million in 1989.

For the nine months ended Sept. 30, net income available to common stock was $60.2 million, or 69 cents per share, compared to a loss of $136.9 million, or ($1.61) per share, in 1989. The 1989 third quarter results included a one-time $179 million after-tax charge to earnings as a result of restructuring moves related primarily to reforming gas purchase contracts and settling take-or-pay claims.

These markedly improved results for the quarter reflect increased operating income from pipeline and distribution activities that more than offset a decrease in operating income from exploration and production that resulted from higher depletion expense and continued low wellhead gas prices.

Pipeline operating income more than tripled from last year to $24.8 million, reflecting increased throughput and margins from transportation and higher natural gas liquid prices related to higher oil prices.

Distribution operating income totaled $8.6 million, up 26 percent from 1989 primarily as a result of lower operating expenses and the continued rebound of the Houston area economy. Although exploration and production experienced a decrease in operating income, net cash flow from E&P operations increased 13 percent for the quarter, reflecting an improvement in total sales volumes.

All three of Arkla's business units experienced increased activity over last year. Pipeline throughput increased 44.4 Bcf or 28 percent, reflecting the growing role of Arkla as a transporter of gas from the midcontinent supply region to the major pipelines serving the East Coast and Midwest.

Although total distribution throughput remained unchanged, higher margin sales were up 1.3 Bcf or 3 percent primarily as a result of the improving economy in the Gulf Coast markets of Entex. Exploration and production also improved with total sales volume up 1.5 Bcfe or 8 percent and production up 0.8 Bcfe or 5 percent.

''Our business is very seasonal, and historically the second and third quarters account for only a very small part of Arkla's annual earnings; therefore our third quarter results were in line with expectations,'' said Mack McLarty, Arkla's chairman, president and chief executive officer. ''We are pleased that our performance for the quarter was significantly above last year, even after adjusting last year's results for the effect of the one-time

charges.

''If the weather stays close to normal through the winter,'' McLarty said, ''we should continue to see improvement in Arkla's earnings, especially with completion of the DEI merger which should occur shortly after the Nov. 28th shareholder vote.

''The recent upswing in gas prices, while more a seasonal effect than a response to higher oil prices, is still encouraging. We believe that with our strong reserve base, our new midcontinent pipeline expansion and our strong base of stable earnings and cash flow from distribution, Arkla is particularly well positioned to continue to take advantage of an improving market.''

Arkla Inc. is a balanced gas company engaged in the transmission, distribution exploration and production of natural gas. Its stock is traded on the New York Stock Exchange under the symbol ALG.

DARIEN, CONN. (OCT. 30) BUSINESS WIRE - Hometown Bancorporation Inc. (HTWN) the parent company of the Bank of Darien, Tuesday announced third quarter net income after extraordinary credits of $33,000 or 2 cents per share as compared to a loss of $127,000 or 7 cents per share for the third quarter ended Sept. 30, 1989.

Extraordinary credits represent tax benefits resulting from the utilization of operating loss carryforwards. For the nine months ended Sept. 30, 1990,

Hometown incurred a net loss of $1,914,000 or $1.08 per share. This compares to net income of $189,000 or 10 cents per share for the comparable period in 1989.

The company provided $130,000 to the allowance for possible loan losses during the third quarter bringing the total reserve to $2,570,000. Kevin E. Gage, president of Hometown stated, ''Because we are not optimistic about the near term economic outlook, we continue to closely monitor our loan porfolio. The current provision to reserve brings the ratio of loan loss reserves to total nonperforming loans up to 108 percent which is well above the industry norm.''

The company's core deposits (total deposits less certificate of deposit over $100,000) increased $9.9 million at Dec. 31, 1989 to $69.2 million at Sept. 30 1990. ''I am very pleased with the company's growth in core deposits during the first nine months of 1990. Such accounts are less rate sensitive and reflect what I believe is confidence in the financial institution and its strong capital base,'' Gage said.

Hometown Bancorporation Inc. had a primary capital to assets ratio (one measure of a bank's financial strength) at Sept. 30, 1990 of 15.91 percent. This compares to the minimum regulatory requirement of six percent.

''We continue to work towards increasing market share in core deposits. This strategy will place the company in a strong position for when general economic conditions in Connecticut improve,'' Gage said.

Hometown Bancorporation's commercial banking subsidiary, The Bank of Darien, has offices in Darien and Westport, Connecticut.

IRVINE, CA (OCT. 30) BUSINESS WIRE - The federal Food and Drug Administration's circulatory system devices panel Monday recommended for approval Advanced Interventional Systems' (AIS) DYMER 200+ Excimer Laser Angioplasty System, the company Tuesday announced. Irvine-based AIS is the first company to receive panel approval for a laser coronary angioplasty system. The panel recommendation is for the system's use in treating lesions 20mm and longer and for ostial lesions. The panel's recommendations will be forwarded to the FDA, which will then decide whether to grant pre-market approval (PMA), which would qualify the DYMER 200+ for commercial sale.

The company will be submitting additional data on the ostial indication and will continue to cooperate fully with the FDA to secure formal PMA approval.

''The success we have experienced with the excimer laser has been gratifying '' said Robert Wall, AIS president and chief executive officer. ''Our laser system can expand the treatment horizons of interventional cardiology. This action by the panel is significant for AIS.

''We have worked hard for this and we are proud to be the first company to receive the panel's approval for a laser coronary angioplasty system.''

AIS' DYMER 200+ is used to perform percutaneous Excimer Laser Coronary Angioplasty (ELCA). During this procedure, excimer laser energy is channeled through a flexible, fiber-optic catheter to remove atherosclerotic plaque in the diseased artery. The AIS system has been shown to be particularly advantageous for coronary artery disease not well-suited to balloon angioplasty.

More than 1,000 ELCA cases have been performed with the AIS system at leading cardiovascular centers nationwide, with a reported success rate of over 90 percent.

AIS, founded in 1986, is a technological leader in the development of laser/catheter systems for cardiovascular applications.

#90303b0824 10/30/1990 ~Business Wire

BOSTON (OCT. 30) BUSINESS WIRE - Most defense contractors in New England appear to be moving aggressively to enter new markets and to reduce their dependence on defense spending, according to a recent survey conducted by Bank of Boston.

More than three-fourths of the 355 defense contracting firms surveyed said they have tried at least one new strategy -- most often new products and more aggressive marketing -- over the past three years to tap into non-Department of Defense markets. Bank of Boston mailed the survey to 2,000 defense contracting firms in New England.

In New England, defense accounts for 8 percent of the total goods and services produced. In Massachusetts, 8 percent of the output goes to defense while in Connecticut, the figure is 9.5 percent. More than 91 percent of the region's Department of Defense direct prime contract awards went to Connecticut and Massachusetts in 1989.

The survey disclosed that three fourths of the defense contracting companies said it wouldn't be difficult to adapt their products or services to reach new U.S. or international markets.

In fact, the survey found that the rate of exporting goods was extremely high. In the manufacturing sector of the defense economy, 21 percent of goods are being exported compared to 12 percent for U.S. manufactured goods in general. In the services industry, 25 percent is destined for foreign markets compared to only 3 percent in that sector generally.

The companies, primarily small- to mid-sized defense contractors that average 40 percent of sales to the military, are confident about their prospects in non-defense markets due to the uniqueness of their products and believe they can weather defense cutbacks, the survey found.

''This is encouraging news for the New England economy,'' said Ira Stepanian, chairman and chief executive officer of Bank of Boston. ''It illustrates the underlying strength of our economy and it shows that New England firms will find a way to prosper.''

''This resiliency among defense firms in the region is especially important since defense spending peaked about three years ago. We anticipate that defense dollars coming to New England, when adjusted for inflation, will drop by two to five percent a year over the next few years,'' said Wayne Ayers, Bank of Boston's chief economist.

''However, our survey results suggest that the move to diversify and to increase exports for this export-oriented region could assist New England in getting back on a more solid footing,'' Ayers said.

When asked if the government should provide assistance to help companies move into non-Department of Defense markets, less than half agreed. And of those favoring assistance, the preferred form of government assistance was in the area of exports, such as eliminating barriers to selling overseas.

''I was surprised and encouraged,'' said defense industry expert Herbert Roth Jr., former chairman of LFE Corp. ''While I hope my colleagues are being realistic about their non-military prospects, I am happy to point out that this optimism is in marked contrast to the attitude in New England during the 1970s.''

Bank of Boston Corp. is a New England-based superregional bank holding company with assets of $37 billion. Its major subsidiaries are The First National Bank of Boston, headquartered in Massachusetts; Casco Northern Bank, N.A. in Maine; Bank of Boston Connecticut; Rhode Island Hospital Trust National Bank and Bank of Vermont. The corporation and its subsidiaries provide a broad range of financial services to individual, corporate, institutional and government customers as well as to other banks. Its common and preferred

stocks are listed on the New York and Boston exchanges.

WARREN, OHIO (OCT. 30) BUSINESS WIRE - Second Bancorp Inc. rebounded sharply in the third quarter of 1990 to post the highest quarterly earnings in the company's history.

Eight hundred eighty-one thousand dollars in earnings for the quarter bettered the previous record quarterly earnings of $876,000 posted in the fourth quarter of 1989 and is also a substantial 19.4 percent increase over the third quarter earnings for 1989.

The improvement is a result of improved earnings from net interest income and non-interest income. Average asset size increased 6.6 percent from $418,329,000 in the third qurater of 1989 to $445,971,000 for the third quarter of 1990.

After the additional provision for loan losses in the second quarter, the reserve for loan losses stands at $3,570,000 as of Sept. 30, 1990. This amount is 91.3 percent higher than the balance of the account as of Sept. 30, 1989. The balance represents 1.12 percent of gross loans at period end.

The board of directors of Second Bancorp Inc. has declared a dividend of 23 cents per share payable Oct. 31, to shareholders of record Oct. 15. This represents a 15 percent increase in the dividends declared for the third quarter of 1989.

#90303b0849 10/30/1990 ~Business Wire
DALLAS (OCT. 30) BUSINESS WIRE - Diamond Shamrock Offshore Partners (NYSE: DSP), the master limited partnership of Maxus Energy Corp., reported net income of $8.4 million, or 12 cents per unit, for third quarter 1990, compared to net income of $9.4 million, or 16 cents per unit, for third quarter 1989.

For the first nine months of 1990, DSP had net income of $16.7 million, or 24 cents per unit, compared to net income of $12.4 million, or 21 cents per unit, in the same period of 1989. The 1989 results included a net loss of approximately $13 million on anticipated property sales.

Sales for third quarter 1990 were $25.9 million, compared to $27.5 million a year ago. The decrease was mainly attributable to lower natural gas prices and lower volumes. Net cash provided by operating activities totaled $15.2 million in third quarter 1990, compared to $22.7 million in third quarter 1989.

For the nine-month period of 1990, sales were $79.3 million, compared to $90.3 million in the first nine months of 1989. Net cash provided by operating activities was $57.4 million in the first nine months of 1990, compared to $75.4 million in the like period last year.

Maxus Energy Corp. (NYSE: MXS), the special general partner of DSP, is an independent exploration and production company based in Dallas.

#90303b0851 10/30/1990 ~Business Wire
BOSTON (OCT. 30) BUSINESS WIRE - Lifetime Corp. reported Tuesday net income of $4.7 million for the third quarter of 1990 or $.52 per share, an 85 percent increase over net income in the third quarter of 1989 of $2.5 million or $0.38 per share.

Revenues of $185.0 million for the third quarter of 1990 represent a 61 percent increase over revenues of $114.9 million for the third quarter of 1989.

Income from continuing operations and before extraordinary items for the nine month periods ending September 30 increased nearly 100 percent to $12.2 million in 1990 from $6.3 million in 1989. Per share earnings increased nearly 50 percent to $1.40 from $.94 per share for the respective nine month periods. Net income of $11.2 million for the nine months ended Sept. 30 compares to $1.6 million for the same 1989 period.

Revenues increased from $328.0 million to $512.9 million for the respective 1989 and 1990 nine month periods.

Home health care revenues, which have grown 37 percent in 1990, comprise 63 percent of total revenues compared to 72 percent a year ago; institutional staffing revenues, which have decreased 16 percent in 1990, comprise 12 percent of total revenue compared to 23 percent a year ago.

The shift in revenue mix results principally from acquisitions in different sectors in late 1989. Paramedical testing revenues of $49 million in 1990 represent 10 percent of total revenues; temporary office personnel revenues of $75 million in 1990 are 15 percent of the total.

Lifetime Corp., through its Kimberly Quality Care and National Mentor subsidiaries, is one of the nation's largest providers of home health care personnel and services, psychiatric home health care, and supplemental staffing to institutions.

Through its ASB/Meditest subsidiary, Lifetime is a leading provider of paramedical examinations, pre-employment examinations, and drug screenings to insurance companies, schools, and businesses. Through its Office Angels subsidiary, Lifetime is a fast growing provider of temporary and permanent office personnel.

CLEVELAND (OCT. 30) BUSINESS WIRE - TRW Inc. announced Tuesday it has signed an agreement with a Polish automotive company to form a joint venture to assemble seat belts in Poland.

The agreement is believed to be the first such joint venture between an American automotive supplier and an Eastern European company.

The Polish company, Fabryka Samochodow Mazolitrazowych (FSM), is headquartered in Bielsko Biala and is the second largest employer in Poland. It produces, under license from Fiat, mini compact vehicles for domestic and export markets. FSM expects to make about 230,000 cars (Micro and 126 models) in 1991 and about 350,000 cars annually by 1995.

The joint venture company, TRW Poland Ltd. (TRW Polska Sp. zo.o.), is majority-owned by TRW and is expected to begin assembling front and rear seat belts by mid-1991. It will be headquartered in Czestochowa, south of Warsaw, which has a skilled and well-educated work force. About 90 people are expected to be employed by 1992.

Under terms of the agreement, TRW will provide technology and machinery for the greenfield operation and an undisclosed amount of cash. FSM will provide the plant facility. Retractor units for the seat belt systems will be supplied to the joint venture company by TRW's Italian seat belt operation in Torino.

''We are excited about this new joint venture, which allows us to participate in the growing Polish automotive market,'' says Charles L. Miller, executive

vice president and general manager for TRW Occupant Restraint Systems, TRW's business unit responsible for worldwide sales of seat belt and air bag systems.

''It marks TRW's entry into the Eastern European market,'' he adds. ''We're also exploring other opportunities to do business with Eastern European companies, especially in the automotive sector.''

Klaus Paschko has been named the general manager of the new joint venture. Paschko is a senior executive of TRW Repa, the company's operating unit for occupant restraints in Germany.

TRW Occupant Restraint Systems, headquartered in Cleveland, is the world's largest supplier of seat belt and air bag systems to the automotive industry. It employs more than 10,000 people and operates in 11 countries.

#90303c0010 10/30/1990 ~Comtex

WASHINGTON (OCT. 30) COMTEX - The 8-K report filed at the SEC shows Electro Brain International Corp. on Oct. 10, 1990, revised its estimate of total revenues for its third quarter, ended Sept. 30, 1990, to be approximately $520,000.

The company previously had estimated total revenues for its third quarter to be in the range of $750,000 to $900,000.

Due to the delay of about 10 days in the delivery of one order of game cartridges from Nintendo, the company reports it was unable to fill certain orders until the fourth quarter of 1990, resulting in the delay of certain sales previously expected to occur in the third quarter being delayed.

The company's address is 573 East 300 South, Salt Lake City, UT 84102, and its telephone number is (801) 531-1867.

-30- 939

#90303c0011 10/30/1990 ~Comtex

WASHINGTON (OCT. 30) COMTEX - The 8-K report filed at the SEC shows Joseph R. Cusumano sold 500,000 common and 100% of the Series 2 preferred shares of Health Corp. of America (TICKER: HEAC) to Preferred Health Inc., effective Oct. 12, 1990.

Additionally, Cusumano was removed from the board of directors of Health Corp. and Larry Wyatt was named the company's new president.

Wyatt, Larry Driscoll and Paul Rohlf were named directors of the company.

Driscoll was named chairman of the board.

The company's executive offices are located at 1160 West Swedesford Road, Berwyn, PA 19312-1096, and its telephone number is (215) 640-0300.

#90303c0035 10/30/1990 ~Comtex
STAMFORD, CT (OCT. 30) COMTEX - Richard Grassgreen, who resigned earlier this month as head of The Enstar Group Inc.(TICKER: ENST) after pleading guilty to securities laws violations, will receive an automobile, secretary and full retirement benefits from the Montgomery, Ala.-based financial company.

Grassgreen, who testified for the prosecution in the sentencing hearing for junk-bond king Michael Milken, resigned from Enstar Oct. 18, according to a Securities and Exchange Commission filing.

The terms of his resignation specify that Grassgreen's vested company retirement benefits will not be affected, he and his wife will have continued use of a company car through Dec. 31, Grassgreen will have continued use of a company secretary until Dec. 31, and both he and the company will not disparage each other.

His resignation from company followed disclosure of a secret arrangement with Milken under which Grassgreen received certain securities from Drexel Burnham Lambert that had been earmarked for Enstar.

Milken, the creator of the market for high-risk ''junk bonds,'' pleaded guilty to six securities violations last year and is being sentenced for those crimes.

This 8-k Filing was submitted to the Securities and Exchange Commission on Oct. 29, 1990.

STAMFORD, CT (OCT. 30) COMTEX - ASA Inc., a wholly owned subsidiary of Westboro, Mass.-based ASA International Ltd.(TICKER: ASAA), has completed the sale of its distribution-systems unit to Distribution Management Systems Inc. of Williston, Vt., for a package of cash, notes and stock valued at $1.1 million, according to a Securities and Exchange Commission filing.

This 8-k Filing was submitted to the Securities and Exchange Commission on Oct. 29, 1990.

-30- 608
#90303c0037 10/30/1990 ~Comtex
STAMFORD, CT (OCT. 30) COMTEX - American Mobile Systems Inc.(TICKER: AMSE), a Woodland Hills, Calif., mobile-communications company, has reached a preliminary agreement to acquire certain mobile radio systems owned by Johnson Communications Corp. for $1.5 million and other considerations.

Under the proposed deal, American Mobile will form two joint ventures with Johnson Communications.

The first will combine the two companies' Specialized Mobile Radio systems in central and western Florida, while the second will combine their Atlanta systems, according to a Securities and Exchange Commission filing.

This 8-k Filing was submitted to the Securities and Exchange Commission on Oct. 29, 1990.

-30- 862

#90303c0038 10/30/1990 ~Comtex

STAMFORD, CT (OCT. 30) COMTEX - Electro Brain International Corp., a Salt Lake City-based distributor of Nintendo electronic-game cartridges, has received a capital infusion of $1.87 million through the sale of 11 million restricted common shares to private Japanese investors.

Electro Brain has raised $2.55 million in new capital during the quarter, including $680,000 earned from the previous sale of 4 million restricted shares to another Japanese investor, according to a Securities and Exchange Commission filing.

The new capital will enhance the company's ability to expand its business and participate in certain opportunities for video-game development and related entertainment fields.

This 8-k Filing was submitted to the Securities and Exchange Commission on Oct. 29, 1990.

-30- 950

#90303c0039 10/30/1990 ~Comtex

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (OCT. 30) COMTEX - The Bush administration is charging the failure of Congress to vote additional funds for the savings and loan bailout before it adjourned over the weekend will cost the taxpayers more money while the House Banking Committee chairman countered the agency has enough funds to continue normal operations into next year.

"We expect the RTC to run out of money early next year," a Treasury spokeswoman said. "Congress did not meet its responsibility. It will halt the

RTC case resolution process and ultimately cost the taxpayer additional dollars."

"While I would have preferred that the House vote additional short-term funding for the Resolution Trust Corporation, the agency has access to funds that will allow it to continue its work until next year," House Banking Chairman Henry Gonzalez (D-Texas) said in a statement.

RTC Chairman L. William Seidman told Congress last week a three month delay in receiving funding would add an extra $250 million to $300 million to the total thrift cleanup cost, estimated at $500 billion, including interest expenses.

The House was set to vote on a short-term financing package of $10 billion to keep the RTC running through Feb. 1991, early Sunday morning but a procedural maneuver by Illinois Democrat Frank Annunzio killed the measure. As a result, Congress will not take further action on the issue until it returns early next year.

"We have some 65 S&Ls we are going to be taking action on and we don't expect it (failure to vote new funds) will affect that," an RTC official said. "We have not fully gauged the impact yet. We are looking at where we're at, what we need and how we expect to raise those funds."

With the Nov. 6 elections looming and public resentment growing over the soaring costs of the S&L cleanup, neither Congress nor the administration wished to be linked to unpopular spending measures regarding the thrift mess.

Earlier this month Treasury Secretary Nicholas Brady sent a letter to the congressional banking committees requesting an additional $40 billion to cover thrift failures through Sept. 30, 1991, the end of fiscal year 1991. This would be in addition to the $50 billion Congress authorized the RTC, the agency responsible for handling the thrift crisis, in 1989.

In his letter, Brady warned the RTC would use up $49 billion of the $50 billion by year-end and "virtually cease within the next two months unless additional funds are provided."

The Senate Banking Committee immediately approved the request but Gonzalez, citing concerns about the cost and slow pace of the cleanup, refused to act unless Brady went to Capitol Hill to defend the administration's request for the money. Brady refused twice to appear before the House Banking panel but the committee subsequently voted an additional $10 billion of funding for the RTC, which the full House failed to act on.

"We all know that the bailout is not popular, but the administration must be willing to come out of its bunkers and share the burden," Gonzalez said.

Although Congress did not vote additional funding for the RTC, Gonzalez noted

the agency has additional borrowing authority of $18.8 billion which does not fall under congressional jurisdiction and will enable it to continue to operate and sell off the assets of failed thrifts.

However, the administration said even if the RTC taps into these funds, it will still be too little to late.

"Even with the $18.8 billion, the failure of Congress to provide the additional loss funds will cause the cleanup to grind to a halt soon," said a Treasury official.

MANILA (OCT. 30) - The Philippine government is planning to lower its domestic debt service burden as part of a package to shrink the ballooning budget deficit, the finance secretary said here Tuesday.

Jesus Estanislao said the government would also push through with other financial reforms to cut the deficit such as introducing an import levy, deregulation of oil prices and tariff restructuring.

He said the government's domestic debt amounted to about 300 billion pesos (11.65 billion dollars) compared to about 27 billion dollars in foreign debt.

However, since the foreign debt had been largely restructured to carry concessional rates and longer maturities its interest payments amounted to about 15 billion pesos (582 million dollars) a year compared to 55 billion pesos (2.14 billion dollars) for domestic debt.

The budget deficit is feared to hit 2.14 billion dollars this year and may grow to 3.3 billion dollars in 1991. Cutting it has become a major criteria for institutions and foreign governments considering giving aid to the Philippines.

Mr. Estanislao said that among measures to lower domestic debt servicing were a "better coordination of cash flows" within official institutions, noting that among the biggest buyers of government securities were the social security system and government corporations.

The government also planned to offer low-interest securities to investors, he added.

These moves would save the government about five billion pesos (194 million dollars) in 1991 and 18 billion pesos (700 million dollars) in 1992, and would also force down interest rates which have gone as high as 33 per cent due to the high-interest securities Manila was offering, he said.

The government is already committed to reducing the proposed 1991 budget by

14.3 million pesos (555 million dollars) but congress has opposed any new taxes and insists that the executive slash expenditure and increase tax revenue.

Mr. Estanislao said he was opposed to cutting public expenditure as this would jeopardize foreign assisted projects which rely on the release of counterpart funds.

He also reiterated that the government would deregulate oil prices next year, even as he warned that a war in the Gulf and resulting higher oil prices "would bring us to our knees economically."

Me. Estanislao denied that foreign exchange was being wasted on non-essential imports, saying that 90 per cent of the country's imports consisted of oil and capital goods.

PARIS (OCT. 30) - French consumer prices rose 0.5 percent in September, compared with 0.6 percent in August, bringing inflation to 3.1 percent since the beginning of the year, a definitive consumer price index published Tuesday by the national statistical body INSEE said.

A projection set the all-year increase in consumer prices at 3.8 percent. Food prices rose 0.2 percent in September and manufactured goods by one per cent, INSEE said. Services increased by 0.2 percent.

WASHINGTON (OCT. 30) - A Japanese consortium has pledged 1.5 million dollars toward the Freer Gallery of Art, a national museum of Asian art here.

Freer Gallery officials announced the donation Monday by the consortium, comprising the Nomura Cultural Foundation of Tokyo, the Nomura Securities Co. Ltd., and professor Ikuo Hirayama, a painter and president of the National University of Fine Art and Music.

It was the largest gift received by the gallery since it opened in 1923 as the first art museum established by the federal Smithsonian Institution. The museum was funded by a bequest from Charles Lang Freer, a Detroit, Michigan, industrialist who gave the Smithsonian his art collection, a building fund and an endowment.

The Japanese donation will finance reinstallation of the original Freer collection of 13,000 objects, most of them Asian art. The collection also includes the world's premier collection of works by U.S. painter James McNeill Whistler.

Officials said 4.5 million dollars remained to be raised for the Freer's 21-million-dollar artist renovation and expansion project which began in 1988 and is scheduled for completion in late 1992.

#90303d1960 10/30/1990 ~French/German News Agency

SYDNEY (OCT. 30) - Domestic air routes in Australia open to all comers as of midnight Tuesday (1400 GMT) as the aviation industry is deregulated after 38 years of government-imposed duopoly control.

The Australian Government has ordered an end to two-airline domination of the industry in a bid to encourage competition in the country's relatively empty skies, ending a process begun in 1987.

As of Wednesday, operators will be free to take on the two major domestic carriers -- Ansett Airlines and the state-owned Australian Airlines -- head-on,

fixing their own fares, importing aircraft and developing niche markets.

Transport Minister Kim Beazley called deregulation Tuesday a "bold experiment" which would result in better airline services, cheaper airfares and a wider selection of services for the travelling public.

But far from leading to a scramble of small airlines, the immediate result of deregulation has been a plethora of slick advertising and a barrage of special offers from the established carriers as they try to shore up key routes.

Only Compass Airlines, floated by Bryan Gray in July, has applied to the Civil Aviation Authority for an aircraft operator's certificate, and does not plan to begin services until December 1.

CAA chairman and noted aviator Dick Smith, who fought hard for deregulation,

said he was "disappointed that on day one there is not another competitor up and running with aircraft."

Four other operators have told the CAA they would like to enter the domestic market -- Southern Cross, TransContinental, Capitol and Seeboard -- but only the first two are expected to be flying by the end of next year.

Until Wednesday, passengers in Australia have had to pay whatever the two airlines decided, nothwithstanding the occasional marketing war.

Australian, Ansett and its sister airline Eastwest -- owned by transport group TNT Ltd and Rupert Murdoch's News Corp -- have major campaigns to be launched Wednesday aimed at sewing up passenger sectors before any new operators come

on the scene.

Passengers can expect over the next few months a wide range of cheap fares on the profitable capital city runs and package deals to leisure resorts.

Ansett has more than 45 aircraft and is expected to lead the price-cutting war.

Australian Airlines, current market leader with 38 aircraft and more on order, planned to celebrate deregulation with a special champagne flight over Ayers Rock, the natural monument in the centre of Australia, at midnight, but would not be making "any sudden changes" to its operations.

Eastwest is focussing on the leisure market, switching from Fokker F-28 jets to eight British Aerospace 146s.

Compass is waiting on delivery next month of two Airbus A330-600R jets leased from Britain's Monarch Airlines to cover initial operations until five aircraft arrive from Polaris Aircraft Leasing Corp.

It plans to undercut the existing carriers by 20-50 per cent.

Transcontinental has said it will have 12 Boeing 737s in the air from mid-1991 with an emphasis on the business market.

Southern Cross plans to fly McDonnell Douglas aircraft, but is unlikely to be in the air before late next year.

HONG KONG (OCT. 30) - China will inherit more than 70 billion Hong Kong dollars (about 10 billion U.S.) contained in a special fund when the British colony reverts to Chinese rule in 1997, government-run radio RTHK said Tuesday.

The statement, to be officially made by Financial Secretary Sir Piers Jacobs Wednesday, was aimed at allaying Chinese fears that London would hand over a bankrupt Hong Kong by going ahead with a mammoth 17 billion U.S. dollar airport and port complex, RTHK said.

The 10 billion U.S. dollar legacy would be accumulated in a fund which is China's half share of Hong Kong's government land sale income in the run-up to 1997, as stipulated in a 1984 Sino-British pact, the report said without identifying sources.

The legacy figure was nearly twice an earlier estimate made by official sources here.

#90303d2260 10/30/1990 ~French/German News Agency

SEOUL (OCT. 30) - The chairman of the world's largest spirit company lambasted the South Korean government here Tuesday for the high taxes it levies on Scotch whisky, threatening to take his case to the GATT.

Anthony Tennant of the British company Guinness, who is here for talks with officials, said Seoul's proposals to lower taxes on imported liquor were not satisfactory and would not stop his industry's efforts to reduce barriers.

"There are very serious obstacles to Scotch whisky in Korea for which there can be no justification, in particular I am referring to the discriminatory taxes and import duties," Mr. Tennant said at a press conference.

He had met with officials of the National Tax Administration and was meeting later Tuesday with Ministry of Trade and Industry officials.

He called for the abolition of taxes levied on imports only and said they should go by January 1, 1991.

Mr. Tennant, who said he had the support of the whole industry, the U.S. and British governments and the European Commission, said he would take his case to the General Agreement on Tariffs and Trade if Seoul refused to budge.

"We are seeking a fundamental restructuring of tax and duties applied to Scotch whiskies, consistent to Korea's obligation under the GATT," he said.

The proposals that the Seoul government has made "do not meet the obligations of GATT membership," he said. "Korea has no way out of the problem, having to obey the GATT rules if it wishes to remain in the GATT system."

A bottle of Scotch whisky, which usually costs six times its landed cost here now, would still cost more than four times its landed cost under the new proposals, he said.

Mr. Tennant and others traveling with him labeled South Korea as the most expensive market for foreign liquor in the developed world, echoing a complaint often heard here.

A 70-centiliter bottle of whisky retailed Tuesday for more than 92 dollars U.S. at a local store. The same bottle in the United States costs around 20 dollars.

Mr. Tennant said that South Koreans who buy a bottle of Scotch pay three times as much as in Japan, Britain and Hong Kong, four times as much as in France, Thailand and Germany and five times as much as Italy.

TOKYO (OCT. 30) - Japan's Hitachi Metals Ltd. said Tuesday its net profit climbed 18.3 percent from a year earlier to 6.3 billion yen (46 million dollars) in the six months to September.

The company, a major producer of high-quality steel with activities in South Korea, the United States and Europe, said sales grew 12.2 percent to 174 billion yen (1.3 billion dollars).

Sales of special steel were unchanged at 37.8 billion yen (274 million dollars). But sales of electronics-related products rose six percent to 37.9 (275 million dollars) along with increased sales of other products.

Hitachi forecast a net profit of 12 billion yen (87 million dollars) for the year to March on sales of 350 billion yen (2.5 billion dollars).

#90303d2300 10/30/1990 ~French/German News Agency
TOKYO (OCT. 30) - Japan's motor vehicle exports dropped 3.7 percent from a year earlier to 2.8 million units in the six months to September, the Japan Automobile Manufacturers Association said Wednesday.

Exports to the United States, the largest importer of Japanese cars, plunged 16.4 percent to 1.02 million vehicles, reflecting increased production by Japanese carmakers in the country and weak demand, the association said.

But exports to Europe rose 5.5 percent to 868,707 units while those to Asia advanced 9.8 percent to 281,966 units.

Of the total, passenger cars amounted to 2,133,664 units, trucks 654,720 and buses 18,973. By value, exports fell 2.5 percent to 32.14 billion dollars.

In September alone, exports surged 14.5 percent from a year earlier to 509,155 units, the association said.

Exports to the United States dropped 12.7 percent to 207,762 units. But sales to Europe inched up 2.8 percent to 134,827 units while exports to Asia climbed 10.3 percent to 52,328 units. By value, the export figure fell 0.4 per cent from September last year to 6.12 billion dollars.

-30- 1298
#90303d2310 10/30/1990 ~French/German News Agency
TOKYO (OCT. 30) - Japan said Tuesday it would slash the share of oil in its total energy supply to 45.3 percent by fiscal 2010 from 57.9 percent in fiscal 1989, by raising sharply the share of nuclear power generation.

Japan's new long-term energy-supply goal, approved at Tuesday's cabinet meeting, said nuclear power will account for 16.9 percent in 2010, up from 8.9 percent in 1989, the equivalent of 4.1 billion barrels of crude oil compared with 3.1 billion barrels last year, officials said.

Japan's dependence on non-fossil fuels, including nuclear power, will increase to 26.8 percent from 1989's 14.8 percent, it said.

The new target is aimed to reduce emissions of carbon dioxide in line with Japan's global warming prevention plan, which seeks to keep such emissions in the year 2000 at the current level, they said.

The plan, worked out by the Resources and Energy Agency, is almost identical to the long-term energy supply projection released by an advisory panel to the International Trade and Industry Ministry in June.

#90303d2340 10/30/1990 ~French/German News Agency

TAIPEI (OCT. 30) - Value of the foreign assets held by Taiwan's banking units in September grew 2.39 percent over a year earlier to 75.9 billion U.S. dollars as the island's capital outflow slowed and sagging exports regained momentum, the Central Bank of China said Tuesday.

The bank's efforts to prevent the local dollar from depreciating by stabilizing it around 27.30 to the U.S dollar had also attributed to the growth in the foreign assets, which helped push Taiwan's foreign exchange reserves up to some 71 billion dollars, one of the highest in the world, the central bank said.

The foreign assets comprise foreign currencies deposited in overseas banks, claims to foreign banks, and securities bought from foreign governments and banking institutions.

Taiwan's total foreign assets shrank to 71.6 billion dollars in June as a result of persistent capital exodus during the first half year of 1990, which had sent the island's foreign exchange reserves down to 63.6 billion dollars, the bank said.

The capital flight, mainly spurred by strong buying of the greenback for fear of a fall in the Taiwan currency and expanding overseas investment by local businessmen, started to level off in July following the bank's intervention to curb currency speculation, it added.

Capital outflow registered a record 11.66 billion dollars in the first eight months of the year, surpassing a total of 8.2 billion dollars sent abroad for the whole of last year, it said.

The island's exports staged a recovery to 5.57 billion dollars in September, up 6.5 percent over a year earlier, following six consecutive monthly declines according to government statistics.

#90303d2350 10/30/1990 ~French/German News Agency

TOKYO (OCT. 30) - Lower interest rates allowed Japanese firms involved in real estate and credit sales to flourish in recent years by borrowing cheap money, a new study here said.

The Tokyo Shoko Research Ltd. study said real estate and non-bank financial institutions such as credit sales companies and leasing companies were last year the largest borrowers of money, surpassing even electricity and steel firms.

Among the 100 biggest private Japanese borrowers last year were 10 real estate firms against only four during fiscal 1984, according to the report published by the Japan Economic Journal.

The study also noted that 45 per cent of the firms had doubled their borrowing in five years, including 33 financial and non-bank financial institutions.

The non-bank financial firms, profiting from lower interest rates, expanded greatly by relending mainly to securities houses and real estate companies.

The study was conducted on about 100,000 Japanese companies, excluding banks, securities firms and insurance companies, based on their accounts for the last fiscal year ending March 31.

The top 10 borrowers (percentage of growth over 1984 in brackets):

Mitsubishi Corp.: 4.83 trillion yen (32.2 bln dlrs) (178) Tokyo Electric Power: 4.65 trillion yen (31 bln dlrs) (1) Orient Corp.: 3.42 trillion yen (23 bln dlrs) (137) Orx: 2.90 trillion yen (19.3 bln dlrs) (155) Japan Leasing: 2.87 trillion yen (19.1 bln dlrs) (199) C. Itoh and Co.: 2.75 trillion yen (18.3 bln dlrs) (69) Marubeni Corp.: 2.68 trillion yen (17.8 bln drs) (36) Mitsui and Co.: 2.53 trillion yen (16.8 bln dlrs) (26) Nippon Housing Loan: 2.32 trillion yen (15.4 bln dlrs) (113) Kansai Electric Power: 2.09 trillion yen (13.9 bln dlrs) (2)

#90303d2360 10/30/1990 ~French/German News Agency

TOKYO (OCT. 30) - Japanese advertising giant Dentsu Inc. said Tuesday it had agreed to acquire 40 percent of the Luxembourg-based holding company of British advertising agency Collett Dickenson Pearce for an undiclosed sum.

Dentsu said the deal, estimated to be worth around 40 million dollars, would help it to establish a European network and to expand existing ties between the two companies in handling Japanese clients in Europe.

Collet Dickenson Pearce is Britain's ninth-biggest advertising agency with billings of 270 million dollars last year. Its network includes Italy, Spain,

France, Ireland, Portugal and Turkey, along with affiliated companies in Germany, the Netherlands, Denmark, Switzerland and Austria.

Dentsu, the world's biggest advertising agency, already has ties with Young and Rubicam of the United States and Eurocom, a unit of French ad agency Havas. It also has its own agencies in the United States, Australia and Thailand.

#90303d2400 10/30/1990 ~French/German News Agency

TOKYO (OCT. 30) - Japan should make efforts to build a society that places more emphasis on improving people's individual life than strengthening its national economy, the Economic Planning Agency said in a report released Tuesday.

The annual report on national life, entitled "A Society More Gentle to People '' said that technology, which has played a significant role in strengthening the economy, has at the same time worsened living conditions through waste and pollution.

In briefing Japanese reporters, agency officials said: ''Our homes have been enriched. But one step outside of the house, we are faced with narrow dangerous roads, crammed commuter trains, unorganized ugly towns, and few places in the neighborhood to relax and spend one's leisure time.''

The report stressed the need for the government to spend more on old age pensions, roads, sports and recreation centers, and public facilities for the elderly.

Regulations for city planning should be reviewed with a mind to creating harmony between areas of residence, commerce and industry, it said.

A society kind to people and to the environment can be realized, if the government takes an individual's viewpoint in adopting comprehensive policies for improving the quality of life, report said.

KATHMANDU (OCT. 30) - An 11-member delegation of Danish importers is to

arrive here Wednesday on a week long visit to Nepal under the joint auspices of the Nepal Chamber of Commerce (NCC) and the Danish Chamber of Commerce, NCC sources said here Tuesday

The delegation is visiting in connection with the promotion of economic and trade relations between Nepal and Denmark, and an NCC spokesman said the members were particularly interested in woollen carpets, readymade cotton garments, handicrafts, knitwear and ceramic materials from Nepal.

During the visit, the delegates will meet producers and exporters, see manufacturing and discuss purchasing arrangements, the spokesman said.

"The visit of the Danish delegation will contribute a lot to the export of Nepalese commodities to Denmark and other Scandinavian countries," the spokesman added.

#90303d2430 10/30/1990 ~French/German News Agency

TOKYO (OCT. 30) - Capital investment by Japanese manufacturers grew by 23.6 per cent last year, the sharpest increase in almost 20 years, the Ministry of International Trade and Industry was quoted as saying Tuesday.

Reports said the ministry's annual report on manufacturing, due for release Thursday, showed that factories with at least 30 employees invested 14.2 trillion yen (103 billion dollars) in new plant and equipment last year. The increase from the previous year was the sharpest since 1970, the reports said.

Shipments by factories with at least four employees grew 8.9 per cent to 299 trillion yen (2,336 billion dollars), the biggest increase in 10 years, the reports said.

#90303d2490 10/30/1990 ~French/German News Agency

DHAKA (OCT. 30) - The Asian Development Bank (ADB) has taken measures to help aid recipient countries overcome problems caused by the Gulf crisis, the institution's president said here Tuesday.

"We have already set up a special working body to identify the impact on the aid recipient countries and explore possible additional measures the bank may take," Kimimasa Tarumizu told a press conference at the end of his four-day visit to Bangladesh.

He said the measures included accelerating loan applications and disbursements as well as consulting with other donor agencies.

Asked on ADB's stand on President Hussain Mohammad Ershad's dream to construct

a Jamuna multi-purpose bridge, Mr. Tarumizu said he had found the concept interesting.

"I am very impressed with the project, but since it's a symbolic international collaboration project, we need to synchronize how to finance its construction with the host government and other donor agencies like the World Bank," he said.

Construction of the bridge -- spanning 4,800 meters (15,840 feet) over the Jamuna river -- would cost a half billion dollars and would carry gas and electricity lines and include a double lane road and railway tracks.

-30- 1408

#90303d2790 10/30/1990 ~French/German News Agency

Bonn (OCT. 30) - The unified Germany in 1991 will produce a real economic growth rate of 2 to 3 percent despite such unfavourable factors as the Gulf crisis, a world business slowdown and rising interest rates, a top industry group predicted here Tuesday.

The German Industry and Trade Council (Diht), the umbrella organisation of German industry, said it based its forecast on a recent survey taken of 17,000 companies.

Diht chief managing director Franz Schoser said that for the first time, companies in eastern Germany were included in the survey. Many of these expected their business fortunes to take a turn for the better starting in the second half of 1991, he said.

He said nearly one-half of West German companies planned to invest in eastern Germany next year. The Diht survey pointed to 1991 being a year of major investment in eastern Germany, Schoser said.

#90303d2800 10/30/1990 ~French/German News Agency

LIEGE, BELGIUM (OCT. 30) - The French GIAT-Industries company is to take over the arms activities of the Belgian Fabrique Nationale (FN) company, the main Belgian arms manufacturer, an FN spokesman said on Tuesday.

The French Groupement Industriel de l'Armament Terrestre (GIAT) said late on Monday that it would acquire "most of the FN activities in civil and military light weapons", the spokesman told AFP.

The French company will not acquire presses, the FNDI company and other minor holdings.

An agreement was due to be completed by the end of November with the Societe

Generale de Belgique (SGB) which holds 76 per cent of FN.

FN has been in a crisis since 1986. Unions have said that they favour the deal and on Monday they ended the occupation of FN factories at Herstal-Liege which had been launched in opposition to SGB preparations to seek a judicial solution.

#90303d2940 10/30/1990 ~French/German News Agency

PARIS (OCT. 30) - The French Thomson SA electronics group on Tuesday reported a half-time net loss after minorities of 270 million francs (about 48 million dollars) compared with a profit of 71 million francs in the same period of last year, the company announced on Tuesday.

The company said the loss was due to increased financial charges and lower earnings by contributing companies on a comparable basis.

The net consolidated profit was 137 million francs, down from 702 million francs.

The financial result was a loss of 729 million francs compared with a loss of 446 million francs.

Thomson CSF achieved a big improvement in its performance, but Thomson Consumer Electronics (TCE) saw its earnings fall.

Sales totalled 34.69 billion francs compared with 33.63 billion. The company forecast that sales for the whole year would be slightly above 75 billion francs, down from the 1989 figure of 76.66 billion francs.

Sales by Thomson-CSF would increase because of takeovers, but on a comparable basis the group would suffer from the effects of the Gulf crisis.

Thomson SA net profits were likely to fall mainly because of increased financial charges.

#90303d3020 10/30/1990 ~French/German News Agency
SYDNEY (OCT. 30) - High fuel prices due to the Gulf crisis would affect the performance of transport group TNT Ltd despite a strong first quarter profit result, its chief executive said here Tuesday.

TNT announced net first quarter earnings of 44.76 million Australian dollars (35 million U.S.), up from 12.81 million dollars (10 million U.S.) after tax and abnormal items in the previous corresponding period.

The group suffered heavily during the domestic airline pilots' dispute last year.

Sir Peter Abeles told shareholders at TNT's annual general meeting he was worried about the impact of high oil prices on customers if confrontation in the Gulf continued for another few months.

TNT chairman Fred Millar foreshadowed a flat annual profit for the global transport group despite the performance for the three months to September 30.

Mr. Millar told shareholders the board was cautious about "the next year or two", largely due to the economic downturn in Australia, though he was confident it could be offset by flow-on benefits from overseas expansion and investment.

He said the current year would be a difficult one and the group expected to achieve a consolidated profit "somewhat comparable" with the 139.88 million dollars (109 million U.S.) reported for 1989-90.

Half of TNT's earnings for the first quarter of fiscal 1990-91 came from foreign exchange gains with declining freight volumes reflected in a modest 7.4 per cent increase in revenue to 1.15 billion dollars (895 million U.S.).

Shareholders approved a proposed allotment of 200 million U.S. dollars in preference shares in the next three months to boost the corporate coffers.

The group has been undergoing an extensive expansion program in its freight operations throughout Europe.

On the eve of deregulation of Australia's domestic aviation industry, Sir Peter admitted that Ansett Airlines -- jointly owned by TNT and Rupert Murdoch's News Corp -- needed to improve yields following an industry-wide drop in the numbers of business passengers.

TNT's share price closed two cents lower at 1.66 Australian dollars.

BEIJING (OCT. 30) - China is drawing from a 450-million-dollar line of credit from Madrid to buy digital telephone switching equipment from a Spanish firm, Alcatel Sesa, Spanish diplomatic sources said Tuesday.

Some 34 million dollars from the line of government and export credits, signed late last year, is to be used for the equipment, which will be installed in Shanghai, the sources said.

A contract to supply the equipment was signed September 28.

The official New China News Agency said the 118,000-line switching equipment will be delivered over two years, with 18,000 lines to be installed in the Pudong development area, across the Huangpu River from central Shanghai.

Spain won contracts to supply other telecommunication equipment in 1988 and 1989 to the central Yangtze River city of Wuhan and the east-coast province of Zhejiang, the diplomatic sources said.

-30- 1086
#90303d3130 10/30/1990 ~French/German News Agency
BEIJING (OCT. 30) - China's fourth national census has pinned down just how many people the world's most populous nation has: 1,133,682,501, the State Statistical Bureau announced Tuesday.

The figure, based on the census which ended July 1, excludes Hong Kong, Macau and the Nationalist-held island of Taiwan.

In a summary carried by the New China News Agency, the bureau said that in the 12 months preceding the end of the census, births outpaced deaths by more than three to one.

China's population was officially estimated at 1.11 billion at the end of last year, with 28.6 per cent living in urban areas.

The fourth national census since the Communist Party took power in 1949 was billed as China's biggest "social mobilization" in peacetime, involving seven million enumerators.

Western experts believe its margin of error runs into the tens of millions.

Results of the census are expected to be used to review China's social policies, including its rigid birth control policy which limits urban families to no more than one child.

The previous national census was in 1982.

#90303d3230 10/30/1990 ~French/German News Agency
LONDON (OCT. 30) - Brierley Investments (BIL), managed by New Zealand businessman Sir Ron Brierley, has won its bid of 644 million pounds (1.1 billion dollars) for the British Mount Charlotte hotel group, BIL advisers Samuel Montagu and Co. Ltd. said on Tuesday.

Brierley launched the bid on September 24 after buying a stake of 10.1 percent from the Kuwait Investment Office, and by Tuesday mid day BIL was assured of 52.5 percent of the equity, a spokesman for the takeover panel said.

BIL has offered 73p pershare, but Mount Charlotte had rejected the offer saying that it valued the company at only 60 percent of asset value.

On Tuesday the share rose six pence to 72p.

Mount Charlotte Investments is the second-biggest British hotel chain after Trusthouse Forte. It manages more than 100 hotels with 14,000 rooms, and made a pre-tax profit of 47.6 million pounds (93 million dollars) in 1989.

MOSCOW (OCT. 30) - Soviet President Mikhail Gorbachev will not be visiting Germany in early November, the time Bonn had foreseen but never got official confirmation for, Moscow disclosed Tuesday.

Gorbachev spokesman Vitali Ignatenko, asked about the Soviet leader's travel plans with regard to Germany, said ''I can only tell you that the president will not travel to Bonn this week''.

Bonn had originally envisaged a November 4-6 visit by the Soviet leader, a

date which the Kremlin never definitely confirmed.

Ignatenko had been asked about the Kremlin leader's travel plans amid speculation in Germany that Gorbachev, faced with pressing domestic problems, might postpone the trip.

Gorbachev just returned here on Monday evening after visits to Spain and France.

A warsaw Pact summit, also originally scheduled for November 4, has been postponed before Gorbachev's trip to Spain and France.

Gorbachev's next scheduled trip abroad is for mid-November when he will attend the Helsinki Accords summit in Paris.

NAIROBI (OCT. 30) - Kenyan dissident Koigi wa Wamwere, who has been charged with treason, says that he has been tortured in prison here, his lawyer said in an affidavit sworn before the High Court Tuesday.

Mr. Wamwere, self-proclaimed leader of the clandestine Kenya Patriotic Front (KPF), was arrested on October 8. The government said security forces had impounded a substantial amount of arms he allegedly smuggled into the country.

Kenya severed diplomatic ties with Norway on October 21, accusing it of supporting Mr. Wamwere, who fled to Scandinavia in 1987 amid a crackdown on KPF members, most of whom were detained for varying periods.

Mr. Wamwere's lawyer Japheth Shamalla filed suit Tuesday asking the High Court to order prison authorities to allow his client "reasonable and adequate facilities to brief his counsel."

Mr. Wamwere has been denied proper access to his lawyer, Mr. Shamalla said.

In an affidavit sworn before the court, Mr. Shamalla, himself a well-known government critic, said Mr. Wamwere had been "subjected to severe torture and extremely inhuman degrading treatment." He did not give details.

Mr. Wamwere was arrested on the same day as anti-government lawyers Rumba Kinuthia and Mirugi Kariuki, and Geoffrey Kuga Kariuki. All four have been charged with treason, which carries the death sentence.

Mirugi Kariuki has filed a similar suit asking to be allowed access to his lawyer, and legal sources said the other two were expected to take similar action. The suit filed on behalf of Mr. Wamwere is to be heard Thursday.

PRETORIA (OCT. 30) - The South African and Polish governments are to establish diplomatic ties in the form of "permanent offices of interests" in each other's countries, the Foreign Affairs ministry said here Tuesday.

"The two governments have been guided by the desire to develop better understanding between their two countries and peoples and to promote mutually beneficial contacts," the statement added.

A Foreign Affairs spokeswoman said the agreement, between South African Foreign Minister Pik Botha and Polish Foreign Minister Kryzysztos Skubiszewski in effect meant establishment of "full consular and diplomatic activities".

Poland is the second eastern bloc country to establish diplomatic relations with South Africa. In March, Hungary and South Africa announced that they had agreed to set up permanent missions in each other's countries.

The diplomatic breakthrough with Warsaw follows the earlier establishment of trade links between the two countries, to be cemented next week when about 100 Polish exporters stage a giant trade fair here.

Last week, South Africa also signed a trade agreement with Romania.

#90303d3580 10/30/1990 ~French/German News Agency
SANUR BEACH, Indonesia (OCT. 30) - The Association of Southeast Asian Nations (ASEAN) Tuesday adopted new measures designed to boost trade and investment ties between the six member countries, officials said.

ASEAN economic ministers ended two days of talks on the holiday island of Bali by agreeing on offering greater access to investors in ASEAN Industrial Joint Venture (AJIV) projects and offering more incentives, the officials said.

The ministers also adopted a new scheme for common effective preferential tariffs on selected industrial products "to facilitate the free flow of goods within ASEAN," they said in a statement.

"We are moving in the right step towards liberalising trade as well as probably even investment in the region," Philippine Secretary for Trade and Industry Jose Conception told a joint press conference.

ASEAN, formed in 1967 to promote economic cooperation in non-communist Southeast Asia, groups Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand.

Market integration in Western Europe, major changes in Eastern Europe and superpower rapprochements have prompted ASEAN to review its cooperation programs and to plan for a new summit in Singapore towards the end of next year when the subject of economic cooperation was expected to feature prominently, officials said.

The ministers earlier initialled an agreement amending the basic terms of the AIJV, which included allowing non-ASEAN investors to hold up to 60 per cent of equity and applying common preferential tariffs for the joint venture products in the countries involved.

Under the AIJV, companies from at least two ASEAN countries must take part in a project and the resulting products qualified for 90 per cent reduction in import tariffs in the participating countries.

There are currently eight projects under the scheme, one for manufacturing centrifugal pumps, and seven for DAF truck components.

TOKYO (OCT. 30) - Japan's All Nippon Airways Co. Ltd. said Thursday its net profit soared 65.6 percent from a year earlier to 12.4 billion yen (90 million dollars) in the six months to September.

But the airline, Japan's second-biggest carrier and its largest domestic airline, revised downward its earnings forecast for the full year, citing uncertainty about fuel prices and interest rates.

Net profit in the year to March is now expected to fall 17 percent from a year earlier to 12.4 billion yen (90 million dollars) compared with an earlier forecast of 17 billion yen (123 million dollars), it said.

Operating revenue climbed 9.5 percent to 379 billion yen (2.8 billion dollars) during the six months and is projected to rise nine percent to 735 billion yen (5.3 billion dollars) in the full year, reflecting strong demand.

The number of passengers carried on domestic routes advanced 11 percent to 16.8 million while those carried on international routes jumped 34 percent to 658,466, boosted by new routes and more flights to Washington and Vienna.

#90303d3640 10/30/1990 ~French/German News Agency
PARIS (OCT. 30) - Former justice minister Pierre Arpaillange on Tuesday joined television boss Philippe Guilhaume by announcing that he would sue for libel after a policeman claimed he had been ordered to set up a homosexual trap to compromise them.

Mr. Guilhaume said on Monday that he was filing a complaint after inspector Jean-Marc Dufourg, of the police General Intelligence service, affirmed that he had been instructed to place a homosexual youth "in the clutches of a minister, and an audiovisual chief".

Mr. Dufourg later alleged that Mr. Arpaillange, who stepped down as minister earlier this month to take over as Auditor-General, and Mr. Guilhaume, who heads the television stations Antenne-2 and FR3, were the officials concerned.

Mr. Dufourg has been suspended in connection with an investigation into the mysterious disappearance of a homosexual pastor, which stirred a storm of controversy over the operations of his unit.

BEIJING (OCT. 30) - Six people were killed and nine injured, two seriously, when one of China's swiftest passenger trains hit a tractor at a level crossing last week, a Tianjin newspaper seen here Tuesday said.

The Tianjin Evening News, in its Sunday edition, said the crash involving the Beijing-to-Shenyang express happened at dawn October 23.

It did not say where the accident took place, but blamed it on the train's driver for allegedly failing to respect regulations while travelling in foggy conditions.

The train runs through Tianjin.

#90303d3680 10/30/1990 ~French/German News Agency

ANKARA (OCT. 30) - A special envoy sent by United Nations Secretary-General Javier Perez de Cuellar arrived here Tuesday for talks on Cyprus, the Mediterranean island divided into Turkish and Greek parts since 1974.

The diplomat, Oscar Camillon said he was carrying no new proposals but would convey de Cuellar's views, hear Ankara's stance on the issue and seek support from Turkey and Greece as guarantor powers for a possible solution of the conflict.

He was to confer with the deputy undersecretary at the foreign ministry, Huseyin Celem, later Tuesday and is due to meet Foreign Minister Ahmet Kurtcebe Alptemocin Wednesday.

Camillon last week met officials of the Greek Cypriot government and the breakaway Turkish Republic of Northern Cyprus (Trnc).

Observers said the U.N. envoy's visit comes in the context of mounting international pressures on Ankara and the Trnc to make concessions.

Turkish troops occupied parts of Cyprus in 1974 and later set up the secessionist Trnc government, which is only recognised by Ankara. The occupation came after a coup staged by Greek Cypriot military, who were linked to Greece.

BANGKOK (OCT. 30) - Thailand has eased its visa rules for East Europeans in keeping with its policy of boosting economic ties with fast-changing Eastern Bloc, radio Bangkok said Tuesday.

''The new rules will authorize Thai embassies and consulates to issue visas for a 90-day stay in Thailand for nationals of the Soviet Union, Albania, Bulgaria, the Czech and Slovak federal Republic, Hungary, Poland, Romania and Yugoslavia,'' said the broadcast.

It quoted a Thai foreign ministry official as saying the new regulation had already been approved by the Thai cabinet.

#90303d3730 10/30/1990 ~French/German News Agency

ISLAMABAD (OCT. 30) - Following her crushing electoral defeat last week, the stage is set for former prime minister Benazir Bhutto's elimination from Pakistani politics, her hardline opponents here believe.

Ms. Bhutto is fighting charges of corruption and abuse of power levelled in special courts the interim government formed after her August 6 dismissal as premier by President Ghulam Ishaq Khan.

If found guilty, she can be disqualified from politics for seven years.

Now that she has been defeated in the political arena, the trials should go on and lead to their "logical conclusion," several senior officials of the Islamic Democratic Alliance (IJI), which swept the polls, said in private.

They said that conclusion was disqualification from politics.

"The law should be upheld, irrespective who it affects," the IJI's leading spokesman, Hussain Haqqani, said publicly.

During the electoral campaign, the interim government led by the conservative IJI became Ms. Bhutto's prosecutor, and she had to appear before special

courts in Lahore and Karachi three times.

She has been summoned to appear November 5 for a hearing in Karachi.

Ms. Bhutto's husband is also the target of the special tribunals and has been in jail for the last three weeks.

Ms. Bhutto was allowed to stand in the elections, analysts say, only because of the strong pressures the United States brought to bear on the government.

Pakistan is Washington's third largest aid recipient, receiving about 600 million dollars in aid from the United States a year.

But U.S. Ambassador Robert Oakley Monday met with the man likely to be Pakistan's next prime minister, IJI head Nawaz Sharif. And in Washington, the State Department said it did not question the results of the poll.

#90303d3780 10/30/1990 ~French/German News Agency

OSLO (OCT. 30) - Norway's opposition Social Democrat chairwoman Gro Harlem Brundtland, 51, was asked by acting head of state, crown prince Harald, Tuesday to form a new minority government.

Brundtland, who led a minority government twice before, in 1981 and again 1986-89, is to hold talks with three other parties with a view to presenting her new coalition on Friday.

Crown prince Harald has been managing state affairs since his father, King Olav V became ill.

The country's tripartite, centre-right coalition government fell Monday with the resignation of Premier Jan Peder Syse after barely a year in power. The 49-year-old prime minister had been accused of business misdeeds.

Syse, whose resignation had been expected for some time, was unable to patch up the split Monday involving his Conservative Party and the Centre Party and the Christian Democratic Party after the Centre Party disagreed on government policies toward the European Community.

Oslo's negotiations with the European Community and European Free Trade Association on future trade relations had produced strains within the cabinet formed a year ago. The agrarian Centre Party opposed the four freedoms in the E.C. charter, especially the free flow of capital.

Syse's Conservatives and the Christian Democrats, along with Labour, had argued that Norway must soften its stand if the negotiations with the E.C. were to make any progress.

Disclosures last month of private business misdeeds by Syse had further weakened the prime minister's standing over the past few weeks.

#90303d3800 10/30/1990 ~French/German News Agency

TOKYO (OCT. 30) - Japanese and North Korean officials will meet this weekend in Beijing for talks aimed at paving the way for the establishment of diplomatic ties, officials said Tuesday.

A Japanese Foreign Ministry statement described the meetings Saturday and Sunday as "preparatory talks" to lay the groundwork for full-fledged negotiations on diplomatic relations between the two countries.

It said the two foreign ministries would send delegates at the level of director-general of bureau.

North Korea, in a surprise shift from its hard-line policy, agreed last month to start talks with Japan on establishing formal ties after the Soviet Union established diplomatic ties with rival South Korea.

Analysts say North Korea has no choice but to look to Japan for capital and technology to spur its debt-ridden and stagnant economy, despite its long-standing opposition to recognition of two Koreas by the major powers.

The agreement was reached between North Korea's Workers Party and Japan's Liberal Democratic Party on September 28 when former deputy prime minister Shin Kanemaru visited Pyongyang.

Japan's main opposition Socialist Party, which has served as a go-between the two ruling parties, was also a signatory to a joint declaration containing the agreement.

The three parties said in the declaration that they "consider that the abnormal state between North Korea and Japan must be eliminated and diplomatic relations established as soon as possible."

The document also said Japan should compensate North Korea for Japan's colonial rule over the Korean Peninsula from 1910 to 1945 and the "losses inflicted upon the Korean people" afterwards.

The United States and South Korea have reportedly demanded that Japan-North Korea rapprochement does not outpace progress in dialogue between North and South Korea.

The Korean Peninsula was divided under a superpower agreement after World War II, with Soviet troops disarming Japanese troops north of the 38th parallel

and U.S. troops doing the same in the south, leading to creation of two republics in 1948.

Japan normalized ties with South Korea in 1965 and has since maintained close links with the south. But it has also been North Korea's largest non-communist trading partner.

#90303d3810 10/30/1990 ~French/German News Agency

Geneva (OCT. 30) - International Air Transport Association (Iata) general director Guenter Eser told airline companies here Tuesday ''don't go too far'' in their upcoming tariff negotiations likely to produce this year's second air ticket price hike.

Wrapping up the second and last day of the annual congress of Iata, to which some 200 airlines belong, Eser said he expected ''tough negotiations'' at the price-setting talks which start here on Wednesday.

Eser said that if higher prices are agreed on, the new rates would not take place before December, since the individual members' governments must first give their approval.

The last price hike agreed on by Iata members was reached in August and took effect in October, with passenger fares increased by five to eight per cent and air cargo rates by seven per cent.

Many airlines are arguing for a further rate increase, citing the rise in fuel costs and insurance premiums triggered by the Gulf crisis.

HARARE (OCT. 30) - Riot police sealed off the street outside parliament Tuesday as more than a hundred University of Zimbabwe academic staff staged an unprecedented demonstration against increased government control of university affairs.

A delegation of the lecturers, who were wearing their academic gowns and colours, left their colleagues lined up in a park opposite parliament and walked two blocks through the centre of Harare to present a petition at the office of President Robert Mugabe.

Although details of the letter were not disclosed, it is believed to urge the president to refuse to sign into law the University of Zimbabwe Amendment Bill which was passed by parliament last week.

The bill sparked several days of clashes between protesting students and riot

police, during which three offices at the university's administration block were set on fire.

The main objections to the bill focus on provisions that would give the government the power to appoint a majority of members of the university council, or governing body, and increase its disciplinary powers on campus.

The Association of University Teachers (AUT) says the measures will destroy the autonomy of the country's sole university.

AUT secretary Anthony Reeler said the letter had been addressed to Mr. Mugabe in his capacity as both president and as chancellor of the university.

#90303d3860 10/30/1990 ~French/German News Agency

LONDON (OCT. 30) - Amnesty International urged the Namibian government on Tuesday to set up an impartial inquiry into reported human rights abuses during the independence war against South Africa.

It said both South African-led forces and the guerrilla South West Africa People's Organisation (SWAPO) "were responsible for such abuses".

The human rights watchdog noted that the Namibian government last week appointed as army commander "a senior SWAPO official who has been publicly accused of being responsible for the torture, 'disappearance' and killing of prisoners in SWAPO camps in Angola".

Amnesty said the Windhoek authorities "should ensure that those responsible for past human rights abuses are not placed in positions where they could have control or authority over prisoners".

The Namibian Defence Ministry last week announced the appointment as army chief of Major General Solomon 'Jesus' Hawala, who was head of security for SWAPO's military wing before independence in March this year.

PRAGUE (OCT. 30) - Children in the region of Most in northern Czechoslovakia will go to school equipped with anti-pollution masks from Monday, the news agency CTK reported.

The Most region is one of the most polluted in central Europe, and 23,000 masks have been supplied free to its children to protect their lungs from sulphur dioxide and dust emitted by local lignite-burning power stations.

The level of respiratory diseases among childen there is said to be three to

four times higher than than in the rest of the country.

CTK said the local municipal authorities planned to generalise the sale of such masks as indispensable.

-30- 827

#90303d4010 10/30/1990 ~French/German News Agency

TOKYO (OCT 30) - A tax reform panel Tuesday advised Japanese Prime Minister Toshiki Kaifu to work out a new tax on land holdings in two years to stop spiraling property prices.

The tax system council said in a recommendation to the premier that the new tax would make it costly to own land, discourage land ownership for speculation and prevent further rises in real estate prices.

The council said the new tax should be levied on both commercial and residential lands in accordance with the value of the properties.

But many of Japan's industry and government leaders voiced objections for various reasons.

Hajime Tsuboi, who heads the national association of real estate agents, said creation of the new tax would amount to "double taxation" on land in addition to an existing tax on fixed assets and would cut the supply of lots for housing.

"It is questionable to levy a tax on utilized land," said Kabun Muto, minister of international trade and industry.

Japan's soaring urban land prices in recent years have led the majority of people to abandon hopes of owning houses.

#90303d4040 10/30/1990 ~French/German News Agency

TOKYO (OCT. 30) - Japan's contribution to improving the lives of South African blacks has been "absolutely insignificant," African National Congress (ANC) deputy president Nelson Mandela said here Tuesday.

The black nationalist leader, addressing a press conference after a series of meetings with senior Japanese officials and businessmen, said he had asked for 25 million dollars in direct aid for the ANC.

The request was rejected Monday evening by Prime Minister Toshiki Kaifu, who said Japan followed the United States and other Western nations in ruling out direct aid to foreign political groups.

Japanese officials, according to Mr. Mandela, stressed that Tokyo had disbursed 1.8 million dollars through international organizations to improve the living conditions of blacks in South Africa.

"If you compare (that) with what has been done by very poor countries in Africa and Asia and also by some industrial countries, the Japanese contribution is absolutely insignificant," he said.

But Mr. Mandela said he was pleased with the support pledged by the three countries he visited before Japan -- India, Indonesia and Australia -- which promised a total of 32 million dollars to the ANC, including 17 million that has already been turned over.

Mr. Mandela, here to raise funds and inform Japanese leaders about recent developments in South Africa, also tried to interest Japanese businessmen in the future of his country once apartheid was abolished.

"Both the ANC and the governement are keen to reach a solution as soon as possible," he said, adding that he hoped to meet South African President Frederik de Klerk upon his return home to "determine the organization which will draw a new constitution."

#90303d4060 10/30/1990 ~French/German News Agency

MANILA (OCT. 30) - The Philippines and the United States will resume talks on military bases and a "new relationship" early next month, President Corazon Aquino announced here Tuesday.

Mrs. Aquino said the negotiations, the third round of talks on the bases after meetings in May and September, would reopen before she leaves for Tokyo to attend the November 12 enthronement of Emperor Akihito.

She stood firm on Manila's plan to fully take over Clark Air Base on September 16, 1991, when the U.S. lease on the jet fighter facility as well as Subic Naval Base and four smaller stations runs out.

Apart from planning to take over Clark, Manila is insisting on a broader range of bilateral issues apart from the bases, including trade, aid, war veterans and environmental matters.

The Philippines, a U.S. colony from 1898 to 1946, hosts the largest American overseas military bases.

The U.S. military facilities provide jobs for nearly 80,000 Filipinos and pump an estimated three billion dollars a year into the Philippine economy, which is facing its worst crisis in years because of domestic problems and the effects of the Gulf conflict.

#90303d4070 10/30/1990 ~French/German News Agency
BEIJING (OCT. 30) - Foreign diplomats in China are barred from using their homes or offices for "purposes incompatible with consular business," under regulations that went into force on Tuesday.

The measures, adopted by the National People's Congress standing committee, are seen as a response to Washington's move to let dissident Fang Lizhi take refuge in its embassy here during last year's Tiananmen Square crackdown.

Mr. Fang, an outspoken astrophysicist and moving spirit of the student-led democracy movement, and his wife were allowed to leave China for Europe in July after 385 days in the embassy. They had been wanted for alleged "counter-revolutionary" crimes.

The regulations, summarized by the New China News Agency and described as the first of their kind here, add that foreign diplomats must respect Chinese law and "not interfere in China's internal affairs."

They also spell out diplomatic privileges and immunities that are widely recognized around the world, including a clause which states that consular buildings "may not be encroached upon."

#90303d4080 10/30/1990 ~French/German News Agency
NEW DELHI (OCT. 30) - Sikh separatists ambushed a train and shot dead six people in India's Punjab state, where continuing violence linked to a Sikh homeland campaign also left seven others dead, police said Tuesday.

All the killings occurred overnight Monday.

Sikh militants armed with automatic weapons fired indisciminately at the Bombay-bound Punjab Mail shortly after it began its run for Bombay in Faridkot district, killing two railway policemen and four passengers.

Five others were injured in the attack, the Press Trust of India (PTI) said, quoting police. No further details were available.

In other incidents, security forces shot dead two Sikh separatists in Amritsar district, while Sikh militants gunned down four villagers and burned a fifth to death elsewhere, the news agency said.

At least 2,160 people have been killed this year alone in violence linked to a bloody campaign for a Sikh homeland called Khalistan (land of the pure).

-30- 1140
#90303d4090 10/30/1990 ~French/German News Agency
NEW DELHI (OCT. 30) - Tibetan spiritual leader the Dalai Lama Tuesday asked Indians to maintain peace, as violence linked to a dispute between Hindus and Moslems left seven people dead.

The Dalai Lama, in a statement here, said he was "deeply anguished at the violence and loss of life in recent weeks" caused by the lingering dispute over a religious site at Ayodhya town in northern India's Uttar Pradesh state.

"While it is for the people of India to resolve their differences... I pray as a simple Buddhist monk and one who loves India dearly for peace and harmony among all its people.

"I have always tried to cultivate the meeting ground between different religions and faiths and appeal to all for tolerance and understanding of each other," the 1989 Nobel Peace Prize winner added.

Security forces Tuesday shot dead seven people in Ayodhya, where swarms of Hindus stormed a 16th century mosque in a bid to destroy it. The Hindus caused minor damage before they were driven away.

More than 100 people have died in Hindu-Moslem unrest over the past week.

The Dalai Lama has been living in India since fleeing his homeland in 1959 following a failed uprising against Beijing. His government-in-exile, based in northern India, is not recognised by any country.

#90303d4100 10/30/1990 ~French/German News Agency
MOSCOW (OCT. 30) - Parliament in Soviet Moldavia, troubled by ethnic unrest, has expelled 10 of 13 Gagauz deputies for "anti-constitutional activities", a spokesman for the legislature said Tuesday.

The spokesman, reached by telephone in the Moldavian capital Kichinev, said the 10 deputies were "deprived of their mandates" late last week "because they were't taking part in parliamentary business. They weren't doing anything."

Tass news agency said that leaders of the Gagauz 'republic', unilaterally proclaimed in August for the 150,000-strong ethnic Turkish minority, were among those thrown out of the Moldavian parliament.

They were "taking no notice of the parliament's laws and resolutions and inciting people to break Moldavian law", the official agency added. Moldavian politicians have also criticised Gagauz representatives for organising elections last Thursday to set up their own parliament.

The nationalist Moldavian People's Front that day sent thousands of "volunteers" to the Gagauz region in the south of the republic to try to stop the poll taking place.

Moldavian authorities on Friday imposed a two-month state of emergency on three Gagauz districts and Soviet Interior Ministry troops have been deployed there.

The unofficial Interfax news agency on Tuesday reported that some of the Moldavian "volunteers" had withdrawn from the Gagauz region.

BANGKOK (OCT. 30) - The Burmese authorities are levelling trumped up criminal charges against scores of political prisoners before a visit by the special U.N. envoy for human rights, observers in Rangoon said Tuesday.

Reports from the Burmese capital say the military junta wants to empty Rangoon's Insein prison of political detainees before the arrival of Professor Sadako Ogata expected early next week.

"At the moment they are making up criminal charges against the political prisoners in Insein. Others they are moving to prisons far outside the capital " a Rangoon-based observer said.

"The military does not want the U.N. special envoy to visit Insein and find political prisoners, only criminal ones," the observer said.

The reports follow earlier ones that Insein was being spruced up for the visit of Ms. Ogata. Diplomats said recently that inmates were being given new mattresses, new blankets and were being given meat four times a week instead of the normal once a week.

A former political detainee in Insein now staying in Thailand, 24-year-old Maung Sann Til Kyaw, said that the warders would frequently put cockroaches and worms in the daily soup.

"The conditions were terrible. The food was uneatable. Lots of us suffered from dysentery and all they gave us was one single pill which did nothing to help," Maung Sann Til Kyaw said.

"The junta want to show that Insein is a normal prison where the inmates are well treated. They want to try and show the U.N. that they respect human rights," an observer based in Bangkok said.

Last February the United Nations Human Rights Commission severly criticised

the junta for their human rights records.

No details of Ms. Okata's visit have been released by the Burmese government and diplomats fear that her movements will be tightly controlled.

#90303d4330 10/30/1990 ~French/German News Agency

SAINT-BRIEUC, France (OCT. 30) - On a windswept island off France's Atlantic coast, Breton farmers have started growing wakame - a seaweed highly prized in Japan and Korea that was brought accidentally to this country a decade ago.

This year, six hectares (15 acres) off the island of Brehat have been planted with the weed, which grows to 1.5 meters (five feet) and is used to flavour soups and salads in both Japan and Korea.

"Today, the Japanese and the Koreans cannot increase their production because they lack space on the seabed," said Patrick Dion, a senior official at the semi-public seaweed research institute that is coordinating the experiment.

"They also have pollution problems," he added.

"We, on the other hand, have now completely mastered the growing and harvesting of the seaweed, which has been cultivated in Asia for centuries," he said.

The plant, whose Latin name is Undaria Pinnatifida, "is perfectly at home in the Atlantic waters," said Mr. Dion.

It was accidentally brough to France in seed-oysters imported from Japan in the late 1970s.

Mr. Dion claimed that the quality of Brehat's wakame - the only one being produced in Europe - is better than that of many of its Asian competitors.

The threat to these competitors is still modest: while Korea produced a quarter of a million metric tons of wakame, and Japan consumed 120,000 tons, Brehat is expected to produce 150 tons next year.

"But Brittany's potential in the next few years is enormous, even though we must ensure that it will be profitable," Mr. Dion said.

-30- 1763

#90303d4410 10/30/1990 ~French/German News Agency

Colombo (OCT. 30) - The Sri Lankan government Tuesday decided to scrap a plan to build a coal-fired power plant in the south of the country following protests from environmentalists.

The decision was made by President Ranasinghe Premadasa in the light of representations made to him on the likely environmental costs of the project and the socio-economic benefits of harnessing other renewable sources of energy.

Environmentalist stiffly opposed the coal power plant, which earlier was to have been set up in the eastern Trincomalee District and later planned to for Weligama, 275 kilometers south of Colombo.

Premadasa has directed that in lieu of the project, the country should plan the first plant which would harness viable alternative sources of energy to meet the future power demand, a statement said.

He directed the Power and Energy Ministry to look into the possiblity designing and constructing new hydroelectric power projects, optimising the exploitation of existing hydro power capacity, introducing solar power, building mini-hydro power projects and setting up small and medium bio-gas plants.

#90303d4490 10/30/1990 ~French/German News Agency

NAIROBI (OCT. 30) - Kenyan Vice-President George Saitoti on Tuesday handed President Daniel arap Moi a report by a committee formed to recommend changes in the ruling party.

The committee was formed in June amid calls for greater democracy in Kenya. The country is officially a one-party state and opposition activity is harshaly repressed.

In July, riots erupted throughout Kenya in protest at the detentions of leading multi-party campaigners Kenneth Matiba and Charles Rubia, both former cabinet ministers, and at least 22 people were killed.

Mr. Saitoti is chairman of the committee, which has heard the views of some 40,000 Kenyans on proposed changes in the Kenya African National Union (KANU), which in 1982 was made the country's sole legal party.

Many of those who appeared before the committee, which held public sessions around the country, demanded nothing short of the resignation of the government, the dissolution of parliament and multi-party elections.

But Mr. Moi, who is also president of the party, has dampened hopes of significant reforms by repeatedly defending the status quo.

The committee has been criticised by anti-government churchmen and lawyers as comprising only staunch party members and supporters of the president.

Mr. Moi said the report would be presented at a party conference to be convened soon. Delegates at the conference will study the report's recommendations and make decisions on possible action by consensus, he added.

TOKYO (OCT. 30) - Three Japanese companies said Tuesday they have signed a contract worth about 16 billion yen (125 million dollars) to set up an underwater optical cable system linking four Southeast Asian nations.

NEC Corp., Fujitsu Ltd. and Ocean Cable Co. said they will lay an underwater line between Brunei and Singapore by November next year and another linking Brunei, Malaysia and the Philippines by January 1992.

The two lines, each about 1,500 kilometers (940 miles) long, will have an information capacity of 560 megabits per second.

NICOSIA (OCT. 30) - President George Vassiliou met Soviet presidential envoy Yevgeni Primakov here Tuesday and proposed Cyprus as a venue for talks aimed at a peaceful solution to the Gulf crisis, Cypriot officials said.

Mr. Primakov, who arrived earlier from Saudi Arabia, briefed Mr. Vassiliou on the results of his latest Middle East tour. A Soviet Embassy spokesman said the envoy was to fly to Moscow on Wednesday.

The Cypriot leader said his country was ready to contribute to all efforts for a peaceful solution to the Gulf crisis, a Cypriot official said.

The eastern Mediterranean island, a haven for refugees from Middle East violence, could serve as a centre for talks, consultations and contacts as well as a base for intermediaries, Mr. Vassiliou was quoted as saying.

Soviet President Mikhail Gorbachev on Monday proposed an inter-Arab conference

to resolve the crisis and voiced opposition to a military option in remarks praised by Iraq.

Kuwait earlier Tuesday hailed Soviet efforts to secure the application of anti-Iraqi U.N. sanctions, following a meeting in Saudi Arabia between Mr. Primakov and the exiled Kuwaiti emir, Sheikh Jaber al-Ahmad al-Sabah.

Mr. Primakov's mission to the Middle East and the Gulf had triggered high hopes at the United Nations, where it was thought he might make progress toward to a peaceful resolution of the crisis sparked by Iraqi invasion of Kuwait.

But he left Baghdad on Monday after meetings with President Saddam Hussein and Foreign Minister Tareq Aziz amid no indications of a breakthrough.

The envoy also met King Fahd of Saudi Arabia, Syrian President Hafez al-Assad and President Hosni Mubarak of Egypt.

BRUSSELS (OCT. 30) - European Community Commission officials, citing what they called ''very alarming'' and ''dramatic'' supply developments in the Soviet Union, said here Tuesday that Moscow could go ahead and request E.C. assistance earlier than planned.

The Commission officials made the remarks on the periphery of the talks here by the ''Group of 24'' western industrialised nations to review aid to Eastern Europe.

So far, the Soviet Union has not been included in the G-24's aid plans for Eastern Europe. But as the Soviet situation deteriorates, experts said, the western nations' calculations for Eastern Europe cannot be made without considering the Soviet factor.

Estimates here see the Soviet payments balance deficit reaching 12 billion dollars this year. Nor did Moscow stand to benefit greatly from the rise in oil prices since Soviet oil production has declined by some 20 per cent.

The E.C. Commission in a report estimated that due to rising oil prices and the collapse of the East Bloc economic group Comecon, the central and eastern European nations next year will need financial support of nearly 15 billion dollars.

This would leave, despite western aid pledges for Eastern Europe so far, a financial gap of almost 7 billion dollars, the Commission report said.

ISLAMABAD (OCT. 30) - Pakistan's highest religious court Tuesday ruled that anyone convicted of insulting the prophets of Islam, Christianity and Judaism should be put to death.

The Federal Shariat Court gave the government six months to scrap the alternate punishment of life term provided for the offence in the existing law.

Otherwise the ruling itself would become law.

Last year seven people were killed in clashes with police in Islamabad over British author Salman Rushdie's book ''The Satanic Verses'', considered blasphemous to Prophet Mohammad by Moslems.

TEHERAN (OCT. 30) - An envoy of Japanese Premier Toshiki Kaifu met here Tuesday with Foreign Minister Ali Akbar Velayati, who stressed Iran's rejection of the invasion of Kuwait, the Iranian news agency IRNA reported.

Mr. Velayati said the invasion was "totally unacceptable" but he also reiterated that Iran was opposed to the deployment of foreign troops in the Gulf region.

The Japanese envoy, Tobohu Matsunaga, briefed the Iranian foreign minister on Tokyo's stand on the Gulf crisis.

Mr. Matsunaga, who arrived in the Iranian capital Monday for a three-day visit was to deliver a message to President Ali Akbar Hashemi Rafsanjani from the Japanese prime minister.

MOSCOW (OCT. 30) - A soviet warship in the Pacific Ocean mistakenly fired 17 shells at the eastern city of Vladivostok but missed it, the Interfax news agency reported here Tuesday.

An ammunition expert aboard the anti-submarine ship Admiral Vinogradov Monday had forgotten to check whether the cannons were loaded shortly before testing them.

The shells exploded about four kilometres above Vladivostok's city centre, Interfax added without saying whether falling shrapnel caused any casualties. An investigation was underway.

JAMMU, INDIA (OCT. 30) - Nine people have been killed and 12 others injured in India's Kashmir state, where Moslems are campaigning violently for a separate homeland, officials said here Tuesday.

Five Moslem militants and a security officer were killed in gunbattles overnight Monday in the northern state's Anantnag district, a Moslem majority region known to be a rebel stronghold, the officials said.

Twelve others, including three security men and nine civilians, were reportedly injured in the exchange of fire.

In Srinagar, Kashmir's summer capital security forces shot dead a Moslem militant Monday evening.

Three bomb blasts also rocked Srinagar late Monday. One of them damaged the house of a moderate Moslem politician.

More than 1,800 people have died so far this year in violence linked to the Moslem separatist campaign.

CAIRO (OCT. 30) - Egyptian police have arrested several suspects in connection with an attack last February on a tourist bus that killed nine Israelis and wounded 17, Interior Minister Abdel Halim Mussa said Tuesday.

General Mussa, quoted by the official Middle East News Agency, also said police had seized "arms used in the attack" east of Cairo. But he would provide no further details "in order not to interfere with the investigation."

The minister said details would be made public "once all the suspects are arrested," suggesting that others were still at large.

In an attack that horrified Israel, gunmen opened fire on a tour bus near the Suez Canal city of Ismailia as it was carrying Israelis to Cairo along a desert road February 4.

Gen. Mussa did not disclose the nationality of the suspects but said police had dismantled 13 terrorist cells whose members had entered Egypt from Jordan, Tunisia, Iraq and Algeria.

Authorities over the past week have detained more than 600 Islamic militants and members of Al-Jihad organization, some of whose activists have been accused in the assassination here October 12 of Egypt's speaker of parliament, Rifaat al-Mahgoub.

Gen. Mussa vowed to "destroy Al-Jihad as well as any other extremist organization that resorts to violence."

BONN (OCT. 30) - The German government is planning a nearly billion-mark (657 million dollar) aid package to help Egypt, which has been severely affected by the Gulf crisis, Bonn said Tuesday.

Negotiations on the conditions of the aid will be held November 13-19 in Cairo the Development Aid Ministry said.

Depending on further decisions yet to be taken here, Bonn's aid could go as high as some 1.3 billion marks, the ministry said.

Among other items, the package is to include a special Gulf crisis aid of 200 million marks, the ''regular'' development help for 1991 of 235 million marks as well as 540 million marks from earlier Bonn aid pledges which had not been paid out due to Egypt's falling behind on its repayments.

Besides this package, Bonn is giving consideration to providing still a further 370 million marks, the ministry said.

In September, Germany set aside 200 million marks for Egypt within the framework of a western aid plan for Cairo, and lifted a freeze on other development aid money for Egypt.

This move was taken in advance of the general debt rescheduling talks between Egypt and western donor countries. Egypt is more than 700 million marks in arrears on its repayments to Germany.

Bonn has also earmarked 200 million marks in aid to Jordan and 110 million marks to Turkey as part of western aid schemes to help countries adversely affected by the Gulf crisis.

NEW YORK (OCT. 30) - New world heavyweight boxing champion Evander Holyfield will fight George Foreman in Las Vegas on April 19, promoter Bob Arum said on Tuesday.

Holyfield's promoter Dan Duva said the date and venue had yet to be fixed, although he has earlier said March or April.

Duva said he was holding a meeting Tuesday following a 10-12 million dollar

offer from Caesars Palace in Las Vegas to stage the fight.

Forty-two-year-old Foreman will pocket 12.5 million dollars of a 20-million stake, according to Duva. Arum is looking after Foreman's interests.

Holyfield, 28, knocked out James "Buster" Douglas to take the crown in Las Vegas last Thursday and declared he wanted to take on Foreman before Mike Tyson, the leading contender and former champion.

#90303d5040 10/30/1990 ~French/German News Agency

SAO PAULO (OCT. 30) - The state-owned Brazilian Aeronautics Manufacturers (Embraer), burdened with a 600 million dollar debt, announced Wednesday that it was firing 4,100 employees -- about a third of its workforce.

Embraer said it was also cutting by 50 per cent the salaries of workers earning more than 1,000 dollars a month and delaying production of some of its aircraft.

Fearing an angry reaction from fired workers, Embraer officials also asked for police protection and 130 Air Force and police forces were dispatched to the company's plant in Sao Paulo.

The aircraft manufacturer will freeze production for two years on the AMX fighter-bomber, developed jointly with Italian firms, and will postpone until next year prodiuction of a 45-passenger jetliner in which it has already invested 225 million dollars.

Embraer President Ozilio Silva, in announcing the cutbacks, said the firm had not expected to face such a serious financial crisis.

He said the company was expected to fall at least 165 million dollars short of the 700 million dollars in new orders projected for 1990.

Among the more disappointing projects was the firm's Tucano military trainer, orders for which fell 65 million dollars short of projections after several potential buyers failed to confirm purchase options.

Embraer has developed some projects that have not yet generated profits, such as the 19-passenger Vector turbo-prop, which is being built jointly with the Argentines at a cost of 120 million dollars but will not be marketed until 1991.

The Brazilian Government is looking into the possiblity of selling the state-owned firm.

#90303d5060 10/30/1990 ~French/German News Agency
NEW DELHI (OCT. 30) - There were bloody clashes at one of the oldest mosques in India Tuesday as radical Hindus tried to start building a temple on the site.

There were conflicting reports of casualties and damage. Militant Vishwa Hindu Parishad (Vhp) movement leader Girisash Kishore, said police shot dead 11 people during the clashes near the town of Ayodhya in central India.

But Federal Minister of State for Home, Subodh Kant Sahay, said six people died when police opened fire to prevent pilgrims entering the complex. Another 14 persons were killed in unrest in other Indian states, he added.

Kishore said the mosque had been damaged by Hindus but Federal Home Minister Mufti Mohammed Syaeed said the building was intact. ''No damage has been done to the structure,'' he announced.

Sayeed, himself a Moslem, said about 15,000 Hindu ''volunteers'' gathered at Ayodhya Tuesday morning in a bid to enter the disputed palace site and start building work.

After police dispersed them, around 600 forced their way onto the temple site. Police replied with gunfire, teargas and baton-charges. Sayeed said only a handful of people broke into the temple compound.

Hindus want to build a 20-million dollar temple at what they believe to be the traditional birthplace of Rama, whom they worship as one of the reincarnations of Vishnu, the creator. They announced months ago that construction work would begin October 30.

At the same place in 1528, the first Moghul emperor of India, Mohammed Babar, had the Babri mosque built, supposedly on the site of the earlier Hindu temple.

In modern times Hindus have repeatedly tried to end what they see as the desecration of the site. In 1855 and 1934 Moslems and Hindus clashed in Ayodhya, leaving many dead on both sides.

Ram Mohan Rao, the government's chief spokesman, said later that a number of people who managed to enter the complex hacked away at the structure with batons. ''Some reached the top of the building and tried to plant flags'' of the Vhp, he added.

Kishore said one of the three domes of the mosque had been taken down and that two others had been ''worked on''. The dismantling had begun at a time recommended by astrologers to be auspicious.

Rao said the situation in Ayodhya, some 500 kilometres southeast of New Delhi,

was now was quiet ''and that the curfew continues''.

The area has been under an indefinite curfew since last Friday but large numbers of Hindus were reported to have come out of their houses to cheer on Hindu pilgrims.

The Vhp claimed that authorities in Uttar Pradesh had arrested over 750,000 Hindu pilgrims and volunteers on their way to Ayodhya.

''This took place despite the fact that the government cancelled many of the passenger trains passing through the area'', said the Vhp spokesman.

State security forces had sealed off all entry points into the state and declared Ayodhya and its neighbouring town of Faizabad as being off limits in a bid to stop pilgrims reaching the mosque.

The situation in Ayodhya was later described as tense but calm as authorities sealed off the disputed site.

The United News of India agency (Uni) quoted officials at the site as saying they would prevent any further attempt by Hindu volunteers to gain entry into the temple area and that they had tightened security.

Two Hindu leaders arrested earlier were released by authorities to pacify the agitated volunteers.

Meanwhile, Moslem leaders were set to meet here Wednesday for an urgent meeting to discuss the situation, according to Javid Habib, a spokesman for the all-India Babri Masjid Action Committee.

JERUSALEM (OCT. 30) - Israel has halted advertising campaigns abroad due to a sharp decrease in visits by tourists fearing the effects of the Gulf crisis and the Palestinian uprising (Intifada) in the Israeli-occupied territories, the daily Jerusalem Post reported here Tuesday.

It quoted Tourism Minister Gideon Patt as saying it was useless to ask foreigners to spend their vacations in Israel when they saw on their television sets pictures of clashes and casualties in Israel and the occupied West Bank and Gaza Strip.

The number of tourists visiting Israel has dropped sharply during the past two months following the August 2 Iraqi invasion of Kuwait and Iraqi threats to use chemical weapons against Israel.

Groups have also cancelled trips to the Holy Land because the Palestinian

conflict has been increasing in intensity.

OSLO (OCT. 30) - The leader of Norway's Labour Party, Gro Harlem Brundtland, on Tuesday agreed to form her third government after the centre-right coalition resigned in disagreement over future links with the European Economic Community (EEC), Norwegian radio reported.

Acting on advice from the president of parliament Jo Benkow, Crown Prince Harald at midday asked Mrs. Brundtland to replace the three-party coalition government of Prime Minister Jan P. Syse.

After seeking assurances from party leaders that her minority government would have a fair chance of surviving the coming months, Mrs. Brundtland was expected to return to the Royal Palace in the evening to formally accept the assignment.

The list of ministers will be presented to the Crown Prince by the end of the week, party sources said.

In September 1989 general elections the Labour Party only won 63 of the 165 seats in parliament, its worst result since World War II.

Mrs. Brundtland will have to take this into account if she wants to pursue traditional Labour Party policies.

Labour has not yet sorted out its position on EEC membership, but stresses the need for an agreement with the Community.

Mrs. Brundtland will need to rely on support from the Socialist Left Party and the agrarian Centre Party which broke its coalition with the Conservatives on Monday.

Being anti-EEC, the Centre Party would not back the Conservatives who sought full EEC membership and not just an economic deal between the EEC and the European Free Trade Association (EFTA), of which Norway is a member.

Mrs. Brundtland, 51, is known as a tough politician.

In 1981 she became Norway's youngest and first woman prime minister in a government that lasted only seven months. She returned to power in 1986, but then was replaced by Jan P. Syse after losing last year's general elections.

She has said that a Labour government would focus on cutting unemployment, protection of the environment and a fair distribution of wealth. She also intends to rewrite the budget, currently being discussed in parliament.

#90303d5170 10/30/1990 ~French/German News Agency
PARIS (OCT. 30) - An Iraqi jetliner chartered by France has landed here bringing home 256 French nationals held hostage in Iraq and 19 citizens from other nations, authorities said Tuesday.

The latest figures indicated that among the French nationals were seven diplomats who had been based in Iraqi-occupied Kuwait. The other passengers were nine Greeks, four Britons, two Filipinos, one German, a Spanish woman, a Lebanese and a Tunisian.

The Iraqi Airways Boeing 747, which arrived around midnight Monday in Paris, returned Tuesday with tons of medicines purchased by Iraq.

Its departure from Baghdad had apparently been delayed for several hours until France agreed to put a shipment of medicines on the return flight in exchange for the freeing of its citizens. Permission had to be secured from the U.N. Security Council sanctions committee.

Reports said some 40 French nationals including nuns, priests and some company representatives refused to leave Iraq.

French President Francois Mitterrand reaffirmed Monday during the visit of Soviet President Mikhail Gorbachev that his government had not negotiated for the release of its nationals.

Apparently on the advice of French authorities, most hostages refused to tell the 300 journalists at the airport about conditions in Kuwait.

But Frenchman Daniel Kienlen said Iraq was facing difficulties regarding basic food supplies due to the United Nations embargo against the country. It was almost impossible to buy rice or milk, and gasoline was scarce despite the lifting of rationing, but there were enough vegetables, he added.

#90303d5270 10/30/1990 ~French/German News Agency

KIGALI (OCT. 30) - Rwandan President Juvenal Habyarimana has ruled out "direct negotiations" with rebels in the east African country unless their departure "forms an integral part of any settlement".

Rwandans "would revolt and rise up as one man" if direct talks were held with the "invaders" on other terms, Major-General Habyarimana predicted Monday in his third message to the nation since the October 1 incursion.

(Official Zairean radio announced Tuesday, however, that Rwandan government representatives and members of the rebel Rwandan Patriotic Front (RPF) were to meet on Wednesday at Gbadolite in northern Zaire.

(A rebel leader, Titus Ruthemara, met Zairean President Mobutu Sese Seko on Momday and afterwards told the Zairean press he had "total confidence in President Mobutu's mediation" efforts for "peace in Rwanda".)

In his message, Maj.-Gen. Habyarimana said Rwandans would "prefer to fight to the last man rather than let a feudal regime be restored".

He was alluding to the minority Tutsi aristocracy chased from power by the majority Hutu during massacres 30 years ago. Most of the rebels who attacked from Uganda are Tutsi, Rwandan refugees or descended from them.

The president, a Hutu, nevertheless said the government would work to help refugees wishing to return, but not people guilty of "war crimes". Hundreds of thousands of Rwandans live in exile.

Maj-Gen. Habyarimana's conditions for talks contradict ceasefire terms set out last Wednesday by Belgian Foreign Minister Mark Eyskens and accepted by both the government and the RPF.

Mr. Eyskens said that the ceasefire would take hold "in situ", including areas captured by the rebels in northeast Rwanda.

Fighting broke out within 36 hours of the start of the ceasefire and has continued around Nyagatare and near Kagitumba on the Ugandan border where Rwandan troops launched a weekend attack, military sources in Uganda reported.

The recapture of the border post would mark a big setback for the rebels, whose estimated 3,000 fighters would be reduced to dispersing in small groups in the region, observers said.

Gen. Habyarimana said Nyagatare, Muvumba and the strategic garrison locality of Gabiro, the scene of much fighting, were in army hands.

(Zaire radio confirmed Tuesday that a ceasefire monitoring group being set up with 15 army officers each from Zaire, Uganda and Burundi was in Goma, eastern Zaire, and would soon be operational.

(The force, decided upon at a summit meeting late last week of Rwanda, Uganda, Zaire and Burundi, is also to include five Rwandan soldiers and five rebels.

(RPF representative Ruthemara told the Zairean press that a ceasefire should be implemented "immediately", but added that "an (African) intervention force to be created should not be like the one in Liberia, which has caused more problems than it has solved".

(He was referring to a five-nation contingent sent into civil war-torn Liberia by the Economic Community of West African States (ECOWAS). Those troops have been fighting one of the rebel factions in Liberia.)

In another development Tuesday, Egypt's new ambassador to Kigali, Sameh Samy Darwich, said Cairo would be ready to send troops to join an intervention force if asked.

The Rwandan government last week called for an intervention force to be set up during a peace mission by Belgium to its former colony.

#90303d5280 10/30/1990 ~French/German News Agency

BRUSSELS (OCT 30) - Japanese cars will enter the EEC without restriction from January 1, 1993, if the Community does not make an agreement with Tokyo, EEC Commission Vice President Martin Bangemann warned here on Tuesday.

The Commission of the European Economic Community has always maintained that the application of the EEC single market in 1993 would mean abolition of national quotas limiting the access of Japanese cars into several member countries.

Talks between the EEC and Japanese on the voluntary restraint of Japanese sales in Europe are deadlocked.

Under an arrangement considered by the Commission and Japanese officials, Japanese manufacturers would limit their sales in Europe until the end of 1997. In exchange, from next year, countries applying quotas, principally France, Spain and Italy, would begin to facilitate access.

France has strongly objected to this approach, and has accused the Commission of offering the Japanese an share of the European market beyond all their hopes.

#90303d5420 10/30/1990 ~French/German News Agency
TEHERAN (OCT. 30) - Ahmad Khomeini, son of the late Iranian spiritual guide Ayatollah Ruhollah Khomeini, condemned Tuesday what he called Iran's silence on the death sentence against British author Salman Rushdie.

"Iran's silence on the application of the decree condemning Salman Rushdie to death is a dangerous, imperialist plot, aimed against the interests of the (Islamic) revolution," he said, quoted by the evening newspaper Ettela'at.

Addressing a group of former Iranian prisoners from the war with Iraq, Mr. Khomeini urged the foreign ministry to "take a stand on this mischief."

In February 1989, Ayatollah Khomeini issued a fatwa, or Moslem religious decree, condemning Mr. Rushdie to death for blasphemy against Islam in his book, The Satanic Verses.

The British Embassy in Teheran was reopened Sunday, after a 19-month closure caused by the Rushdie affair.

#90303d5520 10/30/1990 ~French/German News Agency
MOSCOW (OCT 30) - Thousands of people marched to the headquarters of the Soviet secret police Kgb on Tuesday to commemorate the victims of Stalin's terror and political prisoners.

There they took part in a ceremony dedicating a rock from the Solovyetski Islands in the Arctic Sea, where the first Soviet concentration camp was built

in 1921.

Two weeks ago, the rock was placed in front of Kgb headquarters with the permission of the Moscow city council.

Among the participants were numerous former prisoners and members of their family. One column was made up entirely of children of people who had been classified enemies of the people.

Soviet human rights activists declared October 30 a day of remembrance in 1974 in recognition of a hunger strike by political prisoners in labour camps in the central Volga River region.

The march was organised by Memorial, a society dedicated to the reappraisal of the Stalin era.

In an interview by the Moscow radio station Mayak (lighthouse), the former dissident and current parliamentary deputy Sergei Kovalyov said the Soviet parliament's human rights commission was preparing a ''rehabilitation law'' going far beyond the decrees of President Mikhail Gorbachev.

#90303d5660 10/30/1990 ~French/German News Agency

PARIS (OCT. 30) - The 21 member states of the International Energy Agency meet in Paris Wednesday for the fourth time since the beginning of the Gulf crisis to study oil supply and demand and consider whether they should release some strategic stocks.

Sources close to the IEA said the organization was not expected to call on its members to dip into their reserves at this stage.

One senior official said there was less tension in the supply and demand situation than at the end of September.

At their last meeting, member states were told to be ready to release some of their strategic stocks or consider moves to limit consumption.

The IEA has not ruled out some supply problems if the northern hemisphere suffers a tough winter or if there is an accident at a refinery or oil platform.

But one senior official said that Organization of Petroleum Exporting Countries - notably Venezuela, Saudi Arabia and the United Arab Emirates - had already managed to step up production to cover the shortfall of 4.3 million barrels a day caused by the oil embargo on Iraq and Kuwait.

One expert said fourth quarter OPEC production could be above the target level

of 22.5 million barrels a day the organization set itself before the Kuwait invasion.

The rise in oil prices had also dampened consumption. The IEA estimated that demand was 400,000 barrels a day below the October level last year in Organization for Economic Cooperation and Development countries.

-30- 1657
#90303d5730 10/30/1990 ~French/German News Agency
PARIS (OCT. 30) - The French government has re-taken control of Framatome, the world's leading nuclear reactor manufacturer, in an agreement with the majority private shareholder, the finance ministry said here Tuesday.

The shareholder, the industrial group CGE, has agreed to a cut in its holdings in Framatome, considered of vital strategic importance by the Socialist government, from 52 percent to 44 percent. Framatome employees will hold five per cent of the shares.

The public shareholders will be the Atomic Energy Commission and the state electricity company (the Commissariat a L'Energie Atomique and Electricite de France) with 46 percent and the Credit Lyonnais bank with five per cent to a total of 51 percent.

The CGE was privatized under the rightwing government of Jacques Chirac in 1987 and last June raised its holdings in Framatome from 40 to 52 percent in what was seen a major challenge to the government of Michel Rocard.

Economy and Finance Minister Pierre Beregovoy said at the time that "French nuclear policy cannot be decided by the private sector".

Framatome made a net profit in 1989 of 742 million francs (125 million dollars), 30 percent down on 1988. But its turnover doubled to 19.9 billion francs (almost 3.4 billion dollars).

The company's affairs have of late been marked by rivalry between its chairman Jean-Claude Leny, and CGE boss Pierre Suard, who notably criticised a pressurized water reactor (PWR) joint sales accord with German firm Siemens on the grounds that the German giant had done too well from the deal.

#90303d5810 10/30/1990 ~French/German News Agency
BANGKOK (OCT. 30) - Thai narcotics suppression police have arrested three people from Nigeria and two from Sierra Leone and seized 10.4 kilograms (22.88 pounds) of heroin in their possession here, police said Tuesday.

The five alleged drug traffickers were arrested separately at two hotels in

central Bangkok late Monday, police said.

Amangoua Borphee and Alhjia Aliayajiwa, both 40 and from Nigeria, were arrested after police found six kilograms (13.2 pounds) in their possession, police said.

A half hour later, another woman, Feji Ajuke, 21, from Nigeria, and two men from Sierra Leone identified as Sankor Abubakarr, 39, and Jalloh Amadu, 40, were apprehended after police found 4.4 kilograms (9.68 pounds) of heroin in their possession, the police said.

The police said both Mrs. Borphee and Mrs. Ajuke were major drug suppliers and "many foreigners" worked for them in smuggling heroin to Nigeria.

The seized drug was valued at 2.08 million baht (83,200 dollars) on the local black market, but would fetch 100 times more abroad.

Under Thai law, the maximum penalty for drug trafficking is death by firing squad, but the sentence is generally commuted to life imprisonment.

Thailand has required all Nigerians to have visas since May following a wave of drug-related arrests of Nigerian passport holders, especially in Bangkok.

KATHMANDU (OCT. 30) - A group of 200 Nepalese Hindus lodged a protest Tuesday with the Indian emabssy here, regarding the arrests of Hindu leaders in India over controversial plans to build a Hindu temple there, a source said.

The group, led by the acting president of the World Hindu Federation (VHP), Mr. Krishna Gopal Tandon, handed a memorandum to Ambassador S.K. Sinha, protesting the arrests of Hindu leaders who want to build a temple on the site of a Moslem mosque in the northern Indian town of Ayodhya, the source said.

The 200 Hindus, representing 40 different Hindu organizations, marched to the Indian Embassy and delivered a four point memorandum, including demands for the release of arrested Hindu priests and Bharatiya Janata Party (BJP, Indian People's Party) leaders.

They also called on the Indian government to stop using force against Hindus who claim the site of 16th century mosque in Ayodhya as the birthpalce of their revered Lord Rama.

A VHP press statement said: "We strongly condemn the suppression of Indian Hindus who were trying to reconstruct the holy temple of the universally respected Lord Rama."

Ambassador Sinha assured the group that he would forward their demands to the central government in New Delhi without delay, a VHP spokesman said.

Lisbon (OCT. 30) - The Portuguese navy supply ship Sao Miguel will set off for the Gulf to help enforce the U.N. embargo against Iraq, sources said Tuesday.

The 5,451-ton freighter, which carries a crew of 37, will leave on Wednesday for Southampton, England, to pick up food and materiel for British troops. It is unarmed.

Portugal has already dispatched a frigate to join Nato units in the eastern Mediterraean that replaced U.S. ships deployed in the Gulf.

ACCRA (OCT 30) - Talks set to begin in Mali Wednesday toward bringing peace to war-torn Liberia have been cancelled, according to reports reaching here Tuesday.

The reports quoting Gambian officials said the main rebel leader, Charles Taylor, wanted the talks held in the area of Liberia he controls.

Gambia, current chairman of the Economic Community of West African States (Ecowas), said the full summit of the 16-nation organization was however still scheduled for Mali on November 27.

The five-nation Ecowas mediation committee on Liberia - Nigeria, Ghana, Gambia Togo and Mali - had scheduled the talks to meet Taylor to get his National Patriotic Front of Liberia (Npfl) to sign a peace accord.

The other two factions in the 10-month-old civil war - Prince Yormie Johnson who leads the breakaway rebel group and remnants of slain President Samuel Doe - have already signed the accord.

Taylor, whose consent is vital for a lasting peace in Liberia, has continued to shun peace efforts. He has said he would not attend talks in any of the five countries contributing troops to a 9,000-strong peacekeeping force that has been fighting his troops, but mali does not contribute troops to the force.

BUCHAREST (OCT. 30) - The Romanian government Tuesday said it would call in

the army if there was a transport strike affecting food or basic resources, the official Rompres news agency said quoting a government communique.

It said the defence ministry would be authorized to transport goods in affected regions, but that this would be ''on demand and against payment.''

The brief statement made no mention of a strike begun Monday by the drivers' trade union which has hit about 100 out of 200 truck transport depots in the country. It did not say if the army was already being used.

Nearly 100 trucks and buses traversed Bucharest Tuesday in response to a call by the drivers' union for a "warning" on the eve of the lifting of price controls.

They drove before the central government building, the television centre and the president's office with lights blazing and horns blaring. Representatives handed in a list of their demands to the president's office.

The drivers are asking that the lifting of price controls be accompanied by a lifting of controls on salary levels and for the recognition of a driving licence as professional qualification.

On November 1, the government is due to liberalise prices and devalue by 75 per cent the national currency, the leu.

In a statement broadcast over the radio, the Fratia trade union federation which has backed the drivers said the government "must accept that the trade unions are a reality".

#90303d6220 10/30/1990 ~French/German News Agency

BEIJING (OCT. 30) - China will likely suffer a major earthquake by the end of the century and the authorities should not keep silent on the possibility, a senior official was quoted Tuesday as saying.

State Councillor Song Jian implicited criticized the communist leadership's practice of withholding news considered damaging to the country's image, including information on natural disasters.

Mr. Song was speaking at an earthquake seminar in Tianjin southeast of here and cited experts' conclusions in saying that "the frequency of earth tremors has increased in the last decade," the Tianjin Evening News reported.

Knowledge of this risk should prompt the government "in a socialist country" to "fulfill its sacred task" of taking measures to limit loss of life and property, he added.

Mr. Song also called for more public education about earthquakes.

A severe temblor in 1976 left more than 650,000 dead in Tangshan, a city 150 kilometers (90 miles) from the capital.

#90303d6300 10/30/1990 ~French/German News Agency

BRUSSELS (OCT. 30) - A further opening of the textile market in the EEC region could result in the "rapid" loss of a million jobs in the industry if it is not accompanied by "parallel and significant" moves to open markets elsewhere in the world, the EEC committee for coordination of the textile industry said Tuesday.

A gradual opening of all world markets would need to be accompanied by a 15-year transition period allowing countries to maintain a "core of restrictions" on imports during that period, the committee said in a statement.

This period should also provide for a "safeguard clause" in case of perturbation of the market, it said.

The textile market is currently the subject of an international protectionist accord known as the Multi-Fibre Agreement, which is due to be abolished under the current Uruguay round of multilateral negotiations to liberalise trade under the General Agreement on Tariffs and Trade (GATT), due to be concluded in Brussels in December.

The committee warned that conditions for a return of the textile sector to the GATT had not been not fulfilled under the discussions, while adding that "substantial progress" could neverthless still be achieved in the coming weeks.

RIYADH (OCT 30) - The Saudi government has decided to ban the export of six basic foodstuffs and medicine, the official Saudi Press Agency (SPA) reported Tuesday.

Commerce Minister Sulaiman Abdel Aziz al-Sulaim, quoted by SPA, said that rice sugar, flour, powdered milk, barley and imported oils, as well as medicine, could no longer be exported.

Such goods are subsidized by the state for the benefit of Saudi citizens and foreigners living in the kingdom, but some people were exporting them, he said, without giving details.

Border posts have been notified of the ban and will impose fines on offenders, the minister said.

JOHANNESBURG (OCT. 30) - An elderly tourist from New Zealand was gunned down in Soweto black township here Tuesday when he and his wife were held up after getting lost, state-run television reported.

Alfred Harrison, 74, and his wife Phyllis, 69, lost their way in Soweto, South Africa's largest black township adjoining Johannesburg, when a shot was fired at their car.

Their daughter, Georgina Braithwaite told television news the bullet travelled through her mother's arm and hit her father in the stomach.

Soweto police spokesman Lieutenant Colonel Tienie Halgryn said Mr. Harrison died at the scene of the incident and that only the couple's watches had been stolen.

He said the incident ocurred at 4.15 p.m. (1415 GMT) and that the "callous killing of an innocent tourist" was being intensively investigated by police.

#90303d6520 10/30/1990 ~French/German News Agency
NAIROBI (OCT. 30) - The Rwandan army Tuesday retook the Kagitumba border post with Uganda which had been held by the Rwandan Patriotic Front since the rebels launched an offensive earlier this month in northeast Rwanda from Uganda.

The fall of Kagitumba was announced by state-run Rwandan radio and confirmed by eyewitnesses.

Witnesses said the anti-government forces pulled out of the border post earlier in the day.

A Belgian-sponsored ceasefire was agreed on Wednesday, but has yet effectively to be implemented.

Informed sources late Tuesday said the rebels remained in northeastern Rwanda mainly in the Mutara game reserve and the Akagera national park. Ugandan troops near the border had been reinforced to prevent a mass return of the rebels, they added.

#90303d6570 10/30/1990 ~French/German News Agency
WASHINGTON (OCT. 30) - Squeezed by the budget crisis, a farm bill recently

passed by Congress and ready for White House approval will slash farm subsidies by 25 per cent over the next five years, causing turmoil among farmers and possibly hurting the U.S. position in world trade talks.

For the taxpayer, the total savings from this measure are predicted to reach 13.6 billion dollars over the five-year period, bringing the overall budget for "Farm Bill 1990" to 40.4 billion dollars.

More than half of the savings will come from a new program called "triple base" which cuts the amount of farmland qualifying for federal subsidies by 15 per cent.

The combination of these drastic measures will lop at least 15 per cent off subsidy payments to grain, rice and cotton growers and will freeze subsidy prices well below production costs, analysts said.

Current market prices are so low, they added, that farmers largely depend on federal support to help them finance their crops.

Slashing subsidies could quickly plunge thousands of U.S. farmers into bankruptcy, largely recreating the market crisis of the 1980's in which many farmers went permanently out of business, the experts said.

The new legislation also comes at an awkward time for Washington, they added, since it considerably weakens its position in the current Uruguay Round of negotiations within the framework of the General Agreement on Tariffs and Trade (GATT).

Those talks notably pit Washington against the European Economic Community (EEC) on the issue of farm subsidies, which the United States wants to see sharply reduced.

The move to cut U.S. farm subsidies by a fourth clearly undermines a U.S. bid to have world-wide agriculture subsidies slashed by 75 per cent immediately and by 90 per cent over a period of 10 years, the analysts said.

While the EEC strongly opposes reducing its farm subsidy programs, it seems ready to offer a compromise 30 per cent cut when the Uruguay Round holds its final meeting in Brussels in December.

U.S. President George Bush's administration has said it will present the 25 per cent cut in its farm subsidies as a "down payment" in the multilateral trade talks; clearly a face-saving measure according to analysts.

Only last weekend, Agriculture Secretary Clayton Yeutter warned that if the Uruguay Round should end in a stalemate, he would ask the U.S. Congress to increase export subsidies to farm products in upcoming years

"Farm Bill 1990" also includes a provision allowing the agriculture secretary to raise or lower the loan rate -- a kind of guaranteed minimum price for commodities -- to keep the competitive edge of U.S. farm exports.

In addition, the bill maintains a series of measures to promote U.S. agricultural exports.

One of them allocates 500 million dollars a year to the Export Enhancement Program (EEP) -- a fourth of which will go to processed meat, poultry and flour -- designed to counter what the United States preceives as unfair competition from the EEC in some markets.

Two hundred million dollars have been set aside for an export promotion program, and 5.5 billion dollars is targetted for the GSM 102 export credit program.

#90303d6600 10/30/1990 ~French/German News Agency

WASHINGTON (OCT. 30) - The key race for governor of Texas pits a sharp-tongued Republican businessman against a veteran Democratic politician in one of the most colorful and nastiest contests of the November 6 elections.

Latest polls put Republican candidate Clayton Williams, a conservative millionaire oilman and rancher from West Texas, slightly ahead of state Treasurer Ann Richards in their bid to succeed Republican Governor William Clements, who is not seeking re-election.

Texas, one of the three states with the fastest growing population along with California and Florida, is expected to gain three congressional seats as a result of the 1990 census which will confirm the population shift to the U.S. Sun Belt.

With a 1988 population of 17 million, Texas currently has 27 congressional seats.

And whoever succeeds Mr. Clements in Austin, the state capital, in January will oversee the redrawing of the state's congressional districts.

Despite the high stakes, the two candidates have been running lackluster campaigns, relying heavily on negative advertisements that have taken the art of mudslinging to new lows.

Mr. Williams, a 59-year-old political novice whose cowboy image and earthy language has endeared him to many Texans, entered the race with a distinct advantage.

Vowing to veto new taxes and to enact a tough anti-crime program, he has

sought to portray his rival as a liberal, career politician out of touch with the mainstream.

In addition, there is still considerable resistance to having a woman governor among conservative voters of East and South Texas, analysts said.

Ms. Richards, a 57-year-old recovering alcoholic who won national fame with her disparaging "he was born with a silver foot in his mouth" one-liner against candidate George Bush at the 1988 Democratic National Convention, hurt herself by being less than forthcoming in the Democrats' primary battle about whether she used illegal drugs in the past.

She has spent most of the campaign defending herself against Mr. Williams' attacks, presenting herself as an experienced, mainstream public servant committed to protecting the environment and free choice on abortion, improving the state's low education standards and promoting economic growth to tackle Texas's three-billion-dollar budget deficit.

WASHINGTON (OCT. 30) - Eight sailors killed Tuesday in a boiler room explosion on a U.S. warship in the Gulf pushed to 40 the number of U.S. servicemen killed since Operation Desert Shield began, the Defense Department said.

The accident on board the USS Iwo Jima occurred off the coast of Bahrain as the amphibious assault ship was headed for the North Arabian Sea after routine maintenance in Manama, U.S. authorities said.

The accident Tuesday aboard the Iwo Jima helicopter carrier is the second fatal incident on a U.S. warship involved in Operation Desert Shield that began on August 8.

A U.S. sailor was electrocuted on August 21 while performing routine maintenance aboard the USS Antietam.

Fourteen U.S. servicemen have been killed in airplane and helicopter accidents in the Gulf region while 13 airmen died when a U.S. Air Force C-5A cargo plane crashed in West Germany while on its way to Saudi Arabia.

Four U.S. soldiers have died in vehicle and other accidents in Saudi Arabia, including a marine killed Tuesday when the jeep in which he was riding overturned in the Saudi desert.

The first death since Desert Shield began was a sergeant who was killed on August 12 when her truck overturned on a runway in Saudi Arabia.

#90303d6680 10/30/1990 ~French/German News Agency

BRASILIA (OCT. 30) - Brazil's Secretary for Science and Technology Jose Goldembourg confirmed Tuesday that China sold Brazil enriched uranium in 1984 for its nuclear research program.

Mr. Goldembourg's acknowledgement followed reports that a former secretary of the National Security Council told a closed-door congressional hearing of the sales of enriched uranium by Beijing.

The weekly magazine Veja cited two of the seven congressmen at the secret meeting as saying China had supplied uranium enriched at three percent, seven percent and 20 percent in 1984.

"At a time when the Brazilian Government is trying to be transparent in this domain, holding a secret session of Congress with the military seems an absurdity," Mr. Goldembourg told reporters.

Mr. Goldembourg said identifying China as the source of the urnanium would not have a negative effect on future negotiations to acquire enriched uranium.

The important thing, he said, was "to demystify nationally and internationally Brazil's nuclear activities, which have but one goal: to develop the country technologically."

Infrastructure Minister Ozires Silva said he was not concerned about the affair. "We are not making an atomic bomb and we have no bellicose objective with the nuclear projects developed by Brazil," he said.

In his testimony to the congressional committee investigating Brazil's nuclear program, general Danilo Venturi said the Brazilian Government decided to choose a country willing to sell enriched uranium after the United States unilaterally broke off its agreement to supply fuel for the Angara I nuclear reactor in Rio de Janeiro.

Without fuel to continue operating, Brazil began looking for other partners and had no trouble finding them, said the general, who served as secretary of the National Security Council in the government of general Joao Batista Figueiredo.

Besides China, a European country that is a signatory of the Nuclear Non-Proliferation Treaty offered nuclear fuel for Agra I, he said without identifying the government involved.

General Venturi also said that by 1982 Brazil had mastered the enrichment process up to 0.4 percent but did not disclosed it because general Figueiredo thought it was too soon to go public. In September 1987, President Jose Sarney

announced that Brazil had succeeded in enriching uranium to 1.3 percent.

Since coming to office in March, President Ferdinand Collor de Mello has pledged that Brazil's nuclear program would not be used to develop weapons.

#90303d6930 10/30/1990 ~French/German News Agency

STOCKHOLM (OCT 30) - Six Swedes are to leave Iraq Wednesday along with a Swedish parliamentary delegation now in Iraq to win the release of the some 80 Swedes kept there as hostages, Swedish radio said here Tuesday.

The Ekot radio station said the six were authorized to leave Iraq after the delegation of five Swedish deputies met with Palestinian officials in Iraq.

Four other Swedes returned to Sweden last Friday with Peter Osvald of the political department of the foreign ministry.

Iraq faces an international embargo due to its invasion August 2 and continuing occupation of Kuwait.

It has stopped some 4,000 foreigners from leaving the country to protest the U.S.-led military alliance now in Saudi Arabia, but this week allowed some 300 French and several people of other nationalities to leave.

LAGOS, (OCT 30) - The Nigerian military government has decided to scrap a ban it was to have imposed on the export of raw cocoa beans, the minister of information, Chief Alex Akinyele, announced here Tuesday.

The decision to lift the prohibition order, which was to have come into effect from next year, was taken because Nigeria had inadequate facilities to process its own beans, the minister said.

The problem had been responsible for the acute financial and material losses experienced by local cocoa producers, he added.

According to Finance and Economic Development Minister Alhaji Abubakar Alhaji, only about 10 per cent of the 150,000 tonnes of cocoa produced in Nigeria annually are processed locally.

The government had announced the ban in January in a bid to increase the value added to the country's cocoa exports.

WASHINGTON (OCT 30) - World Bank donor countries and other international aid organizations have pledged from 7.5 to eight billion dollars in cofinancing for drought and famine-stricken Sub Saharan Africa, a World Bank executive said Tuesday.

Edward Jaycox, World Bank Vice President for Africa, said the funds were pledged at a meeting Tuesday marking the second phase of the Special Program of Assistance begun in 1987.

The pledge represents an increase of two billion dollars over the amount pledged for the first phase of the program (1988-90) and will be committed over a three period starting in 1991.

The program provides some 21 low-income, highly indebted countries of Sub-Saharan Africa with financial aid for economic reforms and long-term development programs.

The funds were pledged at a meeting here of donor countries and international aid organizations including the International Monetary Fund, the European Investment Bank, U.N. Development Program, African Development Bank.

SINGAPORE (OCT. 31) - Divers from the Singapore navy found nine bombs Wednesday on the seabed in a channel between the holiday island of Sentosa and Pulau Brani near the Straits of Singapore, officials said.

The latest find brings to 15 the number of bombs uncovered by divers from the Singapore navy since the first batch of six bombs was located last Sunday during a routine training operation.

The relics are believed to be Japanese aerial bombs of World War II, with the biggest weighing up to 500 lbs.

Defense Spokesman Colonel Kwan Yue Yeong said the navy would continue to make periodic sweeps of the channel to ensure that the area is safe. Sentosa attracts thousands of foreign tourists each year.

-30- 896

#90303d8050 10/30/1990 ~French/German News Agency

WASHINGTON (OCT. 31) - Amateur astronomers have found a U.S. spy satellite this month that was thought to have disintegrated after suffering catastrophic failure shortly after it was launched in March.

Four observers independently spotted the 500-million-dollar photo reconnaissance satellite, whose mission was to spy on the Soviet Union, said Ted Molczan of Toronto.

He said he tracked the satellite, which three other amateur astonomers had also spotted about 800 kilometers (500 miles) above earth.

The shuttle Atlantis launched the probe March 1 but the Soviet news agency Novosti reported March 7 that fragments presumably from the satellite were spotted in orbit and it assumed the probe had "been blown up by its owners for some unknown reasons."

The Defense Department had insisted Atlantis achieved its goal -- without specifying what that meant -- but said two parts "associated with" the payload had entered Earth's atmosphere and burned up and the rest was expected to disintegrate.

Florida Today first reported the reappearance of the satellite.

Mr. Molczan said the probe likely disappeared for so long because of a change in orbital inclination and altitude made it difficult to follow. He believes the satellite was boosted into a higher orbit and three degrees higher in inclination soon after the shuttle released it.

NICOSIA (OCT. 30) - Iraqi President Saddam Hussein met Tuesday with his Armed Forces general command to discuss "preparations for urban warfare in the province of Kuwait", the Iraqi news agency INA reported.

INA quoted Saddam, who is commander-in-chief of the Armed Forces, as saying it was necessary to "remain on a state of alert and preparation in the face of the treacherous intentions of the U.S. enemy and its allies over the next few days".

INA said the president "has asked Iraqis to prepare with all their forces and capabilities to face aggression against Iraq and its glory".

Tuesday's meeting was attended by the ministers of information, defence and military industrialisation and Iraqi officials in charge of security in occupied Kuwait.

Iraq invaded and annexed its tiny oil-rich neighbor Kuwait almost three months

ago and a multi-national force led by the United States is deployed in the Gulf in an effort to persuade Saddam to withdraw from the emirate.

#90303e0035 10/30/1990 ~Latin America New Agency

MOSCOW (OCT. 30) EFE - For the first time since the birth of the Soviet Union the Communist Party's politburo will not review next month's annual Revolution Day parade from the stand of honor above Lenin's mausoleum, Moscow city officials said Tuesday.

"The 73rd anniversary of the great October 25 Revolution is to be commemorated under unusual circumstances and its celebration has been organized differently " Moscow city Communist Party boss Yuri Prokofiev told a press conference.

He said only leaders of the parliaments and governments of the USSR and the Russian Federation have been invited to review the parade from atop the Bolshevik leader's tomb.

Prokofiev said the changes to the November 7 parade were due to the "diverse opinions that exist in society over the history and future" of the Soviet Union and because "today the communists in the capital are practically the opposition".

Prokofiev said the parade's organizing committee guest list includes President Mikhail Gorbachev and radical Russian Federation leader Boris Yeltsin.

But it is believed that Yeltsin will decline to stand beside Gorbachev during the celebration after Yeltsin slammed Soviet president for his "timid, conservative path" towards economic reforms.

Moscow Mayor Gavril Popov was also expected to be a no-show at the stand of honor. Popov last month urged city leaders to cancel the parade "so as not to divide society even more".

NEW DELHI (OCT. 30) XINHUA - INDIA'S UNFAVORABLE BALANCE OF PAYMENTS (BOP) MAY INCREASE BY 36.5 PERCENT TO 100 BILLION RUPEES (5.88 BILLION U.S. DOLLARS) DUE TO THE GULF CRISIS, LOCAL PRESS REPORTED TODAY QUOTING A GOVERNMENT OFFICIAL.

THE GULF CRISIS HAS CAUSED A RISE IN PRICES OF OIL AND PETROLEUM PRODUCTS AND FALL IN OVERSEAS INDIAN'S REMITTANCES, AS WELL AS ADDITIONAL EXPENDITURE FOR BRINGING BACK THE INDIANS IN KUWAIT OCCUPIED BY IRAQ IN AUGUST.

ADDRESSING A SEMINAR ON "CHALLENGES OF INTERNATIONAL TRADE" IN MADRAS ON MONDAY, DR G. SUNDARAM, ADDITIONAL SECRETARY TO THE MINISTRY OF COMMERCE, SAID "ANY ASSESSMENT OF THE DIMENSIONS OF THE IMPACT ON OUR BOP IS SUBJECT TO TREMENDOUS UNCERTAINTIES WITH RESPECT TO HOW SOON THE GULF CRISIS WILL BE RESOLVED AND IN WHAT MANNER."

DR SUNDARAM SAID BEFORE THE CRISIS, INDIA PAID 2,660 MILLION U.S. DOLLARS FOR CRUDE OIL IMPORTS AND 1980 MILLION U.S. DOLLARS FOR PETROL AND RELATED PRODUCTS. BUT, WITH PRICES RISING TO 40 U.S. DOLLARS PER BARREL FROM 18 DOLLARS, INDIA HAS TO PAY MUCH MORE THAN THAT, HE ADDED.

ACCORDING TO THE 1988-89 RESERVE BANK OF INDIA ESTIMATES, HE SAID, TOTAL PRIVATE TRANSFER RECEIPTS (REMITTANCES) STOOD AT 2,350 MILLION U.S. DOLLARS, OF WHICH 1,060 MILLION U.S. DOLLARS (45 PER CENT) CAME FROM WEST ASIA. ABOUT 200 MILLION U.S. DOLLARS CAME FROM KUWAIT ALONE.

"ASSUMING THAT A SIMILAR GEOGRAPHICAL DISTRIBUTION OF REMITTANCE FOLLOWS FOR THE 12-MONTH PERIOD AHEAD, IT IS CLEAR THAT AT LEAST 200 MILLION U.S. DOLLARS WILL NO LONGER BE FORTHCOMING," HE SAID.

SUNDARAM SAID THE GULF CRISIS HAD ALSO AFFECTED VARIOUS EXPORT SECTORS, PARTICULARLY THE GEMS AND JEWELLERY SECTOR, AS WEST ASIA WAS A MAJOR MARKET FOR THIS.

BEIJING (OCT. 30) XINHUA - THE PAYROLL OF CHINESE EMPLOYEES CLIMBED BY 10.6 PERCENT TO 197.3 BILLION YUAN IN THE FIRST THREE QUARTERS OF THIS YEAR, ACCORDING TO THE STATE STATISTICS BUREAU HERE TODAY.

DEDUCTING THE PRICE HIKE FACTOR, THE ACTUAL INCREASE IN PAY STOOD AT 9.5 PERCENT -- THE HIGHEST GROWTH RATE SINCE 1987, ACCORDING TO THE STATISTICS.

THE PAY INCREASE WAS ASCRIBED TO THE WAGE INCREASE MEASURES ADOPTED BY THE CHINESE GOVERNMENT.

THE FIRST QUARTER SAW A GROWTH OF EIGHT PERCENT, THE SECOND QUARTER, 10.9 PERCENT AND THE THIRD QUARTER, 12.6 PERCENT.

-30- 721
#90303h0079 10/30/1990 ~Chinese News Agency
NEW DELHI (OCT. 30) XINHUA - A BOLD, INNOVATIVE AND LONG-TERM STRATEGY SHOULD BE ADOPTED BY THE INDIAN GOVERNMENT TO STEP UP ITS AGRO-EXPORTS, INCLUDING PROCESSED FOODS, TO ACHIEVE THE TARGET OF 150 BILLION RUPEES (8.82 BILLION U.S. DOLLARS) BY 1995.

INDIA'S PRESENT LEVEL OF AGRICULTURAL EXPORTS IS ABOUT 28 BILLION RUPEES (1.64 BILLION US DOLLARS).

THE PROPOSAL WAS MADE BY THE ASSOCIATED CHAMBERS OF COMMERCE AND INDUSTRY OF INDIA, IN A BACKGROUND PAPER PREPARED FOR A SEMINAR ON INDUSTRY-AGRICULTURE LINKAGES TO BE HELD HERE ON NOVEMBER 1.

ACCORDING TO THE PAPER, THE STRATEGY SHOULD AIM AT CREATING AN IMAGE OF INDIA AS A RELIABLE EXPORTER. ITS AGRO-EXPORTS SHOULD NOT BE DEPENDENT ON AVAILABILITY OF SURPLUS BUT MUST BE CONTINUED EVEN WHEN THERE IS SHORTFALL IN DOMESTIC PRODUCTION.

THIS CAN BE DONE THROUGH TEMPORARY IMPORTS OF THE PARTICULAR COMMODITY IN SHORT SUPPLY FOR DOMESTIC CONSUMPTION WITHOUT AFFECTING EXPORTS, IT SAID.

THIS POLICY IS ALREADY FOLLOWED IN INDIA AT PRESENT IN RESPECT OF SUGAR AND RICE, BUT NEEDS TO BE EXTENDED TO MORE ITEMS, THE PAPER ADDED.

FOR INSTANCE, IT SAID, LOW VALUE TEA CAN BE IMPORTED FOR MEETING THE DOMESTIC DEMAND SHOULD INDIA'S TEA PRODUCTION SUFFER A SETBACK, WITHOUT CURTAILING THE EXPORT OF HIGH QUALITY TEA OR ITS BLENDS.

IN ORDER TO PROMOTE MEAT AND POULTRY EXPORTS, THE PAPER SAID, DISEASE-FREE DISTRICTS SHOULD BE IDENTIFIED TO GIVE CONFIDENCE TO IMPORTING COUNTRIES. SUBSIDY SHOULD BE PROVIDED FOR POULTRY FARMING TO MAKE EGG AND CHICKEN EXPORTS

COMPETITIVE.

IN THE AREA OF MARINE PRODUCTS, HARBORS ON COASTS SHOULD BE MODERNIZED. SIMILARLY, INPUTS FOR FISH CAPTURE HAVE TO BE TECHNOLOGICALLY UPGRADED, IT SUGGESTED.

#90303h0083 10/30/1990 ~Chinese News Agency

TIANJIN (OCT. 30) XINHUA - TIANJIN, A LEADING PORT CITY IN NORTH CHINA, EXPORTED 1.38 BILLION U.S. DOLLARS WORTH OF GOODS BY OCTOBER 20 THIS YEAR, A 9.3 PERCENT INCREASE OVER THE SAME PERIOD OF LAST YEAR.

TRADITIONAL ITEMS OF FARM PRODUCE AND NATIVE PRODUCTS KEPT RISING MOMENTUM WHILE THE EXPORTS OF MANUFACTURED GOODS SUCH AS LEATHER SHOES, AUTOMOBILE AND MEDICAL INSTRUMENTS INCREASED CONSIDERABLY.

THE CITY GIVES PRIORITY TO MANUFACTURED INDUSTRIAL AND MARKETABLE PRODUCTS AND MACHINERY AND ELECTRIC PRODUCTS IN EXPORT IN THE WAKE OF A READJUSTMENT OF PRODUCT-MIX EARLIER THIS YEAR.

MEANWHILE, THE TIANJIN MUNICIPAL FOREIGN TRADE DEPARTMENT ATTACHED GREAT IMPORTANCE TO QUALITY OF EXPORTED PRODUCTS AND FAITHFULLY KEPT TO CONTRACTS. AS A RESULT, NO FOREIGN CUSTOMERS CLAIMED INDEMNITY SO FAR.

-30- 967

#90303h0115 10/30/1990 ~Chinese News Agency

TIANJIN (OCT. 30) XINHUA - TIANJIN MUNICIPALITY EARNED 5.68 MILLION U.S. DOLLARS FROM THE EXPORT OF 624 TONS OF ESSENCE AND SPICES IN THE FIRST NINE MONTHS THIS YEAR, ACCORDING TO SOURCES FROM THE MUNICIPAL GROUP COMPANIES OF ESSENCE AND SPICES.

THE 624 TONS OF EXPORTED PRODUCTS MARKED A 10.25 PERCENT INCREASE OVER THE SAME PERIOD LAST YEAR, WHILE THE MONEY EARNED INCREASED DRAMATICALLY BY 23 PERCENT.

IN ADDITION, THE TIANJIN MUNICIPAL GROUP COMPANIES OF ESSENCE AND SPICES HAS SIGNED CONTRACTS WORTH 4.33 MILLION U.S. DOLLARS FOR THIS YEAR WITH BUSINESSMEN FROM THE UNITED STATES, SWITZERLAND AND OTHER COUNTRIES.

LIMA (OCT. 30) XINHUA - PERU AND THE UNITED STATES HAVE DECIDED TO FORM MIXED TEAMS OF ANTI-NARCOTICS EXPERTS IN ORDER TO DEVELOP AN EFFECTIVE AND COMPREHENSIVE ANTI-DRUG STRATEGY, A U.S. OFFICIAL SAID MONDAY.

MELVIN LEBINSKI, U.S. ACTING SECRETARY FOR NARCOTICS AFFAIRS WHO MET WITH PERUVIAN PRESIDENT ALBERTO FUJIMORI MONDAY AT THE GOVERNMENT PALACE, SAID THE TWO COUNTRIES HAVE SIMILAR STRATEGIES TO FIGHT AGAINST DRUG TRAFFICKING AND SO THE UNITED STATES DECIDED TO GIVE PERU THE HELP IT NEEDS TO COMBAT THE TRADE.

THE TWO NOW PLAN TO FORMULATE A NEW STRATEGY WHICH WILL COMPRISE THE POLITICAL AND MILITARY ASPECTS OF FIGHTING THE ILLICIT TRADE, AS WELL AS KEEP TIGHT CONTROLS ON THE USE OF CHEMICALS AND LAUNCH A THOROUGH INVESTIGATION INTO DRUG MONEY LAUNDERING, HE SAID.

LEBINSKI SAID HE WAS OPTIMISTIC ABOUT PERU'S ANTI-DRUG TRAFFICKING PROPOSAL, ADDING THAT THE UNITED STATES HAS A SUBSTANTIAL ECONOMIC AND MILITARY AID PACKAGE FOR ALL COCA PRODUCING COUNTRIES, INCLUDING PERU.

BEIJING (OCT. 30) XINHUA - CHINA'S TOURISM CONTINUES TO REBOUND WITH TOURIST ARRIVALS IN SEPTEMBER REACHING 2.19 MILLION, UP 56.3 PERCENT OVER THE SAME PERIOD LAST YEAR, OR 80.1 PERCENT OF THE 1988 RECORD FIGURE FOR THE SAME PERIOD.

ACCORDING TO THE LATEST STATISTICS FROM THE NATIONAL TOURISM ADMINISTRATION, THIS NUMBER INCLUDED 175,000 FOREIGNERS, UP 59.9 PERCENT OVER THE SAME PERIOD LAST YEAR.

TOTAL TOURIST ARRIVALS FOR JANUARY THROUGH SEPTEMBER AMOUNTED TO 20.22 MILLION UP 11.6 PERCENT OVER LAST YEAR'S SAME PERIOD. THIS FIGURE INCLUDED 1.23 MILLION FOREIGN TOURISTS.

THE FOREIGN CURRENCY EARNED FROM TOURISM IN THE FIRST THREE QUARTERS OF THIS YEAR AMOUNTED TO 1.56 BILLION U.S. DOLLARS. THIS WAS 12 PERCENT MORE THAN THE SAME PERIOD LAST YEAR, OR 98.1 PERCENT OF THE FIGURE FOR THE SAME PERIOD IN 1988.

THE AMOUNT EARNED THUS FAR ACCOUNTS FOR 78 PERCENT OF THIS YEAR'S TARGET OF 2 BILLION SET AT THE BEGINNING OF THE YEAR.

IN SEPTEMBER, TOURISTS FROM JAPAN, BRITAIN, FEDERAL GERMANY, AND ITALY INCREASED BY A MARGIN OF MORE THAN 50 PERCENT OVER 1989, WHILE TOURISTS FROM THE PHILIPPINES AND THE SOVIET UNION SURPASSED THE 1988 FIGURES.

JAPAN HAD THE GREATEST NUMBER OF TOURISTS TO CHINA IN THE FIRST THREE QUARTERS OF THE YEAR, FOLLOWED BY THE UNITED STATES, THE SOVIET UNION, SINGAPORE, THE PHILIPPINES, THAILAND, BRITAIN, AUSTRALIA, FEDERAL GERMANY AND FRANCE.

NEW DELHI (OCT. 30) XINHUA - THE ASIAN DEVELOPMENT BANK (ADB) WILL INCREASE ITS DEVELOPMENT ASSISTANCE TO INDIA BY OVER 40 PERCENT FROM LAST YEAR'S 498 MILLION U.S. DOLLARS, ADB PRESIDENT M.K. TARUMIZU SAID TODAY.

TARUMIZU, WHO IS VISITING DHAKA, TOLD THE PRESS TRUST OF INDIA THAT THE ASSISTANCE WOULD BE BASICALLY FOR INDUSTRIAL DEVELOPMENT AND REMOVAL OF CONSTRAINTS IN SECTORS SUCH AS TRANSPORT AND POWER.

REPLYING TO A QUESTION, TARUMIZU SAID THE ECONOMIC SITUATION IN INDIA IS NOT EASY PARTICULARLY IN VIEW OF THE DEVELOPMENTS IN THE MIDDLE EAST.

ASKED ABOUT THE ADB'S ROLE FOLLOWING THE GULF CRISIS, TARUMIZU SAID A SPECIAL COMMITTEE HAD BEEN SET UP TO ASSESS ITS IMPACT ON MEMBER COUNTRIES, PARTICULARLY IN REGARD TO THE BALANCE OF PAYMENT POSITION.

THE ADB PROPOSED TO ASSIST MEMBER COUNTRIES IN COOPERATION WITH OTHER INTERNATIONAL ORGANIZATIONS LIKE THE WORLD BANK AND THE INTERNATIONAL MONETARY FUND, HE SAID.

THE ADB PRESIDENT ALSO ASSURED FURTHER ASSISTANCE TO BANGLADESH. HE SAID THIS YEAR'S ASSISTANCE TO BANGLADESH IS EXPECTED TO RISE TO 400 MILLION U.S. DOLLARS FROM THE PRESENT 339 MILLION U.S. DOLLARS.

#90303k0013 10/30/1990 ~Japanese News Agency

TOKYO (OCT. 30) KYODO - A GOVERNMENT ADVISORY PANEL URGED THE GOVERNMENT ON TUESDAY TO INTRODUCE A NEW TAX ON LAND HOLDINGS IN ORDER TO BRING DOWN JAPAN'S ABSURDLY HIGH LAND PRICES AND TO PUT A BRAKE ON THE WIDENING GAP BETWEEN THE HAVES AND THE HAVE-NOTS.

THE TAX SYSTEM COUNCIL, AN ADVISORY BODY TO THE PRIME MINISTER, SAID IN A RECOMMENDATION THAT TOGETHER WITH THE NEW TAX, TENTATIVELY CALLED THE ''LAND HOLDING TAX,'' THE GOVERNMENT SHOULD CARRY OUT OTHER TAX REFORMS, INCLUDING HEAVIER TAXES ON LAND TRANSACTIONS AND FARMLAND IN COMMERCIAL AREAS.

THE RECOMMENDATION, SUBMITTED TO PRIME MINISTER TOSHIKI KAIFU, HAS LAID THE GROUNDWORK FOR THE GOVERNMENT'S LAND POLICY REFORM, ALONG WITH A REPORT PUBLISHED BY THE LAND POLICY COUNCIL, ANOTHER GOVERNMENTAL BODY, EARLIER IN THE DAY.

TERMING THE INFLATED LAND PRICES IN JAPAN ''ONE OF THE MOST SIGNIFICANT TASKS FACING THE COUNTRY AT PRESENT,'' THE COUNCIL SAID THE LAND PRICE SPIRAL HAS HELPED WIDEN THE ASSET GAP AMONG THE PEOPLE, DISCOURAGING WORKERS WHO CANNOT OWN THEIR LAND AND THUS THREATENING JAPAN'S ECONOMIC PROSPERITY.

JAPAN'S LAND PRICES ARE SO HIGH THAT THE MAJORITY OF PEOPLE CANNOT BUY LAND EVEN IF THEY WORK HARD FOR MOST OF THEIR LIVES.

DEFINING THE LAND HOLDING TAX, TO BE INTRODUCED AT THE BEGINNING OF FISCAL 1992, THE COUNCIL SAID THE NEW TAX SHOULD BE LEVIED ON BOTH COMMERCIAL AND RESIDENTIAL LANDS IN ACCORDANCE WITH THE VALUE OF THE PROPERTIES.

THE COUNCIL BELIEVES THAT SUCH TAXATION WILL MAKE IT COSTLY TO OWN LAND, DISCOURAGING LAND OWNERSHIP FOR SPECULATION AND PREVENTING FURTHER ASSET INFLATION.

BUT THE COUNCIL DECIDED THAT LANDS USED FOR HOUSING OR PUBLIC PURPOSES BE FREE OF TAXES AND THAT BASIC DEDUCTIONS BE ALLOWED ON LANDS WHOSE VALUE IS BELOW A CERTAIN LEVEL.

ANALYSTS SAID THAT AS A RESULT OF THESE LOOPHOLES, THE PROPOSED NEW TAX IS CONSERVATIVE COMPARED WITH THE ORIGINALLY PLANNED ACROSS-THE-BOARD TAXATION.

SINCE THE TAX SHELTERS WILL KEEP MOST PERSONAL LANDOWNERS EXEMPTED FROM THE NEW TAX, THE TAX REVENUE, PART OF WHICH WILL BE RECYCLED IN THE FORM OF REDUCED INCOME AND CORPORATE TAXES, SHOULD FAIL TO REACH 1 TRILLION YEN, THE ANALYSTS SAID.

THE COUNCIL ALSO RECOMMENDED THAT FROM FISCAL 1991, BEGINNING APRIL 1 OF THAT YEAR, THE GOVERNMENT REVIEW EXISTING LAND TAXES, AND IMPOSE STIFFER TAXATION ON FARMLAND.

URBAN FARMERS CURRENTLY ENJOY LOWER FIXED-ASSET TAX RATES AND EXEMPTIONS FROM INHERITANCE TAX, PRIVILEGES PARTLY RESPONSIBLE FOR THE SHORTAGE OF RESIDENTIAL LAND IN BIG CITIES.

ON THE BASIS OF THE RECOMMENDATION, A TAX COMMISSION UNDER THE RULING LIBERAL DEMOCRATIC PARTY (LDP) WILL FINALIZE THE LAND POLICY REFORM PLAN BY THE END OF NOVEMBER, AFTER WORKING OUT THE RATE AND SCOPE OF THE LAND HOLDING TAX AND OTHER DETAILS.

BUT THE ANALYSTS SAID THE PLANNED REFORMS COULD BE IN FOR A ROUGH RIDE, SINCE THE PROPOSED NEW TAX IS ALREADY UNDER STRONG CRITICISM FROM BUSINESSES, LOCAL GOVERNMENTS, AND EVEN ELEMENTS WITHIN THE LDP.

TOKYO (OCT. 30) KYODO - IN AN IRONIC DEVELOPMENT FOR THE OWNER OF JAPAN'S FIVE BIGGEST STOCK EXCHANGES, HEIWA REAL ESTATE CO. WILL WITHDRAW FROM STOCK INVESTMENT AFTER TAKING MASSIVE LOSSES IN THE VALUE OF ITS HOLDINGS, COMPANY OFFICIALS SAID.

THE OFFICIALS SAID THE COMPANY PLANS TO SELL STOCK HOLDINGS WORTH ABOUT 2.56 BILLION YEN IN THE SECOND HALF OF FISCAL 1990 IN ORDER TO PREVENT FURTHER DEFLATION OF ITS STOCK HOLDINGS.

SO FAR THIS YEAR, THE COMPANY HAS POSTED MORE THAN 1 BILLION YEN IN APPAISAL LOSSES IN THE VALUE OF ITS 4.1 BILLION YEN STOCK AND BOND HOLDINGS DUE TO THE STOCK MARKET SLUMP.

WEIGHED DOWN BY THE LOSSES, THE REAL ESTATE DEVELOPER IS EXPECTED TO SEE ITS PRETAX PROFITS FOR FISCAL 1990 SLASHED BY 5.1 PERCENT FROM A YEAR EARLIER.

A COMPANY OFFICIAL SAID HEIWA WILL SHIFT ITS MONEY FOR STOCK INVESTMENT TO MORE STABLE FINANCIAL INSTRUMENTS SUCH AS LARGE-LOT TIME DEPOSITS.

THE TOKYO-BASED COMPANY, OWNER OF THE STOCK EXCHANGE BUILDINGS IN TOKYO, OSAKA NAGOYA, KYOTO, AND FUKUOKA, SECURES MOST OF ITS PROFITS THROUGH RENTS FROM SUCH BUILDINGS.

-30- 1275

#90303k0073 10/30/1990 ~Japanese News Agency

TOKYO (OCT. 30) KYODO - DAIWA SECURITIES CO. AND NIKKO SECURITIES CO., BOTH SAID TUESDAY THAT THE SWISS FEDERAL BANKING COMMISSION HAS PERMITTED TO GRANT THEIR SUBSIDIARIES BANKING LICENSES.

THE DECISION TO APPLY FOR SUCH LICENSES WAS PROMPTED BY AN AMENDMENT TO THE SWISS BANKING LAW, EFFECTIVE NEXT JANUARY, WHICH FORBIDS BROKERAGES TO UNDERWRITE SECURITIES WITHOUT THEM.

UPON RECEIVING THE LICENSES, THE FIRMS WILL BE PERMITTED TO DEAL IN FOREIGN EXCHANGE, OFFICIALS FROM THE TWO BROKERAGES SAID.

THE LICENSES WILL ALSO GIVE THEM MEMBERSHIP IN THE SWISS SECURITIES CLEARING CO., WHICH WILL ALLOW THEM TO ENTER THE INVESTMENT TRUST FUND MANAGEMENT BUSINESS, THEY SAID.

NOMURA SECURITIES CO. AND YAMAICHI SECURITIES CO., THE OTHER TWO OF JAPAN'S ''BIG FOUR'' BROKERAGE HOUSES, HAVE EARLIER BEEN GRANTED SUCH LICENSES.

BUT SWITZERLAND HAD FROZEN THE GRANTING OF LICENSES TO OTHER JAPANESE BANKS AND SECURITIES FIRMS FOR ABOUT A YEAR AND HALF ON THE GROUNDS THAT JAPAN HAS BEEN SLOW IN LIBERALIZING ITS FINANCIAL MARKETS.

-30- 1205

#90303k0076 10/30/1990 ~Japanese News Agency

KUALA LUMPUR (OCT. 30) KYODO - SONY CORP. CHAIRMAN AKIO MORITA WARNED

MALAYSIAN BANKERS TUESDAY THAT THEY SHOULD AVOID THE TEMPTATION OF SEEKING QUICK PROFITS ON FINANCIAL MARKETS AND INVEST INSTEAD IN THE NATION'S ABILITY TO MANUFACTURE QUALITY PRODUCTS.

"IT MAY BE AN OVERSIMPLIFICATION BUT THE FUTURE OF A NATION WILL BE SHAPED BY ITS ABILITY TO PRODUCE PLANES, CARS, ELECTRONICS, HIGH TECHNOLOGY, AND SO FORTH. NOT BY HOW SLICK ITS FINANCIAL MARKETS CAN SHUFFLE AND EXPLOIT PAPER ASSETS," HE SAID AT A LECTURE ORGANIZED BY THE MALAYSIAN ASSOCIATION OF BANKERS.

MORITA MANUFACTURING IS IMPORTANT AS IT IS "FUNDAMENTAL TO ANY NATION OR ECONOMY" AND REGRETTED THAT "MANY OF THE SHARPEST YOUNG BUSINESS MINDS ARE BEING SWEPT UP IN THIS FRANTIC BUY-SELL FEVER."

THIS "WORRISOME TREND" IS "SAPPING THE STRENGTH AND BLURRING THE FOCUS OF THE ECONOMY," SAID MORITA, WHO IS ALSO VICE-CHAIRMAN OF THE FEDERATION OF ECONOMIC ORGANIZATIONS OF JAPAN.

HE SAID THE SECURITIES AND BANKING INDUSTRY, WHICH USED TO PRIMARILY SUPPORT MANUFACTURING AND OTHER PRODUCTION BUSINESSES, "HAS BECOME AN END UNTO ITSELF: MAKING MONEY BY MOVING IT AROUND, BUYING COMPANIES AND THEN BREAKING THEM APART."

MORITA IS WELL-KNOWN IN MALAYSIA. HIS BOOK, "MADE IN JAPAN" WAS A BESTSELLER HERE A FEW YEARS AGO. FAMOUS WORLDWIDE FOR DEVELOPING THE SONY WALKMAN, MORITA ALSO CO-AUTHORED ANOTHER BOOK ENTITLED, "A JAPAN THAT CAN SAY NO."

MORITA ALSO SAID CAPITAL SHOULD BE INVESTED TO SUPPORT NEEDED RESEARCH AND DEVELOPMENT FOR THE CREATION OF NEW PRODUCTS.

AS RESEARCH AND DEVELOPMENT IS GETTING MORE EXPENSIVE, MORITA SUGGESTED THAT COMPANIES WORLDWIDE, EVEN COMPETITORS, SHOULD COOPERATE TO CUT COSTS.

SONY AND PHILIPS NV OF THE NETHERLANDS, TWO OF THE WORLD'S LARGEST ELECTRONICS MANUFACTURERS, CODEVELOPED THE WORLD'S FIRST DIGITAL RECORDING DISC TECHNOLOGY WHICH LED TO CURRENT COMPACT DISC SYSTEMS. OTHER COMPANIES CAN FOLLOW SUIT, HE SAID.

ON A BROADER SCALE, HE PROPOSED A MULTILATERAL ROUNDTABLE OF NATIONS TO IDENTIFY AND DISCUSS TRENDS ON HOW A NEW MARKET OR TECHNOLOGY WILL DEVELOP SO THAT EACH COMPANY CAN INDEPENDENTLY PLAN INVESTMENTS IN RESEARCH AND DEVELOPMENT FOR THE FUTURE.

HE SAID A BILATERAL ECONOMIC COMMUNITY/JAPAN CONSUMER ELECTRONICS ROUNDTABLE, ESTABLISHED IN 1982, THAT ALLOWS INDUSTRY MEMBERS DISCUSS LONG RANGE OUTLOOKS FOR BUSINESS AND TECHNOLOGY, IS A WORKABLE MODEL.

"I BELIEVE WE CAN BUILD A ROUNDTABLE BIG ENOUGH TO SEAT US ALL," HE SAID.

ASKED WHY SONY BOUGHT COLUMBIA PICTURES ENTERTAINMENT, MORITA SAID IT IS LOGICAL TO HAVE BOTH THE SOFTWARE AND THE HARDWARE FOR AUDIO-VISUAL PRODUCTS.

HE SAID SONY INITIALLY HAD PROBLEMS SELLING ITS COMPACT DISCS BECAUSE MUSIC WAS MAINLY RECORDED ON LONG-PLAYING RECORDS.

SONY ONLY MADE PROGRESS AFTER IT PROVIDED MUSIC IN COMPACT DISCS THROUGH A JOINT VENTURE WITH CBS INC. OF THE U.S., HE SAID.

HE SAID COLUMBIA PICTURES ENTERTAINMENT WILL PROVIDE THE SOFTWARE FOR THE AUDIO-VISUAL LASER DISC THAT SONY IS NOW DEVELOPING.

AFTER THE LUNCHEON LECTURE, MORITA LEFT FOR THE NORTHERN ISLAND OF PENANG TO VISIT ONE OF SONY'S FIVE FACTORIES IN MALAYSIA.

TOKYO (OCT. 30) KYODO - NEC CORP., FUJITSU LTD., AND OCEAN CABLE CO., SAID TUESDAY THEY HAVE SIGNED A CONTRACT IN BRUNEI TO SET UP AN UNDERWATER OPTICAL CABLE SYSTEM LINKING FOUR MEMBERS OF THE ASSOCIATION OF SOUTHEAST ASIAN NATIONS (ASEAN).

THE UNDERWATER CABLE WILL LINK BRUNEI, SINGAPORE, MALAYSIA, AND THE PHILIPPINES, THE FIRM OFFICIALS SAID.

CONSTRUCTION OF THE CABLE LINKING BRUNEI AND SINGAPORE IS EXPECTED TO BE COMPLETED IN LATE NOVEMBER, 1991. THE LINE LINKING BRUNEI, MALAYSIA, AND THE PHILIPPINES IS EXPECTED TO BE COMPLETED IN LATE JANUARY 1992.

THE TWO LINES WILL EACH BE APPROXIMATELY 1,500 KILOMETERS LONG. THE LINES WILL HAVE AN INFORMATION CAPACITY OF 560 MEGABITS PER SECOND, THEY SAID. ONE MEGABIT IS EQUAL TO 1 MILLION BITS.

THE TELEPHONE CIRCUIT WILL HAVE A CAPACITY OF ABOUT 15,000 CIRCUITS, THE LARGEST IN SOUTHEAST ASIA, THEY SAID.

-30- 1056

#90303k0094 10/30/1990 ~Japanese News Agency

SINGAPORE (OCT. 30) KYODO - SINGAPORE'S ARMED FORCES WILL HOLD AN AIR DEFENSE ARTILLERY EXERCISE IN AUSTRALIA FOR TWO WEEKS STARTING OCTOBER 5, THE STATE-RUN SINGAPORE BROADCASTING CORPORATION REPORTED TUESDAY.

SOME 63 SOLDIERS FROM THE 165TH BATTALION OF SINGAPORE'S AIR DEFENSE ARTILLERY WILL TAKE PART IN THE EXERCISE, CODENAMED NULLA NULLA II, THE STATION SAID.

THE EXERCISE, WHICH IS THE SECOND IN THE NULLA NULLA SERIES, WILL INVOLVE SINGAPORE'S RAPIER GROUND TO AIR MISSILES AND LIVE AMMUNITION AT PORT WAKEFIELD, SOUTHERN AUSTRALIA.

AUSTRALIA HAS ALLOWED THE REPUBLIC'S ARMED FORCES TO USE SOME OF ITS TRAINING AREAS SINCE 1975.

#90303k0095 10/30/1990 ~Japanese News Agency

TOKYO (OCT. 30) KYODO - JAPAN IS TAKING A "CAUTIOUS" STANCE TOWARD A CHINESE PROPOSAL THAT CHINA AND JAPAN JOINTLY DEVELOP THE SENKAKU ISLANDS CLAIMED BY THE TWO COUNTRIES, AS WELL AS BY TAIWAN, A FOREIGN MINISTRY SPOKESMAN SAID TUESDAY.

IN A MEETING WITH FOREIGN CORRESPONDENTS, TAIZO WATANABE SAID JAPAN IS TRYING TO RESPOND "CAUTIOUSLY," BASED ON THE FUNDAMENTAL POSITION THAT THE ISLANDS ARE JAPANESE TERRITORY.

CHINA'S VICE FOREIGN MINISTER QI HUAIYUAN PROPOSED IN A MEETING SATURDAY WITH JAPANESE AMBASSADOR TO CHINA HIROSHI HASHIMOTO THAT THE TWO COUNTRIES BEGIN TALKS ON JOINTLY DEVELOPING THE POTENTIALLY OIL-RICH AREA AROUND THE ISLAND GROUP.

FOREIGN MINISTRY SOURCES SAID JAPAN HAS SO FAR NOT PUSHED AHEAD WITH EXPLORATION OF THE SURROUNDING SEABED DUE TO THE ISSUE'S POLITICAL SENSITIVITY.

THE SOURCES SAID THE IDEA OF JOINT DEVELOPMENT, WHICH HAS BEEN PROPOSED BY CHINA IN THE PAST, CARRIES THE POTENTIAL FOR UNDERMINING THE LEGITIMACY OF JAPAN'S CLAIM TO THE ISLANDS, WHICH LIE SOME 190 KILOMETERS NORTH OF TAIWAN.

THE SOVIET UNION HAS LONG BEEN CALLING ON JAPAN TO AGREE TO A JOINT DEVELOPMENT SCHEME FOR FOUR ISLANDS, CLAIMED BY JAPAN, WHICH LIE NORTHEAST OF HOKKAIDO.

BUT JAPAN HAS REJECTED THE SOVIET PROPOSALS ON THE GROUNDS THEY DO NOT ENTAIL A RECOGNITION OF JAPANESE SOVEREIGNTY OVER THE ISLANDS.

#90303m0001 10/30/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 30) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

The COMMERCE DEPARTMENT reports that the Gross National Product for the third quarter rose 1,8%. Analysts expected it to expand at an inflation-adjusted rate of 0.8% up from the second quarter rate of 0.4%.

It is a down day for world stocks. ... The Nikkei loses 87 points while the FTSE has slumped 21 points at midday. ... Bonds continue lower with the yield on the long Treasury at 8.83%. The dollar is mixed. ... Crude oil keeps moving higher with Brent crude up 40 cents to $34.70. ... The FEDERAL RESERVE lowered a key short-term interest rate by a quarter of a percentage point in response to the deficit reduction package's passage. ... The SEC has ordered mutual funds with "guaranteed" or "insured" in their names to remove those words. sluggish economy cuts into the management consulting concern's business. ... NATIONAL GYPSUM and its parent AANCOR sought Chapter 11 protection because they couldn't find a lender to replace an expiring line of credit. ... AST unveiled a line of personal computers featuring Intel's powerful 486 chip at about half the price of similar models sold by competitors. ... BOEING reports a 56% gain in third-quarter net income.

WHAT'S AHEAD:

Figures for September new home sales are set for release at 10 a.m. EST. They are expected to have weakened further to a seasonally adjusted annual rate of 542,000 units, which would be 1.5% below August's 550,000 unit rate. ... PEPSICO plans to combine its fast- growing restaurants abroad with its more mature domestic chains. ... GENERAL MOTORS intends to idle at least 11 of its 29 U.S. assembly plants in November.

FROM THE BEARS:

"If the market doesn't react favorably to good news, you'll see how it's going to react to the next spate of bad news," says ROBERT STOVALL of STOVALL/TWENTY-FIRST ADVISERS. He says that Wall Street was so "disenchanted" with the budget process that it was not going to react favorably to any news. He says the budget process was like "an enormous elephant laboring to produce an offspring and out comes a mouse or two." But, he says, barring military action, "the next move in the market is up." ("Nightly Business Report",

10/29)

"We're still in a very, very ferocious bear market," says RALPH ACAMPORA of PRUDENTIAL-BACHE. "Once the market picks its head up, there is some selling in there and I don't think the selling is finished. This bear is not going to end on a whimper, it's going to end on a bang." (CNBC "Market Wrap-Up", 10/29)

"Presently, the stock market is in a major bear phase," says RICHARD MEULLER of "Mueller Market Cycles," who thinks the recent rally in stocks will top out over the next two weeks, followed by a market pullback into December. "[There is] a good chance that the previous closing low of 2365 will be violated," says Meuller. He advises his clients to reduce their stock holdings to 10% on October 31 and transfer the proceeds to a money market fund. Trade the market on the short side after November 7, says Meuller. (CNBC "World Business", 10/30)

"The deficit package reaffirms the bear market," says JOHN BURKE, a floortrader at the NEW YORK STOCK EXCHANGE. "It does not create the kind of economic climate to get us out of the malaise we're in." (WSJ, 10/30)

GAIL DUDACK, technical analyst at S.G. WARBURG, says the market has wasted its best opportunity for a big rebound. "A couple of weeks ago the market started a classic bear market rally, but the wind has been taken out of its sails." Her downside target is 2050 to 2150 on the DJIA. (WSJ, 10/30)

STOCK MARKET:

"Taxes are going up in front of a recession, consumer confidence is low. The news is not rosy," says EDWARD LAUX, head of block trading at KIDDER PEABODY & CO. He describes Monday's market action as "a continuation of Friday's reaction to the budget accord." (WSJ, 10/30)

A number of Dow components were resisting yesterday's decline, says DON WOLANCHUK, a newsletter writer who believes the shrinking number of new lows "suggests we're putting in some sort of important bottom." "The 2420 level so far has produced a low if not the low," says Wolanchuk. "Under normal conditions, the 2350 area should not be violated." (CNBC "World Business", 10/30)

Has the market bottomed? "We're not quite sure yet," is the honest answer from PETER GRENNAN, director of stock index futures at SHEARSON LEHMAN BROTHERS. "But with the market down 600 points since the summer, I would think that we're at least 75%-80% there." In the bottoming process, there can be a difference between price action and momentum, says Grennan: "Price action can still go lower on some of the indexes, even though momentum can hold up." Once the market bottoms, the situation in the Mideast will determine how long it stays there. (CNN "Business Day", 10/30)

"Though a lot of people say the market has another 10% to drop, if you're looking at the long haul, this won't matter," says BRIAN TERNOEY, head of investment services at FOSTER HIGGINS, a benefits consulting firm in Princeton N.J. (WSJ, 10/30)

"People might be suckered into a false rally and then be disappointed in the early part of 1991," cautions SAM STOVAL, editor of "S&P Industry Reports." (CNBC "Market Wrap-Up", 10/29)

"Uncertainty still dominates the market," says JEFFREY SHAMES of MASSACHUSETTS FINANCIAL SERVICES. Even given the resolution of the budget stalemate, "uncertainty about the economy and the Middle East still gets all the attention," and according to Shames, "uncertainty 2 is the worst possible scenario for the stock market." He says the market will turn "when people can see where the bottom is." ("Investor's Daily", 10/30)

"The sloppy trading we've seen in stocks indicates there's not much confidence at all in the market," says JOHN BURNETT at DONALDSON LUFKIN & JENRETTE. "People felt good coming off the weekend, with the budget battle behind them. But there's a touch more reality this afternoon - a feeling that not much has been accomplished on the federal deficit after all. There's more talk of stagflation, the worst of all possible scenarios for the market." ("The Washington Post", 10/30)

The market yesterday was "a classic case of selling on the good news," says MARSHALL ACUFF of SMITH BARNEY. "The market is being spooked by some of the same hobgoblins that have been besetting the market for some time," the price of oil being foremost among those. (FNN "Marketwrap", 10/29)

"People are not inclined to be investing in the market," says NELSON GOLD, senior vice president of OTC trading at INTERSTATE-JOHNSON LANE. "There are just too many problems out there." (WSJ, 10/30)

Yesterday "wasn't much of a day for the bulls," says DICK HOLDEN of ALEX. BROWN & SONS. "It's just so uncertain." ("Investor's Daily", 10/30)

"There was little follow-through to the morning rally and when the bond market began to give way, people took profits," says BILL RAFTERY at SMITH BARNEY, HARRIS UPHAM & CO. "It's still a very nervous, jumpy market." ("USA Today", 10/30)

The market "is telling us there are greater pressures in the [banking] system than can be mollified by a quarter-point move by the Fed," says JACK SULLIVAN, of VAN KASPER & CO., a San Francisco-based brokerage. With banks' borrowing costs outstripping what they can earn on loans, "the banks can't do business. It's stunningly simple but stunningly important - and the market is not priced for it." (WSJ, 10/30)

STOCK TIPS:

Although he thinks there is a lot more downside in the market, SAM STOVAL, editor of "S&P Industry Reports," likes the natural gas stocks and pipelines. He lists TENNACO, TRANSCO and COASTAL CORP. among the pipelines and ATLANTA GAS LIGHT, BROOKLYN UNION GAS, WASHINGTON GAS LIGHT and PEOPLE ENERGY among distributors. He also likes pharmaceuticals MERCK, SCHERING PLOUGH and WARNER LAMBERT. (CNBC "Market Wrap-Up", 10/29)

"At the moment, we have a traders' market and I play each day as it comes - I short and I go long," says PETER GRENNAN, director of stock index futures at SHEARSON LEHMAN BROTHERS. There are good values now for investors who want to take a longer term perspective, but Grennan emphasizes long term: "You cannot expect the market to turn and maintain a rally with the Mideast situation." Grennan's long term favorites: AMERICAN HOME PRODUCTS, EXXON, GE, WALMART, and JOHNSON & JOHNSON. "All of these stocks have shown good earnings sustainability and they are leaders in their product areas," says Grennan. (CNN "Business Day", 10/30)

GM's decision to close four plants is "a positive development in that it's a sign of realism on GM's part," says DEAN WITTER REYNOLDS analyst RONALD GLANTZ. But the move is not likely to impact the car manufacturers stock. According to JOHN CASESA of WERTHEIM SCHRODER, "Wall Street had widely expected the closing of these facilities." ("Investor's Daily", 10/30)

Yesterday's market saw selling of many of the better growth stocks, says MARSHALL ACUFF of SMITH BARNEY. "I'm concerned that the relative valuation of some of these growth stocks now appears to be on the high side, given the weakness in the general market," says Acuff. "If the market goes up, I'm not sure they are going to participate as much as they have. If the market goes down, I see profit taking [in growth stocks]." (FNN "Business Tonight", 10/29)

According to "The Wall Street Journal," five of the 11 analysts who follow the heavy-industry, cyclical stocks strongly recommend BETHLEHEM STEEL. "Bethlehem's stock is very depressed," says PETER MARCUS, a PAINEWEBBER analyst who upgraded his neutral rating to a buy. "There's a great potential for reward." (WSJ, 10/30)

#90303m0002 10/30/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 30) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The dollar's gains yesterday reflect "relief over finally having a budget,"

says KEVIN WEIR, vice president at CANADIAN IMPERIAL BANK OF COMMERCE in New York. This relief may have fostered a sense that "immediate bad news [for the dollar] is out of the way, but I am not at all convinced of that." (WSJ, 10/30)

The currency market "had been anticipating an easing, and the dollar had been falling on that," says EARL JOHNSON of HARRIS TRUST & SAVINGS. Johnson says the easing had already been fully discounted. ("Investor's Daily", 10/30)

"I think there probably was some easing today," says BILL WOLMAN, chief economist at "BusinessWeek" and "CNBC." "It was sort of the minimal easing that was promised as a result of the deficit cutting agreement." (CNBC "Market Wrap-Up", 10/29)

"This rate drop is a direct response to the budget deal," says DAVID BERSON, chief economist at the FEDERAL NATIONAL MORTGAGE ASSOCIATION. ("USA Today", 10/30)

"It was clear that the Fed was not going to lower interest rates without a deal," says PAUL HUARD of the NATIONAL ASSOCIATION OF MANUFACTURERS. He says lower interest rates will have a beneficial effect for businesses, since rates are "one of the major components of the cost of capital." (FNN "Marketwrap", 10/29)

"The question now is, so what?" asks SAM KAHAN of FUJI SECURITIES. "The truth is that unless the banks lower the prime rate, most individuals won't reap any benefit from what the Fed did. Most home equity loans are tied to the prime and if it doesn't go down, they get no help. There certainly is going to be no change in the rates on credit cards." ("The Washington Post", 10/30)

PRUDENTIAL-BACHE SECURITIES INC.'s EDWARD YARDENI says he is disappointed that "the Fed wasn't a little more aggressive" in its quarter point easing. He would have like to have seen the Fed drop to 7 1/2% instead of the current 7 3/4%. (CNN "Moneyline", 10/29)

"I think [the Fed] will move again [to ease interest rates], but the next move will await some more concrete sign of economic softening," say LYLE GRAMLEY, chief economist of the MORTGAGE BANKERS ASSOCIATION and former member of the Reserve Board. "We may not have to wait too long - maybe Friday's employment numbers." (WSJ, 10/30)

"Looking out to the turn of the new year ... there could be substantial easing" by the Fed, says MARSHALL ACUFF of SMITH BARNEY. "I'm talking about a fed funds rate that could go as low as 6%." (FNN "Marketwrap", 10/29)

"At this stage, people realize the Fed has done its deed and now it may be a while before we see the next easing," says CHARLES SPENCE, foreign exchange analyst at FIRST INTERSTATE BANK in Los Angeles. (WSJ, 10/30)

The Fed move "is too little, too late," contends IRWIN KELLNER, chief economist at MANUFACTURERS HANOVER TRUST CO. "We've been waiting for this since the middle of July. A quarter of a point is a drop in the ocean. The economy is in bad shape, and it's going to get a lot worse." (WSJ, 10/30)

The quarter point cut is "like shooting an elephant with a BB gun - it has no effect," according to NIKKO SECURITIES chief economist ROBERT BRUSCA. He points out that normally, the Fed waits until the tail end of a recession to lower rates substantially. "History isn't on your side if you think the Fed is going to push rates down quickly," says Brusca. ("Investor's Daily", 10/30)

"The coffin has already been nailed shut," says RAY STONE of STONE & McCARTHY ASSOCIATES. He believes that the Fed "should have been easing all along," and says that the Fed's refusal to ease over the past several weeks could reduce the strength of the economy over the next several years. "I really think they've been remiss here," says Stone. ("Investor's Daily", 10/30)

"We've turned bullish " on long-term bonds because "the economy is looking very weak," says IAN MacKINNON, senior vice president at VANGUARD GROUP OF INVESTMENT COS. in Valley Forge, Pa. "This is only the first of several easing steps" by the Fed that will lead to sharply lower interest rates, predicts Mr. MacKinnon. "We think these are good levels to buy bonds, and we have started to buy bonds." (WSJ, 10/30)

"We're very constructive on bonds" says H. ERICH HEINEMANN, chief economist at LADENBURG THALMANN & CO. "The underlying inflation rate is really much lower than market participants seem to be assuming." (WSJ, 10/30)

THE ECONOMY:

New home sales for September are reported today and are expected to be 25% below last year's levels. Sales could be soft for the next couple of years, according to STEPHEN GRACE of DELOITTE & TOUCHE. Even though home sales are measured on a national basis, Grace says the industry is driven by local economies. While regional attention has been focused on the weakness in the Northeast, Grace says the Southwest, particularly Houston and Dallas, is strengthening. "The West Coast, while weakening, is still seeing some transactions go on." (CNBC "World Business" 10/30)

"We're on the edge of a cliff," says JOHN CASESA, auto analyst at WERTHEIM SCHRODER & CO. "Consumer confidence is at the lowest level since the depths of the 1981 recession and we really haven't felt it in car sales - yet." ("USA Today", 10/30)

IN WASHINGTON:

The fact that the budget compromise creates a "pay-as-you-go" system is

"probably the most important ingredient in the entire package," says REP. DAN ROSTENKOWSKI (D. - Ill.), chairman of the House Ways and Means Committee. "If you're going to come to the United States Congress with a program, you're going to have to bring along the money that's going to pay for it." (CNN "Moneyline", 10/29)

"By and large, the deficit-reduction plan in five years gives us a bona fide picture of deficit reductions," says ALLEN SINAI of BOSTON CO. But he says the deficit will be "extraordinarily high," even with these reduction. He predicts next year's deficit will be $286 million and that the deficits over the following three or four years will range between $200 million and $275 million. ("Investor's Daily", 10/30)

#90303p1071 10/30/1990 ~PR Newswire

ROCHESTER, NY (OCT. 30) PR NEWSWIRE - Curtice Burns Foods (AMEX: CBI) a major food processor, today reported first quarter fiscal 1991 net earnings of $1.8 milion, or $.21 per share, on sales of $223,482,000.

While the sales represented a 4.7 percent advance from last year's record first quarter sales of $213,400,000, net earnings for the quarter ending Sept. 28 declined 44 percent from last year's first quarter earnings of $3,242,000, or $.39 per share, before the cumulative effect of an accounting change. (A)

Earnings increases were recorded by the company's dessert, pickle, pourable dressing and cheese sauce product liens. Earnings for canned and frozen vegetables were signficantly reduced as a result of 1989's poor vegetable crop. Mea tsnacks also contributed to the decline due to one-time consolidation costs, new product introductions and high raw product costs.

David J. McDonald, president, said, "With the 1990 harvest largely completed at satisfactory levels, our margins for canned and frozen vegetable lines should improve in the latter part of the second quarter, as high cost raw material moves through inventory."

He said that during the quarter, "The production of Globe Products, acquired in December 1989, was totally integrated with our Comstock Michigan Fruit plants. Repositioning of our Nalley's and Hiland potato chip lines has been completed, with emphasis on regional flavors. In the Pacific Northwest we have introduced a low calorie microwave meal line, Quick n' Light, and a low fat dressing line, Bernstein's Light Fantastic."

McDonald said that "These first quarter earnings improve upon earnings of the previous two quarters. It is a good indicator that the investments and integrations completed in 1990, coupled with a return to normal growing conditions in the northeast, are beginning to impact us favorably."

Rochester-based Curtice Burns Foods consists of 10 autonomously managed divisions, 60 plants and warehouses, and 7,000 employees located throughout the United States and Western Canada. The company is unique in the food industry with its strategic focus on regional brands and the development and processing of custom-packed foods for the retail grocery and food service industry.

#90303p1084 10/30/1990 ~PR Newswire

EL SEGUNDO, CA (OCT. 30) PR NEWSWIRE - Infonet, the leading international value-added network services company, announced today that it has signed an agreement with Compania Dominicana de Telefonos (CODETEL) to provide local telecommunications service and support for its customers in the Dominican Republic.

A subsidiary of GTE International headquartered in Santo Domingo, CODETEL operates the Dominican Republic's CODEPACK national public data network. An interconnect is now being established between CODEPACK and Infonet's global network, which is accessible in more than 110 countries for worldwide data, E-mail, store and forward, fax and telex transmissions.

This interconnect will be operational in January 1991. CODEPACK subscribers in the Dominican Republic cities of Santiago, Santo Domingo, Puerto Plata and Bonao will then be able to reach the Infonet network by making a local phone call.

CODETEL's telecommunications professionals will arrange for companies in the Dominican Republic to access Infonet's network and NOTICE 400 global messaging service via CODEPACK and install NOTICE 400 PC E-mail software at their sites.

"We will also hold on-site education and training classes introducing users to the new technology and provide ongoing service and support, complete with a telephone hotline staffed by our senior technical experts," said CODETEL's Technical Director Gonzalo Vinado.

Established in 1970, Infonet is the leading standards-based international value added network services company. It provides and directly supports communication and computer services throughout the world. The company is jointly owned by MCI and 10 major telecommunication administrations in Europe and the Asia-Pacific.

NEW YORK (OCT. 30) PR NEWSWIRE - Omnicom Group Inc. (NYSE: OMC), a communications company comprised of BBDO Worldwide, DDB Needham Worldwide, Diversified Agency Services and Tracy-Locke, today announced that worldwide revenues from commission and fee income increased 14 percent to $281,604,000 in the third quarter of 1990 from $246,623,000 in the same period in 1989. Domestically, commission and fee income increased 2 percent to $162,052,000 in 1990 from $158,590,000 in 1989, with domestic general advertising income growing 7 percent.

International commission and fee income increased 36 percent to $119,552,000 in 1990 from $88,033,000 in 1989. Acquisitions net of divestitures favorably impacted third quarter 1990 commission and fee income by approximately 1 percent as compared to the third quarter of 1989. Net income increased 19 percent to $6,663,000 in the third quarter of 1990 from $5,586,000 in the third quarter of 1989. Fully diluted earnings per share for the third quarter rose 18 percent to $0.26 per share in 1990 from $0.22 per share in 1989.

Worldwide revenues from commission and fee income for the nine months ended Sept. 30, increased 20 percent to $854,446,000 in 1990 from $714,550,000 in 1989. Acquisitions net of divestitures favorably impacted nine-month commission and fee income by approximately 9 percent as compared to the first nine months of 1989. Net income for the nine months ended Sept. 30, increased 18 percent to $34,943,000 in 1990 from $29,662,000 in 1989. During the nine months ended Sept. 30, fully diluted earnings per share increased 20 percent to $1.32 per share in 1990 from $1.10 per share in 1989.

#90303p1087 10/30/1990 ~PR Newswire

MARIETTA, GA. (OCT. 30) PR NEWSWIRE - The board of directors of Realty South Investors Inc. (AMEX: RSI) has declared a quarterly dividend of $.09 per share of common stock payable on Nov. 26 to shareholders of record Nov. 12.

During the third quarter the company reduced the amount outstanding under its line of credit with proceeds of a $4,800,000 mortgage loan and acquired ownership through deeds in lieu of foreclosure of two properties, reducing mortgage loans by $5,700,000 and increasing owned properties by $5,150,000. Cash flow for the quarter was $.133 per share compared with $.140 for the second quarter this year.

Revenues and earnings continue to be affected by lower rentals and occupancy rates in the ongoing real estate downcycle, said Timothy J. O'Neill, chairman and chief executive officer. In addition, property operating expenses were higher due to one-time maintenance costs at a major property as part of a renovation program.

Revenues for the third quarter were $695,000 compared with $856,000 last year and net income for financial reporting purposes was $145,000 or $.07 per share compared with $229,000 or $.10 per share for the quarter last year. For the nine months, revenues were $2,184,000 with net income for financial reporting purposes of $444,000 or $.21 per share compared with revenues of $2,749,000 and net income of $836,000 or $.40 per share last year.

Realty South Investors Inc. invests primarily in real estate projects in the Southeast with a $32 million portfolio.

PITTSFORD, NY (OCT. 30) PR NEWSWIRE - SelecTronics, Inc. (NASDAQ: SELE) today announced the company will have a small net profit on increased revenues for the second fiscal quarter ended Sept. 30, 1990. The company's return to

profitability was announced by Chairman and CEO Michael Weiner at the company's annual meeting yesterday in Minneapolis after the market closed. In the year-ago second quarter, the company had a net loss of $603,000 or ($0.02) per share on $9.4 million in sales.

Weiner said final results would be announced next week. The company's last profitable quarter was the third fiscal quarter ended Dec. 31, 1988. Since then, SelecTronics has gone through a major transition, selling off older inventory, developing new hardware and software product lines, expanding distribution here and abroad, merging with Microlytics, Inc., and consolidating operations in Pittsford.

Weiner also announced that President and Chief Operating Officer James Finke and Executive Vice President Paul Wetenhall had been elected to the board of directors, expanding the board to seven from five. Prior to joining the company in April 1990, Finke was president of Interconsult of North Hampton, N.H., a marketing-management firm specializing in the electronics industry. Prior to joining SelecTronics in August 1988, Wetenhall spent 13 years at Xerox Corporation (NYSE: XRX) in a variety of marketing, finance and strategic planning positions.

Since many SelecTronics shareholders live in upstate New York, the company will hold an information meeting on Monday, November 5, at 4 p.m., at the Genesee Holiday Inn, 120 Main Street, in downtown Rochester.

SelecTronics, Inc. manufactures and markets professional, consumer and custom handheld electronic reference products. Its wholly owned subsidiary, Microlytics, Inc., is a leading developer and marketer of linguistic and reference software products for the microcomputer industry. SelecTronics is approximately 30 percent owned by Xerox.

#90303p1091 10/30/1990 ~PR Newswire

LEICESTER, N.Y. (OCT. 30) PR NEWSWIRE - CPAC, Inc. (NASDAQ: CPAK), today reported higher sales and earnings for the second quarter and the six months ended Sept. 30, 1990.

CPAC sales were up 10 percent in the first six months of fiscal 1991 to $14.7 million compared to $13.2 million for the same period last year. Net income increased to $796,000 or $0.35 per share from $761,000, or $0.33 per share a year ago.

In the second quarter ended Sept. 30, 1990, CPAC sales increased 18 percent to $7.5 million compared with $6.4 million for the same quarter last year. Net income for the period was $415,000 or $0.18 per share compared with $395,000, or $0.17 per share last year.

CPAC, Inc., manufactures developing chemicals and pollution control equipment for the imaging industries which include: photographic, graphic arts, medical, dental, and microfilm. Chief Executive Officer, Thomas N. Hendrickson said that performance in both the equipment and chemical groups had improved in the second quarter, despite recent freight surcharges and raw material price increases.

"The integration of CPAC chemicals with our pollution control expertise and compliance oriented products has positioned us favorably in environmentally conscious markets," said Hendrickson. "We have introduced aggressive marketing programs to capitalize on these strengths."

Hendrickson reaffirmed that Trebla Chemical Company remains the principal profit generator for CPAC, Inc. and said management is further committed to grow the international business of Trebla.

#90303p1096 10/30/1990 ~PR Newswire

INDIANAPOLIS (OCT. 30) PR NEWSWIRE - Anacomp Inc. (NYSE: AAC) announced today that the Company has been successful in completing its placement of $325 million of senior debt and approximately $225 million of senior subordinated notes with common stock warrants.

As previously reported, the transaction required participation by substantially all the Company's existing lenders and bondholders. The proceeds of the financing will be used to retire the Company's existing bank indebtedness of approximately $200 million, repay $250 million of outstanding increasing rate notes, and pay off approximately $55 million in outstanding 12.25 percent notes and related expenses.

The $325 million in senior debt is composed of bank and other term loans with a final maturity at Oct. 26, 1997, and a revolving bank credit facility with an initial blended interest rate of 11.5 percent.

The Company also issued approximately 225,000 units, each consisting of $960 principal amount of 15 percent senior subordinated notes due Nov. 1, 2000, together with 10-year common stock warrants representing, after their issuance approximately 12.5 percent of the Company's common stock on a fully diluted basis at an exercise price of $1.873 per share. In the event the Company does not repay its senior indebtedness in certain amounts in excess of required amortization by the end of years two, three or four, the Company will be required to make additional payments to its senior and subordinated lenders in common stock and/or pay-in-kind debt.

Louis P. Ferrero, chairman and chief executive officer, said that the completion of the transaction is a "major step forward for Anacomp which allows us to focus our efforts on the orderly reduction of our debt while expanding our role as a world-leading information and image management company."

Anacomp is an information management company with leading market positions in

micrographic services, systems and supplies, Anacomp's customers include banks and other financial institutions, large government and industrial users and a variety of other businesses around the world.

DEARBORN, MICH. (OCT. 30) PR NEWSWIRE - Ford Motor Credit Company's net income for the third quarter of 1990 was $159.3 million, up $37.1 million or 30 percent from the third quarter of 1989, Chairman William E. Odom announced today.

"We are encouraged with the progress in our automotive financing business," Odom said. "Hard work on the basics of underwriting and collection capability and operating efficiency is coming through in the results; we are particularly pleased by the improvements this year -- lower delinquencies, lower repossessions, and lower credit losses." Credit losses worldwide were 0.80 percent of average receivables, an improvement of 22 percent from last year.

Additionally, the increase in earnings reflected improved interest margins, reflecting primarily lower borrowing rates and higher retail portfolio yields. The cost of borrowings in the United States was 8.7 percent in the third quarter of 1990, down from 9.1 percent in the third quarter last year.

During the third quarter, Ford Credit provided U.S. retail customers with financing for 382,000 new and used vehicles and financed 33 percent of all new cars and trucks sold by Ford Motor Company dealers in the U.S., compared with 30 percent last year. Ford Credit provided wholesale financing for a quarterly record of 75 percent of Ford Motor Company factory sales to U.S. car and truck dealers.

Net income for the first nine months of 1990 was $442.9 million, up $76.6 million, or 21 percent from the same period a year ago. At Sept. 30, 1990, Ford Credit's assets totaled $57.6 billion, $2.2 billion lower than a year ago reflecting the sale of retail receivables during the fourth quarter of 1989.

Ford Credit provides vehicle financing for about 5 million retail automotive customers and 8,500 Ford, Lincoln-Mercury, Ford Truck, Ford New Holland, and affiliated dealers in the United States, Canada and Australia. It also coordinates the activities of international financing affiliates of Ford Motor Company in 19 countries and manages the insurance business of The American Road Insurance Company.

Ford Credit, a wholly owned subsidiary of Ford Motor Company (NYSE: F), is part of the Ford Financial Services Group.

TOULOUSE, FRANCE (OCT. 30) PR NEWSWIRE - BBN Advanced Computers Inc. and the Centre Europeen de Recherche et de Formation Avancee en Calcul Scientifique (CERFACS) today held a pan-European seminar on applications for the BBN TC2000 parallel supercomputer. A group of over 50 top researchers invited from the industrial and scientific communities throughout Europe attended the one-day event.

The agenda for the day included presentations by researchers at BBN Advanced Computers, CERFACS and the Lawrence Livermore National Laboratory. The presentations covered a range of applications that have been run on TC2000 systems, including Monte Carlo simulation, linear algebra and domain decomposition. The day also included demonstrations on the 30 processor TC2000 system installed at CERFACS last May.

The 30 processor TC2000 system installed at CERFACS provides 570 Dhrystone MIPS (Millions of Instructions Per Second), 600 peak MFLOPS (Million Floating Point Operations Per Second) as well as 416 MBytes of shared memory and 6,580 MBytes of disk storage. In addition, it fully supports the Unix operating system as a stand-alone computer, supporting a sophisticated native programming environment, without the need of a front-end computer.

The TC2000 computer at CERFACS is being used specifically for algorithm development and experiments of large-scale codes in fluids and turbulence and is positioning CERFACS as a Centre of Excellence in Europe for research and training in the use of high-performance computers to solve problems in applied science and engineering.

About the TC2000 Parallel Supercomputer The TC2000 system's shared memory architecture is uniquely suited for applications that require the power of a large number of closely coupled processors. The system's scalable performance allows a dramatic increase in total throughput to an architectural limit of 504 processors, 10,000 peak MFLOPS, 8604 MBytes of memory, and 2520 MBytes/second of I/O bandwidth. Developers can group multiple processors into functional clusters, applying processing power simultaneously to both program development and application execution. BBN's nX implementation of UNIX 4.3 BSD is complemented by a unique set of advanced software development tools created by BBN. These tools enable programmers to interactively debug parallel software, easily setting and examining variables across multiple processors, as well as doing performance analysis tasks. Unlike other massively parallel systems, the TC2000 system is a complete, multi-user system that conforms to industry

standards, including Ada, POSIX, the X Window system and NFS.

CERFACS was created in October 1987 to combine research and training activities in scientific computation for European researchers, engineers and scientists. The centre, supported by industries, laboratories and universities, studies fundamental applications in such fields as aeronautics, meteorology, the petroleum industry and hydrodynamics.

BBN Advanced Computers Inc. develops and markets high-performance multiprocessing computer systems for both supercomputing and high-end realtime applications. BBN has sold and installed more than 300 parallel computing systems worldwide at major aerospace, industrial, government and university sites.

Headquartered in Cambridge, Mass., BBN Advanced Computers is a wholly-owned subsidiary of Bolt, Beranek and Newman, Inc. (NYSE: BBN). For its fiscal year ended June 30, 1990, BBN had sales of $262 million.

CONTACT: Dominique Bennett of CERFACS, 33-61-07-96-96; or Sarah Long of BBN Advanced Computers Inc., 617-873-6000

#90303p1102 10/30/1990 ~PR Newswire

PALM SPRINGS, CALIF. (OCT. 30) PR NEWSWIRE - Bird Medical Technologies, Inc. (NASDAQ: BMTI) today announced record results for the third quarter and nine months ended Sept. 30, 1990. The results are the first reported by the company since it completed an initial public offering in August, 1990.

For the third quarter, net earnings increased 75 percent to a record $446,000, compared to $255,000 for the same period of the prior year. On a per share basis, earnings were $0.08 compared to $0.05 in 1989, on 23 percent additional weighted average shares outstanding. Revenues for the third quarter of 1990 increased 12 percent to $8.5 million, versus $7.6 million in 1989.

Net earnings for the nine months ended Sept. 30, 1990 rose 108 percent to $986,000, compared to $473,000 in the corresponding period of the prior year. On a per share basis, earnings were $0.19, versus $0.10 one year earlier, on 9 percent additional weighted average shares outstanding. Revenues for the first nine months of 1990 increased 20 percent to $26.0 million, compared to $21.8 million in the same period of 1989.

Commenting on the results, Felix T. Troilo, president and chief executive officer of Bird Medical Technologies, Inc., said, "Our company's record performance year-to-date is a reflection of several factors. We have been successful in expanding market share with key products offered by our two operating divisions, Bird Products and Stackhouse. In addition, we are introducing new product lines.

"The Bird Products division 8400ST Volume Ventilator has received strong market acceptance since its introduction in April of this year," Troilo said. "The enhanced capabilities of the 8400ST for respiratory care patients has served to further broaden the market for our Adult Volume Ventilator products. Coupled with the 6400ST Volume Ventilator, our line of air/oxygen blenders, and other products and accessories, we believe Bird offers one of the most diversified and attractive product lines in the industry, in terms of both features and price."

Troilo noted that the company's specialized infection control products, manufactured by its Stackhouse division, also contributed to the impressive performance in the quarter. "In particular," he said, "our Mark III surgical helmet system, which has gained wide acceptance in the orthopedic surgery market, is now also being used in other surgical applications, and our laser smoke filtration systems continue to maintain a significant share of market."

Bird Medical Technologies, Inc. develops, manufactures and sells respiratory care and infection control products to hospitals through two principal divisions: Bird Products Corporation and Stackhouse, Inc.

#90303p1104 10/30/1990 ~PR Newswire

WHITE PLAINS, NY (OCT. 30) PR NEWSWIRE - In its most extensive Personal System/2(see Note A below) announcement since the original PS/2(Note A) rollout, IBM Corporation (NYSE: IBM) today took aim at the high end of the personal computer market. The company announced a family of high-end i486(Note A) PS/2s and options that deliver advanced functions and performance for powerful business computing and networking.

Reinforcing its commitment to Operating System/2(Note A) (OS/2 (Note A)), IBM also introduced a version of the popular operating system that utilizes memory more efficiently and can be used in systems with as little as 2 megabytes (MB) of memory.

Two new PS/2 members -- the Model 95 XP 486 and the Model 90 XP 486 -- unleash the power of the Intel i486 processor and feature a unique design that allows them to be upgraded for future technologies.

The Model 95 and Model 90 combine the flexibility of the Micro Channel(Note A)

architecture with the power of the i486 microprocessor and integrate them with a new high-performance graphics subsystem -- known as Extended Graphics Array (XGA) -- advanced memory technology for faster computing power, and superior storage capabilities for enhanced input/output (I/O) throughput. In addition, an optional 256 kilobyte (KB) memory cache can be added for even faster computing power.

The result is that the new Model 95 and Model 90 can perform up to 2-1/2 times faster than the top-of-the-line, floor-standing PS/2 Model 80-A31.

Both of the new systems feature a unique processor-complex design, which houses the microprocessor, memory controller, memory cache option, and control for system throughput, and can be upgraded to accommodate advances in future technologies.

This advanced processor-complex design, as well as the enhanced speed and extensive expansion capabilities of the Model 95 and Model 90, make them the most powerful PS/2s available. The Model 95 is a file server that packs more than enough power and performance to handle complex networking tasks, while the Model 90 offers customers involved in multimedia or financial modeling, for example, all these advanced capabilities on their desktops.

The new Model 95 and Model 90 feature the industry-standard Small Computer System Interface (SCSI), which allows customers to install up to seven peripherals through a single expansion slot. This standard feature enables customers to access, manipulate and store billions of characters of information right at their desktop or floor-standing PS/2s.

#90303p1106 10/30/1990 ~PR Newswire

WHITE PLAINS, NY (OCT. 30) PR NEWSWIRE - IBM Corporation (NYSE: IBM) today lowered the entry point for users of Operating System/2(see Note A) (OS/2(Note A)) by introducing a significantly enhanced version of the operating system. OS/2 Standard Edition Version 1.3 reduces memory requirements to 2 megabytes (MB) and offers substantial improvements in performance, quality and printer support.

These benefits are further realized in new releases of OS/2 Extended Edition and OS/2 LAN Server also announced today. Designed to incorporate and build upon the enhancements found in the base operating system, OS/2 EE 1.3 and LAN Server 1.3 broaden the range of operating and networking solutions available to IBM desktop users.

OS/2 is an advanced, graphical operating system consisting of Standard Edition (the base operating system) and Extended Edition, which offers the base

operating system along with Communications Manager, Database Manager and LAN Requester.

#90303p1107 10/30/1990 ~PR Newswire

PHILADELPHIA (OCT. 30) PR NEWSWIRE - IBM has made dramatic improvements in the speed and flexibility of a mathematics package that permits IBM advanced workstations, mainframes and supercomputers to solve certain types of complex and financially rewarding applications faster and more efficiently than ever before possible.

The package -- OSL, for Optimization Subroutine Library -- has been used since its introduction last year to solve problems where the difference between a good solution and the best solution can be a savings of millions of dollars.

These applications involve management of resources that may be scarce, especially valuable or vital. Examples include oil, gas, electricity, military and industrial equipment, gasoline, foods, currencies, financial instruments and salespersons, airline crews, and military troops.

The new release of OSL announced here today at a meeting of the Operations Research Society of America and The Institute of Management Science (ORSA/TIMS), has been improved in key areas.

First, it has significantly improved the speed and efficiency by which advanced techniques called the interior point method and mixed-integer programming can be used to produce solutions. This can significantly shorten the time it takes to find answers to large, complex problems.

Second, it can find a series of optimal answers once an initial calculation has been done -- "vary the scenario" -- without re-calculating the entire problem, as was previously necessary.

For example, an oil company might determine what the optimal blend of fuels might be for a warm winter, and then calculate a series of solutions for progressively colder winters.

The OSL R2 mathematical programming package for the IBM PS/2 carries a one-time charge of $2,285. The one-time charge for the RS/6000 Model 320 is $4,160, for Model 530 is $8,320 and for Model 540, $16,640. The one-time charge for OSL R2 on S/370 and S/390 ranges from $11,730 to $149,200, with monthly charges ranging from $244 to $2,765.

#90303p1110 10/30/1990 ~PR Newswire

SCOTTSDALE, ARIZ. (OCT. 30) PR NEWSWIRE - Giant Industries Inc. (NYSE: GI) reported today 1990 third quarter net earnings increased $999,000 to $2,692,000 or $.22 per share on revenues of $91,314,000, compared to $1,693,000 or $.23 per share with revenues of $70,244,000 for the comparable third quarter of 1989.

The rapid increase in crude oil costs and sharply higher product prices resulted in a net LIFO adjustment reducing net earnings by approximately $4 million, or $.32 per share in the third quarter of 1990 whereas for the third quarter of 1989 the LIFO adjustment was insignificant.

Revenues, earnings and earnings per share for the nine months ended Sept. 30, 1990, were $264,215,000, $6,739,000 and $.55, respectively, compared to $218,220,000, $9,483,000, and $1.31 for the same nine month period in 1989. The sharp increase in crude oil costs and higher prices of products caused a LIFO adjustment reducing net earnings for the nine months ended Sept. 30, 1990 by $3,338,000 or $.27 per share; whereas for the like period in 1989, net earnings were not impacted significantly.

Had the merger with Hixon Development Co. occurred Jan. 1, 1989, earnings and earnings per share would have been $2,087,000 and $.23 for the 1989 third quarter and $11,007,000 and $1.18 for the nine month period ended Sept. 30, 1989.

James E. Acridge, president and chief executive officer, commented on third quarter results by saying, "The Iraqi invasion of Kuwait prompted a margin squeeze for the refining industry beginning in the latter part of the third quarter. In spite of this event, net earnings for the third quarter reflect a significant improvement over the same period in 1989. On an earnings per share basis, earnings appear level due to the dilutive effect of the Hixon Development Company merger and I.P.O. in December 1989." Acridge stated that the company continues to aggressively pursue opportunities within its exploration and production division. Acridge went on to note that coal seam gas reserves appear to be significantly better than previously expected and that the company anticipates announcing further details regarding coal seam gas reserves when an outside engineering report is received in the near future.

Giant Industries Inc. is primarily a refiner and marketer of petroleum products, supported by crude oil and natural gas exploration and production. Specifically, Giant currently operates a crude oil refinery with a crude oil rated capacity of 19,300 barrels per day, a 360-mile crude oil gathering pipeline, 71 truck transports, a unique Travel Center and a chain of 30 modern service station/convenience stores in Arizona, New Mexico and Colorado.

GIANT INDUSTRIES INC. UNAUDITED PRELIMINARY RESULTS

#90303p1111 10/30/1990 ~PR Newswire

WILMINGTON, DE (OCT. 30) PR NEWSWIRE - Du Pont (NYSE: DD) and Teijin Limited of Japan today announced they have signed a letter of intent to enter into a 50-50 joint venture to manufacture and sell polyester film for audio and video applications in Europe, the U.S. and other regions, excluding Japan.

This agreement will mark the first polyester film joint venture between American and Japanese firms.

Initial production will be from a line at Du Pont's Luxembourg plant. A second facility will be built in the United States with full operation planned for late 1992. At that time, total investment for the joint venture is expected to be about $200 million.

Capabilities of the joint venture will include production, marketing, sales and technical services. Worldwide sales are expected to be more than $130 million in 1991. Customers initially will be served by existing Du Pont and Teijin facilities and from Luxembourg.

The strength of the venture will be particularly evident in product research and development, Hartnagel said. The companies have agreed to negotiate to jointly develop polyethylene naphthalate (PEN) high- temperature film for a variety of applications, including motors and capacitors, and to sell PEN film for audio and video tape applications.

Du Pont became the first commercial producer of polyester film when it introduced "Mylar" and "Cronar" in the early 1950s, and now is the world's largest producer of polyester film. "Mylar" is used in video and audio tapes, data storage devices, industrial and electrical components, packaging, and reprographic applications. "Cronar" polyester film is used primarily for photographic film applications. Manufacturing facilities are located in Circleville, Ohio; Brevard, N.C.; Florence, S.C.; and Luxembourg.

Teijin Limited, with headquarters in Tokyo and Osaka, has film manufacturing facilities in Utsunomiya, Gifu, and Sagamihara. Teijin was the first company to independently develop viscose rayon manufacturing technology in Japan. Established in 1918, the company is a world leader in synthetic fiber,

chemicals and plastics manufacturing. Annual sales are about $2.2 billion. The company's "Tetoron" biaxially- oriented polyester film is used in video and audio tapes, data storage devices, industrial and electrical components, packaging and reprographic applications.

Du Pont had worldwide sales of $35.5 billion in 1989. Sales to the worldwide electronics industry exceeded $1.8 billion, making it a large and diversified supplier of materials, components, and services to the industry. In addition to information storage media customers, Du Pont Electronics serves the makers of integrated circuits, printed circuits, passive components, and users of interconnections, and subassemblies.

#90303p1113 10/30/1990 ~PR Newswire

IRVINE, CALIF. (OCT. 30) PR NEWSWIRE - National Health Care Systems Inc., (NASDAQ: NHCS) which operates DentiCare, a pre-paid dental plan, announced today that they have retained the San Francisco law firm of Nossaman, Gunther, Knox and Elliot.

The firm will represent National Health Care in matters concerning compliance with the State Department of Corporations (D.O.C.) and general corporate and securities issues. John T. Knox, a partner with the firm, co-authored the Knox-Keene Health Care Service Plan Act of 1975, under which DentiCare operates.

The change in firms comes after the D.O.C. ordered National Health Care to discontinue one of its dental plans which they alleged the company was not authorized to operate. "While the order affected less than 9,000 of our 245,000 patients, we want to avoid any future misunderstandings by taking a more pro-active approach with the D.O.C.," said Dr. Carl E. Bozzo, National Health Care president.

"Nossaman, Gunther, Knox and Elliot is a highly respected firm in the areas of corporate law, health care law, regulatory compliance and legislative representation. They are fully committed to actively communicating with the D.O.C. on our behalf," said Bozzo.

Richard B. Spohn, the firm's partner in charge of National Health Care/DentiCare, is the former director of the California Department of Consumer Affairs and now specializes in administrative, legislative and consumer affairs law. "Mr. Spohn's experience in dealing with the state's regulatory agencies provides a level of confidence which we did not previously have. We can now move forward energetically to provide the best plans and services possible for our subscribers," said Bozzo.

National Health Care Systems Inc. owns and operates DentiCare, a capitated prepaid dental plan operating throughout California. The company offers its prepaid dental benefit packages to employer groups as well as to individuals and small groups. DentiCare currently has over 2,000 contracting dentists and over 245,000 subscriber patients in their plans.

#90303p1117 10/30/1990 ~PR Newswire

ANAHEIM, CA (OCT. 30) PR NEWSWIRE - Odetics (AMEX: OA OB) today announced a six-year, $34 million OEM agreement with E-Systems Inc. of Dallas. Under terms of the agreement, Odetics will supply robotically controlled, Automated Tape Library (ATL) subsystems for a revolutionary computer data mass storage system being developed by E-Systems.

This agreement follows earlier contracts with E-Systems totalling $6 million, under which Odetics is concurrently developing additional ATLs - one for a government application and another for a commercial customer. Joint development activities between E-Systems and Odetics have been under way since 1988.

The E-Systems Modular Automated Storage System (EMASS) represents a new era of mass storage technology. In addition to the Odetics robotic ATL subsystem, EMASS includes 19 mm, D2 format, helical scan digital tape recorders co-developed by E-Systems and Ampex; a Convex supercomputer server, and E-Systems library management software.

EMASS will be able to store more than 10,000 terabytes (one terabyte equals one trillion bytes of data) of information, which is sufficient storage to hold a complete copy of Martha Mitchell's book, "Gone With The Wind, " for every man, woman, and child in the world.

The 10,000 terabytes of information can be stored on less than 135,000 D-2 cassettes - the storage-capacity equivalent of 65,000,000 standard nine-track computer tapes.

The ATL subsystem being built by Odetics for E-Systems is based upon core technology developed for the Emmy Award-winning Broadcast Cart Machine that Odetics supplies to the television broadcast industry; however, where Cart machines store and access up to 280 cassettes configured in a tower, the ATL subsystem developed for E-Systems can access thousands of cassettes located in aisle-configured modules. The cassette storage modules can be joined to form rows up to 80 feet in length.

The heart of the Odetics ATL subsystem is a network of rail-mounted, self-propelled robots that move cassettes between cassette storage modules and tape drives which can be located at either or both ends of the EMASS library.

Able to travel at speeds up to nine feet per second, each robot is controlled by electronics which interface with the EMASS host computer through an Ethernet LAN. Other important elements of the Odetics ATL include motor-control hardware, error-recovery software and recorder mounting modules.

Odetics, headquartered in Anaheim, is a leading manufacturer of intelligent machines, including information systems, for collecting digital and analog data, as well as robotic and artificial intelligence systems.

The company controls 80 percent of the worldwide space recorder market and has more large-capacity broadcast cart machines installed and playing-to-air than all of its competitors combined. The company's Odex I, a technology demonstrator, stands in the Smithsonian Institution in Washington, D.C.

#90303p1119 10/30/1990 ~PR Newswire

RANCHO CUCAMONGA, CALIF. (OCT. 30) PR NEWSWIRE - Kaiser Steel Resources Inc. (NASDAQ: KSRI) today announced its third quarter net income was the second highest in the company's history since reorganizing in 1988. Third quarter net income was $467,000 on revenues of $2.7 million. Kaiser reported net income of $854,000 on revenues of $6.5 million for the nine months ended Sept. 30, 1990. The favorable results were due, in part, to the receipt of $936,000 under the company's 100-year water lease, together with its continuing historical operations. This was the first water lease revenue received in 1990.

"Although we expect our short-term earnings to fluctuate, the third quarter results are a glimpse at Kaiser's potential as we develop our new business ventures," said Richard E. Stoddard, chairman and chief executive officer. Kaiser reported pre-tax earnings of $791,500 and $1,447,300 for the third quarter and nine months respectively. "Over 92 percent of the tax expense we reported will never be paid because of our substantial net operating loss carryforwards," Stoddard said. "Consequently, we believe pre-tax earnings are a better indicator of our operating performance."

Stoddard said an additional highlight of the third quarter was the elimination of approximately $6 million in previously recorded tax liabilities resulting from a $13 million Internal Revenue Service credit. The credit was due to an IRS error on prior years' tax returns of Kaiser Steel Corp., the company's predecessor. According to Stoddard, the company has restated all financial statements from the 1988 reorganization through June 1990 to reflect debt

elimination of approximately $5 million and the reversal of over $784,000 in previously accrued interest expense. "Together with our year-to-date earnings this increases shareholders' equity to over $52 million, an increase of over $6.9 million," Stoddard said. Discussions with the IRS are continuing with regard to the residual $7 million credit.

Kaiser Steel Resources is developing businesses that address vital environmental issues in Southern California, including one of the country's largest rail-haul municipal waste landfills, land remediation and development and water resources.

CONTACT: Daniel M. Larson, president of Kaiser Steel Resources Inc., 714-944-4155; or Scott Brooks of Carl Thompson Associates Inc., 303-494-5472, for Kaiser Steel Resources Inc.

#90303p1120 10/30/1990 ~PR Newswire

GREENSBORO, NC (OCT. 30) PR NEWSWIRE - Wrangler announced today that it has contracted with the United States government to produce one million pairs of camoflauge trousers for American military troops. "Such a contract normally takes six months to execute, and the award was made in 15 days," said Bill Koronis, Senior Merchandise Manager for Wrangler. "The cooperative spirit between government and industry has been phenomenal. We are proud to have the opportunity to play a role in supporting the country's efforts in the Middle East."

The company was selected because of its capacity to quickly and efficiently manufacture the product. The fatigues have a value of over $17 million, and delivery will begin in January. The government has an option to request another million pairs in 1992, raising the potential value to almost $35 million.

Wrangler was instructed to alter the design of the fatigues to suit the requests of American soldiers. The desert camoflauge trousers have been modified to remove some of the traditional features, such as extra heavy fabric in the reinforced knees and seats.

"American soldiers assigned to Operation Shield have had to endure very hot, oppressive climates," said Koronis," the changes were made to accomodate the soldier's request's for cooler uniforms."

Wrangler is a voluntary participant in the Defense Department's Industrial Preparedness Program, which provides for rapid mobilization in the event of national need. The company will continue to produce the fatigues even after American troops return home as the uniforms are needed to replenish already depleted stocks in military depots.

Headquartered in Greensboro, N.C., Wrangler is a leading manufacturer of jeans and jeans-related apparel. Wrangler is a division of VF Corporation (NYSE: VFC), the world's largest publicly owned apparel company.

ROGERS, ARK. (OCT. 30) PR NEWSWIRE - Hudson Foods, Inc. (NYSE: HFI), one of the nation's largest poultry producers and food processors headquartered in Rogers, Ark., today announced results for the period ended Sept. 29, 1990.

Net income for the fourth quarter was $2.0 million, or 14 cents in primary earnings per share. This compares with last year's fourth- quarter net income of $3.6 million, or 26 cents in primary earnings per share.

Sales for the quarter increased 13.6 percent to $187.2 million from $164.8 million one year ago.

For 1990, net income was $8.7 million, or 60 cents in primary earnings per share, compared with the year-earlier $22.8 million, or $1.70 in primary earnings per share ($1.56 fully diluted).

Sales rose to a record $666.7 million from $620.5 million one year ago, a gain of 7.4 percent.

James T. Hudson, chairman and chief executive officer, said: "The key element in 1990s results was lower poultry prices. Chicken product prices were down slightly, but turkey prices were ... disappointing." Hudson added that although parts of the company did not have the previous year's results, Hudson still ended 1990 on a profitable note.

In 1990, Hudson Foods, Inc. continued to move ahead aggressively with efforts to expand its product lines and its customer base. This was accomplished, in part, by the acquisitions of Pierre Frozen Foods, Inc. -- a foodservice supplier -- and the product lines and brand names of Texas-based Roegelein.

Hudson Foods, Inc., one of the nation's largest poultry producers, sells a variety of chicken and turkey products under the "Hudson," "Flavor Fresh" and "Hudson Deli-Meister" brand names, as well as poultry, beef and pork products under the "Ohse," "Schwiegert," "Pierre" and "Roegelein" brand names.

STATE COLLEGE, PA (OCT. 30) PR NEWSWIRE - Texas Instruments' Consumer Products Division's Lubbock, Texas, plant has been awarded the Automation Forum's 1990 Renewal Award.

This award recognizes North American-based firms, who through outstanding manufacturing management, have increased their North American manufacturing content. The increase may come from return of production overseas or a conscious decision to produce on the continent.

In the case of Texas Instruments (NYSE: TXN), the decision to manufacture handheld solar calculators in Lubbock was a bold one, since competitors all manufactured offshore. But the decision made good sense to TI management.

At one time, TI manufactured its calculators and educational products for the U.S. market in its plant in Lubbock and produced both types of products in its Rieti, Italy, facility for the European market. In 1987, production of all educational products worldwide was consolidated in the Lubbock plant and production of financial and scientific calculators was moved to Italy. Because all competitors in the low-end calculator market used low-cost far-East production facilities, TI was forced to reduce its costs and to source its low-end calculators offshore as well.

TI plans to beat its own 20-minute manufacturing cycle time by replacing manual assembly methods. Additional plans include using surface mount equipment to assemble PCB and all other components in Lubbock, realizing further cost reduction and higher quality.

Formal presentation of the Renewal Award occurred during the Automation Forum's "Conference on Managing Factory Floor Graphics and Software Systems" held in State College, Oct. 29.

All applicants for the award are screened by the Forum's Selection Board -- Clay Hudgins of Fluor Daniel, Inc., Robert Maguda of McKinney & Company, Inc. and John Lewelling of Peat Marwick Main & Company. These industry consultants review applications and visit the facilities of the award finalists, meeting with the general manager and other department heads.

The Automation Forum is composed of industry leaders dedicated to advancing the interests of the industrial automation community. The forum is sponsored by the Automatic Identification Manufacturers, the Computer and Business Equipment Manufacturers Association, the National Computer Graphics Association, the National Electrical Contractors Association, the National Electrical Manufacturers, NMBTA -- the Association for Manufacturing Technology, the Robotic Industries Association, and the Society of Manufacturing Engineers.

NEMA, the National Electrical Manufacturers Association, with headquarters in Washington, is the leading U.S. organization representing and serving America's electroindustry companies.

#90303p1133 10/30/1990 ~PR Newswire

NASHVILLE, TENN (OCT. 30) PR NEWSWIRE - Volunteer Capital Corporation (NYSE: VCC) today reported operating results for the third quarter and first nine months of 1990.

President Lonnie J. Stout II said the Company posted net income of $232,000, or $.06 per share, in the quarter ended September 30, 1990, as compared to a loss of $387,000, or $.10 per share, in the quarter ended October 1, 1989. Sales for the third quarter of 1990 were $9,384,000, versus $9,118,000 in the third quarter of 1989.

Volunteer Capital Corporation recorded net income of $1,276,000, or $.32 per share, for the nine month period ended September 30, 1990, as compared to a net loss of $15,733,000, or $3.90 per share, recorded in the first nine months of 1989. Sales for the first nine months of 1990 were $28,076,000, versus

$50,278,000 in 1989.

Net income for the third quarter included an extraordinary gain of $86,000 resulting from the utilization of net operating loss carryforwards. Net income for the nine months ended September 30, 1990 included extraordinary gains of $485,000 resulting from utilization of net operating loss carryforwards and $371,000 (net of taxes) from repurchases of the Company's 8 1/4 percent convertible debentures.

The results for the first nine months of 1989 include a loss provision of $12,130,000, relating to the disposition of the Company's Mrs. Winner's restaurant operations.

The Company's Wendy's operations reported operating income of $828,000 during the third quarter of 1990, as compared to $647,000 reported for the third quarter of 1989. Average store sales for the division were $189,000 for the third quarter of 1990, up 2.7 percent from $184,000 in the third quarter of 1989.

Volunteer Capital Corporation operates 50 Wendy's Old Fashioned Hamburgers restaurants in four states. The Company's common stock is traded on the New York Stock Exchange (NYSE: VCC).

FOUNTAIN VALLEY, CA (OCT. 30) PR NEWSWIRE - FHP International Corp. (NASDAQ: FHPC) reported today that net income for the first quarter ended Sept. 30, 1990 totaled $8,449,000 or $0.32 per share, up 25 percent from the $6,783,000 or $0.26 per share reported for the same period last year. Revenue for the quarter increased 40 percent to $293,822,000 compared with $210,044,000 reported last year.

Robert Gumbiner, M.D., chairman of the board and chief executive officer, stated, "FHP's first quarter growth in revenue and earnings was achieved through increased membership, an improvement in administrative expenses, and higher interest income.

"The percent of revenue spent on health care rose during the quarter, due in part to accelerated physician staffing in the California region's medical centers and hospitals. This increase in physicians should help meet heavier utilization demands during the winter months.

"The company recently acquired a second 99-bed skilled nursing facility in Norwalk, Calif., which will be used to provide subacute and rehabilitation services at a significant cost savings over providing that care in a hospital."

"A new full-service medical center for commercial members has been added in Garden Grove, Calif. and new Individual Practice Association (IPA) plans have been developed in Antelope Valley and Long Beach, Calif.," Dr. Gumbiner said.

The company's total membership increased from 479,000 on Sept. 30, 1989 to 566,000 on Sept. 30, 1990, an 18 percent increase. The commercial plan, offered to over 3,000 employer accounts, grew from 342,000 members at the end of the first quarter last year to 386,000 on Sept. 30 of this year. FHP's Senior Plan, a comprehensive health care plan for Medicare beneficiaries, now has 180,000 members, up from 137,000 members a year ago.

FHP International Corp., through its wholly owned subsidiary FHP Inc., operates staff, IPA and mixed model health maintenance organizations. The company also offers life and indemnity health insurance through FHP Inc.'s subsidiary, FHP Life Insurance Co.

FHP's service areas include Southern California, Utah, Arizona, New Mexico, and Guam. The company is one of the largest Medicare risk contractors in the nation.

NEW YORK (OCT. 30) PR NEWSWIRE - Manufacturers Hanover Trust Company commenced a lawsuit today in the Supreme Court of the State of New York, County of New York, against The Equitable Life Assurance Society of the United States as a result of Equitable's failure to perform its obligations to provide financial support in the amount of nearly $100 million for the 54 story One Astor Plaza office building located at 1515 Broadway in New York City.

Manufacturers Hanover said that it is suing in order to protect the interests of itself and a group of participating banks in financial transactions relating to the purchase, improvement and operation of the building. It stated that Equitable's conduct had come as a complete surprise and was totally inconsistent with what was expected of a financial institution of Equitable's stature.

Manufacturers Hanover said that it and the participating banks had provided mortgage financing and other financial accommodations with respect to the building in reliance on Equitable's commitment to provide financial support for the project and that Equitable was seeking to avoid that support by causing the Equitable-sponsored partnership which owns the building to file a bankruptcy petition.

Equitable is a general partner of the partnership which in turn is the general partner of the partnership which owns the building. Manufacturers Hanover stated that Equitable had caused the bankruptcy filing solely to further its own interests and that there had been no prior communication or indication from Equitable to the lenders concerning Equitable's intentions or actions.

The suit seeks $100 million in compensatory damages and $500 million in punitive damages. In a separate but related proceeding, Manufacturers Hanover has moved in the United States Bankruptcy Court for the Southern District of New York for an order dismissing the bankruptcy case on the grounds that Equitable lacked authority and did not act in good faith in commencing the bankruptcy.

WOBURN, MASS. (OCT. 30) PR NEWSWIRE - Thermo Cardiosystems Inc. (AMEX: TCA) today reported record revenues of $817,000 for the third quarter of 1990, compared with $478,000 for the same period in 1989. Net loss for the quarter was $5,000, compared with a net income of $33,000 for the same period in 1989.

"Our revenues continue to increase as more transplant centers join our clinical investigation of the air-driven HeartMate(R) ventricular- assist device (VAD)," said Victor L. Poirier, president of Thermo Cardiosystems Inc. "At the same time, we continue to increase our spending on research and VAD development."

In addition, the company is continuing to work closely with the U.S. Food and Drug Administration on an application to begin clinical trials of a battery-powered VAD.

Thermo Cardiosystems Inc, is a leader in research and development of implantable ventricular-assist devices. These devices are designed to perform substantially all or part of the pumping function of the left ventricle of the natural heart for patients suffering from cardiovascular disease. Thermo Cardiosystems is a public subsidiary of Thermedics Inc. (AMEX: TMD) and Thermo Electron Corporation (NYSE: TMO).

WALTHAM, MASS (OCT. 30) PR NEWSWIRE - Thermo Process Systems (AMEX: TPI) today reported revenues of $14,335,000 for the second quarter of fiscal 1991, compared with $11,796,000 for the second quarter of fiscal 1990. Net income

was $1,003,000, compared with $605,000 last year.

"We are pleased to have achieved strong results for the quarter in spite of heavy investments in the start-up of our soil-remediation business," said Walter J. Bornhorst, chairman and chief executive officer of Thermo Process Systems. "The improvements we have made in our soil-remediation operations, based on our extensive field experience, have greatly increased our productivity."

Thermo Process Systems designs, manufactures and sells advanced custom-engineered thermal-processing systems for the incineration of hazardous wastes and the automated heat treating of metal parts. The company also provides services for the on-site remediation of hazardous wastes and petroleum-laden soils, in addition to a comprehensive range of metallurgical processes. #90303p1145 10/30/1990 ~PR Newswire

NEW YORK (OCT. 30) PR NEWSWIRE - Fairbanks Morse Engine, a division of Coltec Industries, has received a $3.1 million order from Montefiore Medical Center in the Bronx, N.Y. for cogeneration equipment that is expected to reduce the hospital's energy consumption by 40 percent.

The Fairbanks Morse Engine equipment, which will produce both heat and electricity, includes one nine-cylinder, opposed-piston engine that generates 2,376 kilowatts and two six-cylinder, opposed-piston engines, each with output of 1,570 kilowatts.

The nine-cylinder and six-cylinder engines are part of the Model 38ETDD8-1/8 series, a state-of-the-art Fairbanks Morse Engine product line that features a pure turbocharged design. This design provides higher specific output, greatly improved fuel consumption and reduced exhaust emissions compared with the previous design. The units will operate at 900 revolutions per minute, be subbase mounted and be installed on vibration isolators.

The equipment will be integrated into a system designed by Braun Engineering Associates, P.C., of West Babylon, N.Y. Heat will be recovered from the engine exhaust, jacket water and lube oil resulting in an overall efficiency of 70 percent. Exhaust gas will be treated to reduce nitrous oxide and carbon monoxide emissions.

The diesel engine exhaust will feed into a modified B&W Commercial D-type Boiler to cogenerate heat. Montefiore Medical Center estimates the reduced energy costs created by the Fairbanks Morse Engine equipment will result in

savings equal to the cost of the equipment within 4.5 years. The medical center is a 1,262-bed acute care facility.

Fairbanks Morse Engine, based in Beloit, Wis., manufactures large, heavy-duty gas, diesel and dual-fuel engines for marine propulsion and for stationary and marine power generation.

Coltec. Industries Inc., based in New York, is a privately owned manufacturing company with 1989 revenues of $1.52 billion serving aerospace, automotive and other industrial markets.

#90303p1147 10/30/1990 ~PR Newswire

ARMONK, NY (OCT. 30) PR NEWSWIRE - MBIA Inc. (NYSE: MBI), holding company for Municipal Bond Investors Assurance Corporation (MBIA Corporation), today reported that third quarter net income increased 28 percent to $33.3 million compared with $26.0 million in the third quarter of 1989. For the first nine months of 1990 net income increased 27 percent to $96.8 million compared with $76.5 million in the same period a year ago.

Third quarter earnings per share increased 23 percent to $.86 compared with $.70 last year, and for the first nine months of 1990 earnings per share rose 24 percent to $2.56 from $2.06. Book value per share at the end of September was $23.81 compared with $20.46 at Sept. 30, 1989.

MBIA continued to be the leading guarantor of new municipal bond issues, insuring $2.7 billion and $9.4 billion in par value, respectively, for the third quarter and year-to-date. Based on data from The Bond Buyer, these amounts represent 33 percent of the industry total for the third quarter and 38 percent for the year. Total new issue volume through Sept. 30, 1990, was $91.8 billion, 3 percent ahead of the total for the first nine months of 1989. The insured portion of the market was 26 percent, the same as last year.

Gross premiums written for the quarter rose 36 percent to $47.4 million, compared with $34.8 million a year ago. For the first nine months of the year gross premiums written totalled $149.7 million, up 40 percent from $107.1 million in 1989. Excluding the effects of reinsurance transactions in 1989 and 1990, gross premiums written increased 10 percent for the third quarter and 30 percent for the first nine months, compared to the prior year's periods.

Premiums earned during the third quarter were $26.7 million, a 13 percent increase over 1989. This included $2.0 million from refundings of previously insured issues, compared to $6.4 million for the prior year. For the year to date, premiums earned rose 17 percent to $79.8 million, and included $8.9 million from refundings versus $15.9 million last year. The growth in

premiums earned reflects the impact of the unearned premium reserve of Bond Investors Group (BIG) acquired in 1989.

Net investment income for the quarter increased 42 percent to $29.4 million from $20.7 million a year ago and was $85.1 million for the first nine months of 1990 compared with $59.2 million in 1989. The increase was due to the acquisition of BIG, additions to investments from operating cash flow and higher average yields. At Sept. 30, 1990, MBIA's investment portfolio totalled $1.7 billion and consisted mainly of intermediate-term bonds.

Revenues for the third quarter of 1990 were $56.3 million, compared with $44.5 million in the third quarter of 1989. For the first nine months of 1990, revenues totalled $166.6 million, 30 percent above the $127.7 million in the same period a year ago. Revenues are the sum of earned premiums, net investment and other income.

Expenses for the third quarter and first nine months were $12.5 million and $40.2 million, respectively, compared with $10.9 million and $27.6 million last year. The primary reasons for these increases were interest expense and goodwill amortization arising from the BIG acquisition.

Computed on a statutory basis, MBIA Corporation's unearned premium reserve as of Sept. 30, 1990, was $897.2 million, and its capital base (consisting of capital, surplus and contingency reserve) was $811.3 million, for an aggregate $1.7 billion of policyholders' reserves compared with $1.2 billion a year ago.

MBIA Inc., through its wholly owned subsidiary, MBIA Corporation, is a leading insurer of municipal bonds, including new issues and bonds traded in the secondary market. MBIA is rated Triple-A by Moody's Investors Service, Inc., and by Standard & Poor's Corporation and municipal bonds insured by MBIA receive these ratings.

#90303p1151 10/30/1990 ~PR Newswire

MOORESTOWN, N.J. (OCT. 30) PR NEWSWIRE - Comtrex Systems Corp. (NASDAQ: COMX) manufacturers of computerized point-of-sale terminals and control systems, today reported that net income for the second quarter of fiscal 1991 was $26,169 or $.01 per share compared to a loss of $174,567 or $.08 per share for the like period in fiscal 1990.

Jeffrey C. Rice, president and CEO of Comtrex, reported that this period marks the first profitable quarter for the company since the quarter ending Dec. 31, 1986.

Revenues for the three months ended Sept. 30, 1990, were $1,019,514 compared with $828,808 for the same quarter a year earlier and 95 percent ahead of first quarter fiscal 1991 revenues of $523,024.

For the six months ended Sept. 30, 1990, the company reported a loss of $281,689 or $.11 per share on revenues of $1,542,538 compared with a loss of $390,997 or $.18 per share on revenues of $1,425,037.

Rice said the company's improving performance is attributable to several factors including a strengthened dealer network in the United States, a major order from Wang Laboratories and continuing growth for Comtrex Systems in the European market.

Comtrex recently received orders from Wang totaling approximately $1 million for point-of-sale terminals used in cafeteria and food service installations by the U.S. Air Force. Shipments of these units began in August and are to continue over a six-month period.

The company also announced shipment of its 1000th Sprint unit to France via its European distributor, Restaurant Data Systems, and that first production units of its new SS-960 Super Sprint for fine dining establishments, will be

shipped on Nov. 1.

During the quarter ended Sept. 30, 1990, Comtrex raised approximately $427,500 net of expenses through the sale of 700,000 shares of its common stock. Common shares outstanding at Sept. 30, 1990, were 2,744,029, compared with 2,169,522 at Sept. 30, 1989.

Comtrex Systems Corp. stock is traded on NASDAQ Over The Counter Market symbol COMX.

#90303p1153 10/30/1990 ~PR Newswire

MAYNARD, MASS. (OCT. 30) PR NEWSWIRE - Digital Equipment Corporation today announced the acquisition of the financial services business of Data Logic, Ltd. The division, headquartered in London, is a leading supplier of financial information distribution systems for trading rooms. The acquisition gives Digital additional expertise in systems integration and the development, implementation, and support of UNIX-based systems. Data Logic systems are installed in more than 30 banks throughout Europe.

According to Digital vice president William M. Steul, whose group focuses on

service industries such as banking and investments, "This acquisition, which highlights Digital's commitment to open systems, strengthens our ability to offer customers all the services and technology needed to build integrated trading rooms. In addition, Data Logic customers will benefit from Digital's worldwide sales and support structure."

Per-Olof Loof, director of service industries for Digital in Europe added, "Data Logic's experience in developing, installing and integrating financial trading systems, particularly under UNIX, is well known to European financial services companies. They have strong skills in an area that is strategically important to Digital."

Under the terms of the agreement, Digital will assume all operations of the division, including employment of approximately 100 people, support for their installed systems and performance under their customer contracts. Digital will also now own the rights to Data Logic trading- related products including a UNIX-based digital distribution product, video switch products and application development tools.

As part of Digital's worldwide program to develop, market and support complete trading room solutions, the company last year introduced DECtrade, a VMS software platform that is the foundation for customized trading systems. The company recently outlined plans to develop and market a UNIX-based version as well.

Data Logic is a wholly owned subsidiary of Raytheon United Kingdom, Ltd. Digital Equipment Corporation, headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

ATLANTA (OCT. 30) PR NEWSWIRE - The Southern Company (NYSE: SO) has restated its earnings for the periods ending Sept. 30 to reflect an after-tax charge against net income that was announced last week.

The decision to take the charge -- which totals $218 million or 69 cents per share -- was made after the Supreme Court of Georgia refused to review a decision by the state public service commission disallowing a portion of the company's investment in the Vogtle nuclear plant.

Net income is now reported as $621 million or $1.97 per share for the 12 months ending Sept. 30 -- down $269 million or 85 cents per share from the corresponding period a year ago.

For the third quarter of 1990, earnings are restated to $188 million or 60 cents per share -- off $170 million or 53 cents per share from the third quarter of 1989.

The Southern Company is the parent firm of five electric utilities: Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric. The Southern Company's common stock is one of the 20 most widely held corporate stocks in America.

WOODBURY, N.Y. (OCT. 30) PR NEWSWIRE - Comverse Technology, Inc. (NASDAQ: CMVT), today announced the signing of an exclusive distribution agreement with Alcatel Indetel in Mexico. Alcatel Indetel is the Mexican-based wholly owned subsidiary of Alcatel, the French telecommunications giant. Alcatel Indetel will market Comverse's Trilogue voice and facsimile management systems in Mexico.

Brian Wiltshire, president of Comverse International, stated, "This is yet another step in our penetration of the most important international markets. Alcatel is one of the largest telecommunications companies in the world, and in this case Alcatel Indetel has a very major position in all of the relevant Mexican markets. In fact, we are delighted to announce that Alcatel Indetel has already received an initial purchase order from TelMex (the Mexican PTT)."

Lincoln H.J. Clark, director/public switching systems at Alcatel Indetel, stated, "We expect to obtain a significant penetration of the Mexican PTT and also to sell the Trilogue into the CPE (customer premise equipment) market. Alcatel Indetel provides a substantial number of telecommunications products, including central office switches, to TelMex. We also sell the Alcatel 5100 PBX throughout Mexico." Clark further stated, "We believe that the Trilogue system will contribute significant revenues and profits to Alcatel Indetel, and we are very pleased to have established this partnership."

Comverse, located in Woodbury, develops, manufactures and markets high performance computer systems for commercial and defense communications applications, including multi-media message management systems under the name of Trilogue.

MINNEAPOLIS (OCT. 30) PR NEWSWIRE - As previously announced on Oct. 10, 1990, Golden Valley Microwave Foods, Inc. (NYSE: GVF) had flat earnings for the third quarter of 1990 on sales that were lower than the third quarter of 1989.

Chairman and chief executive officer of Golden Valley Microwave Foods, James D. Watkins, reported that net income was $4.9 million, or $0.27 per share, for the 13-week period ended Sept. 29, 1990, versus $4.9 million, or $0.27 per share in the comparable quarter of 1989. Net sales were $38.6 million, down 7 percent from $41.4 million in the third quarter of 1989.

For the nine months ended Sept. 30, 1990, net income was $17.0 million, or $0.93 per share, a 29-percent increase over the $13.2 million, or $0.73 per share, reported in 1989. Net sales were $122.8 million, up 4 percent from $118.5 million for the first nine months of 1989.

Golden Valley Microwave Foods, Inc. is a leader in the development and marketing of foods produced specifically for preparation in microwave ovens. The company's products use proprietary product formulations, manufacturing processes, and packaging technology. The products are distributed through the vending industry, mass- merchandising outlets, and grocery stores. Lamb-Weston, a 50/50 joint venture with ConAgra, Inc., is a leading participant in the frozen french fry industry, supplying most of the major restaurant chains and food service distributors in the United States.

GAINESVILLE, FLA. (OCT. 30) PR NEWSWIRE - Pharmatec Inc. (NASDAQ: PHTC) today announced it received a grant from the U.S. Public Health Service under the government's Small Business Innovation Research Program to finance the initial development of a drug to treat depression.

There is presently no totally satisfactory therapy for depression. Tranylcypromine ("TCP") is a monoamine oxidase ("MAO") inhibitor, a group of drugs which have been used in the treatment of depression. While TCP has been successful in treating depression, its side effects are significant and its use has been limited.

Pharmatec has developed a patented carrier molecule which, attached to a drug, enables the combination to selectively be delivered to the brain. By using Pharmatec's carrier with Tranylcypromine, it is anticipated that a larger quantity of the drug will reach the brain, blood levels will be lower, side effects will be significantly reduced, and the drug will be released in the brain over a longer period of time.

Commenting on the grant, Marcus E. Brewster, Ph.D., director of Research of Pharmatec, said, "This grant will enable us to launch the development of a Carrier-TCP combination for treating this disease, which affects millions of people in the United States." Brewster continued, "The market for a drug able to effectively treat depression without harmful side effects would be in the hundreds of millions of dollars annually."

Pharmatec is a research-based pharmaceutical company specializing in the development of two novel technologies -- a carrier system for increasing the delivery of drugs to the brain and MOLECUSOL(R) brand cyclodextrins for increasing the solubility and stability of drugs.

RED BANK, N.J. (OCT. 30) PR NEWSWIRE - The trustees of North European Oil Royalty Trust (NYSE: NET) announced today a quarterly distribution of 39 cents per unit, which will be paid Nov. 21, 1990 to holders of record Nov. 9.

In announcing the distribution, John H. Van Kirk, managing trustee, stated that the prices received for gas continued to increase and the conversion value of the Deutsche mark against the dollar also improved. This payment represents a 39.3 percent increase over the amount paid last year for the same quarter. With this payment, total distributions for the current fiscal year will be $1.41 a unit, an increase of 36.9 percent over the $1.03 paid during fiscal 1989.

The annual meeting of certificate holders of the trust will be held in New York on Wednesday Feb. 13, 1990. Notice of that meeting and proxy statement will be sent with distribution of the annual report for the fiscal year of the trust which ends Oct. 31, 1990.

WAUKESHA, WIS. (OCT. 30) PR NEWSWIRE - Hein-Werner Corporation (AMEX: HNW) today reported results for the third quarter ended Sept. 29. Net sales decreased 4 percent to $23.5 million from $24.4 million in the year earlier quarter. Net earnings declined to $159,000 or $.08 per share from $588,000 or $.30 per share. Weighted average shares outstanding were 1,947,000 in the current quarter as compared to 1,937,000 in the third quarter of 1989.

For the nine months ended Sept. 29, 1990 net sales decreased 10 percent to $77.2 million from $85.6 million. Net earnings declined to $1.15 million or $.59 per share form $2.5 million or $1.25 per share.

Joseph L. Dindorf, president and chief executive officer, said, "While business conditions remain difficult in the United States and Canada, Hein-Werner has experienced strong demand for its automotive service equipment products in Europe and for its domestic OEM fluid power business." Dindorf added, "In the shore term, we continue to encourage our shareholders to use conservative expectations for Hein- Werner's operating performance. We are convinced that when business conditions turn positive, the company is well positioned to pursue opportunities in the United States and Canada which, combined with a strong European and Far East presence, will lead to favorable operating results comparisons."

Hein-Werner Corporation is a leading worldwide manufacturer and marketer of collision repair, automotive service and fluid power equipment. The company has manufacturing operations and sales offices in the United States, Canada, Mexico and Europe with distribution channels throughout the rest of the world.

WILMINGTON, DEL. (OCT. 30) PR NEWSWIRE - Wilmington Trust Co. (NASDAQ: WILM) announced today that it has reached an agreement to acquire Citibank's retail precious metals program.

The acquisition is scheduled to become effective Dec. 14, 1990. The acquisition will involve the transfer of Citibank's U.S. retail precious metals sales and purchase activities, including active accounts which currently store gold and silver bullion bars and coins.

According to industry sources, this acquisition will make Wilmington Trust's Refined Investments(SM) Program one of the largest retail precious metals sales and storage programs in the country. Developed by Wilmington Trust in 1987, the Refined Investments Program is a precious metals investment and depository service that Wilmington Trust offers through its own retail branch system and other participating banks.

Wilmington Trust has provided safekeeping of precious metals since 1975 and established its precious metals banking and sales operation in 1984. In 1987, Wilmington Trust was named by the New York Mercantile Exchange as its first depository approved for precious metals storage outside New York City. It was also designated an approved depository for the Chicago Mercantile Exchange.

"Wilmington Trust has a long-term commitment to providing high- quality,

specialized financial services nationwide," said Leonard W. Quill, Wilmington Trust Co. president. "Our precious metals program is an important element in this strategy," he said.

Wilmington Trust's precious metals business is managed by Michael B. Clark, vice president. Clark has been involved in the precious metals industry since 1979 and was recently elected to serve a second term as chairman of the Industry Council for Tangible Assets (ICTA), a trade association headquartered in Washington.

MINNEAPOLIS (OCT. 30) PR NEWSWIRE - Kinnard Investments, Inc. and Bankers Systems Brokerage Services, Inc. announced today they have executed a letter of intent for the acquisition of Brokerage Services, Inc. by Kinnard.

Brokerage Services, Inc., a St. Cloud, Minn.-based firm, is a self- clearing broker-dealer which offers various levels of securities and insurance brokerage services to and in banks, savings and loans and credit unions. Brokerage Services has been providing various services to financial institutions since 1985 and has over 400 client banks.

Kinnard is the parent company of John G. Kinnard and Company, a Minneapolis-based full service broker-dealer which has offices in 28 cities in the Upper Midwest.

Robert R. Martin, chairman of the board of Kinnard, said, "The acquisition of Bankers Systems Brokerage Services is another step in our plan to diversify our earnings base and product mix. We believe that in the 1990s banks will have more involvement in the securities business and this is an opportunity for Kinnard to enter that growth area."

Consummation of the transaction is subject to certain conditions, including the execution of a definitive purchase agreement.

The acquisition is to be closed within 30 days.

NEW YORK (OCT. 30) PR NEWSWIRE - Philip H. Geier Jr., chairman of the board and chief executive officer, reported that The Interpublic Group of Companies, Inc. (NYSE: IPG), had net income of $8,067,000 for the third quarter of 1990, an increase of over 16 percent from $6,934,000 during the same period in 1989. Earnings per share increased over 14 percent to $.24 from $.21 in 1989. Gross income increased almost 12 percent to $316,033,000 from $283,270,000 during the third quarter of 1989.

Net income for the nine months ended Sept. 30, 1990, increased over 10 percent to $47,643,000, as compared to $43,245,000 during the same period in 1989. Earnings per share also increased over 10 percent to $1.42 from $1.29 in 1989. Gross income increased to $942,921,000 from $876,828,000 during the same period in 1989.

Continuing cost containment efforts kept costs at appropriate levels in light of the general economic conditions. Geier noted that the company's financial condition continued to be excellent, with a strong balance sheet and a solid cash position.

Interpublic's agency systems have achieved net new business through Sept. 30, 1990, of approximately $495 million, which is an indication of solid growth.

The Interpublic Group of Companies is comprised of McCann-Erickson Worldwide, Lintas:Worldwide, Dailey & Associates, interests in The Lowe Group and other related companies.

RICHMOND, VA. (OCT. 30) PR NEWSWIRE - United Dominion Realty Trust, Inc. (NYSE: UDR), a Richmond based real estate investment trust, today reported third quarter 1990 funds from operations of $3,691,000 or $.32 per share compared with $3,373,000 or $.32 per share for the third quarter last year. Funds from operations increased 9 percent overall, but with additional shares outstanding in the current quarter, the per share results were the same. For the current third quarter, the Trust had rental income of $11,258,000, income from property operations before depreciation of $6,465,000 and net income of $1,366,000 or $.12 per share, including $417,000 from a gain on the sale of real estate. For the third quarter last year, rental income was $9,307,000, income from property operations before depreciation was $5,609,000 and net income was $823,000 or $.08 per share.

A comparison of how the properties operated in the two quarters shows the following:

CORE GROUP OF APARTMENTS -- Average occupancy declined 1 percent to 93.3 percent, average rental rates increased 3.8 percent and rental expenses increased 5.8 percent.

RECENTLY ACQUIRED APARTMENTS -- Average occupancy increased to 80.8 percent, but rental gains were substantially offset by higher rental expenses and capital costs.

COMMERCIAL PROPERTIES -- Shopping center occupancy fell approximately 3.2 percent to 91.1 percent as gains at recently renovated centers were offset by higher vacancies elsewhere.

For the first nine months of 1990, the Trust reported funds from operations of $11,319,000 or $.97 per share on rental income of $32,512,000 income from property operations before depreciation of $19,107,000 and net income of $3,880,000 or $.33 per share, including $417,000 from a gain on the sale of real estate. For the first nine months of 1989, the Trust reported funds from operations of $8,849,000 or $.98 per share on rental income of $27,351,000, income from property operations before depreciation of $16,960,000 and net income of $3,843,000 or $.43 per share, including a $1,390,000 gain on the sale of real estate.

United Dominion Realty Trust is an equity real estate investment trust that owns and operates primarily apartments but also shopping centers from Virginia to Georgia. The Trust specializes in purchasing properties that can be upgraded by capital improvements and new management. United Dominion's common stock is traded on the New York Stock Exchange under the symbol "UDR."

#90303p1189 10/30/1990 ~PR Newswire

FAIRFAX, VA (OCT. 30) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) today announced that it will provide collection facilities for used motor oil as it joins the Florida Used Oil Recycling Program. Mobil said its participation in the Florida program is a first step in determining how it might address the collection of used motor oil on a national basis. Mobil's pilot program will include both educating its customers and providing collection facilities.

Earlier this month, Mobil launched national television advertising urging motorists to dispose of used motor oil in an environmentally acceptable manner. The seven-second ending to its "Mobil 1" motor oil commercials encourage do-it-yourself oil-change customers to take the oil to collection centers at service stations, garages, government- operated facilities, and other locations.

"The improper disposal of used oil has been identified as a real environmental concern," stated R.J. McCool, vice president of U.S. marketing for Mobil. "A growing number of our customers, many of whom do their own oil changes, recognize that improper disposal of used oil is not in anyone's interest. As a marketer of automotive lubricants, we want to do our part to make sure that used oil is disposed of properly.

"Beginning this week, we are asking all Mobil dealers in Florida who have the ability to accept used oil, to join the state's Used Oil Recycling Program. At those locations that do not have the ability to receive and store used oil, we will encourage our dealers to participate in the program's educational

component." Mobil has 400 stations in Florida.

The Mobil educational effort will complement the state's program by posting signs urging used oil recycling and letting consumers know where they can get more information, and the locations of used oil collection centers.

McCool announced that each of Mobil's company-operated stations in Florida that have used oil storage tanks will begin accepting oil immediately.

Florida's Used Oil Recycling Program is administered by the Florida Department of Environmental Regulation.

Mobil also announced today that it will conduct a pilot used oil collection program in the Washington, D.C., metropolitan market, which includes the District of Columbia, northern Virginia, and southern and western Maryland.

#90303p1190 10/30/1990 ~PR Newswire

CLEVELAND (OCT. 30) PR NEWSWIRE - McDonald & Company Investments, Inc. (NYSE: MDD) today reported revenues and earnings for the second quarter ended Sept. 28, 1990.

For the quarter ended Sept. 28, 1990, revenues were $19,948,000, compared to $18,091,000 for the quarter ended Sept. 29, 1989, an increase of 10 percent. Revenues for the fiscal six months ended Sept. 28, 1990 were $39,008,000, compared to revenues of $36,107,000 for the fiscal six months ended Sept. 29, 1989, an increase of eight percent.

Included in revenues and net income for the second quarter of fiscal 1991 was a nontaxable gain of $716,000 from the sale of the company's 50 percent interest in Meuse, Rinker, Chapman, Endres & Brooks, Inc.

Net income for the quarter ended Sept. 28, 1990 was $227,000, or $.04 per share, compared to $703,000, or $.12 per share, for the second quarter of the prior fiscal year. Net income for the fiscal six months ended Sept. 28, 1990 was $644,000, or $.11 per share, compared to net income of $1,875,000, or $.32 per share, for the fiscal six months ended Sept. 29, 1989. This represents a decrease in net income of 68 percent and 66 percent, respectively, for the fiscal three and six month periods ended Sept. 28, 1990 when compared to the same periods in the prior fiscal year. Net income was favorably impacted by the provision for income taxes which resulted in a tax benefit of $145,000 or $.03 per share, in the three months ended Sept. 28, 1990, and a $30,000 tax liability for the first half of the current fiscal year. The tax provision benefitted from the substantial amount of non-taxable income recognized in the current year. The average number of common shares outstanding in the second

quarter and first six months were 5,504,000 and 5,582,000, respectively, compared to 5,781,000 and 5,787,000 in the year-ago periods.

Directors of McDonald & Company Investments, Inc. today declared a regular quarterly dividend of five cents per share, payable Nov. 23, 1990 to shareholders of record Nov. 13, 1990.

McDonald & Company Investments, Inc., through its principal subsidiary McDonald & Company Securities, Inc., operates a regional investment banking and brokerage business with 22 offices in Ohio, Michigan and Indiana and four offices in Illinois, Massachusetts, New Jersey and Texas.

#90303p1192 10/30/1990 ~PR Newswire

NEWINGTON, CT (OCT. 30) PR NEWSWIRE - TeleConcepts Corporation (AMEX: TCC) today announced that for the first time in the past eleven quarters the company has reported a net profit. The profit for the third quarter of 1990 was $10,000 versus a loss of $433,000 for the third quarter of 1989. The loss for the nine months ending Sept. 30, 1990 was $191,000 versus a loss of $1,710,000 for the nine months ended Sept. 30, 1989. The company feels that it has made significant progress since its most recent profitable year in 1987 in turning the company around. This has been accomplished through three major adjustments to the structure of the company.

1) Inventories have been reduced from $7,748,000 at the end of 1988 to their current level of $3,150,000.

2) Total debt and accrued interest has been reduced from $7,648,000 at the end of 1988 to its current level of $3,110,000.

3) Wages have been cut from an annual rate of $1,735,000 for the twelve months ended Dec. 31, 1988 to their current annualized rate of $1,326,000.

Gross profit increased from $194,000 for the third quarter of 1989 to $657,000 for the same period of 1990. In 1989 certain of the company's products were

being sold at a loss. These products have been liquidated or are now being sold at a substantial profit which has resulted in the 419 percent increase in the gross profit for the nine month period ended Sept. 30, 1990 versus the nine month period ended Sept. 30, 1989. Further, the company has moved the production of its principal products from Korea to Malaysia and China. This has resulted in a saving due to lower import costs and the elimination of import duties for product made in Malaysia. The year to date gross profit for 1990 was $1,547,000 versus $298,000 for the first nine months of 1989.

Net sales for the third quarter of 1990 were $2,925,000 versus $3,178,000 for the third quarter of 1989. This 8 percent decline in sales was due to the slower economy and the corresponding apprehension by retailers about the Christmas season. The backlog at Sept. 30, 1990 was $1,402,000 versus $2,110,000 at the same time in 1989. New products which are now under development are expected to significantly increase next year's sales. These products will be introduced at the Consumer Electronics show which is held in January 1991 in Las Vegas.

WICHITA, KAN. (OCT. 30) PR NEWSWIRE - Brite Voice Systems Inc. (NASDAQ: BVSI) and its Canadian distributor, Time Communications Ltd. of Ottawa, Ontario, Canada, announced the sale of a Gateway 5000(TM) system to Bell Canada for approximately $2.6 million (U.S.). The system consists of call centers in Toronto and Montreal with a control center located in Ottawa, and represents the initial order under a three-year agreement between the three parties,. The system will be manufactured by Brite, and will be distributed and supported by Time which will receive appropriate distributor discounts from Brite. It is expected that the system will be installed over the next 90 days and will be operational by March 1991.

"Bell Canada will be providing the first domestic "900" service in Canada," stated Stan Brannan, president and CEO at Brite. "We look forward to working closely with Bell Canada in the installation of this system and in developing useful applications. In addition, we are excited about the opportunity to install additional equipment over the next three years."

The system will be operated by Telecom Canada, an association consisting of eight member telephone companies -- Alberta Government Telephone, British Columbia Telephone, Bell Canada, Manitoba Government Telephone Co., Maritime Telephone & Telegraph, New Brunswick Telephone, Newfoundland Telephone and Saskatchewan Telephone. The member telephone companies will sell time on the system to commercial businesses, advertisers and information providers throughout Canada. In addition, they have the right to purchase equipment under the terms and conditions of the three-year agreement with Bell Canada.

Brite Voice has also installed other large Gateway 5000 systems for Sprint Gateways, one of the largest service bureaus in the U.S., and Telephone and Information Services Ltd. in London, England. Brite Voice is recognized as one of the leading providers of audiotex and interactive voice response systems in the United States. The company sells its systems to such vertical markets as broadcast and print media, cellular telephone companies, governments, hospitals, real estate companies and telephone directory publishers.

SEATTLE (OCT. 29) PR NEWSWIRE - NeoRx Corporation (NASDAQ: NERX) announced today the appointment of Lawrence H.N. Kinet as a corporate director, expanding the company's board of directors to six.

Kinet brings to NeoRx 20 years of experience in various general management positions including 15 years with Baxter International, Inc., as corporate group vice president and president, Baxter World Trade Corporation. He is currently a partner in the Kensington Group, an international consulting firm specializing in health care.

In making the announcement, Chief Executive Officer Paul G. Abrams said, "We are very pleased to have someone with Lawrence's credentials join our board. His health-care management background and international experience will be invaluable as we move closer to commercialization of our products."

NeoRx Corporation, incorporated in May 1984, is developing monoclondal antibody-based pharmaceutical products for in vivo detection and treatment of certain types of cancer. The company has five cancer clinical trials in progress and has filed for marketing approval with the FDA for two OncoTrac(R) imaging products to detect metastatic melanoma and small cell lung cancer.

CONTACT: Robert M. Littauer, vice president, chief financial officer and treasurer of NeoRx, 206-286-2519; or Anthony J. Russo, or Susan A. Noonan of Noonan/Russo Communications, 212-979-9180, for NeoRx

DOWNERS GROVE, IL (OCT. 30) PR NEWSWIRE - James C. Smith, president and chief executive officer of HealthCare COMPARE Corp. (NASDAQ: HCCC), announced today that revenues for the third quarter ended Sept. 30, 1990 increased 47 percent to $11,170,000 from $7,605,000 during the comparable fiscal quarter a year ago. Income before extraordinary item for the third quarter increased 158

percent to $1,570,000 or $.26 per share, compared with $609,000 or $.11 per share during the comparable fiscal quarter last year.

Revenues for the nine months ended Sept. 30, 1990 increased 27 percent to $30,158,000 compared with $23,660,000 for the same period last year. Income before extraordinary item for the nine months ended Sept. 30, 1990 increased 92 percent to $3,639,000 or $.61 per share compared to $1,900,000 or $.33 per share for the same period of fiscal 1989.

Smith commented that he was extremely pleased with the third consecutive quarter of record results. He noted that the results reflect the continued expansion of the company's PPO networks into new markets and the addition of major new blocks of business with national payors of worker's compensation and group health care benefits who are increasing the services they purchase from COMPARE.

Smith noted that he is quite encouraged about the prospects for 1991 as the company further expands its cost management services to payors of worker's compensation and group health care benefits.

HealthCare COMPARE Corp. is one of the nation's leading independent managed care/cost management companies. The company provides data analysis, extensive utilization management, and provider negotiation services (PPO development and management). Its services are provided to indemnity health care payors as well as alternative delivery systems. The company manages costs and utilization without compromising the quality of care available to health care plan participants.

NORTHBROOK, ILL. (OCT. 30) PR NEWSWIRE - Woodhead Industries, Inc. (NASDAQ: WDHD) today announced the signing of a definitive agreement for the purchase of the assets of Advanced Interconnect, Inc., a privately held firm located in Uxbridge, Mass. Terms of the purchase were not disclosed. Advanced Interconnect manufactures custom cable assemblies for high-end electronic workstations and other high-tech applications. As of September 1990, Advanced Interconnect had annualized sales of approximately $5 million. The transaction is scheduled to close in mid- November.

Alan Reed, chairman and chief executive officer, stated, "This is the first acquisition since the beginning of our major restructuring program in 1986, and we are pleased to have found a company so well- focused and so much in parallel with our future growth plans. The entire management team has agreed to remain and continue their operation of the business. Advanced Interconnect Inc. has a proven record of growth and profitability, and it is anticipated that it will be an immediate contributor to the sales and profitability of Woodhead Industries."

Woodhead Industries, Inc. is headquartered in Northbrook. The company develops, manufactures, and markets premium quality, Safety Yellow(R) specialty electrical devices and mechanical motion control products for industrial applications.

#90303p1218 10/30/1990 ~PR Newswire

PHILADELPHIA (OCT. 30) PR NEWSWIRE - In a head-to-head battle on the trucking

competitor's home turf, Consolidated Rail Corp. (NYSE: CRR) is moving coal 16 miles, eliminating nearly 200 daily round- trip truck movements from Ohio's roads.

Conrail transports the coal in Belmont County, Ohio, between The Ohio Valley Coal Company's Powhatan No. 6 Mine and a barge-loading facility on the Ohio River under a contract with The Ohio Valley Transloading Co., an affiliate of Ohio Valley Coal. All of the traffic moved previously by truck.

"This is part of Conrail's continuing effort to take freight off the highways and put it on the railroad," said Gordon H. Kuhn, Conrail's senior vice president-marketing and sales. "As these efforts succeed, motorists will find highways less congested. This means less damage to roads by heavy trucks which do not pay their fair share toward highway construction and maintenance. By contrast, Conrail's service runs on railroad-owned and maintained right-of-way. Our efforts to move freight from the highways to the railroad also help in reducing petroleum use and truck-generated pollution.

"Freight railroads are more energy-efficient than trucks in moving freight, not just for the long-haul, but for the short-haul as well," Kuhn said. "We have the capacity, and the network, to move that freight. And we, not the taxpayers, pay to develop and maintain our rail networks."

Conrail uses dedicated crews and equipment, including rapid- discharge, air-operated hopper cars, to provide the innovative coal service in southeastern Ohio. Conrail expects to move over a million tons of coal each year under the program, with the potential available to double that amount.

The Ohio Valley Coal Co. sells the coal to customers, primarily electric utilities, along the Ohio River.

Conrail provides rail freight transportation service in 14 Northeastern and Midwestern states, the District of Columbia, and the Province of Quebec.

PALMERTON, PA. (OCT. 30) PR NEWSWIRE - Horsehead Resource Development Company Inc. ("HRD") (NASDAQ: HHRD), today reported record revenues of $15.3 million and net income of $6.2 million, or 17 cents per share, for the third quarter ended Sept. 30, 1990. For the comparable period last year, the company's revenues were $11.6 million with net income of $3.0 million, or 9 cents per share.

For the nine months the company reported revenues of $39.4 million and net income of $14.5 million, or 43 cents per share. For the comparable period a

year ago, HRD's revenues were $33.8 million with net income of $7.8 million, or 24 cents per share, exclusive of a one-time gain on the sale of assets which added $3.5 million of net income, or 11 cents per share, to 1989's results.

"Our EAF dust processing business operated at capacity throughout the quarter " James H. Davis, president and CEO, reported. "The U.S. EPA approved the next step of our major Blue Mountain land reclamation project and we began the revegetation of additional acreage. Our capacity expansions at Rockwood, Tenn., and Palmerton, Pa., both remain on schedule for start-up in the fourth quarter."

HRD is a leader in specialized hazardous waste/resource recovery services emphasizing the recovery of zinc, lead and cadmium from electrical arc furnace dust, and the recycling of these materials into useful products.

#90303p1227 10/30/1990 ~PR Newswire

DETROIT (OCT. 30) PR NEWSWIRE - Consolidated net income of General Motors Acceptance Corporation (GMAC) for the third quarter of 1990, which included the results of GMAC's financing, insurance and mortgage operations, totaled $293 million, compared with $235 million for the same period a year earlier, John R. Edman, chairman, announced today. For the first nine months of 1990, consolidated net income totaled $931 million, compared with $860 million recorded a year earlier.

Net income from financing operations amounted to $259 million for the third quarter, compared with $170 million for the comparable period a year ago. The increase was due principally to lower borrowing costs in the United States and higher income form international operations. Insurance operations contributed $34 million in the 1990 period compared with $65 million earned in the third quarter of 1989. The decrease in insurance earnings was primarily due to lower underwriting and investment income.

In the first nine months of 1990, GMAC earned $827 million from financing operations and $104 million from insurance activities. Financing income was $121 million higher in the 1990 period compared to last year, while insurance results were $50 million lower.

Average borrowing costs in the United States were 8.57 percent in the third quarter of 1990 compared with 9.04 percent last year. This decline was due primarily to lower short-term borrowing costs, which averaged 7.97 percent in the third quarter compared with 8.95 percent in the prior-year period. Borrowing costs related to medium and long-term debt averaged 9.12 percent vs. 9.14 percent in 1989.

GMAC financed or leased 561,000 new cars and trucks in the United States in the third quarter of 1990 and 1,628,000 for the first nine months. This compares with 676,000 and 1,914,000 vehicles, respectively, during the prior-year periods. Outside of the United States, 158,000 new vehicles were financed during the quarter, up 7,000 units from a year ago. Retail installment and lease financing contracts purchased worldwide totaled $11.4 billion in the third quarter and $34.3 billion during the first nine months, down $1.8 billion and $4.1 billion, respectively, from the corresponding 1989 periods.

Total earning assets were $102.3 billion at Sept. 30, 1990, compared with

$99.6 billion a year ago. Total finance receivables outstanding were $91.1 billion, compared with $89.0 billion a year ago. Retail and lease receivables outstanding at Sept. 30, 1990, totaled $75.8 billion, compared with $75.5 billion last year.

#90303p1237 10/30/1990 ~PR Newswire

ATLANTA (OCT. 30) PR NEWSWIRE - IRT Property Co. (NYSE: IRT) reported third quarter funds from operations -- the most accurate measure of performance for a real estate investment company -- of $3.1 million, or $.26 per share, compared to $3.2 million, or $.26 per share, during the third quarter of 1989.

During the first nine months of 1990, funds from operations totaled $9.3 million, or $.77 per share, compared to $9.6 million, or $.79 per share in 1989.

Third quarter net earnings were $2.0 million, or $.17 per share, compared to $1.5 million, or $.12 per share for the third quarter of 1989. Net earnings for the 1990 quarter included a $293,000 gain on the purchase of a portion of IRT's 2 percent convertible subordinated debentures. Earnings in 1989 were impacted by a $209,500 loss on the disposition of property and a $97,000 extraordinary loss on the early retirement of debt.

IRT reported year-to-date net earnings of $6.1 million, or $.50 per share, compared to $6.5 million, or $.53 per share. The 1990 figures include a gain of $993,000 on debenture purchases. Results for the same period in 1989 included a $921,000 gain on sales of property and a $97,000 loss on the early retirement of indebtedness.

Donald W. MacLeod, chairman and president of the company, stated: "The third quarter and year-to-date results reflect the fact that IRT has remained stable in a difficult real estate economy and that IRT's investment portfolio is sound and poised for growth.

"Our stable operating results and our current quarterly dividend of $.20 per share which is based solely on funds from operations enable us to generate cash internally to fund capital improvements and our on-going modernization programs," commented MacLeod.

IRT Property Co. specializes in neighborhood necessity shopping centers in the southeastern United States. Anchor tenants include Harris Teeter, Wal-Mart, Ingles and other popular national and regional chain stores. The portfolio of 90 investments represents more than 5.3 million square feet of retail space.

DETROIT (OCT. 30) PR NEWSWIRE - GM Hughes Electronics Corporation (GMHE) (NYSE: GMH) Chairman Robert J. Schultz announced today that GMHE 1990 third-quarter earnings were up seven percent over the same period a year ago to $158 million on record revenues of $2.9 billion. In the third quarter last year, GMHE earned $148 million on revenues of $2.6 billion.

Earnings attributable to General Motors Class H Common Stock were $0.40 per share for the third quarter as compared with $0.37 per share earned in the same quarter last year.

Both of GMHE's subsidiaries - Hughes Aircraft Company (Hughes) and Delco Electronics Corporation (Delco Electronics) - had improved sales and operating profits for the quarter.

The improvement in sales reflects higher production of defense-related products including ADCAP torpedoes, AMRAAM missiles and Night Vision Systems at Hughes, as well as the impact of increased GM vehicle production and new automotive product offerings by Delco Electronics. Increased operating profits resulted from these improved sales and from aggressive cost-reduction efforts.

During the third quarter, Hughes continued to pursue new business opportunities by entering into joint ventures and teaming arrangements with other companies. Included was the formation of a Hughes-Delco Electronics subsidiary - HE Microwave Corporation - that will manufacture high-technology electronics for both automotive and military applications at Hughes' Tucson, Ariz., manufacturing facility.

The company also teamed with GM subsidiary Electronic Data Systems Corporation and three other companies to pursue a NASA contract for the Earth Observing Data and Information System that will manage massive amounts of data generated by space- and earth-based sensors, and with Delco Electronics to bid on the development of a new modular mission computer for the U.S. Air Force F-16 aircraft.

Hughes also teamed with Sony Trans Com Inc. to develop a cabin communications and passenger entertainment system for the Airbus A330 and A340 airliners that will provide personal video screens, automatic in-flight shopping, and phone calls from the passenger's seat, as well as direct satellite-to-plane TV reception. An agreement also was reached with Samsung Co. Ltd. to pursue a contract that would introduce domestic satellite communications to South Korea.

The second of two Hughes-built British Satellite Broadcasting Communications satellites for direct broadcast television service to the United Kingdom was

launched, and a Hughes synthetic aperture radar mapper, the sole scientific instrument aboard the Magellan spacecraft orbiting Venus, began to produce images of craters, mountains, and other features of the planet's surface with unprecedented clarity and detail.

#90303p1242 10/30/1990 ~PR Newswire

WALL, NJ (OCT. 30) PR NEWSWIRE - New Jersey Resources Corporation (NYSE: NJR) today announced lower earnings for its fiscal year ended Sept. 30, 1990.

Consolidated net income for the year totaled $13 million, or 97 cents per share, compared with $16.4 million, or $1.45 per share, during fiscal 1989.

The decrease in consolidated earnings was primarily attributable to warmer-than-normal winter weather and the delayed resolution of a utility base rate filing, which reduced the earnings of the company's principal subsidiary, New Jersey Natural Gas Company (NJNG). In addition, NJNG experienced higher operating and financing costs associated with its continued customer growth and system expansion.

During fiscal 1990, the weather in NJNG's service territory was about eight percent warmer than normal, or the 10-year average.

The warmest second-quarter weather in NJNG's 38-year history more than offset the record cold temperatures of December 1989. If weather had been normal throughout the fiscal year, earnings would have been higher by about $3 million, or 22 cents per share.

In addition, a delay in the resolution of a base rate petition, filed in March 1989, also served to decrease earnings by preventing NJNG from implementing a $17.3 million increase until late March 1990, well after the winter-heating season.

With a return to normal weather and a full year's impact of the March 1990 base rate increase, NJR expects higher consolidated earnings in 1991, Dolan said.

On Aug. 7, NJNG filed another petition with the BPU, this time requesting a $14.8 million, or 4.5 percent, increase in base rates. The filing, NJNG's fourth since 1985, was necessitated by the higher operating, financing and construction costs associated with the utility's continuing customer growth and system expansion. NJNG is hopeful of resolving this request in a timely manner.

NJNG added 8,507 new customers in 1990, which represented an increase of

almost three percent in its customer base. Although the rate of customer growth has moderated from record levels of recent years, NJNG expects to maintain a growth rate in excess of two percent over the next several years.

Commercial Realty & Resources Corp. (CR&R), NJR's real estate development subsidiary, showed improved earnings during fiscal 1990. CR&R has remained successful due to its focus on high-quality development and the maintenance of a consistently high occupancy rate for its office and mixed-use projects.

CR&R's financial performance was favorably impacted by the completion and substantial occupancy of an 83,000-square-foot building in the Monmouth Shores Corporate Park, here, and the leasing of additional space in its Expressway Corporate Center, Egg Harbor Township.

At Sept. 30, CR&R's developed space totaled 801,500 square feet, compared with 717,300 square feet at the end of fiscal 1989. The occupancy rate associated with this space remains above 95 percent. In addition, the remaining average lease term supporting the occupied space is more than eight years, which provides a stable base of cash flow.

NJR Energy Corporation (NJR Energy), NJR's natural gas and oil exploration subsidiary, reported lower earnings in 1990 due to higher operating and interest costs associated with an increased investment in oil and natural gas properties and drilling results that were less than favorable.

For the fifth consecutive year, however, NJR Energy increased its proved reserves of natural gas and oil to record levels. At Sept. 30, proved natural gas reserves totaled 41 billion cubic feet (BCF), and proved oil reserves totaled two million barrels. These levels compared with 29 BCF and 639,000 barrels, respectively, at Sept. 30, 1989.

NEW YORK (OCT. 30) PR NEWSWIRE - Corroon & Black Corporation (NYSE: CBL) announced that its board has elected Roger J. Elliott, John N. Wooderson, and George F. Nixon to its board of directors. All three are among the senior management of Willis Faber, the London-based insurance broker with which Corroon & Black merged on October 8 to form Willis Corroon plc.

Roger Elliott, chairman of Willis Corroon, joined Willis Faber in 1950. He was appointed director of Willis Faber & Dumas Ltd. in 1968, and was named chairman of that operation in 1986. He has been a member of the board of Willis Faber p.l.c. since 1979 and chairman since 1988.

John Wooderson is the chairman of Willis Faber & Dumas (Agencies) Ltd., and deputy chairman and territorial director of Willis Faber & Dumas Limited. He joined Willis Faber in 1958, and was appointed to its board of directors in 1984.

George Nixon, chief executive of Willis Wrightson Ltd., joined a predecessor firm of Stewart Wrightson in 1964. Stewart Wrightson was acquired by Willis Faber in 1987, and Nixon was appointed chief executive of Willis Wrightson in 1988.

Richard M. Miller, chairman of the board and chief executive officer of Corroon & Black and chief executive of Willis Corroon, said in making the announcement: "It is a source of pride and pleasure to welcome our colleagues from Willis Faber onto Corroon & Black's board of directors. We are beginning a new chapter in our company's history, and the challenges we face are many. The opportunities, however, are vast, and the expected synergies are exciting."

Corroon & Black Corporation, now an operating division of Willis Corroon plc, is headquartered in New York City. Corroon & Black is one of the world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business, and industry. It has offices across the United States and affiliated offices throughout the world. Willis Corroon (ADRs traded on NYSE: WCG) traces its origins to 1824, with the establishment in London of Henry Willis & Company. Its Corroon & Black division was founded in 1905 in New York City.

#90303p1245 10/30/1990 ~PR Newswire

SIOUX CITY, IOWA (OCT. 30) PR NEWSWIRE - Midwest Energy Co. (NYSE: MWE) reported 1990 third quarter earnings of $7,490,000, or 35 cents per share, on revenues of $113,726,000. During the like period in 1989, Midwest Energy reported earnings of $17,419,000, or 81 cents per share, on revenues of $112,379,000. For the nine-month period ending Sept. 30, 1990 earnings were $21,291,000, or 99 cents per share, and revenues were $388,861,000, while comparative 1989 amounts were earnings of $39,429,000, or $1.83 per share, on revenues of $411,133,000. For the 12-month period ending Sept. 30, 1990 earnings were $31,035,000, or $1.44 per share, on revenues of $550,256,000, while comparative 1989 amounts were earnings of $48,340,000, or $2.24 per share, on revenues of $563,615,000.

Harward said electric sales to jurisdictional customers increased 7 percent for the current quarter as compared to a year ago reflecting warmer weather during the cooling season and a slight growth in number of customers. Jurisdictional sales for the nine and 12-month periods also increased by approximately 4 percent.

Natural gas sales for the first nine months of 1990 were 12 percent lower than last year, reflecting this year's mild weather conditions during the heating season. The lower sales from warmer than normal weather has been partially offset by customer growth and increased economic activity in the utility service area.

The company's non-regulated operating subsidiary, Midwest Capital Group, has performed below expectations during the last year reporting a year-to-date operating loss of 7 cents per share through Sept. 30, 1990. The loss has been caused by the construction subsidiaries which have experienced cancellation and deferral of cogeneration projects and a slowdown in electric distribution maintenance jobs performed for neighboring utilities.

Midwest Energy is a holding company with major interest in electric and natural gas utility operations and additional investments in diversified businesses. The company's utility operations provide electricity to 157,000 customers in 228 Iowa and five South Dakota communities and natural gas to 349,000 customers in 208 Iowa, 38 Minnesota, eight South Dakota and three Nebraska communities.

Midwest Energy and Iowa Resources Inc. signed a definitive agreement to merge into Midwest Resources Inc., a new holding company. The merger was approved by the shareholders of Midwest Energy and Iowa Resources, the Iowa Utilities Board and the Securities and Exchange Commission. The company awaits clearance from the Federal Trade Commission. The merger is expected to become effective no later than Jan. 1, 1991.

Midwest Energy's common stock is listed on the New York Stock Exchange and the Midwest Stock Exchange under the symbol "MWE".

JAMESTOWN, N.Y. (OCT. 30) PR NEWSWIRE - Bush Industries, Inc. (AMEX: BSH), a leading manufacturer and marketer of ready-to-assemble (RTA) furniture, today reported results for the third quarter and nine months ended Sept. 30, 1990.

Net sales for the quarter climbed more than 19 percent to $27,325,000 from $22,877,000 for the prior year's period. Net sales for the nine months rose over three percent to $76,863,000 from $74,282,000 for the like period of the previous year.

"The sales gains, achieved in a weak retail environment, reflect the benefits of diversification in home and home office furniture lines, the success of our expanding in-store display programs and our steadily broadening channels of distribution," Paul Bush, chairman and president, said. "Funding these aggressive strategies, increasing inventory levels to be more responsive to customer needs and start-up costs for a new, major distribution center have impacted earnings," he noted.

Third quarter net income was $455,000 or 10 cents per share versus net income of $455,000 or 10 cents per share for the comparable three months of 1989.

Net income for the nine months was $1,072,000 or 24 cents per share compared to net income of $2,250,000 or 50 cents per share for the initial nine months of last year.

"We have seen substantial progress in our production capabilities in accordance with our strategic manufacturing plan. Our capacity and manufacturing efficiency have improved substantially, and our investments in new technology are showing results. Our manufacturing margins are now at the highest level since our record results of 1987," Bush concluded.

The company also completed a definitive agreement for the previously announced acquisition of certain assets of Case Casard, a manufacturer of moderately priced, ready-to-assemble furniture. The purchase is being made for approximately $5.5 million in cash and notes for machinery, equipment and inventories, and is planned to close in early December. Case Casard has annual sales in excess of $15 million.

Separately, on Sept. 24, Bush Industries purchased certain working assets of Eric Morgan Company, a traditional furniture manufacturer, from its secured lender. The company's investment in the Eric Morgan asset purchase was approximately $1.3 million in cash. Eric Morgan's annual sales approximate $10 million.

#90303p1249 10/30/1990 ~PR Newswire

SEATTLE (OCT. 30) PR NEWSWIRE - The Nov. 10, 1989, breaching of the Berlin Wall has changed the rules for transporting goods to the east, according to Danzas Corp.

Danzas GmbH, the German subsidiary of the worldwide Danzas Group, was one of the first transport companies to start playing by the new rules, and by July 1 1990, had operations underway in East Germany.

Currently, Danzas has ten branch offices in what, since then, has become "the eastern part" of Germany. Five serve the principal markets of Berlin, Halle, Leipzig, Gera, and Rostock. Others provide border services at Pomellen, Frankfurt/Oder, and Forst, for freight moving to Poland; and at Neugersdorf and Zinnwald for freight moving to Czechoslovakia.

Prior to the Wall's crumbling down, the forwarding business in East Germany was completely controlled by the state-owned forwarding company Deutrans. "After the liberalization, practically all of the more imnportant forwarding companies of Germany and Western Europe started operating in the east, and Deutrans was disbanded," said Peter Scharf, region east director for Danzas

GmbH.

Danzas now offers the same basic services in the east as offered in the rest of Germany. "We offer overland traffic, air freight and ocean freight, besides several special services," explained Scharf. "Of course the infrastructure in the east is not developed as well as in the west. Both road connections and transport by rail are outdated and have not been extended during the past 40 years.

"In the past, traffic within eastern Germany was carried mostly by rail," said Scharf. "Deliveries from the stations to the consignees or companies were accomplished by truck."

Now, more than 70 percent of the movement of goods in the east has been shifted to road transportation, which has resulted in problems due to limited highway networks and conditions of the roads.

Presently more goods are imported into the east, especially consumable goods. The economy still faces difficulties regarding its exports and has yet to adjust to the market changes.

"It will take time before we see a major effect on shipments from the U.S. into eastern Germany," said Klaus Knappik, chief operating officer of Danzas Corp., Danzas' U.S. subsidiary, based in Bellevue, Wash.

DALLAS (OCT. 30) PR NEWSWIRE - Associates Corporation of North America, part of the Financial Services Group of Ford Motor Company, achieved record earnings from its domestic operations for the nine months ended Sept. 30, 1990 Reece A. Overcash Jr., chairman, announced today.

Earnings before provision for income taxes from domestic operations increased 15 percent to $392.8 million for the first nine months of 1990 from $340.1 million for the same period a year ago. Net earnings for the period were $252.9 million compared with $251.6 million a year earlier. Net earnings for 1989 included foreign subsidiaries, which in 1990 are owned by other Ford subsidiaries.

The Associates continues to manage the finance and insurance affiliates in the United Kingdom, Japan, Canada and Puerto Rico on behalf of Ford. At Sept. 30 1990, the foreign operations had assets of $1.9 billion.

Revenue from domestic operations for the nine months ended Sept. 30, 1990 increased 20 percent to $2.0 billion compared with $1.6 billion in the

prior-year period. Domestic gross finance receivables at Sept. 30, 1990, were $15.8 billion compared with $12.9 billion last year, a 22 percent increase.

Domestic consumer finance gross receivables were $9.6 billion at Sept. 30, up 40 percent from the $6.9 billion reported last year. Consumer finance volume for the nine months was $5.3 billion. The consumer operation includes installment and revolving credit loan products, credit card receivables and automobile club services.

Domestic commercial finance gross receivables totaled $6.2 billion at Sept. 30 compared to $6.1 billion a year ago. Commercial finance volume for the nine months was $4.4 billion. Commercial receivables result from the financing and leasing of transportation, industrial and communications equipment.

The Associates provides consumer finance, specialized commercial finance and leasing, and insurance. Part of the Financial Services Group of Ford Motor Company, The Associates has assets of more than $16 billion in the United States and manages additional assets of approximately $5.0 billion for other Ford subsidiaries in the United States, the United Kingdom, Japan, Canada and Puerto Rico.

HOUSTON (OCT. 30) PR NEWSWIRE - Enron Corp. (NYSE: ENE) today reported net income of $14.0 million for the third quarter of 1990, or $.15 per share after preferred dividends. The amounts compare to third quarter 1989 net income of $13.4 million, or $.14 per share after preferred dividends.

Comparable revenues were $3.1 billion in the most recent quarter and $2.1 billion a year ago.

For the first nine months of 1990, Enron reported a 32 percent increase in net income to $148.9 million, or $2.58 per share after preferred dividends. The amounts compare to net income of $112.6 million, or $1.88 per share for the

first nine months of 1989. Comparable revenues for the nine month periods ended 1990 and 1989 totaled $8.5 billion and $7.1 billion, respectively.

Although EOG disposed of selected properties in 1990, it has reinvested more dollars in core area acquisitions than it has received from these dispositions thereby benefiting the company's net reserve base, Lay said.

Enron's Gas Pipeline Group reported earnings before interest and taxes of $43.8 million in the third quarter of 1990 compared to $74.6 million a year ago. The group reported lower earnings compared to the prior quarter due to non-recurring income of $26 million pre-tax in the third quarter of 1989 primarily related to the take-or-pay settlement process. Houston Pipe Line and Enron Gas Marketing were adversely affected during the quarter by depressed natural gas prices, while income from Enron's interstate pipelines increased. Northern Natural Gas reported higher sales volumes and increased transport margins, and Citrus benefited from higher No. 6 fuel oil prices, which make its natural gas sales more competitive in the Florida marketplace.

Enron Corp., America's leading natural gas company with approximately $11 billion in annual revenues and $9 billion in assets, operates the nation's largest natural gas transmission system; markets natural gas, gas liquids, crude oil and refined products nationally and worldwide; owns 84 percent of Enron Oil & Gas Company, one of the country's largest independent (non-integrated) natural gas exploration and production companies; and also is one of the largest independent producers of electricity in the United States, with extensive experience in combined heat and power installations.

#90303p1256 10/30/1990 ~PR Newswire

DENVER (OCT. 30) PR NEWSWIRE - Ahmed D. Kafadar, chairman and chief executive officer of OEA Inc. (AMEX: OEA), the Denver-based, high- technology manufacturer of propellant and explosive actuated devices, reported record results for the fiscal year ended July 31, 1990.

Net sales and earnings for 1990 were $76,637,300 and $9,416,300, respectively, compared to $62,023,900 and earnings of $7,521,100 for the prior fiscal year. Net earnings per share were $1.41, up from $1.12 per share the prior year.

Sales and earnings during the fourth quarter were $23,453,700 and $2,541,700, respectively, compared to sales of $22,389,100 and earnings of $2,123,000 for the fiscal year 1989 fourth quarter. Earnings per share for the quarter were 38 cents compared to 32 cents for the prior- year fourth quarter.

Kafadar noted that the 24 percent sales increase from fiscal year 1989 was the

result of increases in both government and commercial operations, with the Automotive Safety Products Division the major contributor. The 25 percent net earnings increase related primarily to the increased sales. OEA's financial condition remained strong with working capital of $48,778,100 and a current ratio of 7.2. Shareholders' equity increased to $70,166,700.

Record bookings during the year of $81 million of new engineering work and follow-on production of both aerospace devices and air bag initiators resulted in a backlog of unfilled orders at July 31, 1990, of $90 million, up from the $86 million reported a year earlier.

OEA is a leader in the field of propellant and explosive-actuated devices used in (1) the personnel escape systems of military aircraft, missiles, and for space application and (2) the automotive air bag. All new aircraft, such as the F-4, F-111, F-14, F-15, F-16, F-18, B-1B, B-2, S-3A, and AH-64A, the Space Shuttle, and missiles/launchers, such as the Delta II, Titan, Harpoon, Trident ALCM, Peacekeeper, ACM, Ariane, and SICBM, have OEA-developed and manufactured devices. Most domestic automobiles equipped with an air bag use an initiator manufactured by OEA's Automotive Safety Products Division.

JFK INTERNATIONAL AIRPORT (OCT. 30) PR NEWSWIRE - New York-based Tower Air reported its September 1990 revenue passenger miles (RPMs) increased 23.3 percent compared to September 1989.

Carrier's available seat miles (ASMs) increased by 22.5 percent over the same comparable 1989 month. For September of this year, RPMs totaled 189.4 million and ASMs totaled 207.3 million. For September of 1989, RPMs totaled 153.6 million and ASMs totaled 169.2 million.

Total passengers boarded for the month were 35,140 compared to 40,056 last year, a decline of 12.2 percent. Average load factor on all services dropped slightly from 92.6 percent last September to 92.3 percent for September of 1990.

For the quarter ended Sept. 30, 1990, Tower reported an 11.3 percent increase in RPMs compared to the third quarter of 1989 and a 12.3 percent increase in ASMs. During the third quarter of 1990, Tower logged 688.9 million RPMs compared to 618.9 million in the third quarter last year. ASMs for the current period were 759.7 million compared to 673.1 million in 1989.

Passengers boarded declined 6.9 percent for the period from 144,545 in 1989 to 143,538. Average load factor on Tower's services for 1990 was 93.3 percent

compared to 93.7 percent in 1989.

Tower Air is a U.S. international scheduled and charter services operator headquartered at New York's JFK International Airport. The carrier operates Boeing 747 scheduled services from New York to Tel Aviv, Israel, and the Scandinavian countries of Denmark, Norway, and Sweden on a year-round basis.

Beginning Nov. 1, Tower will provide weekly flights from Miami to the Scandinavian countries and Helsinki, Finland. In the spring of 1991, Tower will offer scheduled service from New York to Paris. The carrier also operates charter services to France, Greece, and Italy.

#90303p1260 10/30/1990 ~PR Newswire

TAMPA, FL (OCT. 30) PR NEWSWIRE - Kimmins Environmental Service Corp. (NYSE: KVN) today announced its third quarter gross revenue and earnings.

Gross revenue for the quarter ended Sept. 30 was $25,136,000 compared to $26,268,000 for the same period in 1989. The net loss for the quarter was $848,000 or $.06 per share compared to a net income of $1,110,000 or $.10 per share in 1989.

Gross revenue for the nine months ended Sept. 30 was $77,977,000 compared to $76,064,000 for the same period in 1989. Net income from operations was $1,027,000 or $.08 per share compared with $2,405,000 or $.22 per share in 1989.

Francis M. Williams, president of Kimmins Environmental Service Corp., stated: "Our third quarter loss is the result of unanticipated start up delays on $43 million of environmental remediation contracts and our aggressive entry into the solid waste management and recycling businesses. The environmental remediation projects are now performing as originally projected. The company has incurred approximately $1,600,000 of start up operating losses in the solid waste recycling business. We are seeing significant progress and expect these recycling centers to begin making operating profit contributions during the fourth quarter. We are confident that this business is adding significant value and earning power to the company."

#90303p1262 10/30/1990 ~PR Newswire

MINNEAPOLIS (OCT. 30) PR NEWSWIRE - G&K Services Inc. (NASDAQ: GKSRA), the Minneapolis-based textile leasing company, today reported record revenues but slightly lower net earnings for the first quarter of fiscal 1991 ended Sept. 29, 1990.

Revenues rose 11.7 percent to a record $31,672,000 from $28,358,000 in the same quarter a year ago. Net earnings were $2,423,000, or $0.18 cents per share, down 5.7 percent from the $2,569,000, or $0.19 a share, earned a year ago.

Earnings were strongly affected by losses related to new startup operations in Miami, Seattle, and St. Louis which contributed only slightly to increased revenues. Excluding these new locations, net income increased to $.21 per share.

Richard Fink, chairman and CEO, said "G&K's revenue growth rate of 11.7 percent is well above the 9.2 percent gain reported in last year's first quarter. This increase reflects the high volume of new sales written in the last two quarters and a significant improvement in account retention.

"Earnings were adversely affected by losses at our three new startup locations. Since these operations were not established until late in the 1990 fiscal year, our results do not yet reflect the additional revenues that we expect to generate as they develop. Additionally, earnings were affected at older locations by higher merchandise costs associated with the increased revenue growth rate.

"There has been strong demand for our services. New account sales during the past two quarters have broken all past records, and account retention rates have also strengthened. We expect these trends to generate higher revenue growth during the rest of the year."

Fink also noted that G&K completed the purchase of Work West Corporation of Canada Ltd. at the end of the first quarter. Work Wear Canada, headquartered in Toronto, is Canada's largest uniform leasing company with revenues for the 1989 calendar year of approximately (U.S.) $62 million. G&K's second quarter will be the first reporting period to include oeprating results from the acquisition.

G&K Services is one of North America's largest suppliers of uniforms and related textile products. In the United States, the company operates in 23 states, serving customers from 20 processing plants and 28 sales and service centers. In Canada, G&K serves customers from 22 locations, including ten processing plants in the provinces of Ontario and Quebec.

PITTSBURGH (OCT. 30) PR NEWSWIRE - Westinghouse Savings Corp., a subsidiary of Westinghouse Financial Services Inc., has acquired United Federal Savings Bank of Illinois for $16 million, it was announced today.

"Market conditions have created opportunities for knowledgeable and experienced investors to acquire sound thrifts and make them stronger," said William A. Powe, chairman and chief executive officer of Westinghouse Financial Services.

"We see a potential for high returns with low risk. United Federal complements our existing residential real estate businesses and allows us to diversify our portfolio with consumer loans," said Powe.

United Federal has assets of $410 million and deposits of $380 million. Its loan portfolio consists entirely of residential mortgages and consumer loans. Founded in 1882, United Federal has headquarters in Galesburg and Peoria and additional offices in 12 locations throughout mid-state Illinois.

"The Westinghouse investment provides the additional capital needed to comply with the 1994 federal standards being phased in under the Financial Institutions Reform, Recovery and Enforcement Act of 1989," said Richard E. Johnson, who continues as chief executive officer of United Federal. "This investment also expands our capacity for growth.

"United Federal holds a significant market share in the communities we serve. Our management team has strong local ties and is committed to growing its customer and depositor base," said Johnson.

A subsidiary of Westinghouse Electric Corp. (NYSE: WX), Westinghouse Financial Services is also the parent company of Westinghouse Credit Corp., the nation's largest finance company providing capital exclusively to businesses.

SAN JOSE, CALIF. (OCT. 30) PR NEWSWIRE - Fourteen Silicon Valley companies and their top executives participated in the "Cadence Stars & Strikes for Touchstone" bowling tournament sponsored by Cadence Design Systems Inc. (NYSE: CDN) on Saturday, Oct. 27 benefiting Touchstone Support Network, a local, non-profit organization dedicated to providing emotional and practical support services for families with children suffering from chronic or life-threatening

illnesses. The event generated a total of over $53,000, which will be used to help Touchstone's expansion of services in the South Bay area and its overall operational costs.

Prior to the event, Cadence executives recruited top Silicon Valley companies and leaders to participate in "Cadence Stars & Strikes for Touchstone" and donate $2,500 per lane. Each company and its employees formed teams to compete in the tournament. Participants included Cadence Design Systems, and Chief Executive Officer, Joseph Costello; Logic Modeling Systems and Chief Executive Officer, Curt Widdoes; Mentor Graphics Silicon Design Division and President, Jim Hammock; Synopsys and Vice President of Finance and Chief Financial Officer Dwight Morita; Synoptics Communications and Chief Executive Officer, Andy Ludwick; VLSI Technology and Senior Vice President of Corporate Strategy, Doug Fairbairn; Valid Logic Systems and Chief Executive Officer, Doug Hajjar; and Zycad Corp. and Chief Financial Officer, Pete Cassidy. Additional participants included Arthur Anderson; Digital Equipment Corp.; Fenwick, Davis & West; Hewlett-Packard and MIPS Computer Systems. Maxtor Corp. also made a direct donation of $5,000 to Touchstone.

"This event exemplifies Silicon Valley leaders' commitment to the local community and support for organizations such as Touchstone," according to Costello. "It is inspiring to see CEOs and their companies put aside their competitive edge to work together for a dedicated group that provides services to our families here in Silicon Valley."

Cadence Design Systems Inc. is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronic systems. Cadence, with offices throughout the United States, Europe and Asia, is headquartered in San Jose, and is traded on the NYSE under the symbol CDN.

MIAMI (OCT. 30) PR NEWSWIRE - Knight-Ridder, Inc. (NYSE: KRI) announced today it is ceasing publication of Runways, a news magazine devoted to the commercial aviation industry.

Runways Publisher Larry Birger said the difficult economic environment under which the publication had been operating since its startup in March was responsible for the decision.

"While readership support more than lived up to our expectations, the advertising didn't follow," Birger said. "We are proud of the quality of our publication and the enthusiasm it generated among our readers. But there is no

sign that economic conditions will improve in the near future."

Runways, launched March 19, quickly grew to a circulation in excess of 30,000 readers. It provided news and feature coverage of the aviation and aerospace industries and was acclaimed for its outstanding use of graphics.

#90303p1273 10/30/1990 ~PR Newswire

NASHVILLE, TN. (OCT. 30) PR NEWSWIRE - Corrections Corporation of America (NASDAQ: CCAX) today announced third quarter earnings of $708,521, or $.08 per share, up 27 percent from $556,722, or $.06 per share, in the third quarter last year.

Revenues for the three months ended Sept. 30, 1990, were $14.9 million, an increase of 51 percent over revenues of $9.8 million in the 1989 period.

For the first nine months of 1990, CCA's earnings grew 48 percent to $1.6 million, or $.17 per share, from $1.1 million, or $.12 per share, last year. Revenues increased 64 percent to $41.1 million in 1990 from $25.1 million in the comparable nine-month period of 1989.

"We are pleased with the steady progress reflected in our third quarter earnings report," said CCA President Doctor R. Crants. "The company showed significantly higher revenues and earnings, despite lower occupancy rates than last year."

CCA opened new facilities in both the first and second quarters of 1990. The company's West Tennessee Detention Facility, originally scheduled to open the first of September, did not accept prisoners until the closing days of the quarter.

"We are proud of the care with which we brought our Mason, Tennessee facility on line," Crants said, "and expect it to generate significant revenues once it is fully populated.

"We plan to follow a similar schedule for opening our Torrance County Detention Facility at the end of November," Crants continued. "Fourth quarter occupancy will be depressed by the start up of these two new facilities, but we look for another increase in earnings at year's end based upon our established contracts."

CCA manages prisons and other correctional institutions for governmental agencies. The company is the industry leader in private sector corrections with 6,744 beds in 21 facilites under management contract or construction.

CCA provides a full range of services that include finance, design, construction, renovation and management of new or existing facilities.

DETROIT (OCT. 30) PR NEWSWIRE - Unisys Corp. (NYSE: UIS) today announced that Signet Bank, the second largest commercial bank in the State of Virginia, has purchased the Unisys InfoImage Image Item Processing System (IIPS). Signet will use IIPS, a high-speed electronic imaging system, to process checks and other payment instruments. The contract, valued at approximately $7.5 million includes hardware, software, and services.

By eliminating the repetitive physical handling of paper checks, currently the norm for conventional check processors, Signet will dramatically change its current labor-intensive method for handling transactions. At the same time, Signet will lay the foundation for improvements in customer service and introduction of new and enhanced products.

Signet is the fifth major bank in the country to announce the selection of Unisys as its principal image processing vendor in the high-speed payment systems area. Others are Chase Manhattan in New York; Huntington Bancshares in Columbus; The Northern Trust Company in Chicago; and Comerica Bank in Detroit. The Unisys IIPS system will be added to Signet's current item processing system, which processes 1.9 million items daily during peak volume periods.

Signet Bank, with more than $12.5 billion in assets, offers consumer-based products and services through 242 branch offices in Virginia, Maryland, and Washington, D.C.

Unisys Corp. is a $10 billion manufacturer of commercial information systems, defense systems and related services. Unisys has more than 75,000 employees and 60,000 customers in more 100 countries.

PITMAN, N.J. (OCT. 30) PR NEWSWIRE - K-Tron International Inc. (NASDAQ: KTII) today announced that its Swiss subsidiary, K-Tron Holding AG, has completed its previously announced acquisition of Hasler Freres International SA, a Swiss company headquartered in Colombier, from SECE Cortaillod Holding SA.

Under an agreement signed in late September, K-Tron agreed to pay 13 million

Swiss francs ($10 million at current exchange rates) for Hasler's stock, subject to possible adjustments. At closing, the purchase price was reduced to 6.2 million Swiss francs ($4.8 million at current exchange rates), primarily to reflect a pre-closing sale/leaseback of the Swiss land and building in Colombier. The purchase price is subject to further possible downward adjustment following completion of a closing date audit. In connection with the acquisition, K-Tron arranged the refinancing of approximately 10 million Swiss francs ($7.7 million at current exchange rates) of Hasler indebtedness.

K-Tron Chairman and Chief Executive Officer Leo C. Beebe said, "Our feeder and blender business continues to be the cornerstone of our strategic planning and growth. Building upon this cornerstone we are pleased to add the Swiss firm of Hasler Freres International SA. With this acquisition we move aggressively into the heavy duty feeder market."

Hasler is a leading manufacturer of heavy duty gravimetric feeders, primarily for the cement industry. The company also manufactures light duty feeders, controllers and other related equipment. With 1989 sales of approximately 27 million Swiss francs ($20.8 million at current exchange rates), Hasler joins the family of K-Tron companies which generated $56.7 million in revenue in 1989.

Beebe added, "Hasler's reputation for quality products and its strong distribution channels in Switzerland, Germany, France, Spain and Brazil, together with K-Tron's advanced weighing technology and worldwide market leadership, provide excellent synergies for improved operational performance and continued growth for K-Tron worldwide."

K-Tron International Inc., through its subsidiaries, is a major producer of gravimetric feeders, blenders and security systems with facilities in the United States, Europe and the Far East and customers throughout the world.

BOSTON (OCT. 30) PR NEWSWIRE - Citizens Gas Supply Corporation (CGSC) and Seneca Resources, a subsidiary of National Fuel Gas Company (NYSE: NFG), today formally disclosed plans for the formation of a joint venture involving long-term purchasing and sales of natural gas and asset acquisitions. The companies intend to target natural gas gathering systems and underground storage as areas of potential investment, and to pursue long-term transportation opportunities.

The announcement followed an informal one made last night to members of the

American Gas Association at a reception held at Boston's John F. Kennedy Library.

"Citizens and National Fuel have enjoyed a substantial commercial relationship for several years," said CGSC Chairman Michael LeM. Kennedy, who went on to say, "We look forward to expanding this relationship in size and scope through cooperative efforts in supply purchases and sales and in the commitment of capital to natural gas assets. This joint venture will enhance Citizens' ability as a natural gas marketer to reliably move producers' gas to both long- and short- term markets."

Bernard J. Kennedy, National Fuel chairman, president and chief executive officer, said, "National Fuel is pleased to enter into this new phase of our relationship with Citizens Gas. The joint efforts of these two companies represents a significant expansion of our gas marketing business and will lead to the acquisition of natural gas assets, including gathering facilities and natural gas reserves."

Citizens Gas Supply is an independent, Boston-based gas marketer with gas supply operations in Houston and is a subsidiary of Citizens Energy Corporation. Since it began natural gas operations in 1983, Citizens has grown to become one of the top five independent natural gas marketers in the United States.

National Fuel Gas Company, based in Buffalo, N.Y., is a public utility holding company with subsidiaries involved in natural gas pipeline and storage operations, utility distribution and exploration and production. Seneca Resources is engaged in the exploration for, and development of oil and natural gas reserves in California, the Gulf Coast, and southwest areas of the United States.

#90303p1298 10/30/1990 ~PR Newswire

PITTSBURGH (OCT. 30) PR NEWSWIRE - USX Corp. (NYSE: X) net income for the third quarter of 1990 totaled $163 million, or $.63 per common share, on sales of $5.1 billion compared with net income of $175 million, or $.62 per common share, on sales of $4.4 billion for the third quarter 1989, it was announced today.

Earnings per share increased quarter to quarter, due mainly to a significant reduction in preferred stock outstanding. Last year's third quarter included pretax profits of $98 million from asset sales compared with $5 million in the current quarter. The Corporation's operating income for the third quarter 1990 was $382 million compared with operating income for the third quarter 1989 of $302 million.

The Energy segment reported operating income of $278 million on sales of $3.7 billion in the third quarter 1990. This compares with operating income of $189 million on sales of $3.0 billion in the third quarter 1989.

Energy's upstream operations (exploration and production) reported operating income of $127 million for the current quarter, an increase of $59 million from the third quarter of 1989. The increase was due primarily to higher prices for worldwide liquid hydrocarbons and foreign natural gas partially offset by decreased domestic crude oil production.

Operating income from Energy's downstream operations (refining, marketing and transportation) totaled $142 million in the current quarter, an increase of $30 million from the third quarter of 1989 due primarily to higher refined product margins.

The Steel segment reported operating income of $63 million on sales of $1.3 billion in the third quarter 1990 compared with operating income of $85 million on sales of $1.3 billion in the third quarter 1989. The decline in operating income was due primarily to lower steel prices.

The Diversified Businesses segment reported operating income of $3 million on sales of $138 million in the third quarter 1990 compared with operating income of $13 million on sales of $153 million in the third quarter 1989.

CHICAGO (OCT. 30) PR NEWSWIRE - Continental Materials Corp. (AMEX: CUO) today

reported a net loss of $329,000 or 28 cents per share for the third quarter, compared with a net loss of $226,000 or 19 cents per share a year ago. The nine months' loss was $1,229,000 or $1.05 per share, compared with a loss of $1,185,000 or $1.02 per share a year ago.

Net sales decreased to $18.5 million, compared with $21.4 million in last year's third quarter. For the nine months, net sales decreased to $55.8 million from $63.9 million a year ago.

Imeco, Inc. of Polo and Dixon, Ill., again achieved strong results with significant sales and income gains over last year's third quarter and first nine months.

Williams Furnace Co. of Colton, Calif., reported a significant decline in sales for the third quarter and first nine months, reflecting an industry-wide decline in sales and some loss of market share. Williams achieved higher income, however, due to cost-cutting measures instituted over the past year.

Phoenix Manufacturing, Inc. sales declined as mild weather in their market areas dampened sales throughout the industry. An extended, planned plant shut down in September for installation of a new state-of- the-art wash system also depressed income.

Combined sales and operations of Continental's two Colorado Springs subsidiaries, Transit Mix Co. and Castle Concrete Co., again declined due to the deep and continued slump in the Colorado Springs construction market.

Income from the company's mining interests for the first nine months of 1990 declined to $40,000, from $190,000 in the prior year, as a result of lower silver prices and discontinuation of payments on a uranium property. The Oracle Ridge Mining Partners' copper property near Tucson, Ariz., is scheduled to begin production by the end of October 1990. The company owns a 30 percent interest in this partnership. The company's share of earnings and cash flow, if any, from the partnership is not expected to be significant in 1990.

OAK BROOK, IL (OCT. 30) PR NEWSWIRE - Waste Management of North America, Inc. today announced the acquisition of Durbin Paper Stock Co., Inc., a major reclaimer and processor of recyclable paper.

Based in Miami, Fla., Durbin owns and operates six recycling processing facilities in Miami, Pompano Beach, Tampa and Sarasota, Fla., and in Rock Island, Ill., and Winston-Salem, N.C. Durbin also has sales offices throughout

the U.S. and abroad to market recycled materials.

Durbin's operations will join Waste Management's existing network of 60 processing facilities across the U.S. and Canada. This year, Waste Management expects to process and market more than one million tons of paper.

Commenting on the acquisition, William P. Hulligan, president, Waste Management of North America, said, "With this acquisition, we have strengthened our recycling processing operation and have expanded our service network to the international market. It will enhance our existing Recycle America collection and processing operations and improve our ability to service customers.

Serge Storelli, president of Durbin, commented, "By joining forces with the nation's largest recycler, we have enhanced our ability to provide processing and brokering services." Other materials processed at Durbin's facilities include aluminum, plastic and ferrous and non-ferrous metals.

Waste Management of North America, Inc., the largest subsidiary of Waste Management, Inc. (NYSE: WMX), is the nation's largest provider of solid wastes services. Waste Management is the nation's premier recycler, serving more than two million households in 260 communities through its Recycle America service.

SAN FRANCISCO (OCT. 30) PR NEWSWIRE - AT&T today announced a telephone interpretation service never before available to consumers.

Starting today, AT&T Language Line(SM) Services' new offering gives consumers in the United States and around the world 24-hour-a-day access to highly-trained experts who can provide telephone-based interpretation services quickly and inexpensively in virtually any language or dialect.

AT&T Language Line Services began offering interpretation services by telephone in 1989 to businesses and emergency agencies, such as police and fire departments, 911 centers and hospitals across the United States. Now, in response to increasing needs and demands, the service is available to consumers as well.

Here are examples of how AT&T Lanugage Line Services' consumer offering works:

-- An American traveling abroad experiences a medical emergency and goes to a local clinic for treatment. The attending doctor speaks only a few English words and has difficulty understanding the patient's symptoms and medical history. The patient calls AT&T Language Line Services and within moments, an interpreter comes on the line to begin to translate the conversation between the patient and doctor.

-- A recent immigrant who has not yet mastered English has difficulty obtaining information about her tax return. She calls AT&T Language Line Services and within moments, an interpreter joins the call to relay the conversation between the immigrant and the federal tax office.

Consumers in the United States can reach an interpreter by calling toll-free 1-800-628-8486. From outside the United States, they can call either AT&T's USADirect (R) service and ask to be connected to AT&T Language Line Services' toll-free number, or they can call directly to AT&T Language Line Services on 408-648-5871, preceded by the appropriate access codes required to call the United States.

The service costs $3.50 per minute for the time on-line with an interpreter and can be billed to major credit cards, including the AT&T Universal Card, American Express, VISA and MasterCard.

In addition to telephone-based interpretation, AT&T Language Line Services provides a variety of other language services including written document translation, foreign language voice recordings and international and domestic telemarketing. For additional information, call 1-800-752-6096.

IRVING, TEXAS (OCT. 30) PR NEWSWIRE - Elliot R. Cattarulla, chairman of the board of trustees of the Exxon Education Foundation, announced today that Edward F. Ahnert has been appointed executive director of the foundation. Ahnert will replace Donald L. Guertin who will become a consultant to industry in the areas of education and public policy.

Ahnert will be responsible for managing the programs of the Exxon Education Foundation (EEF), which are recommended by the foundation's professional staff and approved by the board of trustees.

The EEF was established in 1955 by Exxon Corporation and is supported by Exxon Corporation and its affiliates as a non-profit corporation aiding education in the United States. Since 1955, the EEF has given more than $300 million in support for initiatives designed to assist all levels of education from kindergarten through university.

In 1989, the EEF provided more than $18 million in grants in support of programs in mathematics education, elementary and secondary school improvement teacher education, undergraduate general education and undergraduate developmental education. As part of its program, the EEF also has an Educational Matching Gift Program which provides a 3-to-1 match for contributions made by Exxon employees and annuitants to support degree-granting accredited U.S. colleges and universities.

Speaking on behalf of the board of trustees, Cattarulla said, "We are pleased to announce Edward Ahnert's appointment as executive director of the Exxon

Education Foundation. Our programs in school restructuring, mathematics education and teacher education will benefit from his background in public policy and finance as well as his international experience. His interest in education and broad academic qualifications will assist the foundation in implementing present initiatives as well as working with educators to develop new directions for the future."

DENVER (OCT. 30) PR NEWSWIRE - Newmont Mining Corp. (NYSE: NEM) today announced third quarter net income of $248.4 million, or $3.66 a share, compared with $25.8 million, or 38 cents a share, in the third quarter of 1989. Net income in the 1990 quarter included non-recurring after-tax gains of $149.7 million, or $2.21 a share, from the sale of Newmont's 54.97 percent interest in Peabody Holding Co. Inc.; and $67.2 million, or 99 cents a share, from the sale of 19.99 percent of Newmont Australia Ltd. Consolidated sales for the quarter were $170.1 million compared with $172.9 million in the 1989 third quarter.

Newmont Mining's reported equity in gold production, which now consists solely of 90.1 percent of Newmont Gold's output, was 376,100 ounces in the third quarter. This compares with equity in 384,600 ounces in the third quarter of 1989. The average sales price received for gold in the 1990 quarter, including the effects of Newmont Mining's hedging program and gold loan payment, was $401 per ounce compared with $397 per ounce in the third quarter of 1989.

For the first nine months of 1990, net income was $337.5 million, or $4.98 a share, compared with $42.3 million, or 63 cents a share, in the like 1989 period. The 1990 results included non-recurring after-tax gains of $149.7 million, or $2.21 a share, from the Peabody asset sale; and $79.2 million, or $1.17 a share, from the sale of 19.99 percent of Newmont Australia and from a gain on issuance of shares by that company. Consolidated sales for the first nine months were $520.2 million compared with $435.5 million in the comparable 1989 period.

Newmont Mining's 90.1 percent interest in Newmont Gold Co. (NYSE: NGC) contributed $47.3 million in pretax income during the third quarter, compared with $41.8 million recorded in the third quarter of 1989. This increase was due primarily to the higher price received for gold and an unusually low cost of production in the 1990 quarter. Newmont Gold produced 417,400 ounces in the third quarter compared with 426,900 ounces in the third quarter of 1989. The average price received by Newmont Gold was $385 an ounce in the quarter compared with $368 an ounce in the 1989 third quarter.

Newmont Mining is a leading pure gold company which owns 90.1 percent of Newmont Gold, North America's largest producer; and 100 percent of Newmont Exploration Ltd., a company engaged worldwide in exploration for gold.

#90303p1322 10/30/1990 ~PR Newswire

DENVER (OCT. 30) PR NEWSWIRE - Newmont Gold Co. (NYSE: NGC) today reported third quarter net income of $36.7 million, or 35 cents a share, compared with $33.5 million, or 32 cents a share in the third quarter of 1989. Sales revenues for the third quarter were $160.9 million compared with $157.1 million in the third quarter of 1989. The price received for gold averaged $385 per ounce in the quarter compared with $368 per ounce in the 1989 quarter. Production in the third quarter was 417,400 ounces compared with 426,900 ounces in the 1989 quarter. Third quarter cash cost of production averaged $207 an ounce, down from $210 an ounce in the third quarter of 1989.

For the first nine months of 1990, net income was $116.3 million, or $1.11 a share, compared with $77.8 million, or 74 cents a share, in the comparable 1989 period. Sales revenues for the nine months of 1990 were $490.5 million compared with $404.5 million in the first nine months of 1989. The price received for gold averaged $385 per ounce in the first nine months of 1990 compared with $378 in the comparable 1989 period. Production in the first nine months of the year was a record 1,274,100 ounces of gold, up 19 percent from the 1,070,000 ounces produced in the first nine months of 1989. Cash cost of production in the 1990 period averaged $212 an ounce, down from $228 an ounce in the first three quarters of 1989.

In all, 36.6 million tons were mined in the third quarter of 1990, including 4.6 million tons mined at Newmont Gold's Post orebody at no cost by American Barrick, compared with 29.1 million tons in the third quarter of 1989. The company's five mills treated 3.8 million tons of ore and produced 283,200 ounces in the third quarter, compared with 3.7 million tons treated and 263,800 ounces produced in the third quarter of the prior year. Leach operations had 8.4 million tons of ore placed on pads and produced 134,200 ounces in the third quarter. This compares with 8.4 million tons placed and 163,100 ounces produced in the 1989 quarter.

Newmont Gold, 90 percent owned by Newmont Mining Corp. (NYSE: NEM), is the largest producer of gold in North America. At the end of 1989 it had 20.7 million ounces of proven and probable reserves, the largest announced reserve position on the continent.

#90303p1331 10/30/1990 ~PR Newswire
DULUTH, MN (OCT. 30) PR NEWSWIRE - Minnesota Power (NYSE: MPL) announced that it has amended its Employee Stock Ownership Plan (ESOP) to permit the Plan Trustee to borrow up to $75 million to purchase additional shares of new issue common stock from Minnesota Power. As provided by the terms of the ESOP, the additional new common stock will be used to provide supplemental retirement

benefits to ESOP participants.

It is anticipated that the Plan Trustee will issue a promissory note with a term of 25 years to the company in exchange for such new common stock. The Plan Trustee will repay the loan with dividends paid on common stock in the ESOP and with certain employer-company contributions.

Under current tax law, to the extent dividends paid on the shares of common stock of the company held by the Plan Trustee are used to repay a loan which meets certain requirements of the Internal Revenue Code of 1986, as amended, the company may deduct the amount of such dividends on its corporate income tax returns and realize tax savings.

The issuance of the new common stock is expected to occur in the fourth quarter of 1990, at a price per share equal to the closing price of the common stock on the New York Stock Exchange on the trading day immediately preceding the day of issuance.

The increased number of shares outstanding will initially have a minimal dilutive impact on earnings per share of the company's common stock. However, to lessen and eliminate this impact, the company intends to implement a common stock open market repurchase plan in order to reduce the number of outstanding shares of the company's common stock to the level existing immediately prior to the issuance of the new common stock to the Plan Trustee. The common stock repurchases are expected to be made on the open market from time to time starting in late 1990 and continuing through 1991 and early 1992.

The aggregate number of shares of the company's common stock issued and outstanding is approximately 29 million. The Plan Trustee currently holds approximately 7.1 percent of the company's common stock and it is anticipated that, after the Plan Trustee's purchase of the additional new common stock, and the company's repurchase of its common stock on the open market the Plan Trustee will hold approximately 17.3 percent of the company's outstanding common stock.

Headquartered in Duluth, Minn., Minnesota Power is a diversified electric utility with interest in coal mining, papermaking and water and wastewater treatment.

WASHINGTON (OCT. 30) PR NEWSWIRE - To help paint companies formulate high-performance, low-VOC (volatile organic compound) coatings, Mobay Corporation, of Pittsburgh, today introduced new coating resins and inorganic pigments. The new products include a Bayhydrol waterborne acrylic polyol for maintenance coatings that is the result of a key technology breakthrough. Another outstanding new product is a Bayhydrol aqueous polyurethane dispersion for low-VOC, high-performance automotive refinish primer surfacers.

Also reported by Mobay were several plant expansions and an upgrading of production facilities to help meet demand for coating raw materials and pigments.

The announcements were made at a press briefing at the Ramada Renaissance Hotel-Techworld, conducted in conjunction with the 1990 Paint Industries' Show. The show is being held Oct. 29-31 at the Washington Convention Center and is sponsored by the Federation of Societies for Coatings Technology. Mobay, a Bayer U.S.A. company(A), is an exhibitor at the show (booth No. 921).

The briefing was led by Richard L. White, senior executive vice president of Mobay, who introduced the new waterborne acrylic polyol and discussed the plant expansions and upgrading. Nicholas T. Cullen, vice president of marketing for Mobay's Coatings Division, also was a key speaker, announcing six other important new products now available from the company.

The new products, White said, demonstrate an emphasis at Mobay to supply raw materials that help paint companies and their customers "achieve two concurrent goals: to meet or exceed statutory low-VOC emission levels, and to maintain the high level of performance and protection which have identified paints and coatings made with our raw materials and technology."

New Bayhydrol Polyol Offers High-Performance Properties The new waterborne polyacrylic polyol introduced by Mobay is Bayhydrol LS 2940, a developmental product made possible by a technology breakthrough that enables the water-based polyol to react favorably with polyisocyanates. This permits the formulation of paint systems with both excellent performance properties and very low VOC emissions -- from 2.08 lbs./gal. down to zero. In the past, waterborne polyols could not be successfully mixed with polyisocyanates.

The technology breakthrough, White reported, creates new opportunities for coating bridges, industrial plants and other structures with paints that achieve the dual goals of reducing atmospheric emissions while retaining high levels of protection and appearance. The new proprietary technology was developed by Bayer AG scientists in Germany, the Mobay executive noted.

The Bayhydrol LS 2940 polyol is 30 percent solids and 70 percent water by weight and can be used with various Desmodur N aliphatic polyisocyanates available from Mobay to formulate low-solvent, low-VOC paints, he noted. To produce "low-solvent and even zero-VOC paint systems," Bayhydrol LS 2940 polyol also can be combined with certain Desmodur N aliphatic polyisocyanates, or with the new Desmodur LS 2550 aliphatic polyisocyanate, also introduced today by Mobay, White said.

Mobay is part of the Bayer U.S.A. group of companies. Bayer U.S.A. is the U.S. management holding company of Bayer AG, Germany, and is a diversified group of companies with businesses in chemicals, healthcare and imaging systems. In addition to Mobay, other major Bayer companies in the U.S. include Miles Inc., and Agfa Corporation. Bayer U.S.A. sales in 1989 were $5.4 billion, or more than 20 percent of Bayer's sales worldwide.

WASHINGTON (OCT. 30) PR NEWSWIRE - Marriott Corporation (NYSE: MHS) announced today the opening of an on-site child care center at its international headquarters building in Bethesda, Md. Marriott is the largest employer in the United States sponsoring such a facility at its headquarters.

The 5,600-square-foot Marriott Child Development Center offers child care for children ages 6 weeks to 36 months. Available to all local Marriott employees, the center specializes in infant and toddler care, which is the most difficult type of care to find in the Washington area. The facility, which has capacity for 60 children, features a contemporary design with bright colors and a 3,800-square-foot outdoor playground with state-of-the-art equipment.

"Marriott is proud to provide child care to our headquarters employees," said J.W. Marriott Jr., chairman and president of Marriott Corporation. "The convenience and quality of service at this center will be of real benefit to our employees. We hope it will help them balance the many demands of their personal and professional lives."

The center is operated for Marriott by Corporate Child Care, Inc., a Nashville-based firm which specializes in employer-sponsored child care services. In a joint venture, Marriott's Food and Services Management division and Corporate Child Care offer on-site child care services to

Marriott business, education and healthcare clients. Currently, Corporate Child Care operates 10 child care centers, with plans to open 10 to 15 centers in 1991.

The headquarters child care center is among several programs sponsored and managed by Marriott's Department of Work and Family Life to assist employees in balancing the demands of job and family responsibilities. Other programs include a Family Care Spending Account, which allows employees to pay for dependent care with pre-tax money; Child Care Choices, a nationwide resource and referral service to assist employees in finding suitable child care arrangements; Child Care Discount Program, which provides employee discounts at independent day care centers; and Parenting Seminar Series, a series of lectures that addresses child development and parenting skills.

Recently, Working Mother magazine named Marriott one of "The 75 Best Companies for Working Mothers" and highlighted the company for providing "exceptional child care" for employees and clients.

Marriott Corporation is a diversified hospitality company involved in lodging and contract services. It has more than 200,000 employees and is one of the 10 largest employers in the United States.

#90303p1343 10/30/1990 ~PR Newswire

SAN FRANCISCO (OCT. 30) PR NEWSWIRE - First Nationwide Financial Corp., a wholly owned subsidiary of Ford Motor Co., today announced it has added $115 million to loan loss reserves, including a $92 million increase in general reserves. The action reduced third-quarter net income by $69 million.

The company said 1990 third-quarter earnings were a net loss of $44.6 million, compared with a net gain of $36.4 million a year earlier. For the first nine months of 1990, the company earned $32.6 million, compared with $44.8 million for the same period a year ago.

The company said apartment and commercial real estate loan delinquencies increased beginning early this year. The increases were primarily in metropolitan New York. Delinquencies also increased in selected Southeastern locations and moderately in California. The company said it has taken a number of steps to respond to market conditions, including adding to loss reserves beginning in the fourth quarter of 1989 and reducing commercial real estate lending.

"Given the present real estate climate, it's logical and prudent to increase our loan loss provision," said Robert E. Lackovic, First Nationwide's chairman and chief executive officer. "First Nationwide's $17.4 billion real estate loan portfolio is diversified and well collateralized. Fundamental operations including operating costs and net interest margins, continue to improve."

The company also stated that its principal subsidiary, First Nationwide Bank, had recently completed a routine, concurrent examination of its operations by the Office of Thrift Supervision and the Federal Deposit Insurance Corp. The additions to the loan loss reserves, booked in the third quarter, reflect the result of this examination.

The company noted, however, that two accounting issues not resolved during the examination could adversely affect the bank's earnings and regulatory capital. One issue is the valuation of certain mortgage securities. The other issue involves contractually related intangibles resulting from FSLIC-assisted acquisitions in 1986-87. The bank is discussing both of these issues with its regulators and exploring options to minimize the effects. The bank believes it will resolve these issues in the next three to nine months.

The company announced it expects to receive a capital contribution of $250 million from its parent Ford Motor Co. in November 1990. The contribution would be used to strengthen the capital base of First Nationwide Bank, the company's principal subsidiary. All of the company's savings association subsidiaries exceed capital ratios required by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA).

Assets were $28.2 billion as of Sept. 30, 1990, compared with $31.7 billion a year ago.

In addition to First Nationwide Bank, it principal subsidiary, First Nationwide Financial Corp. operates Columbia Savings, Denver; Pathway Financial F.A., Chicago; and Cardinal Federal Savings Bank, Cleveland. Together, the company operates 263 retail branches in 11 states and 34 loan offices in nine states. First Nationwide is part of the Ford Financial Services Group.

#90303p1362 10/30/1990 ~PR Newswire

MADISON, NJ (OCT. 30) PR NEWSWIRE - Schering-Plough Corporation (NYSE: SGP) today released the following:

For the sake of asthmatic patients and their physicians, Schering- Plough Corporation is compelled to alert them to self-serving publicity campaigns by the organized plaintiffs' trial bar that could seriously mislead and harm asthma sufferers taking theophylline, a standard asthma therapy.

Theophylline is an important, well-established treatment in the control of chronic asthma, a serious and potentially life-threatening disease. Asthma affects 10 million Americans and is responsible annually for an estimated 1.2 million emergency room visits and approximately 5,000 deaths.

Asthma is a complex disease requiring individualized treatment. Physicians must have free and unrestricted access to a variety of different agents, with different therapeutic mechanisms -- including theophylline products -- in order to provide optimal treatment for their asthmatic patients. Theophylline has been used and studied as an asthma treatment for nearly 50 years. This wealth of experience is explicitly reflected in theophylline's government-approved labeling, which instructs physicians on its proper use in both adults and children. The instructions emphasize the need to monitor theophylline blood levels and to carefully individualize each patient's dosage to the minimum required to achieve asthmatic control.

Properly used, under physician supervision and in accordance with approved labeling, serious theophylline side effects have been very rare. Schering-Plough's own experience, as the U.S. leader in theophylline therapy, bears this out. Our products have been prescribed approximately 60 million times since 1985 alone, and in that time the reported incidence of serious adverse drug events, as defined by the U.S. Food and Drug Administration (FDA) has been only 1.3 reports per 100,000 prescriptions. This is a very good and reassuring safety record.

The Association of Trial Lawyers of America (ATLA), under the guise of a consumer protection program, is launching a publicity campaign aimed at alarming asthma patients about theophylline. ATLA is an organization of trial lawyers who file lawsuits on behalf of claimants and plaintiffs while retaining a percentage of any monies gained. ATLA has submitted a letter on theophylline to the FDA and has scheduled a media event to promote its efforts tomorrow in Washington.

Schering-Plough is concerned that ATLA's campaign, combined with newspaper ads by plaintiffs' lawyers soliciting theophylline clients for possible litigation will serve to alarm patients and interfere with physician-patient relationships by overstating and overdramatizing the known risks of theophylline. This kind of campaign has the potential to endanger patients. Should a patient or parent be alarmed into discontinuing critical asthma medications in response to scare messages, severe and even fatal consequences may result. Patients should not be deceived by these lawyers' tactics, but should continue taking their medication as recommended by their physician.

Schering-Plough strongly believes that theophylline is an important prescription therapy for asthma patients. Alarmist and self-serving campaigns like ATLA's, and newspaper advertisements placed by lawyers soliciting clients, are not in the best interests of the asthma patient.

#90303p1363 10/30/1990 ~PR Newswire

ENCINO, Calif. (OCT. 30) PR NEWSWIRE - Medical Properties Inc. (AMEX: MPP) today reported net income for the third quarter ended Sept. 30, 1990, of $420,000, or $.18 per share. For the comparable prior year period, Medical Properties had net income of $423,000, or $.18 per share.

Total income, primarily from rental properties, was $1,342,000 for the current third quarter, compared with $1,334,000 for the same quarter a year ago.

For the nine-month period ended Sept. 30, 1990, net income totaled $1,268,000, or $.54 per share, on total income -- principally from rental properties -- of $4,007,000. For the comparable prior year period, net income was $1,461,000, or $.62 per share, on total income -- principally from rental properties.

The decrease in income and net income for the nine month period as compared to the same period last year was primarily due to lower excess rental income and higher operating expenses.

The company said that it expects to continue the cash dividend policy of $1.20 per share annually, payable quarterly, and that cash available from operations should be sufficient to maintain this dividend rate. The most recent quarterly cash dividend of $.30 per share was paid on Oct. 12, 1990, to shareholders of record Sept. 28, 1990.

Medical Properties is a real estate investment trust engaged in investing in income producing health care related facilities.

CHICAGO (OCT. 30) PR NEWSWIRE - Sears, Roebuck and Co. (NYSE: S) and The Globe Group today announced they will form an alliance to offer nationwide automobile glass repair and replacement services through more than 250 Sears automotive and light-truck service centers.

The service will be called Autoglass by Sears and will be an alliance between Sears and a newly created subsidiary of The Globe Group of Chicago called AutoComp Services, Inc. Autoglass by Sears will initially be rolled out over a three-year period.

The Globe Group is the largest family-owned and operated auto glass repair and replacement company in the nation. The company pioneered mobile auto glass service in 1953. It also provides state-of-the-art windshield repair, Clear-Fix, in which minor windshield nicks and cracks can be repaired without expensive replacement.

The joint announcement was made by Forrest R. Haselton, vice president-automotive, Sears Merchandise Group, and Joe Kellman, president and owner of Globe.

"We see this agreement as a natural extension of the services and customer conveniences already offered by Sears auto centers," said Haselton. Sears currently operates more than 800 auto centers nationwide.

"This is just another example of Sears' ability to leverage off its strengths " Haselton said. "It will provide additional traffic and sales for our auto centers and added convenience for customers," he added.

"Since 1916, Globe has grown by being an innovator and providing quality repair and replacement glass service for our customers," said Kellman. "Through this innovative relationship with Sears, we will be able to provide quality service at a fair price at more than 250 new locations with both in-shop and convenient mobile service."

Autoglass by Sears will serve general consumers and insurance clients. The first national client for the new service will be Allstate, which is a wholly-owned subsidiary of Sears.

FAIRFAX, VA. (OCT. 30) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) today announced that it will begin a pilot program in the Washington, metropolitan area to address the environmental problem caused by improper disposal of used motor oil. Mobil's program will include both educating its customers and providing collection facilities for used motor oil.

"The improper disposal of used oil has been identified as a real environmental concern," stated R. J. McCool, vice president of U.S. marketing for Mobil. "A growing number of our customers, many of whom do their own oil changes, recognize that improper disposal of used oil is not in anyone's interest. As a marketer of automotive lubricants, we want to do our part to make sure that used oil is disposed of properly.

"Beginning this week, we are asking all Mobil dealers in the Washington, D.C., metropolitan area who have the ability to accept used oil, to join in the pilot program. At those locations that do not have the ability to receive and store used oil, we will encourage our dealers to participate in the program's educational component."

Earlier this month, Mobil launched national television advertising urging motorists to dispose of used motor oil in an environmentally acceptable manner. The ending to its "Mobil 1" motor oil commercials encourages do-it-yourself oil-change customers to take the oil to collection centers at service stations, garages, government-operated facilities and other locations.

McCool announced that each of Mobil's company operated stations in the Washington area that have used oil storage tanks will begin accepting oil immediately.

The Mobil educational effort will complement the collection program by posting signs urging proper used oil disposal and letting consumers know where they can get more information, and the locations of used oil collection centers.

WINSTON-SALEM, NC (OCT. 30) PR NEWSWIRE - First Wachovia Corporation (NYSE: FW) announced today that its member companies plan to adopt the same basic name next year.

The First National Bank of Atlanta will change its name to Wachovia Bank of Georgia, N.A., and Wachovia Bank and Trust Company, N.A. will become Wachovia Bank of North Carolina, N.A.

The names of the banks' holding companies also will change. First Atlanta Corporation will become Wachovia Corporation of Georgia, and The Wachovia Corporation will be renamed Wachovia Corporation of North Carolina.

The corporate services subsidiary will become Wachovia Corporate Services Inc.; the trust services subsidiary will change to Wachovia Trust Services Inc.; the residential mortgage company will be renamed Wachovia Mortgage Company; and the student financial services subsidiary will become Wachovia Student Financial Services Inc.

First Wachovia Corporation shareholders will be asked in April for authorization to change the parent company's name to Wachovia Corporation early next summer, said John G. Medlin Jr., chief executive officer. A new Wachovia logo will be introduced when the changes become effective.

D. Raymond Riddle, president and chief executive officer of First Atlanta, said, "The partnership formed by the merger in 1985 of First Atlanta and Wachovia has worked well. Being able to spread costs over a larger base has made it possible for our banks to enhance operating systems and services while retaining autonomy in serving our markets. We value highly the First Atlanta name, but it does not reflect our current status as a statewide bank in Georgia or a key component of a superregional banking company."

Riddle said that the Wachovia name is distinctive, is geographically limitless and has high recognition across the Southeast and in the national and international corporate financial services markets.

L. M. Baker Jr., president and chief executive officer of Wachovia Bank and Trust, said, "We see the conforming of names as a natural step in the evolution of our merger. The common identity reflects the unified and effective banking organization we have built."

"There will be no changes, except in the names," Medlin said. "The two banks will remain separate legal entities, and each will retain its current board of directors, management and staff. The parent company will continue to have dual headquarters in Atlanta and Winston-Salem."

At September 30, First Wachovia had assets of $24.7 billion. The company has 364 full-service banking offices in Georgia and North Carolina and specialized financial services offices in eight other states and the United Kingdom.

#90303p1377 10/30/1990 ~PR Newswire

DALLAS (OCT. 30) PR NEWSWIRE - American Airlines said today that it is urging the Dept. of Transportation to reconsider its decision in the Chicago-Tokyo route case and award the route authority to American instead of United Air Lines.

American said the DOT's decision, announced Oct. 16, is based on "a terrible flaw in logic." When United acquired Pan Am's Pacific route network in 1985 to become a dominant carrier in that region, DOT expected that new routes to Japan in the future would be made available to emerging competitors in order to increase competition, American said.

"Now, five years later, the department has awarded the single most valuable route produced by U. S. efforts to create additional entry to Japan--Chicago-Tokyo--to United. That decision is not only inconsistent with the department's rationale," American said, "it is predicated on a terrible flaw in logic."

The DOT said it was selecting United over American because of United's extensive route network in the Pacific and its Tokyo hub, which enable United to carry passengers beyond Japan to other points in the Pacific.

"Rather than serving as a disqualifying, negative, or even a neutral factor, the dominant position which the department conferred upon United...has become a compelling factor in the decision to award United the new Chicago-Tokyo route," American said.

The ramifications of that flaw are far-reaching and alarming," American told DOT. "By applying this precedent, the department would make it virtually impossible for any carrier to obtain a Japan route coveted by United because United will always have the Tokyo hub and the extensive Pacific route system which DOT now considers to be a compelling reason to give United still more authority."

Moreover, the United-Pan Am route transaction announced on Oct. 23--by which United proposes to acquire five U. S. to London routes, the second of the world's most lucrative and restrictive international markets--underscores the importance of the DOT's flawed logic and emphasizes the importance of reconsidering Chicago-Tokyo. United now proposes to acquire, among other assets, Pan Am's routes between London's Heathrow Airport and five U. S. destinations--New York JFK, Washington Dulles, San Francisco, Los Angeles and Settle.

TORRANCE, CALIF. (OCT. 30) PR NEWSWIRE - After an intensive study of the feasibility of moving to another community out of state, Hughes Aircraft Co.'s Electron Dynamics Division has decided to remain in Torrance.

The division, which occupies more than a half-million square feet of space in its present facility on Lomita Boulevard, employs approximately 1,200 people. The 10-month relocation study was initiated in response to changes in economic conditions, including the downturn in defense spending, the need to remain cost competitive, overcapacity of the present facility, and a variety of incentives offered by other communities seeking new industry.

The decision to remain in Torrance was announced this morning by Hughes group vice president and division manager Ronald A. Forbess, first in a public address announcement and letter sent to all employees of the division and then at a press conference held at the Torrance City Hall.

In announcing the decision, Forbess stressed that even though they would not be moving, significant changes in "our way of doing business" would be taking place within the coming months. These will include a new "team approach" that will affect how each employee approaches his or her work and how they interact with each other, with customers and with suppliers.

"The answer to the business challenges we face," he said, "is to change how we do business, not where we do business." He cited the division's intention to build new partnerships as a key part of this change.

The Hughes Electron Dynamics Division is the nation's leading producer of traveling-wave tubes, which are the key amplifying element in the transmitters of many airborne radars and space communications systems.

#90303p1384 10/30/1990 ~PR Newswire
HOUSTON, (OCT. 30) PR NEWSWIRE - Baroid Corporation (NYSE: BRC), a leading worldwide supplier of petroleum services, today reported earnings from continuing operations for the third quarter and first nine months of 1990 increased 33 percent and 58 percent, respectively, over the comparable 1989 periods. The separation of Baroid's petroleum services operations from the titanium metals and bentonite mining operations of Tremont Corporation was effective Oct. 29, 1990. Accordingly, Tremont's operations are reflected as discontinued operations for all periods presented. The results of continuing operations represent only Baroid's petroleum services operations.

For the third quarter of 1990, income from continuing operations was $5.5

million, or 8 cents per share, on net sales of $155.3 million compared to income from continuing operations of $4.1 million, or 7 cents per share, on net sales of $121.1 million for the third quarter of 1989.

For the nine months ended Sept. 30, 1990, the company reported income from continuing operations of $12 million, or 17 cents per share, on net sales of $422.4 million, compared to $7.6 million, 13 cents per share, on net sales of $350.3 million in 1989.

Operating income improved 33 percent and 38 percent for the third quarter and first nine months of 1990 compared to the respective periods in 1989. Significant improvements in operating income were reported by both Baroid Drilling Fluids and Sperry-Sun Drilling Services reflecting higher levels of worldwide drilling activity, continued world growth in measurement-while-drilling and very strong activity in horizontal drilling in North America. These significant improvements have been partially offset by excess costs in the oilfield equipment segment where the Shaffer division recorded a $2.2 million charge to operating income for additional product warranty expense, late delivery penalties, and cost overruns on specific projects.

The company reported net income of $11.6 million, or 16 cents per share, and $30.9 million, or 44 cents per share, for the third quarter and first nine months of 1990, including the results of Tremont Corporation as discontinued operations of $4.7 million and $15.3 million, respectively. Net income for the same periods includes $1.4 million and $3.6 million, respectively, of extraordinary items principally related to Tremont resulting from the utilization of tax loss carryforwards.

J. Landis Martin, chairman and CEO, stated, "We are pleased with the continued improvement in our operating results and believe our successful separation from Tremont Corporation provides an attractive pure petroleum services opportunity for investors."

ST. LOUIS, (OCT. 30) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) today announced the retirement of the president of McDonnell Aircraft Co. and named his successor. William S. Ross, president of McDonnell Aircraft (MCAIR), will retire on Dec. 31 after more than 35 years of service with McDonnell Douglas. Gerry Johnston, president of McDonnell Douglas Corp., will be temporarily assigned as the company's president until a more permanent president is named.

Johnston's assignment is expected to last from six to 12 months. During this period, he will continue as president of McDonnell Douglas, "but his first

priority will be to assure continuation of MCAIR's success," said John F. McDonnell, chairman and chief executive officer of McDonnell Douglas.

Ross, 64, joined McDonnell Aircraft in 1955 after 11 years as an Air Force pilot. He began his career as an experimental test pilot and was named the company's chief experimental test pilot in 1958. In 1960 Ross became chief test pilot and chief of flight operations for McDonnell Aircraft Co. In 1972 he was named vice president- laboratory and flight and a decade later rose to the position of vice president-general manager - F-15. He was promoted to executive vice president of McDonnell Aircraft in 1985 and was elected president of the company a year later.

Johnston, 59, has held a range of engineering and leadership positions during his 34 years with McDonnell Douglas, including 12 years at Douglas Aircraft Co. in Long Beach, Calif., and some 20 years with the McDonnell Douglas Astronautics Co. in Huntington Beach, Calif. He was vice president-general manager of McDonnell Douglas of Huntington Beach before being elected president of McDonnell Douglas in March 1988.

#90303p1390 10/30/1990 ~PR Newswire

DENVER (OCT. 30) PR NEWSWIRE - Tremont Corporation (NYSE: TRE), a leading integrated producer of titanium metal products also engaged in bentonite mining operations, today reported net income for the quarter ended Sept. 30, 1990, of $6.4 million, or 9 cents per share, on net sales of $57.4 and net income for the nine months ended Sept. 30, 1990, of $18.5 million, or 25 cents per share, on net sales of $183.6 million.

Effective Oct. 29, 1990, the titanium metals and bentonite mining operations conducted by Tremont Corporation were separated from the petroleum services operations conducted by Baroid Corporation by means of a pro-rata reverse spin-off.

Tremont's principal operations are conducted through its subsidiary, Titanium Metals Corporation, which was consolidated effective Jan. 1, 1990, and, accordingly, the company's 1990 results are not comparable to those for 1989.

On a pro forma basis, titanium metals net sales increased $3.6 million, or 7 percent in the third quarter and $12.5 million, or 8 percent, in the 1990 nine-month period, reflecting increased selling prices and a higher value product mix offset in part by a decline in sales volume. There has been a softening of market demand for titanium products as end users are focusing on uncertainties surrounding military programs and their inventory positions. Bentonite mining sales increased due primarily to the timing of certain sales to the foundry market.

Consolidated operating income was $7.2 million in the third quarter of 1990, up slightly from 1989 pro forma results, while consolidated operating income for the nine months ended Sept. 30, 1990, was $28.8 million, up 22 percent compared to pro forma operating income of $23.7 million for the 1989 year-to-date period.

Extraordinary items relate to the income tax benefit of utilization of tax loss carryforwards.

#90303p1391 10/30/1990 ~PR Newswire

MESA, AZ (OCT. 30) PR NEWSWIRE - Customer satisfaction is once again paying off for an Apache tribe that builds parts for the attack helicopter bearing its tribal name.

McDonnell Douglas Helicopter Co. has awarded Apache Manufacturing Co. (AMCO) in Whiteriver, Ariz., a follow-on contract worth approximately $900,000 to build thermal insulation units for 222 AH-64 Apache attack helicopters. AMCO is owned and operated by the White Mountain Apache Tribe. The new contract covers all current U.S. Army and international Apache orders placed with the helicopter company.

AMCO also will take over production of all 32 configurations of nylon-covered Fiberglas insulation that go into each helicopter cockpit. Under previous contracts, AMCO supplied 50 percent of the units, with the other half produced at the helicopter company's Culver City, Calif., facility.

The materials will continue to be cut and kitted in Culver City until the helicopter company finds equipment that can be located in Whiteriver so AMCO can also handle that phase of production.

Gunn and White Mountain Apache Chairman Ronnie Lupe met today in Mesa to sign the latest contract.

"The relationship between McDonnell Douglas (NYSE: MD) and AMCO has been a win-win situation for both parties," Gunn said. "We receive quality products, delivered on time. Meanwhile, the Apache tribe has been able to develop its expertise in manufacturing and provide employment opportunities on the reservation."

The Apache tribe created AMCO as its first manufacturing enterprise in 1988 after working with McDonnell Douglas to train tribal workers in such specialties as quality, inspection techniques, clerical skills, safety, blueprint reading, assembly methods and communications. Contracts to date

total almost $1.4 million.

McDonnell Douglas has been producing the advanced multi-mission helicopter in Mesa since 1983 and has delivered more than 600 Apaches to the U.S. Army. Production with current orders is scheduled through 1994.

DETROIT (OCT. 30) PR NEWSWIRE - Following a bargaining session lasting more than 27 hours, UAW President Owen Bieber and Vice-President Stan Marshall, who heads the union's Chrysler Department, announced that the union has reached a tentative agreement covering UAW-represented hourly and salaried workers at the Chrysler Corporation (NYSE: C).

"We are delighted that we have achieved the pattern settlement for our members here at Chrysler," the UAW leaders said.

Noting that the union faced particular challenges in coming to terms on a new contract at Chrysler, Bieber and Marshall had "high praise for the extraordinary solidarity, discipline and tenacity displayed by the National Negotiating Committee and the entire UAW-Chrysler membership."

"We are confident that this agreement will provide three years of much-needed security for our members and retirees as well as the stability afforded by a committed, quality-conscious workforce for this corporation," they added.

Details of the contract are being withheld pending a meeting of the National Chrysler Council.

LOS ANGELES (OCT. 30) PR NEWSWIRE - In early 1991, L.A. Gear will introduce a revolutionary new line of high technology shoes featuring outsoles, midsoles and inserts using a new an unique polyurethane technology. "L.A. Gear's new product innovation also represents an entirely new era in footwear technology " according to L.A. Gear President Robert Greenberg.

As a result, L.A. Gear Inc. has entered into an exclusive license with UTI Chemicals Inc. of Irvine, Calif., to use their patented manufacturing method and unique polyurethane compound, "Z-thane." The new technology will first be implemented on the company's new Catapult basketball shoe line featuring the "Power Feedback System" which will be produced next year. Initially, the outsole will be seen on the Catapult shoes, but L.A. Gear has future plans to use the technology on other shoes, as well.

Catapult will debut in an unprecedented, full-blown media campaign starring Utah Jazz power forward Karl "The Mailman" Malone during the Super Bowl game in January.

UTI's patented method and special polyurethane compound can produce outsoles in a vast array of vibrant hues; clearly a visual advantage that no other current technology offers. In addition, the polyurethane allows L.A. Gear to blend transparent outsoles and inserts with opaque colors, creating unique combinations that enable the consumer to see the Catapult technology in action.

L.A. Gear will manufacture the Catapult shoe's outsoles, midsoles and inserts in South Korea. L.A. Gear will be the only shoe company to use this superior technology.

Some advantages of this patented method and unique polyurethane material over current techniques are:

-- EQUIPMENT COSTS. Capital equipment investment is one-tenth that of rubber, so the payback is considerably faster.

-- WASTE MANAGEMENT. This technology controls waste to under 1 percent while rubber technology runs 5 percent to 15 percent.

-- REUSABLE MATERIAL. UTI's non-toxic products can be shredded and recycled for other applications while rubber is extremely difficult to dispose of without doing marked environmental harm.

-- STRENGTH AND DURABILITY. This innovative new urethane is literally four times stronger than the rubber used for automobile tires.

The patented process took over 10 years of dedicated research and development, according to UTI Chairman Richard Steinke. "UTI has several machines creating products in the marketplace today, including airless 'flatproof' tires and custom automotive parts. We are looking forward to working with L.A. Gear in their application of polyurethane first in the extraordinary Catapult line, and thereafter in other footwear lines."

Based in Los Angeles, L.A. Gear markets and designs fashion performance footwear, apparel and accessories. The company is currently the third largest footwear manufacturer in the nation.

#90303p1403 10/30/1990 ~PR Newswire

MANCHESTER, NH (OCT. 30) PR NEWSWIRE - Amoskeag Bank Shares, Inc. (NASDAQ: AMKG), a multi-bank holding company, headquartered in Manchester, N.H., today reported a net loss of $20.9 million ($1.88 per share) for the third quarter ended Sept. 30, 1990. The net loss for the third quarter of 1989 was $18.0 million ($1.62 per share). For the first nine months of 1990 the company recorded a net loss of $45.4 million compared to a net loss of $33.8 million for the same period in 1989.

Total assets at Sept. 30, 1990 were $1.7 billion compared to $2.1 billion a year earlier, a 19 percent reduction as a result of the company's planned contraction of the balance sheet. During the same period, total deposits declined 11 percent from $1.6 billion to $1.5 billion. The primary capital ratio at Sept. 30, 1990 was 5.8 percent compared to 7.4 percent at Sept. 30, 1989.

Total non-performing assets increased 12 percent from $191 million at June 30, 1990 to $213 million at Sept. 30, 1990. The breakdown of the $213 million in non-performing assets includes $122 million in non-performing loans and leases $36 million in other real estate owned, $42 million of in-substance foreclosures and a non-performing investment in a joint venture of $13 million.

In the third quarter of 1990, a provision of $13.0 million was made to the allowance for loan and lease losses compared with $25.7 million for the third quarter of 1989. This brought the allowance for loan and lease losses for the third quarter of 1990 to $53 million compared to $49 million at Sept. 30, 1989. The allowance for loan and lease losses was 43 percent of non-performing loans and leases at Sept. 30, 1990. Net charge-offs for the third quarter were $9.1 million.

John L. Allen, president and CEO stated, "The continued impact of the non-performing assets has again affected our operating results primarily by

the need to sustain an adequate allowance for possible loan and lease losses. Primary capital at Sept. 30, 1990 was $105 million. We did resolve $15 million of our problem assets during the quarter, bringing the total resolutions so far this year to $27 million. Salary and benefit expense was reduced by 13 percent and the number of full-time equivalent employees declined 19 percent in the third quarter of 1990 compared to the same period in 1989. In the third quarter, we took a significant step to reduce long-term borrowings by prepaying a $25 million, 9 percent Promissory Note due in 1992 to insurance company lenders.

The uncertain resolution of the national budget deficit and the current recession in the New England economy continue to exacerbate the level and intensity of our problem loans. In spite of all the negative news, however, we remain focused on those areas over which we have control. These are difficult times and there is no quick turn-around in sight for the economy."

PITTSBURGH (OCT. 30) PR NEWSWIRE - The United Steelworkers of America (USW) said today that the corporate reconfiguration of USX (NYSE: X) will be an issue in contract negotiations now under way.

"This announcement raises questions which will be addressed in our negotations " said Andrew V. "Lefty" Palm, director of USW District 15 and chairman of the union's Negotiating Committee.

"We intend to protect our members fully, regardless of what corporate form U.S. Steel takes."

Palm would not comment further, citing a news blackout on negotiations imposed by both parties, but he did say the union would be addressing the matter in a letter to be mailed to USW members employed by USX.

The USW represents about 18,000 workers in 27 local unions at USX mining and steelmaking operations in the United States.

DALLAS, (OCT. 30) PR NEWSWIRE - The board of directors of the managing general partner of Diamond Shamrock Offshore Partners (NYSE: DSP) declared a quarterly distribution by DSP of 8 cents per unit. This cash distribution is payable Dec. 7, 1990 to unitholders of record on Nov. 15, 1990.

Consistent with the previously announced policy, the partnership will distribute on a quarterly basis substantially all distributable cash. For this purpose, distributable cash means net cash provided by operating activities and proceeds from sale of assets, less expenditures for oil and gas properties and equipment, including dry-hole costs, reserves for future operating and capital requirements and contingencies, and other partnership obligations.

DSP is the master limited partnership of Maxus Energy Corp. (NYSE: MXS), an independent exploration and production company based in Dallas.

NEW YORK (OCT. 30) PR NEWSWIRE - The American Merchant Marine Library Association will conduct a special national book drive to collect reading materials for the U.S. merchant mariners supplying Operation Desert Shield. The kick-off will be Nov. 5-9, 1990 on the main concourse of the World Trade Center, New York, where a receptacle will be placed to receive donations of hardcover and paperback books.

In addition, AMMLA is asking for donations to be mailed at library rate to its New York office at the World Trade Center.

The books are being collected for placement aboard U.S. flag ships for use by the officers and crew involved in the Middle East supply effort. The U.S. Navy's Military Sealift Command recently activated more than 70 merchant ships to provide support to U.S. Armed Forces in the Middle East operations. American merchant ships carry the goods and supplies to support the U.S. military in foreign locations.

AMMLA received its charter from the New York Board of Regents in 1921. It is the only "library" which provides reading materials for the crews of U.S. flag ships. Books are collected from publishers and the general public, and without this support there would be no "sea-going" libraries distributed to U.S. flag ships. Cartons containing approximately 50 assorted books are delivered to ships through a network of AMMLA Port Offices in Seattle, Oakland New Orleans, New York, Boston, and Sault Ste. Marie on the Great Lakes. AMMLA books are available to mariners in United Seamen's Service Centers in the international ports of Bremerhaven, Casablanca, Naples, Yokohama, Okinawa, Pusan, Inchon, Guam, Manila and Diego Garcia in the Indian Ocean. Additionally, libraries are mailed to ship's crews through a direct mail service operated from AMMLA's New York headquarters.

In 1989, 455 U.S. Coast Guard, Military Sealift Command, Merchant and other U.S. flag ships received 1,149 libraries through the "Public Library of the High Seas." AMMLA accepts and distributes paperbacks and hardcover books year-round and inquiries can be made to: Jeannine Russel, AMMLA Coordinator, American Merchant Marine Library Association, 1 World Trade Center, Suite 1365 New York, N.Y. 10048, 212-775-1038.

SAN FRANCISCO (OCT. 30) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) today extended its visual processing leadership position to the personal computer market with IRISVISION(TM), the first real-time 3D graphics board for

Intel-based personal computers. This is an aggressive move by Silicon Graphics to broaden its visual processing expertise to a new user community.

IRISVISION supports 8- and 24-bit color on MicroChannel and AT personal computers. The two-board set uses Silicon Graphics' IRIS Graphics Library(TM) (GL)(TM) software interface, which facilitates the development of high performance visual processing applications. IRISVISION will support MS-DOS(TM), SCO Open Desktop(TM) and Windows(TM) 3.0 operating systems.

"IRISVISION redefines and sets new standards for personal computer graphics," stated Edward R. McCracken, Silicon Graphics' president and CEO. "The real-time interactive capabilities available on IRISVISION will change the way people use PCs for design and animation. Along with our software partners, we are setting the direction for personal computer visual processing in the '90s."

IRISVISION provides new capabilities such as interactivity, 3D and color for the mechanical CAD, architectural and creative graphics markets. Over 20 PC and workstation software developers are writing applications for IRISVISION, including: AutoDesk, Bechtel Software, CADAM, CADKEY, CADSI, Comtran, Dynaware, Gimeor, IMAGICA, New Image, Paracomp, Pixar, SOFTIMAGE, Stephen Dedalus, Time Arts, Virtus, Virtual Prototypes and Wolfram Research.

Silicon Graphics is also announcing IRISView(TM), an AutoCAD R.11 ADI Driver and 3D file viewer, which allows AutoCAD users to render and manipulate DXF files interactively.

IRISVISION supports 1280 x 1024 and 1024 x 768 resolution, and offers VGA pass through. The suggested retail price for the AT version of IRISVISION/8 will be $3,495 and IRISVISION/24 will be $4,995. The suggested retail price for IRISVISION/8 for MicroChannel will be $3,995. These introductory prices include a 24-bit z-buffer at no additional charge.

Silicon Graphics Inc. is the leading manufacturer of high performance graphics systems, servers and software for visual processing applications. The company's products, which range from advanced project supercomputers to low-end desktop models and PC graphics subsystems, are used by engineers, scientists and creative professionals in design, analysis, manufacturing and simulation.

NEW YORK (OCT. 30) PR NEWSWIRE - Quotron Systems Inc., a leading provider of global financial information services, announced today the appointment of

William J. Barnicle to vice president, sales and marketing, and James M. Marvin to director, North American sales.

In his new position reporting to Kenneth A. Hines, vice president, Barnicle will be responsible for directing the global sales and marketing effort for Quotron F/X Trader, Quotron's foreign exchange dealing system for global interbank market.

Reporting to Barnicle, James Marvin will be responsible for directing the sales effort for the Quotron F/X Trader system in North America.

Quotron noted that both Barnicle and Marvin were formerly with Reuters in North America and have extensive experience in the financial information services industry and the systems needed to support it.

Designed with the help of foreign exchange traders from the world's largest financial institutions, Quotron F/X Trader provides traders with the ability to manage up to six simultaneous trading conversations, all on one screen. Color-coded conversation "panels" within the screen and easily recognizable graphic symbols provide the exact status of each conversation. Quotron F/X Trader has been in commercial release since Sept. 4, 1990, with 53 banks currently trading in New York, London, Singapore, Tokyo and Hong Kong. The product is scheduled for commercial release in Frankfurt, Zurich and Paris in mid-November.

Quotron Systems Inc., a wholly owned subsidiary of Citicorp (NYSE: CCI), delivers real-time prices for more than 120,000 investment instruments through an international network of more than 100,000 terminals in 23 countries.

#90303p1427 10/30/1990 ~PR Newswire

MONTREAL, (OCT. 30) PR NEWSWIRE - Repap Enterprises Inc. announced today results for the third quarter and nine months ending Sept. 30, 1990.

Sales revenues for the nine months ended Sept. 30, 1990 amounted to $921 million, a 6 percent increase over 1989. Net income was 82 percent lower at $12.2 million compared to $66.4 million in the 1989 period. Cash flow from operations at $92.0 million was 46 percent lower compared to 1989.

Third quarter earnings amounted to $4.5 million ($0.08 per share) compared to $4.2 million in the second quarter of 1990 and $19.6 million for the third quarter of 1989. Cash from operations was $26.6 million for the three months ended Sept. 30, 1990, compared to $54.0 million in 1989.

Repap Enterprises Inc. is an integrated North American paper company with a

capacity of 972,000 short tons per year of coated paper, 160,000 short tons per year of kraft paper capacity and three kraft pulp mills with an effective annual capacity of 800,000 metric tons. Internal kraft pulp consumption amounts to 500,000 metric tons per year resulting in a net market position of 300,000 metric tons per year. Repap now achieved one of its major strategic objectives of reducing the company's dependence on the more volatile market pulp segment of the Forest Products industry.

#90303p1432 10/30/1990 ~PR Newswire

NEWTOWN, PA (OCT. 30) PR NEWSWIRE - SPS Technologies (NYSE: ST) today reported a third quarter loss from continuing operations of $1.8 million, or $.35 per share, on sales of $107.7 million.

This compares to earnings of $4.4 million, or $.88 per share, on sales of $102.6 million a year ago.

A charge of $1.5 million, or $.30 per share, was reported for discontinued operations during the quarter. This represents the anticipated loss on a note received in connection with the company's sale in December 1987 of its Hallowell product line, which was part of the materials handling segment discontinued in 1988. After the loss from discontinued operations, the net loss for the quarter was $3.3 million, or $.65 per share.

For the nine months ended Sept. 30, 1990, earnings from continuing operations were $1.3 million, or $.25 per share. Sales for the period totaled $327.7 million. After the loss from discontinued operations, the net loss for the first nine months of 1990 was $224,000 or $.05 per share. This compares to earnings of $13.5 million, or $2.70 per share, on sales of $323.4 million for the sale period a year ago.

Incoming orders for the third quarter were $105.9 million, compared to the prior year's level of $112.1 million. Backlog at Sept. 30, 1990, was $143.4 million, compared to the backlog of $136.2 million at the end of the third quarter of 1989.

Higher shipments for the quarter and nine months from the fastener segment were partially offset by reduced shipments from the materials segment. Fastener shipments to the transportation and aerospace markets increased significantly, while shipments to the machine tool and industrial machinery markets increased slightly for the quarter and declined for the nine-month period. Shipments of magnetic materials and superalloys declined because of weak demand from industrial and commercial end users.

Contributing to the decline in profitability for the quarter was a loss

recorded by the company's Brazilian affiliate, Metalac S.A. Industria e Comercio, in which it holds a 46 percent ownership interest.

Margins in the industrial fastener business serving the automotive, machine tool and industrial machinery markets were significantly weaker than expected, primarily as the result of cost escalation coupled with competitive pricing pressure. Also affecting margins in this area was a one-time cost associated with the reduction of work force at one of the company's United Kingdom plants.

Materials margins, principally in the magnetic products business, softened as a result of weak demand in the automotive, military, communications and computer equipment markets.

Foreign exchange losses increased by $597,000 in the third quarter compared to a year ago, and by $864,000 in the nine-month period, as a result of significant currency fluctuations during the third quarter of this year.

While price increases and improved operating performance by the Aerospace Products Division provided the division with better third quarter margins than a year ago, the improvement was not sufficient to offset reduced profitability in other areas.

John R. Selby, chairman and chief executive officer, stated, "Many of our markets have been adversely affected by slowing economic conditions, creating an uncertain outlook for the future. Based on the record strength in demand for commercial aircraft, together with the financial strength of the company, we are encouraged and believe that in 1991 the company can demonstrate a marked improvement in earnings performance. At the same time, it must be noted that numerous factors exist that could negatively affect the economies in which we conduct business to an extent now unforeseen."

CINCINNATI (OCT. 30) PR NEWSWIRE - Comair Holdings, Inc. (NASDAQ/NMS: COMR), the parent corporation of Comair, the Cincinnati based "Delta Connection" airline, today announced the appointment of David A. Siebenburgen as president of the company. In addition to his duties as president, Siebenburgen will maintain his position as chief operating officer. David R. Mueller will continue as chairman and chief executive officer.

Siebenburgen joined Comair in March of 1984 as vice president of finance and chief financial officer. He was appointed to executive vice president, chief operating officer and chief financial officer in 1986 and served on the board of directors since 1988.

In addition, the company announced that Randy D. Rademacher was appointed chief financial officer, assuming the duties of Siebenburgen in this capacity. Rademacher will maintain his position as vice president of finance. Rademacher joined the company as director of corporate finance in 1985, was named controller in 1986 and vice president of finance in 1989.

David R. Mueller, chairman and CEO, stated "We are extremely pleased to announce these new appointments. Siebenburgen has been directing the company as chief operating officer and has served on the board for the past several years. We have every confidence that he will continue to demonstrate the outstanding qualities he has shown in the past. It is critical that these positions be held by outstanding people. We believe that our company has appointed two individuals that can guide us into the future with the leadership we will require."

WARREN, OH (OCT. 30) PR NEWSWIRE - CSC Industries, Inc. reported its financial results for the third quarter of 1990 today. Net sales of $46,193,000 increased 8 percent from last year's third quarter level of $42,911,000. For the nine months ended Sept. 30, 1990, net sales were $152,971,000, or 13 percent higher than the sales in the first nine months of 1989 of $135,929,000.

For the third quarter a net loss of $5,556,000, or 64 cents per share, was reported as compared to last year's third quarter net loss of $8,716,000, or $1.01 per share.

For the first nine months of 1990, a net loss of $16,605,000, or $1.92 per share, was reported as compared to a net loss of $9,679,000, or $1.12 per share, reported for the first nine months of 1989. The net loss in 1989 was reduced by an extraordinary gain of $8,240,000, or 95 cents per share, on the restructuring of the $20 million note due Copperweld Corporation.

Lawrence Weeks, president and chief executive officer, said, "The steel market remains very competitive: Copperweld Steel's $23 million capital improvement project on its 12 inch mill will be complete in December of 1990, and this key

project will result in lower manufacturing cost, but, most importantly, will greatly improve surface quality and dimension control on the products rolled on this mill.

"Installation of additional quality enhancing non-destructive testing and finishing facilities will further improve CSC Industries' opportunities to improve earnings."

PALMDALE, CALIF. (OCT. 30) PR NEWSWIRE - The Lockheed team's second YF-22 Advanced Tactical Fighter prototype has completed its first test flight. With Lockheed test pilot Thomas Morgenfeld at the controls the aircraft reached an altitude of 10,000 feet and a speed of 240 knots.

Powered by a pair of Pratt & Whitney F119 engines, the new YF-22 took off from Lockheed's Palmdale production facility and landed at Edwards Air Force Base, Calif., 14 minutes later after performing a variety of aircraft systems checks.

Lockheed's first YF-22 prototype equipped with General Electric YF120 engines, made its maiden flight Sept. 29 with Lockheed test pilot Dave Ferguson at the controls. The two aircraft are now involved in a rigorous flight test program that will continue into December.

Lockheed's YF-22 represents one of two proposed designs under consideration in the U.S. Air Force's Advanced Tactical Fighter competition. In 1991 the Air Force will select one design to go into full scale development. Lockheed is teamed with Boeing and General Dynamics.

MOUNTAIN VIEW, CALIF. (OCT. 30) PR NEWSWIRE - Pyramid Technology Corp. (NASDAQ: PYRD) today reported record revenues for its fiscal 1990 fourth quarter of $55,694,000, an increase of 82 percent over the $30,531,000 reported for the like quarter last year. Income before income taxes for the quarter rose by 98 percent to $7,567,000 from the $3,818,000 recorded in last year's fourth quarter. The company also posted record net income for the fourth quarter of $5,323,000, or $.46 per share, compared to net income of $2,750,000, or $.31 per share, reported for the comparable period in fiscal 1989.

Revenues and net income for the fiscal year ended Sept. 30, 1990 were also at record levels. Revenues advanced by 73 percent to $179,728,000 from the fiscal 1989 revenues of $103,875,000. During the like period, income before income taxes jumped by 110 percent to $24,401,000 from $11,618,000. Net income for fiscal 1990 was $16,835,000, or $1.61 per share, compared to $8,365,000, or $.96 per share, for fiscal 1989.

"I am pleased to report another successful quarter culminating an excellent fiscal year for the company," said Richard H. Lussier, chairman, president and chief executive officer. "Sales in the United States were strong in the quarter, particularly to AT&T. Furthermore, we experienced encouraging growth in our federal business unit during the quarter. As we look forward to fiscal 1991, it is also reassuring to begin the year with almost $42 million of cash and essentially no long-term debt."

Founded in 1981, Pyramid Technology Corp. designs, manufactures, markets and services a family of high-performance, high-reliability servers for open commercial, computing environments. Based on the UNIX operating system, Pyramid products offer mainframe-class performance through a symmetric multiprocessing architecture incorporating the principles of reduced instruction set computing (RISC).

CAMBRIDGE, MASS. (OCT. 30) PR NEWSWIRE - Polaroid's trendy Cool Cam, the instant camera for fashion-minded youngsters, has taken on a bold new look for the holiday season. Now, the Cool Cam is as bright and colorful as the instant photos it takes.

Polaroid is introducing a neon Cool Cam - its latest instant camera, featuring a striking color combination of hot pink and bright yellow for young-minded photographers who want an instant camera that fits their '90s lifestyle.

The latest Cool Cam, styled especially for the 9-to-14-year-old set, is also available in more traditonal two-tone colors - pastel pink and grey or hot red and black. Cool Cam was the first Polaroid camera created specifically for "tweens," the demographic name given to pre- and early teenagers.

Cool Cam uses Polaroid 600 Plus film to deliver bright, sharp and colorful instant photos. At the touch of the shutter button, Cool Cam offers all the sophisticated features that make instant photography easy and hassle-free.

Cool Cam features built-in electronic flash, a pre-focused lens for frame filling portraits taken at four feet or pictures taken from longer distances. Other Cool Cam features include lighten/darken exposure control, red (flash charging) and green (flash ready) light indicators, picture counter and

matching nylon cord neckstrap for easy carrying.

The new neon Polaroid Cool Cam is a great holiday gift idea for all children 9-years and older. The neon Cool Cam is available at major department, discount, drug and toy stores. The suggested list price for the new neon Cool Cam is $49.99.

Polaroid Corporation (NYSE: PRD), with sales of nearly $2 billion, is the worldwide leader in high-quality instant imaging. The company supplies instant photographic cameras and film; and conventional and electronic visual communication products to the consumer, business, industrial and scientific markets.

CONTACT: Gregory R. Venne, 617-577-2863 or Michael J. Spataro, 617-577-2455 both of Polaroid Corp.

WALTHAM, MASS. (OCT. 30) PR NEWSWIRE - Thermo Instrument Systems Inc. (AMEX: THI) today reported revenues of $79.9 million for the third quarter ended Sept. 29, 1990, up 70 percent from $47 million for the comparable period in 1989. Net income for the quarter nearly doubled to $4.9 million, from $2.5 million a year ago. Earnings per share were 19 cents, compared with 11 cents last year, on a 20 percent increase in average shares outstanding due principally to conversions of the company's debentures into common stock.

For the first nine months of the year, revenues rose 43 percent to $193.1 million, compared with $135.2 million last year. Net income was $13.8 million up 53 percent from $9 million in 1989. Earnings per share were 54 cents, compared with 44 cents a year ago, on a 24 percent increase in average shares outstanding.

Arvin H. Smith, president and chief executive officer, said, "The strong growth in earnings is a result of our longtime emphasis on environmental monitoring and analytical instruments, improved performance in our environmental services segment, and the first full quarter of contributions from our Finnigan Corporation subsidiary. We are well on our way to a fifth consecutive record year."

Thermo Instrument Systems develops, manufactures and markets analytical instruments used to detect and monitor air pollution, radioactivity, complex chemical compounds, and toxic metals and other elements in a broad range of liquids and solids. The company also provides environmental science and engineering services, laboratory-based testing, and nuclear health physics services. Thermo Instrument Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

#90303p1489 10/30/1990 ~PR Newswire

TULSA, Okla. (OCT. 30) PR NEWSWIRE - Lowrance Electronics Inc. (NASDAQ: LEIX) today reported record sales of $60,713,000 for the year ended July 31, 1990, up 12 percent from $54,001,000 in sales during the previous year. Net income was $262,000, or 8 cents per share, compared to net income of $250,000, or 7 cents a share, last year.

Darrell Lowrance, president of the company, termed the year-end results "significant in that our company successfully increased sales and market share despite difficult market conditions, but disappointing in that our net income was below expected levels." He cited a sharp drop-off in fourth quarter sales and a deterioration of fourth quarter margins resulting from reduced production and unbudgeted manufacturing rework costs as important factors contributing to the company's lower than expected profit.

Lowrance pointed out that based on industry statistics, factory shipments of new boats decreased 40 percent during the past two model years, and accordingly, unit sales for sonar and Loran-C products in the United States continued their downward trend through model year 1990. In view of the significant decline in recreational boat sales and unsold boat inventories, Lowrance considered the company's strategy during fiscal 1990 of increasing sales and market share a success because the company increased its unit sales by 6 percent.

He further emphasized that, "our sales and marketing efforts continue to pay off as additional dealers for the Lowrance and Eagle product lines expand and strengthen our retail base. We are encouraged by the enthusiastic response to our 1991 Eagle and Lowrance product lines, particularly our three new Eagle models, the Magna, Magna Plus and Ultra-Nav, and our three new Lowrance models the X-25, LMS-150 and 3500 digital. While we are pleased with our current backlog of orders in excess of $16 million, our present backlog is $4 million less than last year at this time.

"The outlook for sales of the company's products next year is clouded by the continuing decline in new recreational boat sales, and unrest in the Persian gulf and its adverse impact on the U.S. economy. A reduction in consumer spending appears likely, and our company is attempting to counter this negative economic news through cost reductions, except in research and development, and the introduction of several new lower priced models in an effort to maintain our market momentum. While the outlook for the economy and

the recreational boating industry is not sanguine, the company remains committed to continued profitability and we remain encouraged by our ongoing prospect for continued growth in market dominance," concluded Lowrance.

Lowrance Electronics Inc. manufactures sonar and navigational instruments and accessories for sport fishing and recreational boating markets under the brand names "Lowrance" and "Eagle." The company's common stock is listed on the National Market and trades in the Over-the-Counter Market under the NASDAQ symbol LEIX.

#90303p1495 10/30/1990 ~PR Newswire

PHOENIX, ARIZ. (OCT. 30) PR NEWSWIRE - Del Webb Corp. (NYSE: WBB) today reported first quarter net income of $2.4 million, or 26 cents per share, on revenues of $48.8 million, compared to net income of $3.8 million, or 35 cents per share, on revenues of $54.6 million during the same period in 1989.

In May, the company changed its fiscal year-end from Dec. 31 to June 30 to more closely coincide with its business cycle. As a result, all comparisons are against the Sept. 30, 1989 quarter.

Philip J. Dion, chairman of the board and chief executive officer, said the quarter's results were in line with expectations. "In late 1989 we

experienced a surge of closings at Sun City Las Vegas as we began to deliver the high volume of homes that were sold earlier in the year. That resulted in higher than expected earnings and we are now at a more sustainable level," he said.

During the quarter, Webb delivered 368 homes, compared to 422 during the same period last year. The decrease is partially attributable to a delivery problem with a previous supplier which delayed the closing of a number of homes during the quarter.

Sales at Webb's Sun Cities in Phoenix, Tucson, Ariz., and Las Vegas, Nev., improved during the quarter as 364 sales were recorded, compared to 324 during the same period in 1989. "Sales in Tucson were up more than 100 percent and Las Vegas posted a sales increase despite strong numbers from a year ago," Dion said.

The company's backlog of homes under contract but not yet delivered remained strong and virtually unchanged during the quarter. Total backlog at the three communities was 1,018 at the end of the quarter, compared to 1,017 a year ago. "I'm encouraged by the consistency of these numbers and that the backlog is more evenly distributed among our communities. This is a positive sign because backlog is indicative of near term revenues and earnings," Dion said.

During the quarter, the company purchased 70,000 shares of its common stock, and in October, purchased another 70,700 shares, all at an average price of $5.31 per share. The company also repurchased approximately $2.5 million of its convertible debentures at current market prices, resulting in a pre-tax gain of $472,000.

At a board meeting Oct. 30, the Del Webb Corp. board of directors declared a five cent per common share first quarter dividend payable Dec. 3, 1990, to shareholders of record Nov. 9, 1990.

#90303p1496 10/30/1990 ~PR Newswire

INDIANAPOLIS (OCT. 30) PR NEWSWIRE - AM Diagnostics, Inc. today announced results for its fourth quarter and fiscal year ended June 30, 1990. As previously announced, American Monitor Corporation closed its Sixth Amended Plan of Reorganization effective Sept. 17, 1990. At that time, American Monitor reorganized, recapitalized and began operating under the new name of AM Diagnostics, Inc.

Revenues decreased during 1990 primarily due to customers' perceptions of uncertainty in relation to the reorganization. The lack of working capital

also limited the company's ability to effectively convert its backlog of orders into sales.

"The reorganization of AM Diagnostics has been largely driven by customers' acceptance of AM Diagnostics' new and improved analyzers which will facilitate our ability to fill our $5 million backlog of orders," said Michael J. Treble, chief executive officer of AM Diagnostics. "The turnaround of AM Diagnostics continues and management believes that the most difficult tasks of the reorganization have been accomplished."

AM DIAGNOSTICS, INC.
CONDENSED CONSOLIDATED STATEMENTS OF OPERATIONS
(Unaudited)(a)
(In thousands, except per-share amounts)

	For the Quarter Ended June 30		For the Year Ended June 30	
	1990	1989	1990	1989
Revenue	$4,820	$6,322	$21,910	$25,983
Net loss	($2,905)	($1,120)	($7,956)	($4,645)
Net loss per share of common stock	($0.35)	($0.13)	($0.96)	($0.56)
Weighted average number of common shares outstanding	8,350	8,350	8,350	8,350

(a) -- The company's consolidated financial statements for the fiscal years ended June 30, 1990 and 1989 were not audited by independent public accountants due to limited financial resources.

Pursuant to the Plan, independent audits of the company's financial statements are not required from July 1, 1988, until the Effective Date of the Plan.

AM Diagnostics, Inc. designs, manufactures and markets superior diagnostic systems to the high-volume niche of the clinical diagnostics marketplace for clinical chemistry, therapeutic drug monitoring and immunoassays serving large hospitals and private clinical laboratories worldwide.

CHICAGO, (OCT. 30) PR NEWSWIRE - Northern Trust Corp. (NASDAQ: NTRS), parent of The Northern Trust Co. and of Northern Trust of California N.A., today announced the signing of a definitive agreement to acquire Tri-Valley National Bank in Dublin, Calif. (in the San Francisco area). Terms of the acquisition were not disclosed.

Tri-Valley National Bank, a wholly owned subsidiary of SJNB Financial Corp., was organized in 1983 and as of Sept. 30, 1990, had banking assets of approximately $12 million.

"With the change in California law in January 1991, we intend to merge Tri-Valley National Bank with Northern Trust of California N.A. The new entity will offer a full range of private banking services in addition to asset management and trust services," said David W. Fox, chairman, Northern Trust Corp.

"Northern Trust of California N.A. now administers trust assets in excess of $1.2 billion from offices in Santa Barbara, Los Angeles, San Francisco, Newport Beach and San Diego," said Alison A. Winter, president, Northern Trust of California N.A.

The acquisition of Tri-Valley is subject to receipt of approval from the comptroller of the currency.

#90303p1510 10/30/1990 ~PR Newswire

SHREVEPORT, LA (OCT. 30) PR NEWSWIRE - Arkla Exploration Co. (NYSE: ARK) today reported a decline in third quarter net income related tocontinued weak wellhead pricing for natural gas. However, as a result of increased production volumes, the company again showed an increase in cash flow for the third quarter ending Sept. 30, 1990, compared to the same period last year.

The company posted third quarter consolidated net income of $1.2 million, or four cents per share, compared to $2.9 million, or nine cents per share in 1989, based on the same number of average shares outstanding. Year-to-date income was $5.3 million, or 16 cents per share, compared to $9.8 million, or 30 cents a share in 1989, based on the same number of shares.

Meanwhile, net cash flow from operations (before net changes in working capital) for the third quarter of 1990 increased 12.7 percent to $18.1 million from $16.0 million in the third quarter of 1989. For the year-to-date period, net cash flow increased 21.6 percent to $57.7 million, up from $47.5 million for the first nine months of 1989.

This is the third consecutive quarter in which Arkla Exploration reported an increase in cash flow since undergoing an initial public offering of stock in December 1989.

Carl S. Quinn, chairman and chief executive officer of Arkla Exploration, attributed the reduction in net income to continued weak wellhead prices for gas in the third quarter--despite the current rise in oil prices--and higher depletion and depreciation expenses.

"However," Quinn added, "as a result of new contractual arrangements and the firming of October spot gas prices, Arkla Exploration's average sales prices are anticipated to improve in the fourth quarter."

In addition, continuing a trend from the first and second quarters, Quinn said the drop in operating income was also partially offset by additional tax credits gained on increased production of "tight sands" natural gas.

Total sales volumes for the company increased to 21.1 billion cubic feet of natural gas equivalent (Bcfe) in the third quarter of this year, which represents an 8.1 percent rise over the 19.6 Bcfe sold in the third quarter of 1989.

Year-to-date sales volumes were also up 13.9 percent to a total of 66.2 Bcfe in the first nine months of this year, compared to 58.1 Bcfe for the same period a year ago.

During the third quarter of 1990, the average sales price for natural gas equivalent fell to $1.67 per thousand cubic feet equivalent (Mcfe), down from $1.84 per Mcfe in 1989, and for the year-to-date 1990 was $1.75 per Mcfe, down from $1.84 per Mcfe last year.

In making this announcement, Quinn also reported that at their regular meeting on Oct. 25, the board of directors declared a quarterly dividend of 5 cents per share payable on Dec. 14, 1990 to all shareholders of record as of Nov. 23 1990.

Arkla Exploration is one of the nation's largest independent gas and oil operators in terms of proved natural gas reserves, with more than 800 Bcfe of reserves. The company is actively engaged in the onshore exploration, development, production and marketing of natural gas and crude oil in the Mid Continent and Gulf Coast regions of the United States.

Arkla Exploration is a publicly-held company, and is traded on the New York Stock Exchange under the ticker symbol "ARK."

#90303p1513 10/30/1990 ~PR Newswire

PHILADELPHIA, (OCT. 30) PR NEWSWIRE - Raymond Broderick, U.S. District Court judge, today approved the settlement of a class action brought by investors against SmithKline Beckman Corp. and certain of the officers and directors in the amount of $22 million.

The settlement culminates more than two years of litigation involving claims by the investors that SmithKline would be able to sustain the earnings growth previously generated by its two principal products, Dyazide and Tagamet. In essence, the plaintiffs alleged SmithKline had represented to the investing public that its record growth was likely to continue when, in fact, the opposite was the case. No decision was ever reached by the court with respect to the validity of the investors' claims.

According to the plaintiffs' lead counsel, Richard D. Greenfield of Greenfield & Chimicles, Dianne M. Nast of Kohn, Savett Klein & Graf, and Sherrie R. Savett of Berger & Montague, the $22 million settlement represents one of the largest comparable recoveries for investors in an earnings projections case. Greenfield stated, "It was impossible to tell, at this time, how much individual investors would receive on their claims because the settlement process is not yet concluded."

Claim forms have been mailed to members of the class, who are required to submit such claim forms to the claims administrators. According to Savett, in order to be entitled to receive a share of the settlement fund, the claim forms must be submitted by Nov. 1, 1990. Nast further stated, "We are very pleased with this settlement and we anticipate that the members of the class will be happy as well."

Additionally, the court also awarded to the named plaintiffs "incentive awards" of $5,000 each, over and above their proportionate shares of the settlement fund.

NEW YORK (OCT. 30) PR NEWSWIRE - Pan American World Airways announced today that it had obtained from Airbus Industrie and United Technologies (NYSE: UTX) short term waivers of certain payments due them from the $150 million of proceeds that Pan Am received from the recent transfer of its Internal German Service to Lufthansa. These waivers were granted pending the creditors' review of the anticipated favorable effects of the transaction between Pan Am and United Air Lines announced on Oct. 23.

It was also announced that Pan Am had not made payments to certain of its pension plans that were also due, pursuant to a waiver previously granted by the IRS, upon transfer of the Internal German Service. Pan Am is presently in discussions with the IRS seeking to secure a deferral of these and other obligations.

If agreements cannot be reached on the long-term deferral of the payments due, the creditors have remedies available to them which, if exercised, could have a material adverse effect on Pan Am.

The amounts due to Airbus Industrie and United Technologies are secured by aircraft, spare engines and spare parts. The amounts due to Pan Am's pension plans for which deferral is requested are secured by a lien on the Pan Am Shuttle.

#90303p1518 10/30/1990 ~PR Newswire

VIENNA, VA (OCT. 30) PR NEWSWIRE - The board of directors of Perpetual Financial Corporation (NASDAQ-NMS: PFCP) announced today that it had changed the fiscal year for the company and its subsidiaries, including Perpetual Savings Bank, F.S.B.

The company's new fiscal year will cover the period of Jan. 1 through Dec. 31. The company's previous fiscal years had ended on Oct. 31.

The change in reporting periods will align the timing of Perpetual's financial disclosure for both bank regulatory and stockholder reporting purposes. Because of the change in its fiscal year, the company will file a Form 10-Q with the Securities and Exchange Commission, covering the quarter ended Sept. 30, 1990, and a transition report on Form 10-Q for the period of Nov. 1, 1989,

to Dec. 31, 1989.

For the three months ended Sept. 30, the company expects to report a net loss after taxes of approximately $31 million. This loss is driven largely by provisions to the reserve for loan losses during the three months of approximately $35 million and by losses of approximately $15 million in its real estate investment activities which have resulted in part from the continuing deterioration in the metropolitan Washington real estate market. At Sept. 30, 1990, non-performing assets are expected to total $401 million, which would be an increase of $66.7 million over their level at July 31, 1990.

As of Sept. 30, 1990, Perpetual Savings Bank continued to meet all three regulatory capital requirements. Stockholders' equity for the coO/ at Sept. 30, 1990, as measured by fgnerally accepted accounting principles, totalled $220 million, or 4.20 percent of total assets. During the quarter ended Sept. 30, 1990, Perpetual Financial Corporation, the holding company, contributed $14.5 of its $26.0 million in excess capital to Perpetual Savings Bank. This action was taken to assist the company's principal subsidiary in complying with regulatory capital requirements. Subsequent compliance with capital ratios may be prevented by additional loan loss provision requirements resulting from the weakening real estate climate.

The actions announced today should have no negative impact on Perpetual's current level of customer service or the safety of its deposits which are insured by the Federal Deposit Insurance Corporation.

Perpetual Financial Corporation, with assets of $5.2 billion, is the holding company for Perpetual Savings Bank, F.S.B., the largest thrift institution in Virginia, Maryland and Washington.

#90303p1519 10/30/1990 ~PR Newswire
RIDLEY TOWNSHIP, PA (OCT. 30) PR NEWSWIRE - Boeing's new 777 commercial airplane program, announced yesterday in Seattle, is also good news for the Delaware Valley.

Ridley Township's Boeing Helicopters has been selected by Boeing Commercial Airplanes to produce wing fixed leading edges for the new Boeing 777. This program could add as many as 300 new employees before it reaches full production in 1995 and is projected to remain at that level for the foreseeable future.

"Boeing Helicopters' expertise in composite materials, and our experience in producing wing components for other Boeing commercial aircraft, plus the hard work of the talented people in our operations group, enabled us to win this

program," said A.R. (Russ) Schiela, Boeing Helicopters' program manager for the 777.

Schiela added that design teams have already begun work on the program, and that tool design and production support will begin in 1991, with first delivery of wing components slated for early 1993.

The wing leading edge structure combines composite and metal components for the new wing design proposed for what will become the world's largest, most spacious two-engine passenger airliner. The Boeing 777 will carry 360 to 390 seats and meet the demand for a jetliner sized between the company's 767-300 and 747-400. The 777 will roll out in April 1994, and first flight is scheduled for the following June.

For more than a decade, Boeing Helicopters has produced wing components and other composite and aluminum assemblies for all jetliners manufactured by Boeing Commercial Airplanes. The division currently produces wing components for the Boeing 737, 747, 757 and 767 commercial aircraft. Approximately 775 people are employed in these programs. Overall, Boeing employment in the Delaware Valley totals more than 6,700.

John Kivitz, Boeing Helicopters' commercial airplane program manager, said, "Deliveries of wing component ship sets in all of our airplane programs have increased significantly in the last few years. The new 777 program offers Boeing Helicopters a fantastic opportunity to assist Boeing Commercial Airplanes in an exciting new project."

Boeing Helicopters is an operating division of the Boeing Defense & Space Group, which is a unit of The Boeing Co. (NYSE: BA), with headquarters in Seattle. Boeing Helicopters produces and modernizes the CH-47 Chinook, a medium-lift helicopter for the U.S. Army and several international customers, composite helicopter rotor blades, fuel kits for the U.S. Marine Corps CH-46 E Sea Knight helicopters and jet transport assemblies. Current developmental programs include the MH-47E Special Operations Aircraft for U.S. Army long range special operations; the V-22 Osprey tiltrotor aircraft, with Bell Helicopter Textron; the LH, an advanced armed reconnaissance/light attack helicopter for the U.S. Army, with Sikorsky Aircraft; and the Boeing 360 Advanced Technology Demonstrator, the world's largest all-composite helicopter.

SEATTLE, (OCT. 30) PR NEWSWIRE - A new business trend has sign painters busy changing the names of businesses from "Jones and Son" to "Jones and Daughter." Increasingly, women are taking over the company business where Dad left off, and giving it their own unique stamp. Car dealer Barbara Guinn is a good example.

The owner of Acura of Bellevue, Guinn opened her own dealership in 1986. Going head to head with luxury European cars to introduce a new Japanese model she drew heavily on her 12 years of experience in the family businesses Nelson Chevrolet of Ballard and Lynnwood Honda. Having started in the accounting department in 1974, she worked her way up to office manager and eventually general manager of the Honda dealership.

The decision to open Acura of Bellevue came after she felt that her children were well-established in school and she herself had completed a year's worth of training at the National Auto Dealer's Academy. The four-year-old business now boasts yearly sales of $25 million, making it the second largest Acura dealership in the Pacific Northwest.

Guinn comes from a long line of auto dealers -- almost as long as the auto industry has been active in Washington State. Her grandfather, Stanley Nelson opened Nelson Chevrolet in Ballard in 1922, and in 1957 her father Stan Jr. started his own Chevrolet dealership in Sedro Wooley Uncle Fred Nelson owns Lynnwood Honda and Guinn's sister Pam Steinman has Foothills Pontiac/Buick/Toyota in Burlington. Of the 400 new car dealers in the state of Washington, Guinn and Steinman are two of just three who are women.

Guinn doesn't spend much time dwelling on the fact that she herself is a woman in a traditionally male industry. Rather, she pays attention to the needs of her customers, some 40-50 percent of whom are women.

"I try to educate the service and sales people that women as well as men are qualified, intelligent consumers. Attitudes are changing in all walks of life and this is one where it really makes a difference in our company's bottom

line."

KANSAS CITY, MO (OCT. 30) PR NEWSWIRE - A. Drue Jennings, president and chief executive officer of Kansas City Power & Light Company (NYSE: KLT), today sent the following letter to Wilson K. Cadman, chairman of the board and president of Kansas Gas and Electric Company (NYSE: KGE):

Your recent decision to sell Kansas Gas and Electric Company demonstrates that KG&E is involved in an auction. Consequently, you were and are required to act as impartial auctioneers in order to produce the best value for your shareholders.

We have suspected, and have now confirmed, that you have favored The Kansas Power & Light Company in this auction process, providing them extensive access to information and analysis while exerting every effort to defeat our tender offer. KPL's chairman states that you have given his efforts to acquire KG&E your "full support" and that you have "jointly...identified significant areas of potential cost savings for 1/8y3/8our customers based on synergies."

In contrast, we have been denied essential information and been refused cooperation in identifying synergies and cost savings that would support a higher price. Yesterday your investment banker told us that he has been specifically instructed to have no further communications with us.

The auction is not over. You are obligated to provide us with all of the information which we have requested, including the same information you provided to KPL, and the same cooperation in our efforts to identify synergies and value as was afforded KPL. I look forward to your prompt response and sincerely hope that you will now start working with us to produce the best value for your shareholders.

On July 23, 1990, Kansas City Power & Light commenced an all cash, fully financed tender offer for all outstanding common and preferred shares of Kansas Gas and Electric. The offer price of $27 per share for the common stock, approximately $857 million in the aggregate, represents a 37 percent premium over the market price of Kansas Gas and Electric common stock on July 20, 1990, the last trading day prior to the commencement of Kansas City Power & Light's offer.

The tender offer is scheduled to expire on Nov. 30, 1990, at 7 p.m., New York City time, unless the offer is further extended.

CONTACT: J. Turner White of Kansas City Power & Light, 816-556-2997, or Joele Frank of Adams & Rinehart, in New York, 212-557-0100

LA JOLLA, CA (OCT. 30) PR NEWSWIRE - Intermark, Inc. (AMEX: IMI) today announced that it has retained the investment banking firm of Bear, Stearns & Co. Inc. to act as its financial advisor on the possible sale of its subsidiary, National Airmotive Corporation. The Company said Bear, Stearns will assist in identifying qualified buyers of National Airmotive and also will manage the selling process.

National Airmotive is a leading commercial franchised distributor and overhaul agency for gas turbine engines manufactured by the Allison Gas Turbine Division of General Motors Corporation, and is the only distributor licensed to sell and service the entire Allison line of gas turbine engines.

John C. Stiska, President of Intermark, said, "National Airmotive is a strong, profitable business and has the capacity and opportunity with the right strategic buyer to double its present $100 million annual sales with very few changes to its manufacturing facility. Without having to make an additional investment, such a buyer could benefit from National Airmotive's capacity and worldwide reputation for excellence."

Intermark is a $1 billion operating/holding company whose business is to acquire a controlling interest in, operate through and add value to well-established, successful, mid-sized American growth companies in broadly diverse industries.

DANBURY, CT (OCT. 30) PR NEWSWIRE - First Brands Corporation (NYSE: FBR) today announced that its major shareholders, Metropolitan Life Insurance Company and The First Boston Corporation and certain of its affiliates, have terminated discussions with prospective acquirers of First Brands.

In light of difficult conditions for financing acquisitions and the unsettled outlook for the economy generally, the major shareholders concluded that it was unlikely that a transaction could be effected on terms satisfactory for all shareholders of First Brands. In June, a Schedule 13-D filed with the Securities and Exchange Commission by the major shareholders indicated that they had determined to actively solicit indications of interest from, and enter into discussions with, third parties regarding the potential acquisition of all or portions of the common stock or assets of First Brands.

Alfred E. Dudley, chairman, president and CEO of First Brands, stated that "Our major stockholders have reaffirmed their belief in the significant underlying values inherent in the company and the opportunities that lie

ahead. Our businesses are performing ahead of our expectations and the objectives we set for ourselves in 1986 when First Brands was created."

"We will continue to actively pursue opportunities to enhance shareholder value, including repurchase of our stock, reduction of debt and acquisitions which complement our existing products and add to earnings growth."

First Brands Corporation develops, manufactures, markets and sells leading consumer products sold under the GLAD, GLAD-LOCK, PRESTONE, STP and SIMONIZ brands.

#90303p1555 10/30/1990 ~PR Newswire

EDMONTON, ALBERTA (OCT. 30) PR NEWSWIRE - Numac Oil & Gas Ltd. (Toronto: NMC) of Edmonton, Alberta reports consolidated financial results for the nine months ended Sept. 30, 1990, as follows:

NUMAC OIL & GAS LTD.
(Millions, except per share amounts)

	Nine Months Ended September 30	
	1990	1989 (Restated)
Gross Revenue	$36.8	$32.4
Cash Flow	$21.5	$18.0
per share	$0.84	$0.71
Net Earnings	$3.0	$4.0
per share	$0.12	$0.16

Numac recorded solid improvements in gross revenue and cash flow for the nine months ended Sept. 30, 1990, compared with the same period in 1989. Gross revenue increased by 14 percent to $36.8 million compared with $32.4 million in 1989 and cash flow increased by 19 percent to $21.5 million compared with $18 million. These increases reflect higher production volumes and selling prices for both crude oil and natural gas. As a result of increased depletion and deferred income taxes, both non-cash items, net earnings were $3 million in 1990 compared with $4 million in 1989.

Primarily as a result of a 40 percent increase in crude oil selling prices and an 8 percent increase in crude oil production volumes, gross revenue and cash flow for the three months ended Sept. 30, 1990, were $14.4 and $8.5 million,

respectively, compared with $9.9 and $4.9 million in the quarter ended Sept. 30, 1989. Net earnings were $1.5 million compared with $0.5 million in the third quarter of 1989.

Crude oil and natural gas liquids production averaged 4,708 barrels per day (bpd) compared with 4,655 bpd in the first nine months of 1989. Importantly, production in the third quarter of 1990 was 4,858 bpd compared with 4,496 bpd in the third quarter of 1989. Numac's crude oil and liquids production currently exceeds 5,100 bpd.

#90303p1557 10/30/1990 ~PR Newswire

NEW YORK, (OCT. 30) PR NEWSWIRE - Leucadia National Corporation (NYSE: LUK) announced that its board of directors, acting through the executive committee of the board, has increased the number of its common shares that the company is authorized to purchase. As a result, the company is authorized to purchase. As a result, the company currently is authorized to purchase up to 1,000,000 common shares from time to time in open market purchases or private transactions.

Leucadia National Corporation is a holding company for its consolidated subsidiaries engaged in life insurance (through Charter National Life Insurance Company of St. Louis), manufacturing (principally through its Conwed General Marble and Electri-cord Divisions), banking (principally through American Investment Bank, N.A.) and real estate development and, through its approximately 66 percent interest in PHLCORP, Inc., is engaged in trading stamps (through Sperry and Hutchinson Company, Inc.), motivation services (through S&H Motivation, Inc.) and the property and casualty insurance businesses (principally through Empire Insurance Company and Allcity Insurance Company). In addition, as a result of its partnership interest in The Jordan Company and Jordan/Zalaznick Capital Corporation, two related partnerships which are principally engaged in structuring leveraged buy- outs in which their partners become equity participants, the company has equity interests in several private companies. The company owns non- controlling equity interests representing more than 5 percent in the following publicly owned United States companies: Carmike Cinemas, Inc. (16 percent of Class A shares), Jones Plumbing Systems, Inc. (approximately 11 percent) Olympus Capital Corporation (approximately 24 percent) and Transportation Capital Corp. (approximately 13 percent) and owns approximately 46.6 percent of the outstanding share capital of Molins PLC, an United Kingdom corporation.

#90303p1560 10/30/1990 ~PR Newswire

HOUSTON, (OCT. 30) PR NEWSWIRE - Noble Drilling Corp. (NASDAQ: NDCO) today reported 1990 third quarter operating revenues of $32 million compared with $28.7 million for the third quarter a year ago. The resulting operating loss and net loss were $46,000 and $599,000, respectively, for the 1990 third quarter compared with an operating loss of $1.3 million and net income of $714,000 for the third quarter of 1989. The 1989 third quarter net income was primarily attributable to a $2.7 million gain on the sale of the company's 250-foot jackup rig the "Johnnie Hoffman."

For the nine months ended Sept. 30, 1990, the company reported operating revenues of $97.7 million compared with $73.1 million for the same period of 1989. The operating loss and net loss were $4 million and $5.7 million, respectively, for the nine months ended Sept. 30, 1990 compared with $8 and $7 million, respectively, for the same period of 1989.

Noble's average domestic rig utilization rate for the first nine months was 34 percent, up from 26 percent for the same period of 1989. Domestic land operations averaged 28 percent utilization while the offshore operation averaged 53 percent.

Jim Day, president and CEO said, "The domestic market has continued to strengthen with the current rig count reaching its highest level since January 1988. We anticipate the overall activity level will remain strong through the fourth quarter."

The company's average international rig utilization rate for owned and leased equipment for the first nine months was 36 percent, up from 29 percent in the 1989 comparable period. Four rigs were transferred from the domestic offshore fleet to the international fleet effective July 1, 1990, in anticipation of their mobilization to Nigeria. This transfer directly increased the utilization rate of the domestic offshore division and, conversely, decreased the utilization of the international division. At Sept. 30, 1990, the company also operated 12 rigs through labor contracts, 10 in the North Sea, one offshore Malaysia and one in Kenya.

The company has one land rig in Syria. Day said, "In view of recent events in the Middle East, our operation in Syria has been suspended until there is some resolution of the conflict."

On Aug. 28, 1990, the company concluded an equity offering of 9,000,000 shares of its common stock which consisted of 5,000,000 primary shares issued and sold by the company and 4,000,000 shares sold by selling shareholders. From the company's net proceeds of approximately $44,500,000, the company repaid $15,200,000 of debt and the balance is being used to fund the company's capital expenditure and working capital requirements. The company did not receive any of the proceeds from the sale of shares of common stock by the selling shareholders.

The company has previously announced that its subsidiary entered into four contracts with The Shell Petroleum Development Company of Nigeria Limited to provide three posted barges and a shallow-water jackup for Shell Nigeria's drilling program in Nigeria, and that the company expected the rigs to commence operations in Nigeria late in the fourth quarter of 1990. All four rigs are currently in shipyards undergoing major modifications and refurbishment, and the company's original schedule for mobilization of the rigs has been revised. The "NN-1" and the "Gene Rosser" are currently scheduled to depart the Gulf of Mexico the latter part of November to arrive in Nigeria the latter part of December. The "Lewis Dugger" and the "Chuck Syring" are scheduled to commence transport to Nigeria by late-January 1991.

Noble Drilling Corp. is a major drilling contractor providing offshore and onshore contract drilling services worldwide with operations in the United States, Canada, the U.K. North Sea, Africa, the Far East, South America, the Middle East and India. The company's common stock is listed in the NASDAQ/NMS under the symbol NDCO.

TORRANCE, CA (OCT. 30) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) today announced that it will be conducting a dBASE Cross Platform Challenge at the Comdex '90 Conference and Exposition in Las Vegas, Nov. 12-16. The Challenge will allow participants to port an existing DOS-based dBASE application and data to a VAX VMS system, UNIX workstation or Macintosh computer.

"The dBASE Cross Platform Challenge is the best way for us to demonstrate what we call the 'true portability' of dBASE IV across PC, VMS, UNIX and Macintosh platforms," said David Proctor, Ashton- Tate executive vice president, product development. "Participants will be able to watch an existing PC dBASE application run on another platform without recompilation or modification."

According to Proctor, this level of portability is particularly desirable for the existing three million users of dBASE products on a DOS-based PC.

The true portability of these products allows users to easily migrate to other hardware platforms while permitting companies to leverage the large investments they have in applications, data and training.

Challenge Guidelines: Conducted in the Ashton-Tate booth (H8218) in the Las Vegas Hilton Hotel, appointments for the dBASE Cross Platform Challenge are being scheduled in one-half hour increments from 9 a.m. to 5 p.m. each day of the show.

Anyone interested in participating in the Ashton-Tate dBASE Cross Platform Challenge should contact the company's Advanced Consulting Group at 213-538-6116 to schedule an appointment. Participants will be asked to bring their application and data on either a 5-1/4" or 3- 1/2" disk to the Ashton-Tate booth at COMDEX '90.

Due to time restrictions, Ashton-Tate is limiting the size of the application to no more than 5,000 lines of pure dBASE code and requesting that the application does not include "load and call" routines.

Headquartered in Torrance, Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. The company's major product categories include database management systems, word processing, integrated decision support, spreadsheets, graphics and software utilities. Ashton-Tate has international operations in most countries around the world, with products available in 20 languages in more than 50 countries. The company also offers a comprehensive line of training and support services for individuals, corporations and government agencies.

DENVER (OCT. 30) PR NEWSWIRE - Apache Corp. (NYSE: APA) today announced that it has commenced its previously announced public offering of convertible subordinated debentures.

The 7.5 percent debentures, due Oct. 1, 2000, offered at 100 percent of their

principal amount, are convertible into shares of Apache common stock at any time prior to maturity unless previously redeemed at a conversion price of $19.18 per share. The $150 million offering is underwritten by Merrill Lynch & Co., The First Boston Corp., Goldman, Sachs & Co. and Smith Barney, Harris Upham & Co. Inc.

Net proceeds to the company from the offering will be used to repay virtually all bank borrowings and commercial paper indebtedness and for other general corporate purposes.

Apache is an independent energy company engaged in exploration, development, production and marketing of natural gas and crude oil. The company's securities are traded on the New York and Midwest Stock Exchanges (symbol APA).

NEWPORT NEWS, VA. (OCT. 30) PR NEWSWIRE - The Flight International Group, Inc. (NASDAQ-NMS: FLTI) announced today that it had reached agreements in principle with the lenders who last year sued the company as a result of its default on an aggregate of approximately $63 million in outstanding loans and who had not previously settled such lawsuits.

The agreements in principle announced today relate to the remaining $35.1 million in previously defaulted debt owing to five creditors. These agreements in principle provide that, subject to negotiation and execution of final documents satisfactory to all parties and certain other conditions, defaults under existing debt would be waived, payment terms of the restructured debt would be extended as compared to the debt currently in default and the lawsuits brought as a result of such defaults would be dismissed. If the final documentation is successfully negotiated and other conditions satisfied, Flight International will have restructured, brought current or paid off all of its defaulted debt.

"We are extremely pleased with the outcome of our latest round of lender negotiations," said J. Nelson Happy, chairman and chief executive. "These agreements in principle are an important step toward eliminating the remaining defaults and restoring the company's fiscal credibility among new and existing lenders, customers and suppliers."

The company also said that it expects to file its letter of application for inclusion of the company's common stock on the National Association of Securities Dealers Automated Quotation system by Oct. 31, 1990. "Listing on NASDAQ will be an important step in trying to create a more liquid market for Flight International shares," Happy said. "I hesitate to put a time frame on the listing process, but our shareholders will know the fate of our

application as soon as we do."

The Flight International Group, Inc. is a leader in aviation services with interests in government and military contracts as well as commercial flight operations.

TULSA, OK (OCT. 30) PR NEWSWIRE - BancOklahoma Corp. (NASDAQ: BOKC) reported today net income of $2.1 million for the three months ended Sept. 30, 1990, and net income of $6.2 million for the first nine months of the year. The company has been profitable for the past five quarters. Net income available to common shareholders, after the accumulation of unpaid dividends on the FDIC's Class A Preferred Stock in Bank of Oklahoma, N.A. was $294,000 and $792,000, respectively.

Last Thursday, George Kaiser announced the signing of a contract with the FDIC to acquire its interests in Bank of Oklahoma. Leonard J. Eaton, BancOklahoma chairman and chief executive officer, said it is anticipated that negotiations will begin this week with Kaiser's Acquistion Holding Company regarding Bank of Oklahoma shareholders' continuting interests.

Bank of Oklahoma's nonperforming loans and net repossessed assets are down substantially from a year ago. Nonperforming loans, including loans past due 90 days or more, were $52.9 million at Sept. 30, 1990, and $65.5 million at Sept. 30, 1989. Net repossessed assets were $32.1 million at Sept. 30, 1990, and $39.2 million at Sept. 30, 1990.

During the third quarter of 1990, Bank of Oklahoma made provisions of $1 million to its loan loss reserve and $1.4 million to its repossessed asset reserve. Its loan loss reserve was $46.0 million at Sept. 30, 1990, representing 86.9 percent of nonperforming loans.

At Sept. 30, 1990, BancOklahoma had total assets of $1.8 billion, total loans of $1 billion and total deposits of $1.6 billion. Primary capital was $113.3 million or 6.15 percent of total assets.

NORWALK, CT (OCT. 30) PR NEWSWIRE - Connecticut Bancorp, Inc. (NASDAQ: NKBK), the holding company for the Norwalk Bank, reported that after providing an additional $2 million in reserves for loan losses, it incurred a net loss of $2,026,000 ($1.45 per share) for the third quarter of 1990. Reserves were $3.1 million or 4.1 percent of total loans at the end of the third quarter. These results compared to a net loss of $147,000 ($.10 per share) in the third quarter of 1989. The addition to loan loss reserves is attributed to a continued deterioration in the overall economic environment and, in particular, the real estate market, and a worsening of the financial condition of individual borrowers. For the nine months ended Sept. 30, 1990, the company incurred a net loss of $3.4 million ($2.41 per share) compared to a net income of $7,000 ($.01 per share) in 1989.

Emmett G. Murphy, president of the Norwalk Bank, said, "Our continuous monitoring of local and regional economic conditions and particularly the weak real estate market as they affect our individual and corporate borrowers has indicated a continued decline in economic activity. This has resulted in additional stress to the financial condition of some of our borrowers. Due to the increase in our non- performing loans as a function of these economic factors, we have determined that a substantial addition to our reserves for possible loan losses is prudent at this time."

Kevin G. Woelflein, chairman of Connecticut Bancorp, Inc., added, "Although the region continues to experience substantial declines in economic strength and banks in general are feeling the effects in higher levels of non-performing loans, the Norwalk Bank remains in a position to weather this period of economic instability."

During the first nine months of 1990, deposits grew to $81 million, a 10 percent increase over year-end 1989, and loans increased to $76 million, an increase of 3 percent. Total assets at Sept. 30, 1990, were $86 million.

SAN FRANCISCO (OCT. 30) PR NEWSWIRE - San Francisco-based PLM International (AMEX: PLM) today announced the promotion of George E. Jennings to Director, Marine Operations. Jennings, 54, has served as Technical Marine Manager for PLM International's marine group since January 1989.

Jennings has over 35 years of experience in the maritime industry and has held positions at Getty Oil Co. and Caldel Marine Associates. As Director, Marine Operations, Jennings will be responsible for the operation and maintenance of all of PLM International's marine vessels. He will report to Dirk Langeveld, Vice President, Marine. PLM International owns and manages a fleet of 42 ships, including handy-size dry bulk carriers and oil product tankers.

PLM International is an integrated equipment leasing company engaged in the leasing and management of transportation equipment and in operating leases domestically and internationally, and in the syndication of capital equipment leasing investments. The company operates and manages over $1.3 billion of transportation equipment and related assets for its account and various investment partnerships and third party accounts.

MOSCOW (OCT 30) TASS - THE MIDDLE EAST WILL CONTINUE TO BE GRIPPED BY POLITICAL AND ECONOMIC CRISES UNTIL THE PALESTINIAN PROBLEM IS SOLVED, NAIF HAWATMEH, GENERAL SECRETARY OF THE DEMOCRATIC FRONT OF THE LIBERATION OF PALESTINE, SAID HERE TODAY.

HE ARRIVED IN MOSCOW ON MONDAY AT THE INVITATION OF THE SOVIET AFRO-ASIAN

SOLIDARITY COMMITTEE.

COMMENTING ON THE SITUATION IN THE GULF, HAWATMEH SAID THAT "DESPITE THE THREAT OF AN ARMED CLASH, THERE ARE POSSIBILITIES FOR A POLITICAL COMPROMISE".

"AFTER MY MEETINGS WITH IRAQI LEADERS I HAVE AN IMPRESSION THAT (IRAQI PRESIDENT) SADDAM HUSSEIN IS READY FOR A PEACEFUL SOLUTION OF THE PROBLEM," HE SAID.

HE NOTED THAT TWO CONDITIONS ARE NECESSARY TO SETTLE THE CONFLICT -- AN ARAB SOLUTION OF THE PROBLEM AND A U.S. PLEDGE NOT TO USE FORCE AGAINST IRAQ.

HAWATMEH SAID THE TOUGH U.S. STAND ON THE GULF CRISIS STOOD IN THE WAY OF A PEACEFUL SETTLEMENT.

HE NOTED THAT THE SOVIET UNION AND FRANCE COULD PREVENT AN ARMED CONFRONTATION IN THE GULF. "MOSCOW AND PARIS COULD BECOME AN OBSTACLE TO WAR," HE SAID.

COMMENTING ON A RECENT VISIT BY SOVIET PRESIDENTIAL SPOKESMAN YEVGENY PRIMAKOV TO IRAQ, HAWATMEH WELCOMED THE SOVIET UNION'S EFFORTS TO ACHIEVE A PEACEFUL SETTLEMENT, SAYING THESE EFFORTS WOULD BRING "TANGIBLE POSITIVE RESULTS".

HAWATMEH CALLED FOR A SINGLE STAND OF THE PALESTINE LIBERATION ORGANISATION ON THE SETTLEMENT OF THE GULF CRISIS.

#90303u0025 10/30/1990 ~United Press International

NEW YORK (OCT. 29) UPI - Goaltender John Vanbiesbrouck stopped 22 shots and Brian Leetch scored a goal and assisted on another Monday night to extend the New York Rangers' home winning streak to seven games with a 5-0 triumph over the Quebec Nordiques.

New York, 7-0 at Madison Square Garden this season, is off to its best home start in the 65-year history of the franchise. The team's last seven-game home winning streak ran from Dec. 21, 1983 to Jan. 18, 1984.

The Rangers registered their fifth straight victory overall and are 10-1-0 in the last 11 games. The shutout was Vanbiesbrouck's second of the season and ninth of his career.

In the only NHL game scheduled Monday night, New York took a 1-0 lead at 8:08 of the first period on Ray Sheppard's second goal of the season. Leetch shot from the high slot and the puck ricocheted off the post out to Sheppard at the right faceoff circle. Sheppard then blasted the puck past Nordiques goaltender John Tanner.

Mark Janssens gave the Rangers a 2-0 lead at 18:56 with his fourth goal, a turnaround backhander from right in front of the net. Kris King worked the puck free down the right side and sent it behind the net, where Jody Hull shoveled it out in front to Janssens.

Ron Tugnutt replaced Tanner at the beginning of the second period and gave up a power-play goal to Leetch 16 seconds into the period for a 3-0 lead. Mike Gartner assisted on the goal for his 900th NHL point.

The Rangers' Troy Mallette suffered a mild sprain of his left knee during the game, the Rangers reported, and will be out of the lineup seven to 10 days.

Kevin Miller scored his third goal of the season at 7:17 of the third period to extend the lead to 4-0 after Tugnett lost the puck behind his own net and John Ogrodnick was able to pass it out in front, where Miller shot it into the empty net.

Brian Mullen scored his sixth goal of the season at 9:27 for a 5-0 Rangers lead.

#90303u0083 10/30/1990 ~United Press International

(OCT. 30) UPI - French hostages used by Saddam Hussein as human shields to ward off attack at strategic sites in Iraq have won freedom, while President Bush and the Iraqi leader both say the Persian Gulf crisis may lead to military confrontation.

A Boeing 747 whisked more than 260 French hostages held in Iraq and Kuwait to Paris Monday, while Saddam said in a television interview that his nation would not object to war ''if God wills it.''

President Bush, visiting San Francisco, denied he is preparing America for war in the Middle East, but said the United States would take military action against Iraq if provoked.

''I am working to try to get this matter resolved peacefully. We have a lot of force there and they're well trained,'' said Bush. ''They are highly motivated and that alone is sending an enormously strong signal to Saddam Hussein.''

Soviet envoy Yevgeny Primakov flew to Saudi Arabia from Baghdad Monday after an apparent failure to persuade Saddam to end his nearly 3- month-old occupation of Kuwait. But Mikhail Gorbachev revealed his latest information from Primakov indicates Saddam appears to have softened his position.

Gorbachev, visiting France, said the gulf crisis must be settled peacefully and suggested Saudi Arabia work toward an ''inter-Arab'' solution.

Concluding a two-day meeting with French President Francois Mitterrand, the Soviet leader told reporters war in the Persian Gulf is unacceptable.

He said if Arabs find a solution among themselves, then ''the Iraqi leadership would be more ready to accept that.''

''Saudi Arabia is close, a neighbor, and has certain relations with Iraq. It could take an initiative, as well as other countries,'' Gorbachev said. ''There are inter-Arab mechanisms. They must act.''

Primakov was expected to speak with Saudi King Fahd and other officials about Gorbachev's peace proposal, Arab radio stations said.

Some Arab newspapers had described Primakov's mission as a ''last chance for peace.'' After the envoy left without a promise of Iraqi withdrawal from Kuwait, the U.N. Security Council voted for new measures against Iraq. The measures hold Iraq responsible for damage to Kuwaiti property and for human rights violations stemming from the invasion.

Saddam, for his part, said in a Cable News Network interview his talks with Primakov were ''wide-ranging, deep and very useful.''

He said Iraq is trying to avoid military confrontation and would rather negotiate a peace, but added it seemed that Israel and British Prime Minister Margaret Thatcher are trying to push Bush into that dangerous and grave quagmire.

He said ''there is nothing worse than war,'' but if the Arabs and Iraqis feared war they would lose their values of ''honor, sovereignty and security.''

''If the Americans were to opt away from war and distanced themselves from war then they will have established a strong position for themselves and for humanity.''

Saddam said an acceptable forum would be an international conference for a comprehensive solution to Middle East issues or a meeting of Arab nations.

Saddam described himself as ''an Arab citizen, a believer in God fighting for truth.''

''If God were to will that war occur then we, believers in God, will not object,'' he told interviewers. ''If he wills it (war) we will have to accept it despite the nature of things that will come in such a situation.''

Secretary of State James Baker, in a speech in Los Angeles, said Saddam is ''hell-bent on a revival of hot war'' in the Middle East. Baker said although the United States prefers a diplomatic solution, ''We will not rule out a possible use of force if Iraq continues to occupy Kuwait.''

In another development Monday, Saddam offered to make peace with Kurdish rebels in northern Iraq, news reports from Iran said. The government of Iran could mediate between the Iraqi government and rebels. The Kurds, non-Arabs whose tribes extend into Turkey, Iran and the Soviet Union, are a historically troublesome minority who periodically seek independence from Baghdad.

More than 260 French and 13 Greek and British hostages arrived in Paris from Baghdad, ending a three-month ordeal in Iraq and Kuwait that saw some of them used as human shields against attack at strategic locations. The freed hostages landed at Charles de Gaulle Airport outside Paris aboard an Iraqi Airways Boeing 747 jet after a six-hour flight from Baghdad.

The remaining six diplomats at the French Embassy in Kuwait city were on the flight, but French officials insisted the diplomatic mission remains ''open.''

Before the freed hostages arrived, the French government announced it would comply with an Iraqi request and send medicine to Baghdad aboard the plane that carried the nationals to freedom.

Officials said about 40 French nationals, including some who hold both French and Iraqi citizenships and members of religious groups, chose to stay behind in Iraq.

Some of the families of the hostages showed up at the airport with bottles of champagne. Annie Fauqueur arrived with her three daughters and five other members of her family on a chauffeur-driven car, courtesy of her town's mayor.

''My husband has been a prisoner since August,'' Fauqueur said before the Iraqi Airways jet landed. ''Don't say he was a swimming pool hostage, that would make him very upset, especially since he was sent to a strategic site as a human shield.''

PITTSBURGH (OCT. 30) UPI - Los Angeles put a scare into Pittsburgh during Halloween week when they returned the opening kickoff 100 yards for a touchdown Monday night, but that just seemed to put the Steelers in the spirit of the season.

Bubby Brister passed for four touchdowns, including two to Merril Hoge, who also scored on a 1-yard run, to lead the Steelers to a 41-10 rout of the Rams.

Brister completed 15 of 24 passes for 161 yards as the Steelers improved to 4-4 and climbed within a game of first-place Cincinnati in the AFC Central Division. The Rams, preseason favorites to reach the Super Bowl, fell to 2-5 in the NFC West.

Brister threw touchdown passes of 6 and 2 yards to Hoge, 17 to rookie Eric Green and 8 yards to Dwight Stone.

Gaston Green opened the game by returning the kickoff 100 yards for the Rams' only TD. Green took Gary Anderson's kickoff at the goal-line, ran up the middle, cut to his left and ran up the left sideline untouched into the end zone 16 seconds into the game to give the Rams a 7-0 lead.

''They knocked a few of our people down and Green ran very, very well,'' said Steeler Coach Chuck Noll. ''It was just one of those things. I think that put us in the spirit of things though. It may have woken us up.''

The Steelers tied the score 7-7 on their next possession on a 6-yard touchdown pass from Brister to Hoge. Brister rolled to his right and hit Hoge on the 8-yard line, and he ran into the end zone at 5:05 of the first quarter.

''It was important for us to get down and get a touchdown to get the momentum back,'' said Brister.

''It was a great game plan. (Offensive coordinator Joe Walton) coached us very well, getting us ready to play.''

Pittsburgh's David Johnson intercepted Jim Everett's pass and returned it down the left sideline 34 yards to the Ram 17 with 2:01 left in the first quarter. On the next play, Brister hit Eric Green in the left corner of the end zone with 1:56 remaining in the first quarter to give Pittsburgh a 14-7 lead. It was the first-round draft choice's sixth touchdown catch in 11 receptions.

''There was a penalty on the play and I knew it was coming back,'' Johnson said of his interception. ''I thought I would gamble if they threw the out route. If it was a different route, it would have been a TD, but called back.''

Lansford kicked a 32-yard field goal 45 seconds into the second quarter to cut the Pittsburgh lead to 14-10. The kick was set up by a 43-yard pass interference penalty against Thomas Everett on a pass from Jim Everett to Flipper Anderson that gave Los Angles a first down on the Steeler 23.

''That was a terrible football game for us,'' said Ram Coach John Robinson. ''We made about every error you can make in a game. We committed obvious, numerous dropped fumbles and pass interceptions. We gave the ball to them deep in our territory a number of times.

''Pittsburgh is a good football team and they played good, but we are self-destructing in all phases of the game.''

Anderson kicked a 42-yard field goal at 4:36 of the second quarter to boost Pittsburgh's lead to 17-10. Rod Woodson's 49-yard kickoff return to the Ram 39 set up the score.

The Steelers increased their lead to 20-10 on Anderson's 30-yard field goal on the first series of the third quarter. Woodson returned the kickoff 45 yards to the Ram 45 to set up Anderson's kick at 6:10.

''It was pretty obvious that we got our butts kicked pretty good by a pretty good football team,'' said Jim Everett. ''We made them look a lot better, but they're a fine football team.''

Hoge scored his second touchdown at 11:12 of the third quarter on a 1-yard run off right tackle. The Steelers took over the ball three plays earlier when punter Keith English was tackled by Stone at the Rams' 6.

''It's always fun when you are scoring touchdowns,'' said Hoge. ''I felt a lot of emotion out there tonight. It was really fun.

''When things are going bad the offense always gets the blame. We've had a few injuries, but now we are gettting a few people back and getting better and better.''

Brister completed his third touchdown pass of the game, an 8-yarder to Stone, seven seconds into the fourth quarter. Stone juggled the ball before falling into the end zone along the right sideline.

Brister threw his fourth TD pass and second to Hoge, a 2-yarder, with 2:42 left in the fourth quarter to increase Pittsburgh's lead to 41-10.

SEOUL, South Korea (OCT. 30) UPI - South Korea opened its embassy in Moscow

Tuesday and appointed Gong Ro-myung as its first ambassador to the Soviet Union, the Foreign Ministry said.

The South Korean Embassy began full operation based on a mutual agreement earlier this year to establish full diplomatic relations between the two countries.

Gong, 58, has served in various diplomatic posts both at home and abroad. His last assignment was as the consular officer at the South Korean trade office in Moscow.

The Soviet Union, an ally of North Korea, had no official ties with South Korea before the 1988 Seoul Summer Olympics. Informal relations expanded following the Olympic Games, leading to an accord for an exchange of trade offices in December 1989.

The two nations became closer following a meeting between Soviet leader Mikhail Gobachev and South Korean President Roh Tae-woo in San Francisco in June. The two governments finally agreed to open ambassadorial relations effective Sept. 30.

#90303u0203 10/30/1990 ~United Press International

TBILISI, Georgia, U.S.S.R. (OCT. 30) UPI - The pro-independence Round Table-Free Georgia bloc won a landslide victory that will sweep the the Communists from power in Georgia's first free elections in 70 years, Georgian television said Tuesday.

The television said that Round Table has received 70 percent of the votes in Sunday's elections, while the Communists had mustered 20 percent.

Georgian election commission chairman Irakli Zhordania said on Monday preliminary results showed the opposition group received roughly twice as many votes as the Communists. Another election official estimated Round Table with 60 percent of the vote.

''Nobody expected such a big advantage for Round Table,'' Zhordania said. ''Everywhere throughout Georgia, the advantage went to Round Table.''

Pre-election polls had shown the Communists polling 30 percent with Round Table second with 21.5 and the rest of the population undecided or favoring one of the other nine blocs participating.

Final official results were expected to be available in two days, but Zhordania said enough results were in to declare Round Table the clear winner.

''This was the first time we have had multiparty elections that expressed the true will of the people,'' Zhordania said. ''This moment can be considered one of the most decisive in the life our country.''

''I want to congratulate the Round Table and its leader Ziad Gamsakhurdia for their victory on behalf of the elction commision,'' Zhordania said. ''I hope they can fulfill all the ideas and promises for a better future of our country.''

Round Table has vowed to seek independence from Moscow, although officials from the party refuse to speculate on a timetable.

Gamsakhurdia, founder of the Georgia Helsinki Watch Group and imprisoned as a political dissident for two years under Leonid Brezhnev, is likely to be elected president of Georgia when the new 250-member parliament convenes.

The results vindicated the prediction of Gamsakhurdia, who said before the polls that his opposition bloc would gain a parliamentary majority if the vote counting was fair.

Monday night, a victory rally, held by several thousand Round Table supporters in front of the government building, closed Tbilisi's main Rustaveli Avenue.

After Gamsakhurdia spoke and the rally was breaking up, a man fired a starter's pistol with a blank, causing a brief panic, and the man who fired the dud pistol was seized.

Because of previous shootings connected with the campaign, the incident caused alarm. In the run-up to the elections, shots had been fired into candidate's homes.

On Friday, the leader of National Democratic Party Georgi Chanturia was wounded in the arm, and the assailant has not been caught.

#90303u0205 10/30/1990 ~United Press International
(OCT. 30) UPI - Around the world, around the clock, the latest news from U-P-I...

French hostages used by Iraqi leaders Saddam Hussein as human shields are back home in Paris. A Boeing 747 whisked more than 260 French citizens held in Iraq and Kuwait to the French capital, where they were greeted by friends and relatives bearing champagne.

Former President Reagan says he has lost a ''dear friend.'' William French Smith... who traveled to Washington with Reagan in 1981... died of cancer yesterday in Los Angeles at the age of 73. The ex-attorney general helped carry out Reagan's conservative agenda during his stint at the Justice Department.

One high school student in Charlestown, Indiana, says she and her classmates ''started crying'' after learning that another student had taken hostages at gunpoint. But the more than eight-hour ordeal ended yesterday with Eli Dean surrendering to police. The hostages were freed and NO shots were fired.

The United Auto Workers union is urging 67-thousand Chrysler employees to

report to work today, even though they don't have a contract. The U-A-W and Chrysler are still at the bargaining table in Highland, Michigan... negotiating past a midnight strike deadline, when a contract extension expired.

A report by Senate staff investigators says more information remains to be reviewed... but the available evidence says some Vietnam prisoners of war may still be alive. The report also states that American P-O-W's were held in Vietnam after the Pentagon said there were NONE.

A jury in Dallas will decide a more than 20-year-old dispute over who owns the .38 caliber pistol that killed Lee Harvey Oswald. A judge has ordered an attorney holding the gun that killed the Kennedy assassin to produce it and other items from the Jack Ruby estate for the opening of the trial today.

New York police are searching for a suspect in a fatal shooting on a Manhattan subway yesterday. Authorities say a retired police officer was shot and killed with his own gun after he tried to stop a robbery. The would-be robber fled after shooting the officer in the eye.

Nelson Mandela is asking Japan for financial help in educating young South African blacks. The black nationalist leader made his appeal to Japan's parliament as he continues a fund-raising swing through Asia. Mandela will meet with opposition party members and labor leaders in Tokyo.

-30- 2581

#90303u0248 10/30/1990 ~United Press International

BANGKOK, Thailand (OCT. 30) UPI - Vietnam has accepted a U.S. proposal to station a permanent U.S. representative in Hanoi for the first time to deal with efforts to account for Americans still missing in action from the Vietnam War, Vietnamese Foreign Minister Nguyen Co Thach said Tuesday.

Thach also dismissed a Senate report that there was evidence Americans were still be held captive in Iraq.

He said retired Army general John Vessey, who is special presidential representative on MIAs, made the proposal during a meeting in Washington on Oct. 17.

''I accepted immediately,'' Thach told a small group of reporters at Bangkok airport.

''He will be the representative of the special envoy of the president of the United States. So you could not say it is a private arrangement,'' he said.

It would be the first time the United States has had a such a full- time representative in communist Vietnam.

He said he did not know when the representative would arrive, but that Vietnam was already arranging for housing.

U.S. military teams have visited Vietnam repeatedly for joint efforts to account for the 1,677 Americans still listed as missing in action in Vietnam.

But he said the agreement on the MIA representative and his first visit to Washington were signs of progress in relations with the United States.

Thach reacted with a chuckle to an interim report issued Monday by the Republican staff of the Senate Foreign Relations Committee which said there was evidence that Americans may still be held against their will in Vietnam.

''It is clear that this is totally false,'' Thach said.

''If any American who has information on living Americans or the remains of MIAs they can come to Vietnam and have all the facilities to go directly to the spot, but they must pay their expenses,'' he said.

He said such Americans should first go through U.S. channels, but if they insisted on a private visit it would be allowed.

Thach said he has issued this challenge to Americans who contend there are still live American prisoners in Vietnam before, but no one has taken him up on the offer.

He also disputed reports that the Vietnamese government was stockpiling the remains of missing Americans.

''Yes, there is storage of American remains, but it is not a government warehouse,'' he said.

He said more than 700 remains have been recovered from private Vietnamese traders attempting to use them to obtain rewards or visas from the U.S. government.

American forensic teams have investigated nearly 300 of the remains and concluded that none of the remains were American, he said.

''I am very annoyed with this barbarous trade, (but) it is a bonus of the former U.S. propaganda about MIAs,'' he said.

Thach said his visit to Washington and his talks with Secretary of State James Baker in mid-October were signs of progress in U.S.- Vietnamese relations.

He declined to speculate when the United States would end its economic embargo against Vietnam, but said pressure was rising from the private business community.

''Since the crisis in the Gulf, the smell of oil in Vietnnam has been detected from very far away,'' he said.

Vietnam has already discovered two major offshore oilfields now being exploited by a Soviet-Vietnamese joint venture and it has signed contracts with eight foreign oil firms for further exploration.

Thach said U.S., Japanese and Thai oil companies were interested in winning exploration rights.

#90303u0250 10/30/1990 ~United Press International

STUTTGART, Germany (OCT. 30) UPI - A U.S. Army helicopter hit a high tension wire and crashed in southern Germany killing the two crew aboard, a military spokesman said Tuesday.

He identified the victims as Chief Warrant Officers Clarence E. Hall, 24, of Coeburn, Va., and John A. Wilkinson, 32, of Colinga, Calif.

Both were attached to the 11th Aviation Brigade.

He said the helicopter apparently hit a high tension wire before crashing to the ground Monday night. U.S. military officials were investigating the crash.

The spokesman said the chopper, an AH-64 Apache, was on a routine training flight when it crashed near the southern German town of Erlangen.

(OCT. 30) UPI - Cool fall weather chilled the eastern half of the country Tuesday as clear skies covered much of the nation and showers soaked the Northwest.

Temperatures dipped below freezing for the first time this season in many parts of the Middle Atlantic states, New England and the Midwest and frost warnings were posted in several states.

A huge high pressure system covering the region brought the cold weather, but temperatures began to warm and winds shifted to the southwest.

A frost warning was in effect for Piedmont, S.C. and scattered frost was expected in the midlands and northwest parts of the state.

The Pacific Northwest continued to play host to the nation's worst weather, this time with showers and winds reaching 25 mph and lows in the mid 40s. The rain was expected to continue through the day.

Dense fog blanketed the Southern California coast for the second day in a row Tuesday, cutting visibility to near zero in San Diego.

Fog also covered southern Texas, where visibility was a half mile in Kingsville and was limited all along the coast bend.

Clear skies extended from the Plains, where Iowa had temperatures in the 50s and winds of 10 to 15 mph, to New England, where highs in Boston only were expected in the 50s.

#90303u0398 10/30/1990 ~United Press International

MANILA, Philippines (OCT. 30) UPI - President Corazon Aquino said Tuesday she will not seek re-election in June 1992.

''No, I'm not,'' Aquino snapped when asked during a news conference with foreign reporters if she would run again at the end of her six-year term.

A presidential fact-finding panel which looked into a series of coup attempts reported earlier this month one of the causes of political instability in the republic was Aquino's failure to state categorically her political plans.

Aquino also rejected proposals by the political opposition for amnesty for leaders of recent coup attempts and said any amnesty must be based on justice.

However, she said she was willing to consider clemency for those who were ''hoodwinked'' into joining the rebellions.

Meanwhile, police detonated a bomb concealed in a plastic bag delivered by a boy to a company associated with Aquino's Trade Secretary Jose Concepcion, who is facing corruption charges. Concepcion's offices have been the target of several bomb attacks blamed on rebel soldiers.

Aquino also said she favored a new relationship with the United States that would not only focus on its military presence in the country but other aspects as well.

Aquino, 57, the housewife who was swept to power in a civilian-backed military revolt in February 1986, had on a number of occasions announced she would not run again.

However, speculation persists that while Aquino, who has crushed seven military rebellions, has no intention of seeking another term she may yield to pressure from her family and close advisers and stand again.

She also has on several occasions fueled speculation on her political plans.

Once, she said her lawyers had told her the constitution does not bar her from seeking another term.

On another occasion, she stated she was encouraging speculation about her political future after critics said being a lame duck was one of the burdens of her presidency.

Asked when she will officially declare if she is or is not going to be a candidate, Aquino said, ''The fact that I have never declared that I will run - I think we should leave it at that.''

She declined to name her most likely successors. She said there were six or seven names prominently mentioned.

''I will not be stupid to name three and get the other four running after me. I have enough problems as it is. I will just wait for the opportune time when we know for sure who are the candidates,'' Aquino said.

She said she did not wish to suggest the main issues in the coming polls to the potential candidates.

''In the same way that I have this thing about unsolicited advice, I guess some of them will also be thinking that way.

''But if I am asked, certainly, and I like the candidate, I will not only give suggestions, but I will really be helping in the campaign,'' Aquino said.

#90303u0422 10/30/1990 ~United Press International

TOKYO (OCT. 30) UPI - Japanese manufacturing companies shipped $2.17 trillion worth of goods in 1989, up 8.9 percent over the preceding year and the highest year-on-year increase since 1980, the Ministry of International Trade and Industry reported Tuesday.

A 16.7 percent increase was recorded in 1980, the ministry said.

The ministry said investments in plant and equipment by manufacturers with 30 or more employees surged 23.6 percent to $111 billion, the largest growth since 1970 when investment rose 23.8 percent over the preceding year.

Aichi Prefecture, a state in central western Japan where Japan's top automaker Toyota Motor Corp. is based, posted the largest amount of manufacturing shipments with $258.7 billion worth of products, the ministry said.

-30- 964

#90303u0444 10/30/1990 ~United Press International

TOKYO (OCT. 30) UPI - NEC Corp. said Tuesday it would invest $620 million to build a factory for manufacturing 16-megabit dynamic access memory chips, the next generation of computer storage devices.

The company said the facility, to be built at its subsidiary in Japan's southernmost main island of Kyushu, is scheduled to start operation in the summer of 1992.

The new plant will manufacture 4 million units a month when production is a top capacity, NEC said.

''Our decision is aimed at meeting future growth in demand for large- scale memory chips,'' a spokesman for the company said.

The spokesman said NEC plans to start sample shipments early next year. Other major electronics firms such as Hitachi, Toshiba and Mitsubishi Electric have announced decisions to manufacture 16 megabit DRAMs. They plan to start sample shipments toward the end of this year or early next year.

#90303u0459 10/30/1990 ~United Press International

CHARLESTOWN, Ind. (OCT. 30) UPI - A teenager suspended from school took a teacher and about 15 students hostage at gunpoint in a high school classroom, gradually releasing his captives until the standoff ended more than eight hours later.

The suspect, Eli Dean, who had been suspended twice in the past two weeks, did not fire a shot during the siege Monday and no injuries were reported.

Dean, 17 released his final hostage - his cousin, Jason Dean - as he surrendered to the Indiana State Police. At one point about seven hours into the standoff he released two hostages in exchange for pizza, authorities said.

''Jason told us he was staying there for Eli's safety. He was worried about Eli,'' said Sgt. John Mann of the state police, one of the officers who negotiated with Eli Dean.

Dean was distraught because of being suspended from classes but made no specific demands during the siege, said ISP Sgt. Marvin Jenkins. He reportedly went to the school to speak to Melody Money, described by another student as his favorite teacher.

Police said Dean walked into her classroom at 11:10 a.m. and displayed a handgun in front of Money and about 15 students.

''I'm not going to hurt nobody. I just want to get drunk,'' he told them, according to student Sarah Burchett. He had a fifth of whiskey with him, she

said.

Dean agreed to let some of the students leave the room immediately but six of them and the teacher were detained.

Around 2 p.m., freshman Stacy Medelli was allowed to leave and the teacher was permitted to leave a short time later.

Eventually, four more students were allowed to depart, leaving Dean with just one hostage before the standoff ended around 7:30 p.m.

''We felt there was a serious threat to everybody. He threatened suicide throughout the day,'' Mann said.

Dean was suspended once for triggering a fire alarm and a second time for breaking a window.

''I guess it upset him,'' said classmate Amanda Garr.

''Everybody accused him of being a bad guy and he kind of got fed up with it. I guess he was going to show them how bad he couuld really be,'' said Brandy Gregory, an area student who spoke with one of the released hostages.

Still, Garr said she and other students were stunned that Dean would create a hostage situation.

''Eli, to me, is the best guy anybody could ever ask for,'' she said. ''Something got in him and he's gone crazy about it. He's a very good guy. He wouldn't hurt anybody.''

Garr said she and other students at first thought a bomb threat had been called when the rest of the school's 643 students were told to leave the building and assemble in the football field.

''We found out it was Eli and everybody started crying,'' she said.

Police said Dean apparently had confidence in Money because she had counseled him over previous problems he had at home.

The youth's parents and stepfather, Rocky Williams, were called to the school to help police negotiators.

Williams said he believes Dean took his .44-caliber revolver from their home.

Dean's father, Robin Dean, is a weighmaster for the Indiana State Police.

All other personnel in the school were evacuated while a SWAT team moved into place and state police negotiators made contact with Dean and the evacuated

students were sent home for the day.

#90303u0470 10/30/1990 ~United Press International
(OCT. 30) UPI - Vietnam's foreign minister says his nation has accepted a U-S proposal to station a permanent American representative in Hanoi to deal with efforts to account for Americans still missing in action from the Vietnam War. It would be the first time the United States has had such a full-time representative in communist Vietnam.

Senate staff investigators issued a report yesterday that said American prisoners of war were held in Vietnam after the Pentagon said there were NONE, and some probably are still alive. The report said ''The information available to the U-S government does NOT rule out the probability that U-S citizens are still being held in Southeast Asia.''

Police in Beirut say the deputy director of a pro-Syrian weekly magazine was wounded last night in an attack outide his apartment house in the mainly Moslem sector of Beirut. Gunmen opened fire and shot the man in the chest. A statement by the magazine said the attack was aimed at undermining present Syrian-backed government efforts to restore law and order.

Authorities in Manila say at least two people were killed and others are missing after a concrete bridge collapsed today and dumped eight vehicles into the water. Police said rescuers are searching for the commuters following the cracking and collapse of the right lane of the Sevilla bridge. Authorities said a heavy corn truck may have caused the bridge to crack.

Officials in the Soviet republic of Georgia say the pro-independence Round Table-Free Georgia bloc won a landslide victory in weekend elections. The election results will oust the communists in Georgia's first free elections in 70 years. A television report said that Round Table received 70 percent of the votes in Sunday's elections, while the Communists got only 20 percent.

The Food and Drug Administration wants to ban 111 ingredients in NON-prescription diet drugs. The F-D-A says manufacturers of those ingredients failed to submit data to show that the ingredients worked. The F-D-A's proposed rule changes will be published today in the Federal Register and will be followed by a 60-day comment period.

#90303u0509 10/30/1990 ~United Press International
WEST HOLLYWOOD, CA (OCT. 30) UPI - Axl Rose, lead singer for the heavy metal band Guns 'N Roses, was arrested early Tuesday for allegedly bashing a neighbor woman over the head with a wine bottle, authorities said.

The altercation occurred at the condominium building where they both live, sheriff's Deputy John Ashley said.

Gabriela Kantor, 37, was returning to her condo when Rose confronted her in a hallway, Ashley said.

''Words were exchanged between the two of them,'' he said. ''Rose took Kantor's keys away from her and threw them off the 12th floor to the ground below.''

''Rose then took a bottle of wine away from Kantor and emptied the contents (onto the floor) and then hit her over the head with the bottle,'' Ashley said.

Kantor was taken to Cedars-Sinai Medical Center, where she was treated for a concussion and was held for observation, Ashley said.

Rose was arrested inside his condo and booked at the West Hollywood sheriff's station on suspicion of assault with a deadly weapon. Bail was set at $5,000.

Ashley said Kantor and Rose have been involved in an on-going dispute over the past few months about the loud music she claimed he was playing.

''Apparently the source of this is (that) Rose knows that she has been the source of deputies coming to the location on prior occasions,'' Ashley said.

#90303u0558 10/30/1990 ~United Press International

DETROIT (OCT. 30) UPI - City officials imposed a curfew and mobilized more than 35,000 volunteers and nearly 3,500 block clubs in hopes of stifling Detroit's traditional Devil's Night arson spree Tuesday night.

In the past decade, the night before Halloween has become an excuse for firebugs to go on a rampage, torching abandoned houses, parked cars and trash bins. Many fires have spread to occupied homes.

This year, Mayor Coleman A. Young and city workers have launched their most aggressive anti-arson campaign. In addition to the army of volunteers, seven special Fire Department command stations will be set up.

Department of Public Works crews have razed more than 600 abandoned buildings in the past several weeks and the Police Department has towed abandoned cars that might attract arsonists.

A 6 p.m.-to-6 a.m. curfew began Monday for unescorted youths under 18. As of 10 p.m. Monday, 113 people had been arrested on curfew violation charges, compared to 136 for the same period last year. The curfew ends at 6 a.m. Thursday.

Detroit's Devil's Night mobilization, now in its sixth year, has had an impact. Fires have dropped 72 percent since the peak in 1984, when a record 810 fires burned over the three-day Halloween period. Last year, there were 223 fires over three days.

''We hope that the period will come in the not-too-far future when the Halloween period will be looked upon as any other period - and it will not be necessary to take unusual steps,'' Young said. ''But until that day comes, we will do whatever we have to do to keep it under control.''

Alarmed by the international publicity over Devil's Night, Young carefully controls access to arson statistics. No official figures are released until several days after Halloween - and those figures come from the mayor's office.

Traditionally, the areas hit hardest by Devil's Night arsonists are the older, poorer sections of the city with closely packed wooden houses pockmarked by vacant buildings and crack houses. Many sections of the city, however, remain virtually untouched.

#90303u0587 10/30/1990 ~United Press International

EDEN PRAIRIE, MN (OCT. 30) UPI - The Minnesota Vikings board of directors passed a resolution Monday that Roger Headrick will be elected president and chief executive officer of the club effective Jan. 1

Wheelock Whitney will relinquish his post as president. Headrick's selection is subject to the development of an agreement satisfactory to Headrick and the board, the club said in a statement.

Mike Lynn, executive vice president and general manager of the Vikings, will continue to serve in that capacity until the end of the year and will work with Headrick in acquainting him with the club's operations, the team said.

Lynn said he give up his title of general manager at the end of the year but would retain the title of executive vice president. Lynn is leaving the team to head the new World League of American Football.

''After Jan. 1, my priorities will change,'' Lynn said in the statement released by the club. ''Between now and the, I will be dividing my time between the Vikings and the World League. And I will be working with Roger to achieve what we all want, the successful operation of the Vikings and a smooth management transition.''

Headrick, 54, has worked for several large companies in the Twin Cities in the past, and most recently was the chief financial officer of Pillsbury.

Headrick admits he does not have much experience with sports franchises... but says ''The Vikings have a tradition of success and my job will be to carry on that tradition.''

''A number of clubs in the National Football League have structures similar to what we are planning here,'' Whitney said, ''and, in fact, this is the way the Vikings were structured at one time. I have been serving as a part-time president of this corporation and what we are talking about now is a full-time job. I simply do not have the time to spend the hours that are necessary to serve in this position. In my opinion and the opinion of the officers of this corporation, Roger Headrick is the right man for the job.''

Headrick's appointment on a 6-3 vote by the board follows a recent announcement by NFL Commissioner Paul Tagliabue that he will resolve an ownership dispute over the club. A faction led by Whitney and Lynn is fighting for control against a faction led by Minnesota Twins owner Carl Pohlad and businessman Irwin Jacobs.

#90303u0591 10/30/1990 ~United Press International

(OCT. 30) UPI - Price on the Tokyo Stock Exchange closed lower Tuesday in light trading in the absence of fresh market-affecting news.

The key Nikkei Average of 225 selected issues, which gained 323.67 points Monday, slipped 86.91 points to 25,242.40.

The broader-based Tokyo Stock Exchange Price Index of all listed major issues lost 10.83 points to 1,865.24.

Trading was slow with turnover estimated at 400 million shares, down from 526 million shares Monday.

Declines outpaced advances 611 to 338, while 162 issues remained unchanged.

Analysts said most professional investors stayed on the sidelines in the absence of fresh news on the Middle East situation.

''The market was due for some technical easing, but there were still a lot of investors buying on the downside,'' Yoko Kamiki a trader at Daiwa Securities Co. said.

''The market seems stronger than it should be,'' Kamiki added.

Analysts explained local investors were discouraged by the Japanese yen's sharp fall against the dollar in Tokyo.

On the Tokyo Foreign Exchange, the U.S. dollar soared against the Japanese yen

despite a Federal Reserve decision to cut short-term interest rate.

The dollar closed at 129.00 yen, jumping 1.65 yen from Monday's close of 127.35 yen, the Bank of Japan reported.

On the trading floor, constructions were generally lower. Steels, shipbuildings and high-tech issues also weakened along with energy- related issues.

Rubbers, chemicals and nonferrous metals closed higher.

Elsewhere in Asia, stocks fell sharply in light trading on the Hong Kong Stock Exchange, hammered by a lower-than-expected close on Wall Street and renewed pessimism over the Gulf crisis.

The Hang Seng Index, which gained 12.65 points Monday, plunged 51.88 points or 1.7 percent, to 3,011.65.

Among the narrower indexes, financials lost 14.35 points, industrials shed 46.71, utilities plunged 88.38 and properties dropped 86.63 points.

Volume amounted to around an estimated 859.6 million shares, compared with 1.09 billion shares changing hands Monday.

Analysts said an expected rally on Wall Street over the passing of a U.S. deficit-reducing budget failed to materialize, sending issues tumbling.

''Wall Street did not do well and that had a lot to do with the sentiment in Hong Kong turning entirely to the bear's side,'' said Herman Lam of Asia Equitites.

''The hopeful peace seems to have evaporated in the Gulf and that hurt the market as well,'' Lam said.

In Singapore, stocks dipped in light trading on the Singapore Stock Exchange following the lower closing in Tokyo and the continuing stalemate in the Persian Gulf.

The Straits Times Industrial Index, which gained 2.12 points Monday, fell 12.28 points to 1,164.83. The broader-based All Singapore Index fell 2.53 points to 324.21.

Volume amounted to around an estimated 27.4 million shares, compared with 39.2 million shares changing hands Monday.

Trading remained quiet as many local investors were less willing to take up big positions due to uncertainty in the Middle East, analysts said.

Market watchers explained said the market was overbought and is likely to consolidate further before attempting to break the 1,200 resistance level on the Straits Times Index.

On the trading floor, the foreign and local shares of Singapore Airlines plunged 80 cents and 20 cents to $13.20 and $10 respectively after the national carrier announced a lower interim profit and a gloomy forecast for the full year.

Other losers included, UOB foreign shares easing 50 cents to $5.50 and Shangri-la slipping 35 cents to $5.50.

Gainers included, DBS added 20 cents to $9.50, CI Holdings gained 15 cents to $2.48 and Far East Shipping added 15 cents to $6.20.

#90303u0608 10/30/1990 ~United Press International

NEW YORK (OCT. 30) UPI - The New York Daily News began hiring replacements for Newspaper Guild writers and editors who have gone out on strike, newspaper officials said.

Several New York and New Jersey journalists who had placed their resumes on file at the News said they had received job offers from the newspaper on Monday. The offers all apparently were on the condition that the journalists, who asked not to be identified, report to the News by the end of this week.

Asked late Monday if the newspaper was hiring replacement editors and reporters, News spokeswoman Lisa Robinson said the publication was ''in the process of replacing all workers who are members of striking unions.''

''Last week union members exercised their right to strike. This week we at the paper are exercising our legal right to replace all the strikers,'' Robinson said.

Striking News workers continued early Tuesday to rally outside a Brooklyn printing plant, where a protest last Thursday grew into a full- blown and sometimes violent strike over a contract agreement.

All trade unions employed at the paper, except the printers union, have joined the job action.

Since Friday the paper has been put out by management members who have written some of the copy themselves, while relying heavily on wire service reports.

Mayor David Dinkins met with George McDonald, head of the Allied Printing Trades Council, the umbrella group for the striking unions, at Grace Mansion Monday evening.

The mayor also invited News publisher James Hoge to the meeting but Hoge had declined to meet with the unions.

Following the meeting, Robinson late Monday said, ''We're hopeful that they mayor's meeting with union leadership was productive and that he prevailed on

the unions to stop the violence, vandalism and intimidation of those newstand operators who make their living selling the Daily News.''

Police said 21 striking News workers have been arrested since the walkout was first declared Thursday. The bitter confrontation has seen delivery trucks firebombed and scores of replacement workers pelted with bottles, stones and eggs.

The strike brought to a boil a simmering dispute that began 10 months ago when the Tribune Co. of Chicago, which owns the News, opened contract talks vowing to seek millions of dollars in cost reductions and impose sweeping control of hours and working conditions.

#90303u0630 10/30/1990 ~United Press International

DALLAS (OCT. 30) UPI - The World Methodist Council has announced that its 1990 Peace Award will go to Soviet President Mikhail Gorbachev, the winner of this year's Nobel Peace Prize.

The Rev. Joe Hale, chief executive of the 500-member council, announced the award on Monday in the United Methodist Reporter published in Dallas. He said Gorbachev had agreed to accept the honor.

''Mr. Gorbachev does not profess to be a Christian but since the late 1980s, and especially since the Millenium Celebration of the Conversion of Russia in 1988, he has taken steps to free churches in the U.S.S.R. from oppressive laws that have prohibited the full expression of Christian witness and deprived the church of land and properties,'' the award announcement said.

Gorbachev is the 11th person to receive the World Methodist Peace Award. Others include Egyptian President Anwar Sadat in 1978, South African Methodist leader Abel Hendricks in 1979 and former President Jimmy Carter in 1985.

The award was created in 1976 to recognize individuals pursuring peace and reconciliation between people and nations.

The council represents 64 Methodist denomiantions worldwide.

#90303u0656 10/30/1990 ~United Press International

(OCT. 30) UPI - A boiler explosion aboard the U-S-S Iwo Jima in the Persian Gulf killed at least six American sailors today. At least four others were injured. A Navy spokesman said the ship was scheduled to be taking part in amphibious exercises at the time of the accident. Navy spokesman Lieutenant Commander Alan Dooley said the 602-foot-long amphibious assault ship was being towed back to port in Manama after the engines were shut down as a precaution. He said the wounded sailors all suffered ''steam burns'' and were taken by helicopter to a hospital ship.

U-S military officials are investigating the crash of an Army helicopter that killed two crewmen in southern Germany last night. A military spokesman says the helicopter hit a high tension wire and crashed near the town of Erlangen.

More than 260 French hostages held in Iraq and Kuwait were flown to Paris last night. Before the freed hostages arrived, the French government announced that it would comply with an Iraqi request to send medicine to Baghdad aboard the plane that carried the hostages to freedom.

Iraqi Airways says one of its freight aircraft is tentatively scheduled to land in Geneva on Thursday to pick up a a shipment of medicines. The Swiss government announced yesterday that it would allow the flight because medicines are humanitarian supplies permitted under United Nations sanctions.

Authorities in West Hollywood, California, say Axl Rose, the lead singer for the heavy metal band Guns 'n Roses, has been arrested after he reportedly hit a neighbor woman over the head with a wine bottle early today. A police spokesman said the woman and Rose have been involved in an on-going dispute during the past few months about the loud music she claimed he was playing.

Television reports in the Soviet Georgian republic are telling of a big victory for the opposition and a big loss for communists in Sunday's elections. The pro-independence Round Table-Free Georgia bloc reportedly received 70 percent of the vote to 20 percent for the Communists.

Former Attorney General William French Smith died yesterday of cancer at the age of 73. Smith resigned as attorney general in January 1984, but his departure was delayed for months while a special prosecutor investigated Edwin Meese after allegations that Meese received financial help from friends who got government jobs. Meese eventually was cleared.

Philippine President Corazon Aquino said at a news conference today that she will NOT seek another term when her six years in office expire in June 1992. However, there is speculation that Aquino may eventually give in to pressure from her family and close advisers to run again.

Authorities in Seoul, South Korea, say 40 people were arrested and about 150

others are being sought for forming an underground leftist organization planning armed uprisings. The Korean version of the C-I-A says the group tried to organize more than 16-hundred students, workers, farmers, politicians and other activists into a nationwide network.

VATICAN CITY (OCT. 30) UPI - American Archbishop Paul Marcinkus, central figure in a Vatican Bank scandal that rocked the Catholic Church in the early 1980s, has resigned from Vatican service after 40 years, the Vatican announced Tuesday.

The brief Vatican announcement said Pope John Paul II had accepted the resignation of Marcinkus as head of the Pontifical Commission for the Vatican City State, the job he has held since he was replaced as president of the Vatican bank in June, 1989.

Apparently reflecting the pope's reluctance to see Marcinkus go, the announcement said Marcinkus presented his resignation ''insistently'' and would remain a ''consultant'' of the same Pontifical Commission.

Marcinkus, 68, said he planned to return to the United States to work as a simple parish priest in his native Chicago archdiocese.

''I am very grateful to the Holy Father for having granted my request to retire from Vatican service and return to the United States,'' he said.

The towering son of Lithuanian parents, born in the Chicago suburb of Cicero, Ill. on Jan. 15, 1922, Marcinkus had served in various Vatican posts for 40 years. He was president of the Vatican bank - formally known as the Institute for Religious Works (IOR) - from 1971 until June 1989, when the Vatican appointed a five-man Supervising Council to head the bank.

The scandal linked with his name erupted in 1982 when the Milan-based Banco Ambrosiano, then Italy's largest private bank, collapsed with debts of $1.287 billion.

Italian investigators accused Marcinkus of being partly responsible for the crash because of his close banking ties with Ambrosiano President Roberto Calvi. Calvi fled to London, where he was found hanging by the neck under a Thames river bridge in September 1982.

A coroner's court first ruled Calvi's death was suicide, but after a second hearing it returned an open verdict, leaving open the possibility that Calvi was murdered.

Milan magistrates issued arrest warrants against Marcinkus and two other

Vatican bank directors, charging them with ''complicity in fradulent bankruptcy.'' But the Vatican refused to hand them over and later Italy's top appeals court and its Constitutional Court ruled that Italian legal authorities had no jurisdiction over the sovereign Vatican City State.

The pope showed his confidence in Marcinkus, who formerly acted as a bodyguard on papal trips, by maintaining him as bank president until the bank was reformed in 1989.

The Vatican always denied any wrongdoing in connection with the Banco Ambrosiano collapse. But in 1984 it paid $240.9 million to Ambrosiano creditors as a ''goodwill gesture.''

In a magazine interview at the time, Marcinkus said he told Vatican officials: ''You are crazy. If we are not guilty we should not pay.''

''I have nothing to be ashamed of in what I have done,'' Marcinkus told the magazine. ''I could be ashamed of one thing, and that is to have perhaps had too much faith in Roberto Calvi. But that was not difficult because Calvi had an excellent reputation in the banking community.''

#90303u0694 10/30/1990 ~United Press International

ST. LOUIS (OCT. 30) UPI - Scientists have detected a new abnormality in the brains of suicide victims, a discovery that may lead to better ways of identifying and treating suicide-prone people, it was reported Tuesday.

Researchers from New York University and Israel's Weizmann Institute of Science compared the brain chemistry of 12 people who committed suicide and were not on psychiatric drugs with 12 people who died of other causes.

Researchers found suicide victims' brain cells had between two and nine times the number of protein structures called mu opioid receptors as other people's brain cells. The biggest difference was seen in areas of the brain involved with sensory and motor function.

The people who killed themselves also had 50 percent less of another type of opioid receptor, called delta, in several brain regions, including the area that governs memory.

No differences were found between the two groups for another type of opioid receptor involved in pain perception, called kappa.

''We may be able to find a whole new family of drugs that act on these receptors, help treat depression and prevent suicide,'' said Anat Biegon, a neurobiologist at New York University and co-author of the study.

However, Biegon emphasized it is still not known if living people who attempt suicide or non-suicidal depressed people have opioid receptor imbalances similar to suicide victims'. Another unanswered question is whether the unsual distribution of receptors stems from too high or too low levels of opioids in the brain.

Past studies have linked suicide only to changes involving the brain chemicals serotonin and norepinephrine. But the new study, presented at the Society for Neuroscience's annual meeting, is the first to associate changes in the opioid system with suicide.

Opioids, which are naturally occuring chemicals in the body, induce pain-killing and euphoria-producing effects similar to opium-based drugs like heroin and morphine.

Doctors previously had observed that severely depressed patients experience a reduced ability to experience pleasure and are more likely to suffer from chronic pain than non-depressed people.

Changes in opioid-binding receptors in the brains of living people now can be mapped by sophisticated imaging techinques like positron emission tomography, or PET, Biegon said.

If the findings in dead people hold up in living patients, it is possible PET could be used to detect which depressed people are most likely to kill themselves. There presently are no reliable biochemical markers to help psychiatrists determine which patients are at greatest risk for suicide.

In contrast to the opioid system, there is currently no good way of tracking norepinephrine activity and only limited means of tracking serotonin activity in the brains of living people, Biegon noted.

''I hope this gets people interested in new directions for research that may in time result in clinical interventions,'' the scientist said. ''The opioid system has not received a lot of attention in suicide.''

BONN, GERMANY (OCT. 30) UPI - Parliament ratified two treaties Tuesday settling the withdrawal of 380,000 Soviet troops from former East German territory and Germany's contribution to the removal costs.

Foreign Minister Hans-Dietrich Genscher said the treaties set a new beginning for German-Soviet relations.

Soviet and German government officials agreed that Germany will pay $7.6 billion for withdrawing by 1994 the 380,000 Soviet soldiers stationed in what

used to be East Germany.

The bilateral agreement over the costs of the withdrawal, signed Oct. 9, six days after German unification, also includes a $2 billion loan to the Soviet Union that will carry no interest for five years.

The second agreement, signed Oct. 12, settles the details of the removal of the troops and sets conditions under which the soldiers and their families will live until they return home.

German legislators ratified both treaties by an overwhelming majority.

Genscher stressed that the Soviet troops are not occupational forces and have to respect German law.

He said the German government wants the Soviet authorities to stop executing sentences, especially the death penalty, against Soviet military personnel on German soil. Germany does not have the death penalty.

Genscher appealed to people to help the 600,000 Soviet civilians and soldiers in eastern Germany adapt to the new situation.

''Let us help them to find their way in this order foreign to them,'' he said.

BANGKOK, THAILAND (OCT. 30) UPI - Thailand has begun preparing office space, staging areas, airbases and transport routes for the estimated 20,000- man U.N. force to be dispatched to Cambodia once a peace accord is reached, a Thai military spokesman said Tuesday.

But more stiff fighting in Cambodia is expected before a settlement can be worked out, said Lt. Gen. Naruedon Dejpradiyuth, the director of information for the Thai Supreme Command.

''The supreme commander has instructed the military to prepare operational locations for the U.N. officials who will be working in Cambodia after a cease-fire,'' Naruedon told reporters at a briefing.

He said he expected that 20,000 U.N. officials including a 10,000-man peacekeeping force, would arrive in Thailand early next year en route to Cambodia.

''They will use Thailand as a transit point to Cambodia,'' Naruedon said.

He said Thailand will allow the U.N. officials to use two military airports near the Thai-Cambodian border.

Naruedon said Thailand will provide office space and accommodation for the U.N. officials in military areas near the border.

''We just want to be ready, but if the Cambodians fail to settle their differences, they will carry on fighting,'' he said.

''Everyone wants to see peace in Cambodia but it depends whether the Cambodians want it or not.''

Naruedon said Thai intelligence reports indicated that the Vietnamese-backed Cambodian government and the three-party resistance have stepped up military preparations for fierce fighting during the dry season that starts about mid-November.

''They (the four factions) have adjusted their bases, mobilized and reinforced their troops,'' he said. ''The resistance also used seized tanks in the fighting.''

The three-party resistance is spearheaded by the radical Khmer Rouge, who were ousted from power by Vietnam's invasion of Cambodia in late 1978.

#90303u0752 10/30/1990 ~United Press International

WASHINGTON (OCT. 30) UPI - Sales of new single-family homes declined 21 percent in September to an annual rate of 503,000 units from 638,000 units in the year-earlier period, the Commerce Department said Tuesday.

During the first nine months of the year, sales fell 15 percent to an annual rate of 435,000 new homes, compared with 512,000 units for the same period the year before.

The department said the median sales price of new homes was $115,000 in September while the average price was $142,3000.

At the end of September, the seasonally adjusted estimates of new houses for sale was 337,000, or an 8.4 month supply.

Sales were down in all regions of the nation, with the greatest monthly decline posted in the beleaguered Northeast. Home sales in that region fell 15.6 percent from August to September and were 12 percent below year-ago levels.

Western real estate markets appeared to offer the greatest monthly resistence to weakness. New home sales fell only 0.7 percent in the West from August to September but were down a sharp 36.4 percent from year- ago levels.

Sales of new homes in the South declined 7.8 percent from August to September and were down 14.2 percent from year-ago levels. Midwestern new home sales dipped 2.1 percent during the month and were down 10.7 percent from year-ago levels.

The sales slowdown is taking its toll on housing prices. The median sales price for a new home declined 2.8 percent during September to $115,000 from $118,400 in August.

The average sales price fell 1.6 percent to $142,300 from $144,600 in August, the department said.

#90303u0763 10/30/1990 ~United Press International

DETROIT (OCT. 30) UPI - Ford Motor Co., burdened by costly buyer incentives, new product costs and losses in both its domestic and overseas automotive operations, Tuesday reported third-quarter net income of $101.7 million, or 22 cents a share, down sharply from $477 million, or $1.03 a share, in the year-ago quarter.

But the latest results by the nation's second largest automaker were bolstered by a standard accounting change that revised the useful lives of properties, retroactive to Jan. 1. Without that change, Ford would have earned only $14.8 million, or 3 cents a share, in the latest quarter.

In the United States alone, Ford lost $17 million on its automotive business, excluding that same accounting change regarding certain fixed assets. That compared with a $37 million loss on its U.S. automotive operations in the year-ago quarter.

Outside the United States, Ford posted an $89 million loss excluding the accounting change, vs. a $324 million profit a year ago. The automaker blamed the losses on higher product costs and lower production in Europe, as well as economic woes in Brazil.

Those results caused Ford's after-tax return on sales to amount to a 0.2 percent loss, vs. 1.8 percent in the year ago quarter.

Ford also posted a reduction in earnings at its Financial Services Group, with profits slipping to $141 million, or 30 cents a share. But the reduction was due to a $69 million increase in loan-loss reserves at its First Nationwide subsidiary to cover projected losses in real estate values.

Ford's cash and marketable securities during the third quarter declined to $4.63 billion from nearly $5.8 billion as of Sept. 30, 1989.

Worldwide revenues totaled $23 billion, compared with $20.2 billion in the

1989 third quarter.

For the nine-month period ended Sept. 30, Ford's net income amounted to $1.3 billion, or $2.80 a share, including the third quarter accounting change, down from $3.52 billion, or $7.51 a share, during the first nine months of 1989.

Worldwide nine-month sales were $75.5 billion, compared with $72 billion a year ago.

Ford is the second of the nation's Big Three automakers to report third quarter results.

Monday, Chrysler Corp. posted a third-quarter loss of $214 million, or 95 cents a share, citing the high costs of rebates, a sluggish economy, and over 56,000 units of lost minivan production as it changed over to an all-new model.

It was Chrysler's second quarterly loss since 1982, comparing with a profit of $22 million or 10 cents a share during the 1989 third quarter not counting a $309 million gain from the sale of Mitsubishi stock in the year ago quarter.

Chrysler's latest losses nearly wiped out its profits for the year so far, with nine-month earnings sinking to $37 million, or 17 cents a share, vs. $1.02 billion, or $4.38 a share, earned during the first nine months of 1989.

Industry leader General Motors Corp. was expected to report its third quarter results Wednesday, with analysts predicting the giant automaker might take a substantial writeoff by officially closing four U.S. assembly plants that were classified as ''indefinitely idled.''

Those plants include its Fiero factory in Pontiac, Mich., its Leeds plant in Kansas City, Mo., the Lakewood plant near Atlanta, and its Framingham, Mass., plant.

The writeoffs could lower GM's earnings between $700 million and $1 billion, industry analysts said.

Without the charges, GM was expected to earn between $235 million and $420 million during the quarter, or between 40 and 70 cents a share.

That compares with profits of $517 million, or 72 cents a share, earned by GM in the 1989 third quarter.

#90303u0768 10/30/1990 ~United Press International

PHILADELPHIA (OCT. 30) UPI - If the city runs out of cash around Dec. 1 as expected, Mayor Wilson Goode expects city employees to work anyway, even if they are not getting paid, a published report said Tuesday.

Labor leaders, however, said the mayor could not force workers to stay on the job because that would violate their labor contract. He can only request that they continue working and hope they do.

Goode said in an interview with the Philadelphia Inquirer that those workers who stayed on the job without getting a pay check would be fully compensated once the fiscal crisis was over.

He could not estimate how long the city's 25,000 civil servants might be asked to work without pay.

Goode said he didn't understand how an employee would choose to not work even if they were not paid, considering that they would get paid once the money is there to pay them.

''My assumption is that they all will work ... because not to work is not to be paid when money becomes available,'' Goode told the Inquirer. ''(If they) work, all they have is delayed payment. I don't understand how anyone could choose not to work under those circumstances.''

City officials estimate they will run out of cash about Dec. 1 unless the state comes through with a bail-out or they are able to secure loan notes on Wall Street.

State lawmakers have said Philadelphia won't get any help from them until after the election next week.

The city has been unable to find a bank willing to guarantee that it will pay back any loans it secures on the financial market so officials have put off indefinitely plans to sell $375 million in short-term notes.

Thomas Paine Cronin, head of the city's white-collar union, District Council 47 of the American Federation of State, County and Municipal Employees, said union officials were discussing what to do if workers don't get paid.

''The mayor can have all the expectations he wants. We'll do what's best for our people,'' Cronin told the Inquirer.

Goode, City Council members and state legislators have been meeting regularly to try to hammer out an agreement that would keep the city from going bankrupt.

#90303u0804 10/30/1990 ~United Press International

WASHINGTON (OCT. 30) UPI - The nation's total output of goods and services jumped an unexpected 1.8 percent in the third quarter on strong consumer purchases of cars, vans and trucks, the Commerce Department said Tuesday.

Private economists expected an increase of only 0.8 percent in the government's initial estimate of the real gross national product during July, August and September as recession fears swept the nation.

''This ... contradicts those who believe we are in a recession or are about to enter one,'' said Michael Darby, undersecretary of commerce for economic affairs. ''We expect the economy to continue to expand at a modest pace for the remainder of the year and in 1991.''

The data, however, are subject to revision.

The $18.5 billion surge in the real GNP for the third quarter, adjusted for inflation, follows a revised $4.5 billion - or 0.4 percent - gain in the second quarter, according to the department's Economics and Statistics Administration.

In the first quarter, the real GNP was up 1.7 percent.

The White House recently revised its estimate of final GNP growth for the year to a gain of 0.7 percent, with a 1.3 percent increase in the first three years of 1991, Darby said.

''To date, the economy is expanding somewhat faster than these cautious assumptions indicate,'' Darby said. ''At this stage, therefore, the economy is growing modestly on average, with some quarter-to-quarter volatility.''

Two or more consecutive quarters of negative growth in the real GNP indicate the economy has slipped into recession. An advance of less than 1 percent is generally considered a weak showing.

But the data is subject to change. The Commerce Department will revise the numbers in November and release a final estimate in December.

Two gauges of inflation tied to the report indicated a mixed picture in the aftermath of Iraq's Aug. 2 invasion of Kuwait - and the worldwide ballooning of oil prices.

''To the best of our knowledge, this summer's events in the Persian Gulf had little net effect on GNP in the third quarter,'' Darby said. ''However, the associated rise in oil and gasoline prices clearly influenced the inflation rate.''

Consumer spending leaped to $23.9 billion, not counting inflation, in the third quarter from $1.5 billion in the second quarter.

Spending on durable goods - expensive items made to last three or more years - climbed to $3.2 billion in July, August and September from a decline of $10.8

billion in April, May and June.

A Commerce Department spokesman attributed the bulk of the increase to automotive purchases, which were up $3.4 billion in the third quarter vs. down $6.1 billion in the second quarter.

Spending on non-durable goods increased to $3.8 billion from a decline of $4.4 billion, and spending on services increased slightly to $16.9 billion during the last quarter, the government said.

Exports regained lost strength in the third quarter, up $1.9 billion vs. down $8 billion, while imports increased to $9.8 billion from $1.2 billion in the second quarter, another sign of strong consumer spending.

Spending on housing fell $7.5 billion in the third quarter after diving $5.5 billion in the second quarter.

Business investment, meanwhile, increased $9.2 billion in the third quarter after falling $6.2 billion, and government spending slowed to $2.6 billion from $12.3 billion in the second quarter.

Military spending was not a significant factor despite the Iraq crisis.

#90303u0815 10/30/1990 ~United Press International

LONDON (OCT. 30) UPI - The Confederation of British Industry Tuesday reported the lowest level of business confidence since October 1980, with manufacturers reporting falls in orders, output and employment.

The employers' organization, in its quarterly survey of industrial trends and business confidence, reported that 53 percent of firms surveyed said they were ''less than optimistic about the general business situation than four months ago.'' This was the eighth consecutive monthly decline.

The October 1980 survey found that 46 percent of respondents were negative on the economy.

''Manufacturing industry is clearly facing very tough economic and trading conditions, and many firms are now battening down the hatches and preparing to ride out the storm,'' said David Wigglesworth, chairman of the CBI committee that compiled the study.

The study was based on interviews with 1,500 companies, and showed sharp falls

in output, orders for export and local markets, and in the number of jobs in industry.

The CBI said the gloomy mood was reflected by 49 percent of companies showing falling orders, and only 13 percent saying business was expanding.

Overall demand in the British economy had declined over the last four months as rapidly as it did during the height of the last recession in January 1981, the CBI said.

''The pace of falling output is the quickest since April 1981, and prospects for jobs are the weakest since 1983,'' Wigglesworth said.

But the survey said industry was making fewer cuts in training and capital investments than in the last recession, and this should make the slump less severe.

The London International Stock Exchange reacted to the CBI survey, with shares on the FTSE 100-share index falling by 21 points at the middle of the trading day.

Much of the survey was conducted before Britain cut interest rates by a percentage point to 10 percent and moved to join the European Exchange Rate Mechanism last month.

However, Wigglesworth said responses from industrialists after the British government announced the policy shifts showed that businessmen expected conditions to get worse, even though Britain had moved closer to its European neighbors in economic policy.

The CBI called on the British government to further reduce interest rates to revive flagging businesses.

The government of Prime Minister Margaret Thatcher contends that the British economy is stronger than it was in the late seventies and early eighties and have so far refused to define the economic downturn as a recession.

#90303u0826 10/30/1990 ~United Press International

HONG KONG (OCT. 30) UPI - High bodily iron content could be a telltale sign of potential violent behavior, according to a study conducted on Hong Kong prison inmates and released Tuesday.

The study, administered by the Correctional Services Department, showed that the iron content in hair samples of violent prisoners was nearly double that of non-violent inmates.

Security officials said the findings could eventually lead to hair analysis being used as an aid in identifying potentially violent prisoners on admission to jail and the use of medical treatment and dietary methods to control violent behavior.

The CSD said the findings were in line with criminological research conducted in the United States, but emphasized that the study would have no immediate effect on the way Hong Kong handled its prisoners.

''Such uses can only be implemented after ethical, legal and scientific problems associated with the practice are resolved,'' said CSD Commissioner Chan Wa-shek. ''All these require further research and consultation with the medical and dietician professions.''

In the experiment, researchers compared hair and blood samples taken from 94 pairs of consenting violent and non-violent prisoners.

The average iron content in hair samples of violent prisoners was 42 percent higher than that found in samples from non-violent prisoners, the study found.

The blood tests showed no significant differences between the two groups of inmates.

#90303u0873 10/30/1990 ~United Press International

NAIROBI, KENYA (OCT. 30) UPI - Northern Somali rebels claimed Tuesday they killed nearly 500 government soldiers in attacks on government positions around the northern town of Hargeisa.

The fighting took place 540 miles north of the capital, Mogadishu, the Somali National Movement rebels said.

It was the second time in a week the rebels claimed to have routed government forces in the region. Previous battles were just north of the Red Sea port town of Berbera, 600 miles north of Mogadishu.

There was no word from the government side on the rebel claims.

The clandestine SNM radio report monitored in Nairobi Tuesday said the rebels had suffered 48 casualties in the attacks, and another 36 guerrillas were seriously wounded.

The SNM have been fighting since 1981 to overthrow the government of President Mohamed Siad Barre.

-30- 1032

#90303u0894 10/30/1990 ~United Press International

LIBREVILLE, GABON (OCT. 30) UPI - The ruling Gabonese Democratic Party obtained a narrow parliamentary majority in the country's first multi- party elections, capturing with the help of three independents on its slate 62 of the 120 seats in the National Assembly, officials said Tuesday.

Opposition parties took 55 seats in the contest after Sunday's final round of voting. Their strong representation in Parliament indicated President Omar Bongo's experiment in democracy has been a success despite charges of electoral malpractice in some constituencies, political analysts said.

The opposition Morena des Bucherons (Renewal Movement) party led by Mba Abessole placed second with 19 deputies while the Gabonese Progress Party led by Pierre-Loyuis Agondjo took third position with 18 deputies.

The Original Morena Party commanded by Pierre Nzoghe Nguema managed seven deputies, followed by the Association for Socialism in Gabon with six seats, the Gabonese Socialist Union with four seats and the Circle for Reflection and Progress which took just one seat.

Three elections at the constituencies of Mayumba and Moabi in the south of the country were scheduled to be held next Sunday because of incidents that prevented voting there last Sunday.

Observers said the Morena des Bucherons, which already had 17 seats before Sunday's run-off, could have done better still if its leader had not decided to boycott the second round.

The boycott was a blessing for the Gabonese Democratic Party and also bolstered the showing of the Gabonese Progress Party.

With the Gabonese Democratic Party controlling 62 seats - and forecasts that this will be boosted to 63 or 64 after the final three elections next Sunday - the party that has ruled Gabon for 22 years is likely to dominate the coalition government of ''national unity'' that Bongo has said he wants to see formed following the polls.

But politicians both in the ruling party and among the ranks of the opposition are known to be divided over the wisdom of joining such a power-sharing administration.

(OCT. 30) UPI - The Navy reports that six sailors died today and four others were injured when a high pressure steam line apparently burst aboard the helicopter carrier Iwo Jima. The accident occurred as the ship was preparing for amphibious exercises near Bahrain in the Persian Gulf area. All of the casualties were Navy personnel. The Iwa Jima carries 685 officers and enlisted personnel and can carry 11- hundred Marines.

Strong consumer purchases of cars, vans and trucks helped the nation post an unexpected one-point-eight percent jump in third quarter G-N-P figures. The

Commerce Department figure on the total output of goods and services was up by 18-point-five-BILLION dollars for the July-to- September period. This follows a four-tenths of one percent gain during the second quarter. The news doesn't ease recession worries. But economists normally define a recession as two periods of declining G-N-P figures, something that has yet to happen.

Workers at Chrysler plants around the country are being urged to remain at their jobs, despite the midnight expiration of the latest extension to their old contract. All of this comes as negotiators for both sides worked throughout the night, trying to come up with a new contract. Chrysler says it canNOT afford the generous pension increases and job guarantees in contracts the U-A-W has already gotten from Ford and General Motors.

NASA is preparing to conduct a crucial fueling test aboard the shuttle Columbia. A battery of television cameras and special sensors has been set up in the shuttle's engine compartment in an effort to pinpoint a crippling hydrogen leak that has grounded Columbia since May. Engineers will begin pumping super-cold liquid hydrogen into the shuttle's big external fuel tank in a short time.

Also at Cape Canaveral, space agency managers are wrapping up a two- day flight readiness review of next month's classified Atlantis mission. The all-military crew reportedly will put a secret reconnaissance satellite into orbit. Launch is scheduled for around November 10th.

Despite more than a decade of birth control efforts, the population of China continues to grow at a staggering rate. The government today released the results of its first census in eight years... and the state statistics bureau says there are now one-pointBILLION Chinese. That figure appears to doom China's goal of holding its population to one- point-two-BILLION by the year 2000. In 1982, China counted slightly more than one-BILLION people.

City officials in Detroit are mobilizing more than 35-thousand volunteers and nearly 35-hundred block clubs to prevent the annual Devil's Night arson spree that's become a Halloween Eve tradition. Young firebugs use the night before Halloween to go on a rampage, burning abandoned homes and cars and torching garbage cans and trash bins. But, as in recent years, Mayor Coleman Young has imposed a strict dusk-to- dawn curfew and launched an aggressive anti-arson campaign.

Authorities in West Hollywood say lead singer Axl Rose of the heavy metal band ''Guns 'N Roses'' was arrested early today for allegedly hitting a neighbor woman over the head with a wine bottle. The woman was treated at a nearby hospital for a concussion and held for observation. Authorities say the altercation occurred in a 12th-floor hall in the condominium building where the two live.

ALVIN, TX (OCT. 30) UPI - A pickup truck slammed broadside into a school bus in heavy fog early Tuesday, injuring 22 students and the truck driver, Brazoria County deputies said.

The students received minor injuries and were taken to Alvin Community Hospital where they were evaluated. A hospital spokeswoman said it was unknown whether any students would be admitted.

Alvin school district officials reported to the hospital with medical records, and parents were advised to pick up their children from the hospital, a district spokesman said.

The bus, en route to Mason Elementary School, was traveling on Brazoria County

Road 58 and was crossing U.S. 288 when the truck slammed into the driver's side of the bus about 8 a.m.

''The (truck's) headlights showed up out of the fog,'' as the bus was crossing the highway, an accident investigator said, adding the truck driver tried to stop but did not have enough time to avoid the accident.

The truck hit the bus in the area of its propane fuel tank, which withstood the impact of the crash, deputies said. The bus carried students ranging from preschool to age 11.

The pickup truck rolled away from the bus before the truck burst into flames and the driver escaped from the vehicle, deputies said. The truck driver was taken to St. Lukes Hospital in Houston. His name and condition were not available.

A security director for the Alvin school district said students appeared to suffer only minor neck and head injuries.

The front of the truck was destroyed. The bus was hit on the driver's side in front of the rear wheels, and the passenger portion of the bus was smashed.

#90303u0928 10/30/1990 ~United Press International

MANILA, PHILIPPINES (OCT. 30) UPI - A concrete bridge damaged in a major earthquake last July collapsed Tuesday and dumped eight vehicles into the water below, killing at least two people and leaving other commuters missing, authorities said.

Benjamin Abalos, mayor of Mandaluyong town near the bridge, said the span was damaged by the 7.7 earthquake which rocked the main Luzon island July 16, killing at least 1,600 people and causing extensive devastation.

Police said rescuers were searching for the commuters following the cracking and collapse around noon of the right lane of the 50-meter Sevilla bridge.

Hospital sources said Marvin Cruz, 5, and an unidentified man drowned. At least five people were injured.

''When I got to the middle of the bridge, I felt my taxi going down and then I saw water coming in,'' said taxi driver Danny Escobar. ''So I swam out before I could sink with my car.''

Police said three cars, three jeepneys, a van and a ten-wheel truck loaded with corn fell into the water. Four of the eight vehicles sank.

Police said rescuers were trying to lift the vehicles with cranes and

searching for survivors, tying up traffic in a busy intersection between Manila and two suburban towns.

Authorities said the heavy corn truck may have triggered the cracking of the bridge.

SEABROOK, N.H. (OCT. 30) UPI - The Seabrook nuclear power plant was removed from the New England power grid early Tuesday morning after technicians discovered an electric malfunction, a plant spokesman said.

The problem was detected as the $6.6 billion plant was being returned to service following two days of maintenance work.

The plant's reactor was being held at 18 percent of its capacity, with the steam it generated being routed to a condenser instead of the turbine.

Ron Sher, a spokesman for Seabrook operator New Hampshire Yankee, said the problem involved a ground in a turbine component called the exciter.

''In order to make the turbine's rotor move to make electricity, the exciter places an electrical field on the rotor,'' Sher said. ''Technicians determined that there is a ground taking place in the exciter itself, making an incomplete electrical connection.''

Sher said technicians were working to find the ground. He said they believed the problem would be corrected later in the day.

Seabrook was shut down Saturday night for maintenance work on steam valves. Sher said the malfunction was unrelated to the maintenance work on the steam valves.

The plant had been reconnected to the power grid at midnight, but was taken back off line at 7:30 a.m.

Sher said Seabrook had been operating continuously at or near 100 percent power for 65 days. The weekend shutdown was the first since the plant was placed in permanent full-power operation in August.

Seabrook received its full-power license in March. Technicians worked all summer to bring the plant in stages to full-power operation.

At full power, Seabrook generates 1,150 megawatts of power, enough to supply 1 million homes.

#90303u1008 10/30/1990 ~United Press International

RICHMOND, VA (OCT. 30) UPI - Fallen televangelist Jim Bakker was given an ''unconscionably long'' 45-year sentence from a biased judge who said he was tired of being a ''sap for money-grubbing preachers,'' attorneys for the PTL founder argued Tuesday before a federal appeals panel.

U.S. District Judge Robert Potter, who sentenced Bakker after a jury convicted him of bilking thousands of his followers, is nicknamed ''Maximum Bob'' for his harsh sentences. Bakker's attorney, Harvard law professor Alan Dershowitz, argued ''Judge Potter is one the reasons the sentencing guidelines were implemented.''

The federal sentencing guidelines, imposed in November 1987, were at the heart of the 4th U.S. Circuit Court of Appeals case because they suggest Bakker should have received a sentence somewhere between 31 and 52 months.

Bakker was indicted in March 1987 so the government argued the guidelines did not apply. Bakker's attorneys argued since the last count said the conspiracy was continuing, the guidelines should apply.

Dershowitz, who has defended such notables as Leona Helmsley and Claus von Bulow, also argued the guidelines that he helped develop are designed to prevent gross differences between sentences. He said Bakker's sentence is longer than the average sentence for rape or murder.

The Bakker defense team also argued the jury instructions were prejudiced against the charismatic preacher. They said it did not allow for a good faith defense - that he didn't intentionally defraud people who paid $1,000 to become a lifetime PTL partner. In return for their money, the lifetime partners were to get three nights free a year at the Heritage Grand Hotel at Bakker's South Carolina theme park.

Prosecutors countered it had nothing to do with religion but was an old-fashioned real estate scam - that Bakker could never have provided all the rooms he had sold.

Dershowitz also argued Potter expressed prejudice when he said during the trial: ''Those of us who have religion are ridiculed for being saps for money-grubbing preachers.'' Arguing for the government, attorney Deborah Smith said the comment came after a week of testimony from a fleeced flock and ''was an appropriate summary of the evidence.''

The three-judge panel asked for further briefs on some technical arguments, and is not expected to rule for another 60 days. Dershowitz said if the case was sent back to a different judge for a new sentencing, Bakker could be released in the near future.

Bakker is currently at a federal corrrectional center in Rochester, Minn. Another Bakker lawyer, David Wice, said it was his understanding the preacher's cellmate is political extremist Lyndon LaRouche.

Bakker resigned from his $129 million television ministry March 19, 1987, after acknowledging a tryst with a church secretary, Jessica Hahn, in 1980 and payment of $115,000 in hush money to prevent her from revealing the secret.

Bakker, a former member of the Assembly of God denomination, handed the PTL to Moral Majority founder Jerry Falwell.

#90303u1018 10/30/1990 ~United Press International

BONN, GERMANY (OCT. 30) UPI - Nearly 60 percent of Germany's forests have been damaged by air pollution and the most severely affected area is in former East Germany, a politician in the environmental Greens party said Tuesday.

''The galloping consumption of our forests is continuing undiminished because the two main forest killers - sulphur dioxide and nitric oxide and the ozone they produce - could not be stopped yet,'' said Wilhelm Knabe, a Greens deputy in parliament and a forestry expert.

Knabe, citing an offical report that has not been released, said research shows shows marked differences in the health of eastern and western German forests.

The report, the first on Germany as a whole, said 59.3 percent of the nation's wooded areas had suffered some damage as of 1990. The report said damage to the forests rose sharply in large part because of severe pollution problems in eastern Germany.

Knabe said research showed the worst affected region is the state of Sachsen-Anhalt in what was formerly East Germany, where 76.5 percent of trees are damaged.

The report says the condition of eastern German forests worsened in 1990, with damage reaching 65.7 percent, an increase of 11.4 percent over last year's figures. The report shows 34.3 percent of wooded areas in eastern Germany exhibit no signs of damage and 35.9 percent show signs of advanced damage - the partial or total loss of needles and leaves.

A separate survey by the Greens and conducted only in eastern Germany put the damage to forests there as high as 95.5 percent. That survey shows in eastern Germany, 67 percent of wooded areas register advanced stages of damage. Only 4.5 percent show no signs of damage.

The official report revealed by Knabe said in western Germany, 56.1 percent of

the forest is damaged, a rise over last year's measurement of 52.9 percent and over the 1986 figure of 53.7 percent.

In former West Germany, 17.4 percent of wooded areas show signs of advanced damage, the official report stated.

The report showed in unified Germany, 23.6 percent of wooded areas exhibit signs of advanced damage and 35.7 percent are lightly damaged.

Knabe attributed the damage in eastern Germany to the widespread use of low-grade coal in industry and for home heating needs.

He said in western Germany, the pollution damage largely resulted from high-speed driving, increased reliance on used automobiles which produce higher emissions, and rising numbers of utility vehicles.

VATICAN CITY (OCT. 30) UPI - American Archbishop Paul Marcinkus, central figure in a Vatican Bank scandal that rocked the Catholic Church in the early 1980s, has resigned from Vatican service after 40 years, the Vatican announced Tuesday.

The brief Vatican announcement said Pope John Paul II had accepted the resignation of Marcinkus as head of the Pontifical Commission for the Vatican City State, the job he has held since he was replaced as president of the Vatican bank in June, 1989.

Apparently reflecting the pope's reluctance to see Marcinkus go, the announcement said Marcinkus presented his resignation ''insistently'' and would remain a ''consultant'' of the same Pontifical Commission.

Marcinkus, 68, said he planned to return to the United States to work as a simple parish priest in his native Chicago archdiocese.

''I am very grateful to the Holy Father for having granted my request to retire from Vatican service and return to the United States,'' he said.

The towering son of Lithuanian parents, born in the Chicago suburb of Cicero, Ill. on Jan. 15, 1922, Marcinkus had served in various Vatican posts for 40 years. He was president of the Vatican bank - formally known as the Institute for Religious Works - from 1971 until June 1989, when the Vatican appointed a five-man Supervising Council to head the bank.

The scandal linked with his name erupted in 1982 when the Milan-based Banco Ambrosiano, then Italy's largest private bank, collapsed with debts of $1.287 billion.

Italian investigators accused Marcinkus of being partly responsible for the crash because of his close banking ties with Ambrosiano President Roberto Calvi. Calvi fled to London, where he was found hanging by the neck under a Thames river bridge in September 1982.

A coroner's court first ruled Calvi's death was suicide, but after a second hearing it returned an open verdict, leaving open the possibility that Calvi was murdered.

Milan magistrates issued arrest warrants against Marcinkus and two other Vatican bank directors, charging them with ''complicity in fradulent bankruptcy.'' But the Vatican refused to hand them over and later Italy's top appeals court and its Constitutional Court ruled that Italian legal authorities had no jurisdiction over the sovereign Vatican City State.

The pope showed his confidence in Marcinkus, who formerly acted as a bodyguard on papal trips, by maintaining him as bank president until the bank was reformed in 1989.

The Vatican always denied any wrongdoing in connection with the Banco Ambrosiano collapse. But in 1984 it paid $240.9 million to Ambrosiano creditors as a ''goodwill gesture.''

In a magazine interview at the time, Marcinkus said he told Vatican officials: ''You are crazy. If we are not guilty we should not pay.''

''I have nothing to be ashamed of in what I have done,'' Marcinkus told the magazine. ''I could be ashamed of one thing, and that is to have perhaps had too much faith in Roberto Calvi. But that was not difficult, because Calvi had an excellent reputation in the banking community.''

(OCT. 30) UPI - The number of Americans killed in Operation Desert Shield grew by seven today. Six sailors died aboard the helicopter carrier U-S-S Iwo Jima when a steam line connected to a boiler ruptured. Four others were seriously burned. A Marine was killed and three others injured when a multi-purpose vehicle on a night exercise overturned in the eastern Saudi desert.

A Navy spokesman says very high pressure steam spewed from one of the Iwo Jima's two boilers today as the ship was getting under way after a port call in Bahrain. The injured sailors were transferred to the hospital ship U-S-S Comfort for medical treatment.

In southern Germany, two Americans died today when their U-S Army Apache helicopter hit an electrical wire and crashed near the town of Erlangen. The dead were identified as Chief Warrant Officers Clarence Hall of Coeburn, Virginia, and John Wilkinson of Colinga, California. Both men were attached to the 11th Aviation Brigade.

Economists expecting a small eight-tenths of one percent jump in third-quarter G-N-P figures were more than surprised when the Commerce Department made its report this morning. The figure was actually up one- point-eight percent, thanks to heavy consumer purchases of automobiles.

The housing industry continues showing effects of a steady decline that has gone on for most of the year. The Commerce Department reports a 21 percent drop in new-home sales last month when compared with last year. Sales are down 15 percent when figured on a monthly basis going back to January.

The shuttle Atlantis has been cleared for a night-time military launch on November 9th, one day earlier than originally planned. As usual with such flights, the exact launch time is classified. The word on Atlantis comes as NASA prepares for a critical fueling test for the leak-plagued shuttle

Columbia.

A study has found a new abnormality in the brains of people who committed suicide... a discovery that could lead to new ways to identify and treat suicide-prone people. The study reported in St. Louis says researchers found higher levels of one protein structure in the brains of suicide victims and less of another of the proteins.

The Vatican announced today that American Archbishop Paul Marcinkus has resigned from the Vatican service after 40 years. Marcinkus was head of the Vatican Bank in a scandal that rocked the church in the 1980's. He says he wants to return to parish work in the Chicago area.

The German Parliament today cleared the way for the withdrawal of 380-thousand Soviet troops from former East German territory. Lawmakers ratified two treaties under which Germany will pay Moscow nearly eight- BILLION dollars for pulling out its armed forces by 1994. The agreement also includes a NO-interest, two-BILLION-dollar loan to the Soviet Union.

A pick-up truck slammed into the side of school bus near Alvin, Texas, early today, injuring 22 students and the truck driver. Most of the students had minor injuries and were examined at a hospital. The truck burned, but the propane fuel tank aboard the bus withstood the impact of the crash. Sheriff's deputies say thick fog may have contributed to the accident.

NEW YORK (OCT. 30) UPI - A lawyer's effort to establish that the jogger attacked in Central Park was never raped backfired Tuesday when a witness testified that medical personnel at the crime scene found she was sexually assaulted.

Questioning by attorney Colin Moore, representing Kharey Wise, 18, one of the two youths on trial in the attack, was another indication he may go ahead with plans to grill the attack victim about her sex life when she becomes a witness.

Wise and Kevin Richardson, 16, are on trial, accused of raping, beating and leaving for dead the jogger on April 19, 1989.

Moore tried to bolster his contention the jogger was never raped in his questioning of Estelle Paris, an Emergency Medical Services technician who treated the investment banker shortly after the attack.

''You mean to say you couldn't make any analysis there as to whether there was a rape?'' Moore asked Paris in state Supreme Court in Manhattan.

''I saw blood ... in her pubis and buttocks.'' Paris replied. ''We thought she had been raped at the time.''

''Was your opinion rooted in any scientific fact?'' Moore asked.

''It was based on five years of medical experience,'' Paris snapped, choking back angry tears.

The testimony came after the mother and sister of Richardson said on Monday they would refuse to serve as witnesses in his defense.

Ripping out the heart of the defense case, the mother of Richardson, Grace Cuffee, and his sister, Angela Cuffee, angrily told defense lawyer Howard Diller Monday that they would not cooperate with him.

After a private conference with Justice Thomas Galligan in his chambers at state Supreme Court in Manhattan, Diller said the judge told him to ''do the best with what you've got.''

Diller had planned to argue that Richardson, 16, was tricked into making a confession by police who repeatedly promised he could go home if he made incriminating statements. His mother and sister were both at the precinct on the night of his arrest and were expected to be the prime defense witnesses.

Richardson and Kharey Wise, 18, are on trial on charges they beat and raped a woman jogger, whose name has not been published because of the nature of the crime, in Central Park on April 19, 1989. They also are accused of beating and robbing two male joggers, John Loughlin, 42, and David Lewis, 32.

Three other youths were convicted of the charges last summer and are serving 5 to 10 year jail sentences.

#90303u1136 10/30/1990 ~United Press International
WARSAW, POLAND (OCT. 30) UPI - Polish and German officials opened two days of talks Tuesday aimed at achieving a treaty confirming the existing border between the two countries and outlining a pact on good neighborliness.

''All issues of importance to our future relationship will be discussed,'' said Dieter Castrup, political director in the German Foreign Ministry, who heads Bonn's delegation.

A draft of the border treaty under review is result of the two-plus- four conference in Paris in July and in Moscow in September. The Polish Foreign

ministry said it had presented the Germans with a draft Oct. 8.

It states that Germany has no claim to any territory in Poland, nor will it make any such claim.

Following Germany's defeat in World War II, it was forced to give up areas south of the Oder and Neisse rivers to Poland, while Poland in turn lost 20 percent of its pre-war territory to the Soviet Union on its eastern frontier.

Poland favors a rapid conclusion of the treaty and hopes a signature will be possible later this year or early next year.

German Chancellor Helmut Kohl indicated he favored signing the agreement in April so that it can first be ratified by the first elected reunified German Parliament, which will be chosen Dec. 2.

The working group was scheduled Wednesday to consider an agreement on cooperation and good neighborliness between Poland and Germany. The paper was in its fledgling stages, and the Warsaw meeting was to discuss its general concept and main points.

Jerzy Sulek, director of the Europe Department in the Polish Foreign Ministry, heads Warsaw's side.

A follow-up meeting was scheduled in Frankfurt-on-the-Oder, a border town on the Oder River, for Nov. 8.

#90303u1178 10/30/1990 ~United Press International

MEXICO CITY, MEXICO (OCT. 30) UPI - The captivity of a German consular official in the southern city of Oaxaca entered the second day Tuesday as authorities negotiated with hostage-takers demanding the release of a jailed leader, the German Embassy said.

Immo Von Kessel, charge d'affaires of the German Embassy, said Wolfgang Wilczek has been held hostage since Monday by members of an organization known as Procup.

Wilczek, 49, is Germany's consular representative in Oaxaca, 170 miles southeast of Mexico City.

''They have sent us a manifesto demanding improvement of human rights in Mexico and release of political prisoners,'' Von Kessel said. ''But the only concrete demand was the immediate release of their leader, Felipe Martinez Soriano.''

Humberto Cruz, a state government spokesman in Oaxaca, said group members ''took over the German consulate at about 4 p.m.''

Von Kessel said he has been in constant telephone contact with Wilczek. He said Wilczek told him there were five members of the group inside the building and various others on guard outside.

He said army troops have surrounded the consular building.

''Wilczek and I spoke on the phone several times and he appears to be in a good mood, though a little concerned,'' he said.

Von Kessel said local authorities were negotiating with members of the group, but that he had no information about progress of the talks.

''We are taking any action possible, but we don't want anything dramatic to happen,'' he said. ''We hope it can be solved through negotiation.''

Von Kessel said he was not sure whether the hostage-takers were armed.

Martinez Soriano is in jail in Mexico City, charged with involvement in the

deaths of two security guards of the Mexico City daily newspaper La Jornada in April.

The guards were killed after they refused to accept propaganda from Procup, allegedly part of the Party of the Poor.

Martinez Soriano, former director of Oaxaca University, has denied having any ties with Procup, and his lawyers have protested the circumstances of his arrest earlier this year.

Members of Procup also jailed in connection with the the security guards' deaths have been holding a hunger strike in a Mexico City prison for several weeks.

''Martinez is the leader of a group ... suspected of being involved in clandestine activities, so I don't think his followers will achieve their goal '' Cruz said.

Von Kessel said the group threatened to stay in the consulate until Martinez Soriano is released, saying in their manifesto they are prepared to die for it.

He said the manifesto was also delivered to Jorge Carpizo, president of the government's National Human Rights Commission.

Wilczek has been a resident of Oaxaca for 23 years. He is head of the Consular Corps of Oaxaca.

Von Kessel said Wilczek is the German government's representative in Oaxaca, but does not have diplomatic status. ''The papers making him our official consul are still being processed,'' he said.

-30- 3215

#90303u1181 10/30/1990 ~United Press International

(OCT. 30) UPI - The helicopter carrier U-S-S Iwo Jima is being towed back to port in Bahrain with its engines shut down as a precaution after a high pressure steam line burst, killing seven Navy personnel and seriously burning three others. The accident occurred as the carrier was moving out to take part in amphibious exercises in the Persian Gulf. The injured sailors have been flown to a Navy hospital ship for treatment.

The military build-up in the Persian Gulf region was at the top of the agenda during a White House meeting today. President Bush called congressional leaders and his national security advisers in to discuss the crisis and other issues. Bush denied yesterday that he was pushing for war. But he also said the United States will act swiftly against Iraq if provoked.

Some movement is reported on issues of job security, wages and pensions as

negotiators for the United Auto Workers union meet with their management counterparts at Chrysler. There are NO reports of any wildcat walkouts following the expiration early this morning of the latest extension of the old contract. The contract actually ended September 15th, but Chrysler's 67-thousand unionized employees have continued working as the talks continued. But the union can still call a company-wide strike if it wants.

The economy performed better than most experts thought it would during the third quarter. The Commerce Department says the gross national product rose an unexpected one-point-eight percent... and that's much better than the eight-tenths of one percent growth forecast by private economists. Strong consumer demand for cars, vans and trucks kept the economy perking despite recession fears fueled by rising fuel costs.

Under-secretary of Commerce for economic affairs Michael Darby says- ''This... contradicts those who believe we are in a recession or are about to enter one.'' Darby predicts continued moderate growth for the rest of the year and into 1991.

One sector of the economy hardest hit by slow sales, housing, slipped further behind last month. The government says sales of new single- family homes fell 21 percent in September, to an annual rate of only 503-thousand units. The biggest monthly decline in home sales was in the Northeast, where sales dipped 15-point-six percent. The median price of a new home was 115-thousand dollars in September... while the average price of all homes sold was 142-thousand 300.

The shuttle Atlantis has been given the green light for one of the worst-kept military secrets around, its expected launch of a reconnaissance satellite next month. Atlantis is to lift off from Cape Canaveral in a night-time launch now set for November 9th. That word comes as NASA technicians begin loading super-cold liquid hydrogen aboard the shuttle Columbia. They will be closely monitoring the process, looking for any evidence of fuel leaks that have kept Columbia grounded since May 30th.

Published reports indicate that Mayor Wilson Goode expects the city's 25-thousand civil servants will just keep working if the city runs out of cash as expected around December 1st. And Goode says he doesn't understand why an employee would chose NOT to go to work then.

New York Daily News officials say the newspaper is hiring replacements for Newspaper Guild writers and editors who are on strike. The paper was struck by all but one of its unions last week. A Daily News spokeswoman says the paper is hiring replacements for all the striking workers. Mayor David Dinkins met with the leader of the umbrella organization for the striking unions, but Daily News publisher James Hoge declined to meet with the unions.

#90303u1211 10/30/1990 ~United Press International

INDIANAPOLIS (OCT. 30) UPI - Indiana has agreed to place a pamphlet in state park inn rooms that warns readers the Bible is a ''violent, racist and sexist fable.''

The pamphlet, published by the Freedom From Religion Foundation of Madison, Wis., will be placed in the 550 rooms of the state's six park inns, state Department of Natural Resources officials said.

It was submitted in protest of Gov. Evan Bayh's decision last year to keep Gideon Bibles in the rooms.

The foundation's president, Anne Gaylor, said Bayh's decision to okay the Bibles in the rooms was ''a gross violation of the separation of church and state.''

She said Bayh was ''insensitive'' to people who are not Christians or who belong to different Christian sects.

''Gov. Bayh should have known better,'' she said.

But Fred Nation, Bayh's press secretary, said the governor was concerned that some people would find the pamphlet material ''blasphemous.''

''We are taking this under review and will make a decision in the near future '' Nation said, even though placement of the pamphlets has been approved for now.

In response to complaints about the Bibles from the Indiana Civil Liberties Union, Bayh decided to allow any religion that had tax-exempt status under the federal tax code to provide material for inn rooms. The foundation has such status.

The group's phamplet is titled, ''Dear Believer.''

It includes a picture of the Bible with a stamp on it that says: ''Warning! Literal belief in this book may endanger your health and life!''

It characterizes the biblical God as ''a macho male warrior who ... is partial to one race of people; judges women inferior to men; is a sadist who created a hell to torture unbelievers.''

Gaylor said there are 24 Hoosier members of her group out of a national membership of 3,100.

BONN (OCT. 30) UPI - The flow of West German goods to East Germany soared 135 percent to $7.6 billion in the first eight months of this year compared with the same period in 1989, the Federal Statistics Office said Tuesday in a report.

But trade in the other direction - from East to West Germany - only rose 8 percent to $3.36 billion from January to August compared with the same period last year, the report said.

When the East German Stalinist leadership was ousted in a peaceful revolution last fall and the inner-German border opened, western exports swamped the East German market.

The one-way trade increased even more when the strong Deutsche mark was introduced July 1 as part of monetary and economic union and in advance of Oct. 3 German unification.

In August alone, West German exports to East Germany jumped by 241 percent to a total value of $1.35 billion, compared with July, the report said.

In the first eight months of the year, the figure rose 135 percent to $7.6 billion, it said.

In August, trade from east to west climbed 23 percent to $477 million from July, the report said.

A different report released Tuesday by the German Industry and Trade Association said that western German exports will continue to stay high in 1991, although exports from eastern Germany will drop.

The report said the expectation that West European economies - except for the British economy - will continue to be stable and grow in 1991, is a good sign for German exports, because 70 percent of all German exports go to those countries.

The association's report predicted German economic growth at a real 2 percent to 3 percent, including a 1 percent to 2 percent drop in eastern Germany.

The report's forecast corresponded with earlier predictions by Economics Minister Helmut Haussmann, but contradicted last week's report by the five leading German economic research institutes that growth would drop from the current 3 percent to 4 percent to 1.5 percent next year.

#90303u1221 10/30/1990 ~United Press International

NEW YORK (OCT. 30) UPI - Kobe beef made its debut in New York Tuesday and the rarest thing about it is its price - $100 for a 12-ounce steak.

The Japanese gourmet meat has not been exported for more than 20 years and its noted for its delicate flavor, as well as its cost.

Producers say the steak from Wagyu cattle bred near Kobe, Japan, is expensive because the cattle receive tender loving care unknown to other cows.

For example:

-Daily rubdowns with swatches of straw.

-Beer fed through a baby bottle to ''stimulate their appetites and break down muscle tissue.''

-A diet rich in soybeans, rice and grains.

The only drawback for cholesterol-aware Americans is the liberal marbling of fat found in Kobe steaks, more than in domestic prime-grade beef.

The advent of the legendary beef at the Homestead is the result of two years of negotiations with a Japanese import firm and several trips to Japan by the restaurant's owners, brothers Greg and Marc Sherry. They worked with Kobe slaughtering plants to help them conform to strict U.S. Deparment of Agriculture standards.

''There is definitely a market for Kobe beef in this country,'' said Greg Sherry, noting that he expects the price of Homestead's steaks will vary between $100 and $125 depending on the cut and import costs.

Sherry said Kobe steak belongs in the same rarified fine food and drink category as white truffles, Beluga caviar, and Cristal champagne. Carried away he even compared it to great art.

''A Kobe steal is comparable to a Van Gogh,'' he enthused. ''That says it all.''

Anyway, it's cheaper to eat Kobe steak in Manhattan than it is in Tokyo, due to the weakness of the dollar in Japan. American tourists have to pay $180 to $250 for a smaller 8-ounce serving of the beef in Japan.

#90303u1243 10/30/1990 ~United Press International

WAHINGTON (OCT. 30) UPI - In an ironic twist, next week's elections could strip the Senate of both its most conservative and most liberal Republican senators - Jesse Helms of North Carolina and Sen Mark Hatfield of Oregon.

Helms, the apostle of the far right, and Hatfield, the lonely voice of the

left, are fighting for their political lives in two of the tighest Senate races of the year.

Polls in the two states, as well as soundings by political observers, show Hatfield and Helms are facing the most serious challenges of their lengthy political careers from little-known Democrats.

Anita Dunn, spokeswoman for the Democratic Senatorial Campaign Committee, said the Oregon and North Carolina elections, as well as the one in Minnesota, ''are all dead heats.''

She said that committee polls show Hatfield slightly behind, although within the margin of error, and North Carolina a deadlock with the result depending on voter turnout.

Hatfield, who has never been beaten in nearly 40 years of politics, is now scrambling to fend off a wealthy entrepreneur and enviromentalist, Harry Lonsdale, who has transformed the four-term senator from a state icon to a vulnerable incumbent.

In North Carolina, Helms is in a dogfight with former Charlotte Mayor Harvey Gannt, a generation younger and black, who is running even stronger that did former Gov. James Hunt in the celebrated $25 million 1984 election that the three-term senator won 52-48 percent.

Although no one is willing to bet they will lose, their defeat would have a dramatic impact on the Senate and within the Republican Party.

Helms, a big, rumpled man of 69 with a courteous manner that hides an iron adherence to his beliefs, is the most visible and vocal conservative in the Senate and one of the best-known in the country.

His defeat, coupled with the retirements of Sens. William Armstrong, R-Colo., and Gordon Humphreys, R-N.H., could relieve the Senate of the constant fights over so-called moral issues. Other senators share their views but do not put them as high on the agenda.

Over the last 12 years, the Helms-Armstrong-Humphreys trio has pushed, with much success, restrictions on the use of federal funds for abortions, curbs on family planning programs and what they consider obscene art.

Helms, on his own, has ranged far afield to the point where he often ties up the Senate.

More than any single senator, Helms has blocked nominations and stymied bills through objections that leaders have honored and with filibusters or threats of filibusters.

It is unlikely that any other Republican conservative is inclined to take over Helms's role as an obstructionist although, in a much lower key, many of them would carry on his agenda.

In contrast to Helms, Hatfield is a sophisticated intellectual who travels the Georgetown social circuit, takes great pride in fashionable dress and is a near-pacifist politically.

At the same time, he is very active in the congressional prayer breakfasts, personally chose the Senate's present chaplain and is adamantly, although not loudly, against abortion.

The departure of Hatfield would mean the Senate would be left without a true Republican liberal, ending in the Senate a golden era for the GOP left. At one time, it was strong enough to elect Sen. Hugh Scott of Pennsylvania as Senate GOP leader.

The election defeat of a dying Sen. Jacob Javits, R-N.Y., 10 years ago and the retirement of Sen. Charles Mathias, R-Md., in 1986, left only Hatfield to carry the banner of the left. He was clearly isolated - notably on defense issues and international issues where he very frequently voted with liberal Democrats.

There remain some East Coast Republicans - Sens. John Chafee of Rhode Island and Sen. William Cohen of Maine - but they are better classified as moderates than liberals.

#90303u1257 10/30/1990 ~United Press International
MEXICO CITY (OCT. 30) UPI - Twenty-eight years after the Cuban missile crisis Fidel Castro denies he urged a pre-emptive nuclear strike against the United States and Cuba remains indignant over being left out of U.S.-Soviet negotiations.

A dispatch Monday from the official Cuban news agency, Prensa Latina, outlines what it calls the ''October Crisis,'' and traces the brush with Armageddon back to 1959, only months after Castro's forces ousted dictator Fulgencio Batista.

''As early as May 18, 1959, U.S. President Dwight Eisenhower gave the go-ahead to begin preparations for the mercenary landing on Playa Giron in April, 1961 '' Prensa Latina said.

On April 17 that year, 1,200 CIA-trained Cuban exiles landed at the Bay of Pigs in an invasion attempt that was crushed by Castro's revolutionary forces.

''Twenty-eight years after the October crisis that placed the world on the

verge of nuclear war, Cubans maintain their principal justification of (the events of) that time, and reproach Nikita Khrushchev for pushing them aside in the secret conversations,'' Prensa Latina said.

The article refers to a 200-page Cuban document that had been kept confidential until recently.

The document says Cuba should have been consulted before the Soviets agreed to remove the 42 one megaton medium-range missiles from the island following tense negotiations with President John F. Kennedy, arguing that ''the missiles had been installed under a military agreement between the Soviet Union and Cuba.''

Excerpts from memoirs taped by former Soviet leader Nikita Khrushchev after he was ousted from power in 1964 were published earlier this month in Time magazine, in which Khrushchev says Castro called for a pre- emptive nuclear attack against the United States.

''Our own intelligence also informed us that an (U.S.) invasion would probably be unavoidable unless we came to an agreement with the president (Kennedy) very quickly,'' Khrushchev said. ''Castro suggested that to prevent our nuclear missiles from being destroyed, we should launch a pre-emptive strike against the United States.''

In direct reference to the memoirs, Prensa Latina quoted Castro as denying that version.

''I am said to have advised Khrushchev to launch a pre-emptive attack with nuclear missiles against the United States ... but it really wasn't like that '' Castro said in Havana.

Cuba's chief concern, according to the Cuban document, was that it had not been able to say whether it was satisfied with the guarantees Kennedy gave the Soviets that the United States would not invade the island.

Khrushchev recalled: ''Castro was hotheaded, he thought we were retreating - worse, capitulating. ... We thought this came from him being young and inexperienced as a statesman. He had been deceived many times, so he had the right not to believe the word of the president.

''The experience taught him a good lesson.''

#90303u1261 10/30/1990 ~United Press International

ORLANDO, Fla. (OCT. 30) UPI - The average price of regular gasoline sold nationwide held steady during the past week, breaking a five-week string of price increases, the American Automobile Association said Tuesday.

The average price of regular unleaded gasoline sold at self-service pumps remained unchanged this week at $1.38 a gallon, the AAA said. The average price had been moving steadily upward since Sept. 18.

The current price is 30.5 cents above that recorded Aug. 1, the day before Iraq seized Kuwait, and only 0.8 cents a gallon below the record price recorded by the association prior to the 1981 Easter weekend, AAA said.

Although the average price nationwide remained unchanged for the week, regional price hikes were recorded in the Southeast and Mid- Atlantic regions, AAA said. Prices declined in all other regions, the association said.

AAA also said this week's price relief was not uniform at the pump.

While the price for regular gasoline held steady, the average price of mid-grade gasoline rose 0.3 cent to $1.467 a gallon, AAA said. The average price for premium gasoline rose 0.1 cent to $1.549, the group said.

#90303u1263 10/30/1990 ~United Press International

SOFIA, BULGARIA (OCT. 30) UPI - Bulgaria and Romania invited international monitoring agencies to inspect chemical and nuclear plants along their common border in a decision aimed at removing a big source of tension between the two countries.

The decision was reached during talks that ended late Monday between Foreign Minister Lyuben Gotsev and his Romanian counterpart, Adrian Nastase, who traveled to Bulgaria in an effort to end a long-simmering dispute over cross-border pollution.

The dispute centers mainly on a Soviet-built chemical plant in Giurgiu, Romania, which Bulgaria claims spews toxic chemicals that have spoiled the environment and sickened residents of the Bulgarian city of Ruse, directly across the Danube River from the plant.

The factory's smokestacks allegedly release a gas that contains up to nine times the allowable level of chlorine, the government in Sofia contends.

Local authorities have linked the pollution to a sharp increase in a respiratory ailment dubbed ''Ruse lung.'' Trees in the city are dying and birds have vanished. On the worst days children have been advised to wear gas masks when walking to school.

During the talks Monday, which also included Bulgarian President Zhelyu Zhelev and Prime Minister Andrei Loukanov, the two sides agreed to invite the United Nations Environmental Program to inspect the Giurgiu plant. At the same time

the International Atomic Energy Agency in Vienna will investigate a Bulgarian nuclear power plant at Kozloduy, near the Romanian border.

''We will accept the assessments and conclusions of UNEP and IAEA,'' Loukanov told a news conference.

A high-ranking foreign ministry official said the agreement was crucial to improving relations between the two countries.

''Without a lasting and stable solution of the problem, we cannot imagine the development of our relations with Romania,'' he said.

#90303u1267 10/30/1990 ~United Press International

WARSAW, POLAND (OCT. 30) UPI - Poland will privatize its biggest press concern, previously owned by the now-disbanded Communist Party, and allow foreign investors to submit bids, a government official said Tuesday.

''This is the biggest privatization project undertaken in Poland,'' said Jerzy Drygalski, who leads the team liquidating RSW Prasa, which controls 80 percent of the daily press and employs 85,000 people.

''The government approved late last night all the recommendations put forward by our team,'' he told a news conference. ''Their aims were to break the press and political monopoly of the former Communist Party.''

At least 20 foreign publishers have shown serious interest, with media barons Robert Hersant of France, Robert Maxwell of Britain, and Australian Rupert Murdoch leading the pack, he said.

A total of 118 papers will be sold and 72 will be handed over to teams of journalists who have formed cooperatives.

The state treasury will take over RSW's 19 biggest printing houses and the only distribution company in Poland, which has over 24,000 newsstands nationwide.

Drygalski said his commission resisted pressure from new political groups, Solidarity and local governments to give them individual papers for free.

''The papers will be sold by an open bid but other criteria will be considered '' said Marek Filipowski, an expert to the commission.

Specifically, newspapers will not necessarily go to the highest bidder, particularly if he is foreign, as ''the press is a very delicate market involving political considerations,'' Drygalski said.

''We should protect the most important national and regional dailies and prevent monopoly (by any foreign investor),'' Drygalski said.

The commission has not estimated the total assets of RSW.

It wants to proceed quickly by selling financially troubled newspapers and those that have been at the heart of battles to control them.

Drygalski said one of the first to be offered will be the independent national daily Zycie Warszawy, which has the biggest advertising section in Poland.

Its value was preliminarily estimated $4.2 million. The paper's circulation is 250,000 on weekdays and 350,000 on weekends.

Some smaller printing houses will be given to cooperatives on lease agreements.

Drygalski said it would take about six months to privatize RSW.

#90303u1269 10/30/1990 ~United Press International

ANAHEIM, CA (OCT. 30) UPI - Disneyland, the grandfather of modern amusement parks, will boost its admission prices by $2 for adults and children, a park spokesman said Tuesday.

The new admission prices, which go into effect Nov. 1, are $27.50 for an adult ''passport'' and $22.50 for children between the ages of 3 and 11, according to spokesman Bob Roth. Children under 3 years old are admitted free.

Roth said that the price increase, the 10th since 1982, was needed because of inflation and the costs of expanding Disneyland, which is celebrating its 35th anniversary this year.

''The costs of expansion and renovation are enormous,'' Roth said.

The major areas of expansion over the next decade will include ''Mickey's Starland,'' which will showcase the Disney characters, and ''Hollywoodland,'' which will incorporate some of the aspects of the Disney MGM Studios theme park that opened last year in Florida, Roth said.

Disneyland, which bills itself as ''the happiest place on earth,'' also plans to renovate its ''Tomorrowland'' area over the next few years.

Disneyland, the second most popular amusement park in the country after Walt Disney World in Florida, last increased its prices in December 1989, when it also boosted them by $2.

#90303u1272 10/30/1990 ~United Press International
AMMAN, JORDAN (OCT. 30) UPI - Y.S. Perera, dripping wet from a special midday shower, stepped away from a waist-high public faucet at al-Andalus refugee camp and shook the water from his face and hair.

''I think most probably we are going home today,'' said Perera, a Sri Lanka native who spent the last three and a half years working as a salesman in Kuwait.

His wife brushed her teeth at another outdoor spigot nearby while dozens of other refugees bathed, laundered clothes and washed dishes in anticipation that they would soon be leaving Jordan.

Nearly three months after the Iraqi invasion of Kuwait, the tide of tens of thousands of refugees that inundated Jordan is gradually beginning to subside.

Only 700 people remain at al-Andalus camp, which housed about 7,000 refugees in rows of blue and beige aluminum-framed tents just one month ago. Officials said two other camps had closed, and the parking lot of Queen Alia International Airport, which was clogged with refugees three weeks ago, is now empty.

Despite the slowing flow of refugees, officials said they thought a trickle of people would keep moving through Jordan. ''I expect they will continue coming here and we are ready to deal with them,'' said Falah al Kaice, a volunteer who helps run the camp.

The refugees at al-Andalus are mostly from poorer Asian and African countries, such as Bangladesh, Sri Lanka, the Philippines, India and Sudan.

They remained in Kuwait for so long because they had heard frightening rumors about the dangers of the journey to Jordan or because they had financial trouble and were hoping for a settlement of the crisis that would let them recoup their lost earnings.

''The main problem was the financial problem for Sri Lankans,'' said Perera. ''We had help from some friends, not foreigners, just Sri Lankans.''

Many of the refugees confirmed reports that Iraqis are breaking down heavy equipment and hauling it out of Kuwait.

''It is stolen, everything,'' said Mohdi Abu Taher Chawdhey, a Bangladeshi who worked for the Kuwaiti Ministry of Electricity and Water. ''Now Kuwait city is like a ghost town. Everything is closed.''

Some of the refugees told stories of looting and robbery. Mufaddal Sifuddin, a 20-year-old Indian, said he was sleeping in an apartment with 15 other people

one night when Iraqi soldiers rousted the bunch and took all their money.

He also said he saw a police officer shoot a soldier who was looting goods.

Aida del Mundo, a native of the Philippines who worked as a saleswoman, said soldiers weren't the only ones who were trying to get a bargain at the expense of the foreign workers in Kuwait.

''Sometimes the Iraqi civilians, they would knock on your door and would say, 'Do you want to sell your things?' And they would buy the whole flat,'' she said.

Del Mundo, who has been unable to speak to her husband and two children in the Philippines since the crisis began, said generally the Iraqi civilians offered to pay far less than what the goods were worth.

She said food was available but expensive in Kuwait and that people sometimes traveled to the nearby Iraqi city of Basra to shop for groceries.

Most of the refugees at al-Andalus camp face uncertain futures. Sri Lankans like Perera are returning to a country torn by an internal civil war, while Bangladeshis like Chawdhey are returning to a nation where work is extremely difficult to find.

''Everything is spoiled, everything is lost,'' said Chawdhey, who spent 12 years in Kuwait. ''We have lost everything. Now we are going to our own country. What will we do then because our country is so poor?''

But Perera said he was determined that his years of labor in Kuwait would not be lost.

''I must go back to Kuwait,'' he said. ''My money is in Kuwait.''

-30- 4016

#90303u1286 10/30/1990 ~United Press International

WASHINGTON (OCT. 30) UPI - Mutual fund sales declined to $10 billion in September from $11 billion during the same month last year and $13.4 billion in August, the Investment Company Institute said Tuesday.

Assets of all mutual funds also decreased to $1.02 trillion from $1.03 trillion the month before while assets of long-term funds fell to $537.8 billion from $554.7 billion in August.

Short-term fund assets also slipped during the month to $484.4 billion from $484.8 billion the month before.

Jacob Dreyer, the institute's vice president and chief economist, attributed

the falloff to declining stock prices.

''Portfolio values of equity funds shrank in September by about 5 percent and those of bond funds by over 1 percent,'' he said. ''Despite the turmoil in financial markets, mutual fund shareholders stayed the course.''

Dreyer said there were no significant outflows from either short- or long-term funds.

Sales of stock mutual funds totaled $4.4 billion in September, down from $5.1 billion in August and $5.5 billion from year-earlier levels. Growth-and-income funds topped equity sales categories with sales of $1.7 billion and also led sales of all long-term funds.

Bond and income mutual fund sales declined to $5.6 billion in September from $8.3 billion in August but increased from $5.4 billion during the same period last year.

Sales of long-term municipal bond funds declined to $1.9 billion from $2.4 billion in August but remained the same as year-ago sales levels.

Total fund redemptions declined to $7.1 billion in September from $9.2 billion in August and $8 billion in September 1989. Equity fund redemptions fell to $3.2 billion during the month from $4.6 billion in August and $3.6 billion in the year-earlier month.

Sales of stock and bond funds in September totaled $2.9 billion, down from $4.2 billion in August and $3 billion in September 1989.

-30- 2098

#90303u1289 10/30/1990 ~United Press International

WASHINGTON (OCT. 30) UPI - The most widely used asthma drug can cause serious complications, including seizures and permanent brain damage, and should be banned for sale without a prescription, a lawyers' group said Tuesday.

While the drug theophylline can provide relief to millions of asthma sufferers when used carefully, doctors and the public are not well advised of the potential dangers, the group said.

''Theophylline can be a life-saver or a life-taker - and an unsuspecting public often doesn't understand the real risks,'' said Michael Maher, president of the Association of Trial Lawyers of America.

The group held a news conference with several doctors who described the dangers and an Everett, Wash., man who sued one of the drug's makers after his daughter suffered brain damage from seizures he said were caused by the drug.

About 10 million Americans suffer from asthma and about 10 million people in the United States, including asthma sufferers and those with other breathing problems, are believed to use theophylline in some form.

The drug is available by prescription and in at least five over-the- counter asthma and bronchitis medications including Bronkaid tablets and Primatene tablets, the lawyers' group said.

Schering-Plough Corp. of Madison, N.J., one of more than 30 companies that make the drug in the United States, held its own news conference immediately afterwards to praise the drug as an ''important, well- established treatment.''

''Properly used, under physician supervision and in accordance with approved labeling, serious theophylline side effects have been very rare,'' the company said.

If used properly, the drug can be very beneficial and safe. But the difference between the amount of the drug that is effective and amount that is unsafe is very small, experts said. Patients may not realize they are taking too much of the drug if they take a non-presciption medicine containing the drug with a prescription form, they said.

In addition, doctors are often not well informed about the potential dangers of the drug and the need to carefully monitor patients, the group said.

The group said it had learned of at least 26 cases of serious complications, including 10 deaths, that had occurred since 1975 among patients taking theophylline.

In addition, there were some 6,000 cases of theophylline overdoses reported nationwide in 1989 alone, including 94 serious cases and 34 deaths, the group said.

''I don't want to see other children have the toxic reaction my daughter did '' said Jeffry Pollock, who said his 7-year-old daughter Jennifer suffered severe brain damage in 1986 due to seizures triggered by the drug and the flu.

The group has asked the Food and Drug Administration to ban the drug in non-prescription form, make warnings for doctors stronger and make warnings for patients clearer.

FDA spokeswoman Faye Peterson said the agency banned the sale of the drug alone without a prescription in 1986, and proposed banning the drug in combination form in 1988 because the dosages were too small to be effective.

Drug companies opposed the ban on combination medicines, and the agency is reviewing additional evidence they submitted in support of their position. But Peterson said she expected the ban to be implemented within a year.

#90303u1305 10/30/1990 ~United Press International
JERUSALEM (OCT. 30) UPI - Three Arabs allegedly tried to plant a bomb in a Tel Aviv area store Tuesday but the device exploded prematurely, killing one suspect and wounding the other two, officials said. Two other Arabs were killed in incidents in the Israeli-occupied West Bank.

The events signaled renewed violence against Israelis that erupted Oct. 14 when a West Bank Palestinian stabbed to death three Israelis in Jerusalem. Since then, nine Israelis have been wounded in attacks by Arabs and two Palestinians killed in the communal violence.

The attacks followed Oct. 8 riots in Jerusalem's Old City, when Israeli security forces killed at least 20 Arabs.

In order to prevent more attacks and anti-Arab reprisals, the army sealed off the occupied West Bank and Gaza Strip for four days, preventing 110,000 Palestinians from going to work in Isrel. They were reopened Sunday amid debate whether Israel should economically separate itself from the territories.

After two days of relative calm, three Arabs were killed in a rash of incidents Tuesday.

One Palestinian was killed and two wounded by a bomb they allegedly were trying to plant in grocery store exploded prematurely. The dead man and one of the others were brothers who worked in the store, located in Bnei Brak, a predominately ultra-Orthodox suburb of Tel Aviv.

In the West Bank city of Nablus, a Palestinian teenager was shot and killed when he knifed an Israeli guard on a oil delivery truck, military sources said. The guard was moderately wounded in the attack, which occurred near the military administration building.

The guard, who was stabbed about 10 times, managed to fire one shot before the driver called for help. Security forces arrived and shot the attacker when he ignored orders to stop stabbing the man.

The suspect, identified as Haitham Jalamah, 17, by Palestinian sources, belonged to the Hamas Islamic fundamentalist group, Army Radio reported.

However, three masked members of the Islamic Jihad organization marched through the Nablus's Casbah, taking responsibility for the incident and proclaiming Jalamah, 17, a martyr, Palestinian sources said.

Monday, Defense Minister Moshe Arens declared the Islamic Jihad an outlawed organization. The small group, established in the late 1970s, is considered to

be the most extreme Palestinian organizations in the occupied territories, the army spokesman said. Its goals are the destruction of Israel through a holy war and the establishment of a Islamic state.

Nablus, the largest West Bank town, was put under curfew and declared a closed military zone.

Maj. Gen. Yitzhak Mordechai, commander of the Central District, warned that the army would respond forcefully to any attacks.

''It is possible that there will be more attempts such as this,'' he told Army Radio, ''but anyone who tries must know ... he is taking a big risk because the security forces will react, as they reacted here, to prevent any danger to the lives of our forces or citizens.''

Also Tuesday, an Arab stabbed a policeman at the East Jerusalem bus station. The officer was lightly wounded and the suspect arrested, police said.

In Tulkarm refugee camp, a patrol encountered a group of youths wanted by the security forces. During a chase, a youth, identified by Palestinian sources as Ahmed Alsurji, 18, was shot and killed, military sources said. In clashes that erupted later, three Tulkarm residents were wounded, the sources said.

The commander of the area, who was not identified, told Army Radio that Alsurji belonged to a group called the ''Black Tigers'' that allegedly had carried out murders of suspected collaborators in the area.

In Gaza City, a 45-year-old Palestinian suspected of collaborating with Israeli authorities were shot and killed Tuesday by masked Arab activists, Palestinian sources said.

#90303u1307 10/30/1990 ~United Press International

(OCT. 30) UPI - Scalding steam from a ruptured boiler line killed seven sailors aboard the helicopter carrier Iwo Jima in the Persian Gulf today. One of four sailors injured by the hot pressurized steam died after being helicoptered to the hospital ship U-S-S Comfort. A spokesman says all the injured sailors suffered steam burns. The accident occurred as the Iwo Jima was leaving Bahrain for amphibious exercises in the gulf.

An eighth American serviceman died in an accident in Saudi Arabia during a night exercise. He was identifed as Marine First Lieutenant Michael Monroe of the First Battalion of the Third Marines. A spokesman says Monroe was killed and three other Marines injured when a multi- purpose vehicle flipped over in the desert. So far, 38 U-S servicemen have died in accidents during the Operation Desert Shield build-up.

NASA has its fingers crossed as engineers pump super-cold hydrogen aboard the shuttle Columbia in a crucial search for an elusive fuel leak. The fueling operation began shortly after Noon. The engine compartment of Columbia has been outfitted with a impressive array of television cameras and special sensors to pinpoint any leaks. Also today, the space agency cleared the shuttle Atlantis for launch on a secret military mission on November 9th. That's one day earlier than originally planned.

Israeli police followed a trail of blood today as they arrested two of three Arabs who allegedly tried to plant a bomb in a Tel Aviv grocery store. The third suspect died when the explosion went off prematurely in a predominantly ultra-Orthodox suburb. Military sources also report that a Palestinian was shot and killed after knifing an Israeli guard on an oil delivery truck in the West Bank city of Nablus.

Germany will pay almost eight-BILLION dollars as its part of an agreement that will get 380-thousand Soviet troops out of what used to be East Germany. The withdrawal will come in stages and is expected to be finished by 1994. Until then, the Soviet troops will have to respect German law under terms of the bilateral agreement.

A politician in Germany's Greens environmental party who also is a forestry expert says a report yet to be released shows that air pollution has damaged nearly 60 percent of Germany's forests. A separate survey taken in eastern Germany shows the damage there may be as high as 95-point-five percent. Sulphur dioxide and nitric oxide are blamed as the two major causes of the forestry damage.

Dense fog is blamed, in part, for a pick-up truck-bus accident that injured 22 students headed for classes in Alvin, Texas, this morning. The pick-up truck slammed into the driver's side of the bus, injuring the bus driver as well as the students. The pick-up driver escaped injury. Officials at the Alvin Community Hospital say the students had only minor injuries.

Workers tunneling under the English Channel are about to make history. Project managers say British and French work teams digging from opposite ends will connect a service tunnel with a probe within 24 hours, creating the first direct link between England and the continent. The tunnelers will link up when a two-inch wide steel pipe appears on the French side of the wall of chalky soil. The actual break-through is set for early December. The 31-mile Chunnel will end Britain's geographical isolation from Europe when rail traffic begins in mid-1993.

#90303u1347 10/30/1990 ~United Press International

HOLLYWOOD (OCT. 30) UPI - The nation's movie theaters have grossed nearly $4 billion so far this year, only about 1 percent behind last year's

record-setting pace, when box office sales reached $5 billion by year's end.

Despite a traditonally slow mid-fall performance, the year-to-date box office hit $3.99 billion over the weekend, compared with $4.05 billion for the same period last year, Daily Variety said Tuesday. In 1988, the total at the same juncture had reached $3.57 billion.

The top 10 movies of the weekend - led by ''Stephen King's Graveyard Shift'' -drew $30.8 million over the weekend, off 7 percent from the previous weekend's $33.1 million and 6 percent behind the $32.6 million scored by the top 10 a year ago.

For the week, the domestic box office reached $68.5 million, off from $81.2 million for the year-ago week. In 1988, the same week produced ticket sales of $64.1 million.

The low box-office figures are unlikely to cause much concern within the industry, as they come just before the big push for Christmas-season films. The only major release expected to open this weekend will be Adrian Lyne's mystery-thriller ''Jacob's Ladder.''

But the Christmas season figures to be busy with Paramount announcing Monday that it will adhere to its previously announced plans to open ''The Godfather Part III'' on Christmas Day. Many had expected the sequel to be delayed.

The Christmas rush will begin Nov. 16 with three films debuting - Disney's animated ''The Rescuers Down Under,'' Fox's thriller ''Home Alone'' and MGM/UA's ''Rocky V.'' Three more major releases will open five days later: Disney's ''Three Men and a Little Lady,'' Fox's ''Predator II'' and Warner's ''The Nutcracker Prince.''

Some of the other major Christmas films this year will be Warner's ''Bonfire of the Vanities,'' Columbia's ''Misery,'' Tri-Star's ''Look Who's Talking Too'' and Universal's ''Kindergarten Cop.''

Meanwhile, ''Ghost'' should become the year's top-grossing film by the end of next weekend. The Patrick Swayze-Demi Moore movie has pulled in $176.5 million for Paramount and trails only Disney's ''Pretty Woman, '' which has collected $177.8 million in ticket sales.

Five other films have topped the $100-million mark this year: New Line's ''Teenage Mutant Ninja Turtles'' coming in at $133.1 million; Paramount's ''Hunt for Red October'' at $120.7 million; Carolco's ''Total Recall'' at $118.3 million; Fox's ''Die Hard 2'' at $114.4 million and Disney's ''Dick Tracy'' at $103.7 million.

KHARTOUM, SUDAN (OCT. 30) UPI - The Sudanese Army took armored cars and guns into a camp of up to 30,000 refugees on the outskirts of Khartoum, forcing its displaced inhabitants out and reducing their homes to a smoking ruin by Tuesday.

The refugees were then trucked out of the city.

Hilaat Shouk, a notorious shanty on a garbage dump six miles from downtown Khartoum, became a symbol in 1987-8 for those displaced from southern Sudan by the country's southern civil war - a war still raging.

It was a bleak place, a ragbag of sackcloth tents strewn across the vast flat tip where southern tribesmen and women scrounged a feeble existence from bootlegging sorgum beer, charity and whatever menial jobs they could find.

Aid workers, who dealt with these black African refugees in Moslem, Arab-dominated Khartoum, said the settlement, the largest in Khartoum itself, had grown to 30,000 people.

At dawn last Sunday, however, hundreds of soldiers armed with automatic weapons and backed by armored personnel carriers, moved into Hilaat Shouk and started, on government orders, to bulldoze the flimsy dwellings there.

They cut off the water, supplied through stand-pipes by the British- based aid organization Oxfam, the week before.

There was no resistance, and when reporters visited the scene Tuesday, the camp was gone. A huge pall of stinking black smoke rose from burning tents into the hot air. A score of soldiers oversaw the removal by truck of the last stragglers with their possessions.

''They came and told us to pack up and move,'' said James Wala Kot, a camp-dweller who had escaped the security net and set up his makeshift tent on a construction site some distance from Hilaat Shouk.

''They wanted us to go to Jebel Awlia. But there is no water at Jebel Awlia,'' he said.

Aid workers confirmed that at least 150 families had arrived at Jebel Awlia, 25 miles south of Khartoum, where the government designated a site for them to live.

''They have no water, and spent a whole day without food,'' said one worker, who requested anonymity.''There is no work for them there. Hilaat Shouk was a rubbish dumping area. No one wanted it.''

The aid workers said the Sudanese Council of Churches took 50 sacks of grain,

a water truck and 150 blankets down to Jebel to provide scant interim relief to the displaced.

The government announced its intention of moving Khartoum's displaced people at the start of this year, saying the camps were hotbeds of crime and that the land belonged to people who were claiming it back.

The original plan was to work out a comprehensive resettlement scheme with non-governmental organizations. But two weeks ago, the government took a snap decision to start moving people out.

Brig. Pio Yukwan, a member of the staunchly Islamic ruling Revolutionary Command Council, said Tuesday the decision was a humanitarian one, and that the displaced would be better off at Jebel Awlia, which he said was plentifully supplied with water.

''We don't force displaced people to go back home,'' he told a news conference Tuesday.

Sudan currently faces a mounting food crisis in the provinces, with up to five million people facing starvation early next year if help does not come, according to the United Nations watchdog Food and Agriculture Organization.

Given the shortages - and with rationing in the capital - aid workers said they believed the government was privately worried about having so many southerners, mostly black African Christians and animists, on its doorstep.

There are an estimated two million displaced southerners in the Khartoum area, mostly not living in the 23 camps which ring the city.

''The government wants them kept at some isolated place. Maybe these people are a problem. They brew local beer,'' said one aid worker.

Alcohol is banned under Sudan''s strict Islamic law.

''It is easy to move them without people making a protest,'' he said. ''There is no one to represent them.''

The government, meanwhile, Tuesday said food shortages were due to the large number of refugees in the country and said the international community should feed these refugees while the Sudanese looked after themselves.

It denied it had said Monday that it would not accept international food assistance.

ST. LOUIS (OCT. 30) UPI - Scientists reported more encouraging results in the first attempt to treat muscular dystrophy by implanting healthy muscle cells Tuesday, saying the method significantly boosted the strength of three boys' big toes.

In June, Dr. Peter Law of the University of Tennessee at Memphis generated excitement when he reported the experimental procedure, called myoblast transfer, improved muscle strength in the toe of one boy suffering from Duchenne muscular dystrophy.

Now, similar promising results have been produced in two more patients, Law told the Society for Neurosciences annual meeting.

Currently, there is no treatment for Duchenne muscular dystrophy, the most common and severe type of muscular dystrophy in children. The inherited disorder strikes about one in every 3,500 boys, damaging muscles and often leading to death before age 20.

In Law's experiment, three boys ages 10 and 11 received injections of healthy immature muscle cells, called myoblasts, in a foot muscle controlling one of their big toes. The other foot received a dummy injection.

It was hoped the transplanted cells, which are usually taken from a relative, will produce dystrophin, a protein that is missing in the muscles of muscular dystrophy patients because of a genetic defect.

Three months after the transplant procedure, tests show the muscle function in the treated toe had improved 30 percent and 80 percent in the two boys whose transplanted cells were donated by a brother and 13 percent in the boy whose cells came from a non-relative, Law said. In contrast, he said the muscle function grew worse in the untreated toe muscles.

Furthermore, the treated muscles contained dystrophin and looked normal, while the untreated muscles lacked dystrophin and did not look healthy, Law said.

No side effects were reported from the treatment. The boys received the immune-suppresing drug cyclosporine to prevent rejection of the transplanted cells.

Although the early results are heartening in the fight against the deadly disease, researchers emphasized myoblast transfer is taking place on a very limited basis and may never become a standard treatment for muscular dystrophy.

It would take hundreds of millions or billions of cells and thousands of injections to treat all of a patient's muscles. There is also the problem of treating the heart muscle, which is sometimes damaged by the disease.

The Tennessee group has treated 11 muscular dystrophy patients since January

1990. Law did not report on the conditions of the other eight patients.

Researchers at the Montreal Neurological Institute in Canada have also started similar work, transferring myoblasts into an arm muscle of three Canadian boys. Although that team has said the transplants appeared to take, they have not yet released results on dystrophin production or muscle function.

Boston's New England Medical Center and Children's Hospital of San Francisco soon plan to begin myoblast transfer experiments.

#90303u1390 10/30/1990 ~United Press International

CAPE CANAVERAL, FL (OCT. 30) UPI - A $50 million Delta rocket carrying a $90 million communications satellite was cleared for launch Tuesday, the 200th flight of the workhorse booster since its debut in 1960.

The 126-foot, blue-and-white Delta 2 was scheduled for liftoff at 6:16 p.m. EST from the Cape Canaveral Air Force Station. Forecasters predicted an 80 percent chance of good weather, although high upper- level winds were a concern.

The rocket's payload was Inmarsat-2 F1, the first of a new generation of high-power communications satellites built by British Aerospace for the 62-nation International Maritime Satellite Organization, or Inmarsat.

''Inmarsat-2 is a new kind of satellite, specifically designed to handle mobile communications applications,'' Inmarsat Director General Olof Lundberg said in a statement. ''It will ... provide communications to Earth stations small enough to be hand portable.''

The flight plan called for the solar-powered 2,100-pound satellite to be ejected into a preliminary elliptical orbit about 21 minutes after blastoff. An on-board rocket was scheduled to fire later to boost the satellite toward its final circular orbit 22,300 miles above the Indian Ocean equator.

The flight marked the 200th Delta mission dating back to May 13, 1960, when a less powerful version of the McDonnell Douglas Space Systems Co. booster debuted carrying an Echo 1 communications satellite.

That mission ended in failure, but a Delta launched three months later, on Aug. 12, 1960, was successful, kicking off one of the most reliable American rocket programs ever mounted. In 199 launches before Tuesday's flight, only 12 were failures.

Constantly upgraded to improve performance, Delta rockets have evolved through 16 different configurations. The Delta 2 currently in service was built by McDonnell Douglas specifically to launch 20 Air Force Global Positioning

System satellites under contracts valued at $669 million.

McDonnell Douglas also markets the rockets on a commercial basis and prior to Tuesday's launch, the company's record stood at 21 successes in a row dating back to May 3, 1986, and a perfect 13 straight for the upgraded Delta 2, including six commercial launches.

Inmarsat-2 F1 is the first satellite owned and operated by the London-based Inmarsat consortium, which has focused on providing global satellite communications service for ships at sea using leased radio transponders aboard eight other satellites.

Ahmad Ghais, director of engineering and operations for Inmarsat, said the organization plans to greatly expand service in the 1990s to include users on the ground and in the air around the world. The company's motto for its expanded service is ''global mobile.''

''Anyone on the go should be able to use our satellites to communicate anywhere on Earth,'' Ghais said.

Inmarsat paid $160 million for its first wholly owned satellite, the Delta 2 rocket and ground services. The price tag also included the cost of about $70 million in insurance that was purchased commercially at a rate of 16.5 percent. The balance of the mission cost was self-insured by the company.

Inmarsat currently provides direct-dial voice, fax and data transmission services for ships at sea. But the company is aggressively marketing small terminals that can be used aboard aircraft or in the field.

Mobile transmission units currently cost about $15,000, but the price is expected to drop into the $5,000 range in a few years, bringing instant satellite communications into the reach of small business users.

''Today we have about 12,000 terminals in use,'' Ghais said. ''Most of these are on ships (but) about 1,000 are on land. We're looking toward hundreds of thousands (of users) later this decade.''

A second Inmarsat-2 satellite is scheduled for launch aboard a Delta 2 in February 1991. Two more satellites will be launched by French-built Ariane rockets in July and November of next year.

#90303u1394 10/30/1990 ~United Press International

WASHINGTON (OCT. 30) UPI - Supreme Court Justice David Souter, whose nomination hearings this summer were marked by a refusal to disclose his views on abortion, played a key role Tuesday in debate over the only major abortion case before the court this term.

In a series of questions during oral arguments, Souter appeared skeptical about a government effort to bar health care workers at federally financed family planning clinics from discussing abortion as an option with pregnant clients.

Souter asked Solicitor General Kenneth Starr, arguing for the government, whether the proposed regulations to the 20-year-old Title 10 family planning program would let a doctor tell a woman whose life would be threatened by having a baby that ''you are in danger'' and an abortion is indicated.

Starr said the regulations would allow a doctor to tell her she is in danger and needs treatment, but not to recommend an abortion.

''To actually go forward and counsel, 'You need an abortion,' is beyond the regulations,'' said Starr.

But Souter wanted to know why, if the woman already is pregnant and so beyond the government's professed pre-pregnancy scope of the program, a doctor could still not discuss abortion without the clinic risking a loss of government money.

Starr said in that case a physician would have ''transcended the boundaries of Title 10.''

''For all we know, her blood pressure is going to result in a stroke within the next hour,'' Souter said.

In such a circumstance, he asked, cannot a physician perform his normal functions and discuss a full range of medical options with the woman? ''The (government) can in effect preclude professional speech?''

The exchange was part of hour-long oral arguments over whether regulations proposed to Title 10 of the Public Health Service Act of 1970 violate freedom of speech and the rights of poor women to be informed of their medical options.

Title 10 is the largest source of federal support for family planning and reproductive health care, providing about $200 million a year to 4, 000 clinics servicing 5 million low-income women nationwide.

The government claims the regulations are needed to uphold the original intent of Congress not to provide money for abortion-related services.

Opponents acknowledge the government has the right to withhold money for abortions, but claim it cannot prohibit speech simply because it finances a project. A decision in the case is expected sometime next year.

''We depend upon our doctors to tell us the whole truth, whoever is paying the

bill,'' said Laurence Tribe, a lawyer from Harvard Law School arguing the case against the government. ''It's strictly a First Amendment argument.''

Starr said Title 10 is a ''specialized'' family planning program dealing only with pre-pregnancy. It provides a short ''transition'' for pregnant women, said Starr, providing them with a referral list of facilities that focus on childbirth and - under the new regulations - excluding those whose major function is to provide abortions.

Under the regulations, a pregnant woman asking about abortion can be told only that the Title 10 program does not consider it an ''appropriate method of family planning.'' She cannot be told where to go for an abortion.

Starr said various guidelines used to administer Title 10 in the past have caused ''chaos'' and allowed some recipients of government money to violate the original intent of Congress by advocating abortion.

Initially, Title 10 allowed the discussion of abortion as an option. Since 1981 it has required that abortion be mentioned as one of the legal options open to a pregnant client.

#90303u1398 10/30/1990 ~United Press International

NEW YORK (OCT. 30) UPI - Consumer hoarding has helped drive up heating-oil prices and supplies should be sufficient unless there's a war or the winter is "extraordinarily" cold, the oil industry's chief spokesman said Tuesday.

Charles DiBona, president of the American Petroleum Institute, also said oil prices have been driven up by speculation over war in the Middle East rather than any shortage of supplies, but defended the role of oil-trading exchanges.

"We believe that the stocks (of heating oil) held by private individuals and companies outside the petroleum industry are considerably above normal," he replied to a question during a briefing of reporters.

"We think ... customers are entering winter with a lot more heating oil than they normally have," DiBona said, as a result of an unusual surge in buying since Iraq's Aug. 2 invasion of Kuwait triggered the Middle East crisis. In addition, heating oil stocks held by the oil industry are six million to seven million barrels above "historical levels" this time of year, he said.

"Barring some unusual, unforeseen developments such as extraordinarily cold weather or loss of crude supply, domestic refineries appear capable of directly supplying all or nearly all the nation's heating oil requirements," he said.

Asked why heating oil prices have risen so sharply, DiBona said, "It's

probably due in the United States ... to stockpiling." The price rise in "middle distillates," which includes heating oil, jet fuel, and diesel, is also a "worldwide phenomenon," the industry executive said.

"There's much more heating oil imported into the United States than gasoline so you're much more affected by world prices," he added. U.S. refineries produce on average 3.3 million barrels a day of heating oil and diesel fuel in winter although they surged above that level last "one-in-70" year winter at the expense of gasoline output, DiBona said.

Imports are normally 200,000 barrels to 400,000 barrels daily and the oil-industry's stocks, currently at 337 million barrels, could be drawn down at the rate of 280,000 barrels a day, he said.

The Energy Department estimates daily demand this winter will average 3.3 million barrels, which could surge to 3.5 million barrels if the coming winter has "one-in-20 year" cold weather rather than last year's "one-in-70," he said. "So, short of some major problem in the Mideast that shuts off crude supplies, we should be in pretty good shape this winter," DiBona said.

Saudi Arabia and other nations of the Organization of Petroleum Exporting Countries have made up all but 500,000 barrels of the 4.2 million to 4.3 million barrels lost daily by the U.N. embargo of Iraqi and Kuwaiti crude oil, he said.

Asked if war speculation on the New York Mercantile Exchange, the world's largest oil-trading exchange, rather than any shortage in supply had caused the rise in oil prices, DiBona said prices would have been "softer" without such speculation, but said the exchange had lessened price "volatility."

"I would agree that the current price of crude oil reflects the anticipation of future supply-demand relationships. And if there were not that concern the current supply-demand situation would result undoubtedly in softer prices than there are today," he said.

Members of Congress had said the presence of the Merc and other exchanges are causing rapid changes in price, DiBona said. "I think that's absolutely mistaken. I think the existence of those markets has reduced the volatility, not increased it." Asked how high oil prices would rise if war broke out in the Middle East, DiBona replied, "It's highly unpredictable what would happen."

#90303u1416 10/30/1990 ~United Press International
ROCHESTER, WI (OCT. 30) UPI - Alaska and Hawaii have the highest average prices for gasoline among the 50 states, while Georgia and Missouri have the lowest average prices, a Wisconsin management consulting firm said Tuesday.

The study by Runzheimer International of Rochester, Wis., shows gasoline in Wisconsin is slightly more than the national average of $1.387 a gallon, with an average price per gallon in Wisconsin of $1.406. The study is based on October prices for regular unleaded self-serve gasoline.

The study shows Alaska had the highest average price per gallon of $1.607 cents while Hawaii was second at $1.56. Within the continental United States Nevada, Nebraska, and Oregon had the highest prices, respectively, of $1.49, $1.483, and 1.477. Georgia had the lowest price at $1.286, while Missouri had a price of $1.302, and South Carolina $1.316.

Lee Czarapata, vice president of Runzheimer's Transportation Division, said a variety of factors "influence the discrepancies in gas prices throughout the United States." He said the top factors are the state gas tax, which is added directly to the retail pump price, as well as availability of fuel.

"If there is a great deal of competition in an area with discount service stations and off-brands available, gas prices will be less," he said. "In out-of-the-way places, where gas stations are few and far between, gas prices will be higher."

He also said transportation costs of fuel and cost of living are important factors in the cost of gasoline. "In areas of high labor rates and real estate costs, prices will be pushed higher by the general economy," he said.

-30- 1853

#90303u1417 10/30/1990 ~United Press International

TACOMA, WA (OCT. 30) UPI - Like a turkey with oven reservations on Thanksgiving, being a black cat around Halloween is risky business.

Ask Tom Prest, manager of the Garden and Pet Store in suburban Lakewood, who has come to shun any dealings with black cats before Allhallows Eve.

''They are probably used for everything from pranks to other more morbid possibilities and it's something we don't want to get into,'' Prest said Tuesday. ''We're selling these animals as pets and there's too much of a possibility that somebody might use them for other purposes.''

Several weeks before Halloween, Prest stops accepting donations of black kittens.

''If somebody calls offering a black kitten, we just suggest that they hold on to them for a couple of weeks and try back after Halloween, '' he said.

And he has a warning for owners of black cats: Keep them indoors!

''There are always rumors of some sort of satanic cult snatching black cats

and barbecuing them. The more prominent issue, though, is how many of them are going to be used for tricks.''

Last week, a local resident came in asking for help finding a missing pet. When Prest heard it was a black cat, he offered his condolences and told the customer to avoid having too much hope.

''That's the other side of it,'' Prest said. ''I have only circumstantial evidence, but there seems to be a substantial amount of theft of black cats, or at least a substantial number of black cats that turn up missing this time of year.''

Prest took over his pet store three years ago and adopted his black cat policy on the advice of existing staff.

''Last year we had a kitten in within a few weeks before Halloween and one of my employees was suspcious of some of the people that were looking at it, because they didn't look very reliable.

''Sometimes we've had a bunch of teenagers running in trying to buy them around Halloween. So I don't sell them, nor do I sell chicks around Easter.''

Regarding the latter, Prest notes that local laws no longer allow the selling of individual chicks ''because people were buying baby chicks and giving them to kids and they (the chicks) were dead within a week.''

#90303u1436 10/30/1990 ~United Press International

(OCT. 30) UPI - Eight more American lives were lost in Operation Desert Shield today... seven of them sailors aboard the helicopter carrier U-S-S Iwo Jima. Three other sailors were seriously burned in the incident, in which a high-pressure steam line burst, scalding the crewmen.

Another American- a Marine- was killed when a multi-purpose ''humvee'' vehicle overturned during a night exercise in Saudi Arabia. Three other Marines were injured in that accident.

President Bush met with bi-partisan congressional leaders and his top military brain trust at the White House today and called for a continued build-up of U-S forces in the Persian Gulf. Maine Republican Senator William Cohen said after the 75-minute meeting- ''I don't have any impression we're moving closer to war.''

Gasoline prices didn't go up last week, but they didn't come down either. The American Automobile Association says the average nation-wide price of a gallon of regular unleaded sold at self-service pumps was unchanged at one dollar 38 cents. It's the first time gasoline prices have NOT risen in five weeks.

Engineers are pumping super-cold liquid hydrogen into the fuel tanks on the shuttle Columbia in a critical test to determine whether any more hydrogen leaks exist on the spacecraft. The Columbia has been grounded since May because of hydrogen leaks.

Private economists got a surprise this morning when the Commerce Department reported that the nation's gross national product- the total of all goods and services produced in the U-S economy- was one-point- eight percent higher in the third quarter. The stronger-than-expected increase is attributed to consumers buying cars, vans and trucks.

Officials from Poland and Germany are meeting in Warsaw for two days of talks on a treaty confirming the existing post-war border between the countries. The western portion of Poland, between the Oder and Neisse Rivers, used to belong to Germany. But the Germans say they will make NO claim to any territory.

In northern India today, security forces opened fire on thousands of Hindus as they tried to begin construction of a temple on the site of 16th Century Moslem mosque. The official Press Trust of India says thousands of Hindus broke down barricades in a Hindu holy town 345-miles southeast of New Delhi. The violence came despite roadblocks, a curfew and the presence of thousands of para-military troops.

Gourmet Kobe beef is making its debut in New York City today, but a 12-ounce steak from one of the hand-massaged, beer-fed steers will cost you 100 dollars. The meat is so expensive because of the tender, loving care the cattle receive... including daily rubdowns with swatches of straw and beer fed from a baby bottle.

-30- 2920

#90303u1447 10/30/1990 ~United Press International

(OCT. 30) UPI - A steam line connected to a boiler ruptured aboard the USS Iwo Jima in the Persian Gulf, killing eight sailors and seriously burning two others, and a Marine died when a vehicle overturned in Saudi Arabia, U.S. military officials said Tuesday.

President Bush met at the White House with congressional leaders and his national security advisers. He staked out a ''stay the course'' strategy for the crisis, calling for a continued build-up of U.S. forces for possible use in the event other measures do not push Iraqi leader Saddam Hussein out of Kuwait.

Bush signaled a continued reliance on economic pressure and military intimidation during the meeting.

Sen. William Cohen, R-Maine, said Bush did not indicate the economic sanctions

meant to punish Iraq for its Aug. 2 invasion of Kuwait, were nearing a make-or-break point and added, ''I don't have any impression we're moving closer to war.''

Also Tuesday, Iraqi Foreign Minister Tariq Aziz said Soviet President Mikhail Gorbachev had contributed to the search for a peaceful solution to the standoff.

''There were certain positive elements regarding the search for a peaceful solution and the recognition of the existence of a link between regional issues,'' Aziz told state-run Baghdad Radio.

Gorbachev, the winner of the 1990 Nobel Peace Prize, told reporters that war in the gulf is unacceptable and the crisis must be settled peacefully. Gorbachev, who met for two days with French President Francois Mitterrand, suggested Saudi Arabia work toward an ''inter-Arab'' solution.

Gorbachev's statement came the day after a Soviet envoy failed to win a promise from Iraq that it would end its nearly 3-month-old occupation of the gulf emirate.

The Palestine Liberation Organization welcomed Gorbachev's proposal. ''There is a serious attempt going on now to reach an Arab solution to the gulf crisis '' PLO official Nabil Shaath told reporters in Cairo. ''And there has also been an encouraging Iraqi response.''

At the Pentagon, Navy spokesman Lt. Cmdr. Alan Dooley said steam leaked from the Iwo Jima's boiler system as the helicopter carrier left Manama, Bahrain after a routine port call. Six sailors died at the scene and two others after being taken to the Navy hospital ship USNS Comfort. The other two injured also were put aboard the hospital ship.

The Iwo Jima, which arrived in the gulf Sept. 16 from its home port in Norfolk Va., was heading for amphibious exercises, said Navy spokesman Cmdr. J.D. Van Sickle in Dhahran, Saudi Arabia. The ship is part of the U.S.-led international force dispatched to the gulf region after Iraq's invasion of Kuwait.

''Shortly after it got under way, the ship suffered a leak in a steam line, a rupture in a steam line in the boiler room,'' Van Sickle told CNN.

In another accident, a U.S. Marine was killed and three others injured when a multipurpose ''humvee'' vehicle overturned during a night exercise in Saudi Arabia, a Marine spokesman in Washington said.

The spokesman identified the dead Marine as 1st. Lt. Michael N. Monroe. His hometown was not immediately available. The injured servicemen, from the 1st Battalion, 3rd Marines, were in stable condition on a Navy hospital ship.

A Marine spokesman in Saudi Arabia said three other sailors were injured, one seriously, Monday when two 50-caliber rounds apparently were accidently fired into their vehicle as it approached a Marine outpost.

In all, 38 U.S. servicemen have died in accidents during Operation Desert Shield.

The Pentagon announced that U.S. forces would conduct amphibious exercises in the north Arabian Sea from Tuesday through Nov. 8. The exercises involve 20 airplanes and 75 helicopters. Pentagon officials would not disclose the number of ships or Marines involved.

DUMFRIES, Scotland (OCT. 30) UPI - Pan American World Airways staff at London's Heathrow Airport made two security blunders on Dec. 21, 1988, the day a bomb was placed aboard a Boeing 747, destroying the plane and killing 270 people, a security official said Tuesday.

Michael Jones, who served as Pan Am's security manager at Heathrow at the time of the disaster, told a fatal accident inquiry that the breaches involved twice allowing baggage to go on a flight unaccompanied by a passenger, a contravention of U.S. aviation regulations.

He said no blame had been passed for breaking of the rules, which are aimed at preventing an extremist from checking a bomb onto an aircraft and then not taking the flight.

Jones said an American passenger, Jaswant Singh Basuta, had been singled out for special checks and did not take his seat on doomed Flight 103, but his luggage remained on the New York-bound aircraft.

He said the baggage of Nicola Hall - a 23-year-old Australian secretary who was one of the 270 victims of the tragedy - had been sent on an earlier flight also breaking the rules.

Jones, a former detective sergeant with London Metropolitan police, said Basuta had been singled out as ''an individual of possible concern.'' He had discovered Basuta was missing and then located the passenger, who he instructed to swiftly go to the departure gate.

Asked if Basuta had been casual and relaxed or unconcerned, Jones replied: ''He ran towards the departure gate - he wanted to be on the flight.''

Jones said he was not aware of any instructions to take special security precautions for the flight. Since the disaster, procedures had been altered

and there was now a full reconciliation of baggage and passengers, he said.

WASHINGTON (OCT. 30) UPI - Yields fell on two-year T-notes Tuesday to an average of 7.84 percent, the lowest since 7.71 percent in December 1989, the Treasury Department announced.

The government said it auctioned $12.1 billion of the 7 3/4 percent interest rate notes at an average of $99.836. At the September auction, the average yield was 8.18 percent.

MOSCOW (OCT. 30) UPI - Thousands of people held candles and prayed Tuesday at a ceremony unveiling a stark grey boulder placed near the KGB's Lubyanka headquarters as a monument to the millions once imprisoned in Soviet labor camps.

The Memorial Society, dedicated to those who suffered during the reign of terror initiated by Josef Stalin, staged the emotionally charged demonstration in downtown Moscow in the shadow of the looming black statue of Felix Dzherzhynsky, founder of the secret police.

''The best minds of our country were exterminated in the prison camps,'' said Genrikh Altunyan, an Armenian deputy from the Ukraine. ''We must do everything possible so that this will never happen again.''

Altunyan told the crowd, which police said numbered about 5,000 people, that he served time in a labor camp several times in the 1970s and 1980s.

Throughout the rally, people passed up red carnations to be placed on the boulder's grey marble base with the inscription: ''This rock from the grounds of the Solovetsky Labor Camp has special significance and was erected by the Memorial Society in honor of the millions of victims of the totalitarian regime.''

The 3-foot-3 boulder, sitting at a slant on the larger base, was transported by ship from Solovetsky, a monastery converted into the first prisoner camp in the early years of Communist rule after the 1917 Bolshevik Revolution.

Demonstrators, bundled up against a brisk autumn evening, lighted candles, held up photographs of loved ones who disappeared in the labor camps, observed a minute of silence and sang in a prayer service led by Russian Orthodox priest Gleb Yakushin.

Several clusters of Orthodox believers held aloft long staffs supporting icons in ornate gold frames glistening in the candlelight. Siberian poet Yevgeni Yevtushenko recited verses of homage to the Gulag victims, his voice ringing out in the night.

Several demonstrators interviewed in a Soviet television news report on the ceremony, broadcast later Tuesday night, broke down in tears as they told of relatives who had died in prison camps.

Alexei Artsibushev, 71, wore the battered, faded-brown stocking cap from his time in labor camps from 1946 to 1955 above the Arctic Circle in the northern cities of Vorkuta and Inta. The hat bore his prison identification number, U-102.

''We prisoners didn't have names,'' he said. ''We just had serial numbers, like cars.''

Artsibushev, wearing a wooden icon around his neck, said he was charged with engaging in ''anti-Soviet agitation and propaganda,'' but his eyes glistened as he recounted his activities in helping to run an illegal underground church.

''We did everything that needed to be done,'' he said.

Nearly all the dozens of banners and posters held aloft at the demonstration carried anti-KGB or anti-Communist slogans.

One banner showed two hands dripping with blood and read: ''The KGB has not washed its hands of blood.''

Other signs said ''Victims of Communist terror - the people remember you,'' and ''How much longer can we stand the Communist paradise?''

Speakers demanded that the KGB turn over its archives and allow the establishment of an institute to study the infernal machine that condemned millions to work in the Gulag camps on trumped-up charges often based on forced denunciations by acquaintances.

''This shows that society wants to take this organization (the KGB) into its own hands,'' said Yuri Mitunov, an independent Soviet journalist. ''Before, such a demand was considered extremist.''

Moscow Communist Party chief Yuri Prokofiev, who participated in the ceremony, said the deaths of millions of people in labor camps was ''homocide against the people and the party,'' but many demonstrators clearly implicated the party in the crime.

#90303u1517 10/30/1990 ~United Press International

NEW YORK (OCT. 30) UPI - New York may lose its status as the nation's second movie-making capital because studios feel the cinematographers' union has made production too expensive, industry sources reported Tuesday.

Most of the major production studios, represented by the Alliance of Motion Picture and Television Producers, have been negotiating with the International

Alliance of Theatrical Stage Employees and Moving Picture Machine Operators for a new contract to replace one which expires Wednesday.

No agreement has been reached and talks were reported at an impasse. City Hall was reported to be worried that studios are writing New York out of their scripts.

"If there is no contract, there probably won't be any movie starts scheduled here beginning Thursday," said Patrick Pleven, a spokesman for the Mayor's Office for Film, which works with the film industry to encourage movie-making in the city.

"We're very possibly looking at months without production in the city," said Nick Counter, president of the producers' alliance headquartered in Sherman Oaks, Calif. "Under current contracts with IATSE, the film-making situation in New York has become just too expensive."

Film production in New York reached a new high this year with 127 permits for feature films issued by the city through Oct. 19, compared with 101 permits for the entire year of 1989, Pleven said.

This makes New York the film industry's "second city" after Hollywood, having experienced a 35 percent increase in feature film-making in the past five years.

Pleven described feature films as a "big part" of the $3 billion that film-making, including television, documentaries, commercials, industrials and educational films, pours into the city's economy annually.

He said movie producer who are not a part of the filmakers' alliance probably will go ahead with plans to make films already scheduled. "Woody Allen, for instance, is set to start work on a new film here Nov. 15," Pleven said.

Studios affected by a failure to reach a new congract with IATSE locals 644, representing cinematographers, and 52, representing studio mechanics, would include Paramount, Columbia, Warner Bros., 20th Century Fox, Orion, and MGM. Universal and Disney are not involved in current negotiations.

According to Pleven, feature films spend $100,000 to $150,000 a day on location, more than commercials and other types of film which spend about $75,000 a day.

Industry sources said the producers have insisted IATSE accept rules agreed to last year by members of the union working in Hollywood that makes a contract week any five days worked at staight time for an eight hour day. Time-and-a-half is paid after eight hours through 14 hours.

IATSE's New York contract stipulates that the five-day work week is Monday

through Friday with double time after eight hours, double-and-a- half time after 14 hours and double time on weekends.

A major consideration in a halt to studio activity in the city after Wednesday is film executives' uncertainty that the unions will continue to work without a contract, although IATSE has not called for a strike, sources said.

One film in the making in Manhattan, "Other People's Money," will move filming to Connecticut Thursday, according to produce Norman Jewison.

Lou D'Agostino, a spokesman for IATSE Local 644, said one of the issues preventing a settlement is the producers' refusal to give New York workers the same pension and welfare fund contributions, derived from residuals, that have been given Hollywood workers.

The union disputes the producers' claim that New York workers get an equivalent amount in payouts and insists on a share of residuals, D'Agonstino said.

#90303u1527 10/30/1990 ~United Press International

ATHENS, GREECE (OCT. 30) UPI - Former Socialist Transport and Communications Minister George Petsos was remanded to custody Tuesday after appearing before a special magistrate investigating an embezzlement scandal.

Petros, who told journalists he he was innocent of any involvement in the scandal, was the second minister in the Cabinet of former Socialist Prime Minister Andreas Papandreou to be remanded to custody in a month.

A special court, set up by the Vouli or Parliament last year, is currently investigating the involvement of ministers in Papandreou's government in the embezzlement of some $200 million from the privately owned Bank of Crete.

Former Bank of Crete chief George Koskotas, who was at the center of the scandal, was charged with siphoning off the money from the bank and paying part of the embezzled amount into the campaign funds of Papandreou's Pan-Hellenic Socialist Movement, or PASOK.

Koskotas, who was arrested in the United States on other charges in 1988, is currently awaiting extradition to Greece.

Petsos testified for four hours before the special court Tuesday before he was remanded to custody. He was among four PASOK ministers, including Papandreou, ordered by the Greek Parliament last year to appear before the court.

Oct. 2, former PASOK Deputy Premier Agamemnon Koutsoyorgas was also remanded to custody after appearing before the special court.

The Koskotas scandal, as it is called, contributed to Papandreou's fall from power in the June 1989 elections. The former premier has denied all involvement in the scandal.

#90303u1550 10/30/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (OCT. 30) UPI - The Slovak premier says nationalist extremists may resort to terrorism to promote their aims for an independent Slovakia.

Premier Vladimir Meciar told a meeting of local government officials Monday that ''extreme nationalists would stop at nothing,'' the Communist Party newspaper Rude Pravo reported Tuesday.

''Some groups of the population may be armed,'' he said, adding that terrorist actions have been announced.

Meciar said he expected a ''national bloc'' of extremists led by Slovak National Party leader Vitazoslav Moric to declare Slovak sovereignty Nov. 17, the first anniversary of the ''Velvet Revolution,'' and to declare independence shortly thereafter.

Meciar's spokesman, Martin Hric, confirmed the premier's remarks. He also said Soviet soliders in Czechoslovakia and others whom he would not name were selling arms to extremists.

Over the weekend, 1,800 border guards and several hundred extra police were sent to Slovakia to beef up police patrols.

Boris Lazar, a senior official with Public Against Violence, Civic Forum's sister group, said PAV had received anonymous threats against its leaders, and expected that some unbalanced extremists could resort to violence.

''There is a possibility of violence against some politicians, but I don't think the Slovak nation would make or back a putsch,'' he said.

Leading the extremist movement is Vitazoslov Moric, who heads the Slovak National Party. He is joined by Matica Slovenska, Slovak Heritage Group, Roots Movement for Freedom of Slovaks, and the Stur Society, named after Ludovit Stur, who a century ago codified the Slovak language.

Slovaks resent centralized rule from Prague and being looked down on by Czechs. After 1,000 years of Hungarian rule, Slovakia was made part of the newly established Czechoslovak Republic in 1918.

Its only period of sovereignity was the five years when Nazi Germany annexed Czech territory.

With the fall of communism, the Slovaks have again begun to establish their national credentials.

Several SNP leaders have, however, distanced themselves from Moric, and affirmed their commitment to keeping Slovakia in its federation with Czech lands.

Meciar warned Matica Slovenska members to consider carefully the views of its leader, Jozef Markus, who said the movement had exceeded its role. ''The state cannot afford to finance this organization when it is fighting the state,'' he said.

In a related campaign, about four dozen students entered the fifth day of their hunger strike on the steps of the Slovak National Council in Bratislava. They are protesting a law they say does not go far enough to make their native tongue their republic's official language.

The extremists want Slovak to be the official language in all public places. The Slovak parliament approved a more moderate law that would allow regions with 20 percent minority populations to use the minority tongue officially.

Slovakia's 5 million population is about 15 percent minority, speaking Hungarian, Polish, Ukrainian, German or Romany.

LONDON (OCT. 30) UPI - British and French tunnelers inched toward each other beneath the waters of the English channel Tuesday, on schedule for the link-up that will end Britain's geographical isolation from Europe.

An official of Eurotunnel, the consortium building the gargantuan project from the British end, said the two work teams would connect with a probe within the next 24 hours in the drilling of a service tunnel.

She said the British tunnellers had stopped their machine and inserted a 2.3-inch-wide steel pipe into the chalky soil a distance of 110 yards. The French machine was still grinding onward and was now about 10 yards from the hole left by the probe, she said.

''That is when you get what is called a technical junction,'' the spokeswoman said. ''We believe everything is on course, but it is not something you can predict with absolute accuracy.''

The probe will enable engineers to confirm whether the tunnel is heading in the right direction for the actual breakthrough, now scheduled for early December, she said.

The significance of the event was not lost on British workers who call themselves ''the Tunnel Tigers.'' In reports they said the hole would be large enough for them to get a ''whiff of garlic'' from the French side.

A formal linkup ceremony will take place in January, when British Prime Minister Margaret Thatcher and French President Francois Mitterrand will meet at the midway point to shake hands and celebrate Britain's first physical link with the continent.

Rail traffic is scheduled to start rolling through the 31-mile link of two rail and one service tunnels in mid-1993 at the completion of the $15 billion project that began in January 1986.

The end of Britain's historical role of sitting in ''splendid isolation'' from the continent has inspired emotional debate in the island nation. Thatcher has come under criticism for not putting government money into building a high-speed rail link, meaning French bullet trains will have to slow down upon entering England.

HIGHLAND PARK, Mich. (OCT. 30) UPI - Chrysler Corp. and the United Auto Workers announced Tuesday a tentative three-year agreement that UAW President Owen Bieber hailed as ''a pattern settlement in all respcets'' to the ones reached earlier at General Motors Corp. and Ford Motor Co.

The pact, covering about 67,000 U.S. hourly and salaried workers, came following a final bargaining session that lasted nearly 28 hours and a meeting between Bieber and Chrysler Chairman Lee Iacocca that may have moved the talks off center.

Bieber said the issue of job security was ''the major stumbling block'' and added that ''there were times when it looked bleak.''

But he said, ''It's a pattern settlement in all respects.''

''We always look for a silver lining... we found that silver lining today,'' Bieber said smiling broadly.

JOHANNESBURG, SOUTH AFRICA (OCT. 30) UPI - South African business leaders declared Tuesday they had a "vital stake" in the outcome of negotiations on a post-apartheid constitution and appealed to the government for a place in the bargaining process.

About 300 delegates at the annual meeting of the South African Chamber of Business voted overwhelmingly to call on the government of President Frederik de Klerk to ensure business has a voice in the looming negotiations. A resolution was approved "in the firm conviction that business has a vital

stake in the outcome of political negotiations for the new South Africa."

It said the country needed a political system that "will inspire business confidence and attract further investment" and called on "the government and all political leaders to create the necessary mechanisms" for business to join the drafting process.

The government expects to begin formal negotiations next year with black leaders on a new constitution to end 42 years of minority white rule under a sweeping racial reform program launched by de Klerk ten months ago.

The appeal by business for a role in the power-sharing talks follows extensive debate on a future economic system between supporters of a free market economy and the African National Congress, which has endorsed a mixed economy and nationalization as a way to redistribute the country's wealth.

Johannesburg business leaders, in a background document, expressed concern over the ANC's proposals and warned against "creating a climate of needless uncertainty for existing businesses and potential investors."

"Dubious and failed systems such as socialist centrally planned economies will as has been the experience in Eastern Europe, Africa and elsewhere, lead not to wealth creation but to a destructive loss of the opportunities which could otherwise exist," it said.

"Business will have to deal with nationalization and related arguments as vigorously and critically as it previously dealt with interventionist policies by the government."

SAN JOSE, COSTA RICA (OCT. 30) UPI - Manuel Jimenez Borbon, former president of the Inter-American Press Association and publisher of the newspaper La Nacion, died Tuesday after a long illness. He was 54.

Jimenez suffered from gastro-intestinal cancer that later spread to his bone marrow, family members said.

His illness had drawn him away in recent months from his work as publisher of La Nacion, the prinicipal newspaper in the country, and as vice president of the Inter-American Press Association, a position he held to his death.

He was president of the presitigious press association from October 1988, to October 1989.

Jimenez, a lawyer and journalist, directed the largest media company in Costa Rica during the last 10 years, bringing in advanced technology and

diversifying many of its publications.

In early October, La Nacion inaugurated a new division called Impresos Comerciales, a state-of-the-art computerized printing service for private companies, worth more than $3 million.

Jimemenz is survived by his wife Bertha Rodriguez and four children. He is also survived by his father, Manuel Jimenez de la Guardia, who is an important agro-industrial businessman and former Finance Minister, and his brother Rodolfo, an economic adviser to President Rafael Calderon.

(OCT. 30) UPI - Haiti's military pledged ''strict neutrality'' Tuesday in forthcoming elections on the impoverished island nation, days after voter registration ended with nearly three-quarters of the eligible voters signed up to cast ballots.

A 22-day voter registration period ended Friday with 71 percent of the eligible voters registering, near the figure of registered voters on Nov. 17, 1987, when celebrated elections ended in violence and military intervention. Twenty-six people have registered to run for president, including two figures linked to Haiti's former dictatorship.

''The military institution will observe with strict neutrality the electoral process,'' said a statement issued by the military's high command Tuesday. The statement also affirmed that the military would take precautions to provide security at polling places when citizens vote in national elections scheduled for Dec. 16.

Backing up the military's support for election is the arrival in Port-au-Prince of 30 military observers from a United Nations team to ensure that the Haitian military can prevent an outbreak of violence and protect voters.

Hundreds of additional international observers are expected to arrive in Haiti the poorest nation in the Western Hemisphere and most densely populated, in the coming weeks. The United States, France and Canada have been giving financial and monitoring assistance to Haiti, and former President Jimmy Carter has made three election-related trips to Haiti since July.

The army's support for elections is crucial, because there have been five governments and near-constant turmoil since the ouster of dictator Jean-Claude ''Baby Doc'' Duvalier. He fled in February 1986, and the first free elections after nearly 30 years of Duvalier-family rule ended with at least two dozen dead.

The killings were believed to have been carried out by feared Duvalier private militiamen known as Tontons Macoutes, or ''bogeyman'' in the Haitian tongue of Creole. The army was widely believed to have supported the violence, and the elections were cancelled.

Lt. Gen. Henri Namphy, who was ruling Haiti as an interim leader, stayed on until elections that installed President Leslie Manigat in February 1988. Manigat won in elections viewed by observers as fraudulent and mistakenly tried to curb Namphy's powers. The lieutenant general ousted him June 19, 1988. However, former Duvalier-aide Lt. Gen. Prosper Avril seized power from Namphy in September 1988.

Avril eventually agreed in March 1990 to hand over power to an interim government led by President Ertha Pascal-Touillot, Haiti's first woman president, who now must contend with the presence of former Duvalier Interior Minister Roger Lafontant and former Duvalier military commander Claude Raymond. Both men and Manigat are running for president.

Lafontant returned to Haiti in July from exile in the Dominican Republic, and he vows to win the presidency, even though there is a warrant for his arrest on torture charges. The Haitian Constitution drafted after Duvalier's ouster appears to prohibit any of his close associates from taking elected office. Haiti's provisional electoral council is expected to make a decision on the candidacy of Lafontant and Raymond on Nov. 26.

Political observers in Haiti suggest Lafontant will not be allowed to run for office. However, they say since he remains at large and is still a presidential contender points to possible instability and violence as the elections draw closer.

The military's statement Tuesday indicated it will ''respect legal and constitutional decisions'' by the electoral commission, appearing to publicly back away from Lafontant.

#90303u1705 10/30/1990 ~United Press International

TALLAHASSEE, Fla. (OCT. 30) UPI - Former Olympic diver Bruce Kimball, who killed two people in a drunken-driving accident two years ago, Tuesday was granted a 1993 early parole date.

Kimball, 27, was sentenced to 17 years in prison on charges of manslaughter

and inflicting serious bodily injury. On Aug. 1, 1988, he drove his sports car into a pack of teenagers at a popular hangout beside a dead-end country road near Brandon, a Tampa suburb. He killed two and seriously injured four others.

His initial release date was tentatively set for 1995. The early release for the silver medalist at the 1984 Olympics was approved by the three-member Florida Parole Commission as part of a new state program aimed at reducing prison overcrowding.

The mother of one of the slain victims, Theresa Bedell, attended the short hearing in Tallahassee. She said she was angry Kimball could serve less than five years for the death of her 19-year-old son, Robbie.

''I really feel that Bruce Kimball should be dead and my son should be alive '' she said. ''That's how I feel. But I can accept what society says should be his punishment. What I cannot accept is that these reductions keep continuing. It's wrong.''

Bedell and another youth, Kevin Gossic, 16, were killed in the collision. Kimball was found to have a blood alcohol level of .20 percent, double the amount recognized as intoxicated under state law.

The commission ruling came a day after officials announced a computer glitch stopped the mailing of questionnaires to more than 1,000 victims, including some of the victims in the Kimball case.

The completed questionnaires were intended to be added to the mix of information used by commission members to determine whether an inmate should be granted parole.

Bedell's father, Robert, was the only victim to recieve a questionnaire, and that's only because he called and asked for one.

''I'm mad as hell that he'd even be considered under this program,'' Bedell said. ''I'm not concerned about (Kimball's) future. My son doesn't have a future. Every Christmas, every birthday, every Aug. 1, we have to live with that.''

#90303u1712 10/30/1990 ~United Press International
(OCT. 30) UPI - Nine American servicemen die in Persian Gulf accidents... President Bush holds a steady course on U-S Gulf policy... NASA finds NO leaks aboard the space shuttle Columbia... and Detroit mobilizes to prevent another Devil's Night arson spree. U-P-I, has it all, next:

The death toll in Operation Desert Shield in the Persian Gulf climbed to at least 40 today because of two more accidents in the area.

Eight sailors were killed and two others seriously burned when a high-pressure steam line burst in a boiler room on the helicopter carrier U-S-S Iwo Jima as it steamed out of Bahrain.

A Marine was killed and three others injured when a multi-purpose vehicle overturned during a night exercise in the eastern Saudi Arabia desert.

The new deaths were reported as the United States moved once again to increase the pressure on Iraqi President Saddam Hussein.

The State Department announced that Secretary of State Baker will fly to seven countries in the Mideast and Europe next week and will meet with Soviet Foreign Minister Eduard Shevardnadze.

Reports last week had indicated that Baker would make such a trip and would seek Saudi Arabian permission for a U-S military attack to drive Iraqi forces out of Kuwait.

A spokesman says Baker will leave Saturday morning, flying to Bahrain, Saudi Arabia, Egypt, Turkey, France and Britain. He says Baker will meet with his Soviet counterpart at a site to be announced in Western Europe.

President Bush met with congressional leaders at the White House today, signaling a continued reliance on economic pressure and military intimidation to get Iraq to withdraw from Kuwait.

After the session, Republican Senator William Cohen of Maine told reporters that he did NOT get the impression that the nation is moving closer to war in the Persian Gulf.

In Independence, Virginia, the manufacturer of Nautilus exercise machinery announced the donation of 100-thousand dollars worth of the machines to U-S troops in Operation Desert Shield.

A spokesman says instructors will accompany four sets of 10 machines each to different locations in Saudi Arabia. He says the first instructor to go will be John Urmston, the managing director of Nautilus who also is a colonel in the U-S Marine Corps Reserve.

It was busy day at Cape Canaveral.

The space agency cleared the shuttle Atlantis for launch on a secret military mission on November 9th. Then, engineers began a fueling test to determine whether a hydrogen leak aboard the shuttle Columbia has been fixed.

Late word from the Kennedy Space Center says Columbia was given a clean bill of health after it didn't spring any leaks.

The launch date announced for Atlantis is one day earlier than originally planned. As with all military flights, details are classified... but the cargo of the shuttle reportedly is a spy satellite.

The Atlantis star-gazing mission is months behind schedule because of a fuel leak that was later repaired.

The problems aboard Columbia were more troubling. At least two separate fuel leaks have delayed Columbia's 10-day astronomy mission more than seven months. Today, technicians watched television screens and special monitors as engineers pumped super-cold rocket fuel in the grounded shuttle's tanks.

Sensors detected only slight levels of hydrogen gas, well below the limit of 600 parts per Million. Spokeswoman Lisa Malone said- ''All appears to have gone well with our tanking operations. Columbia appears to have tight aft compartment.''

NASA wants to launch Columbia during the first week of December.

Forecasters are predicting an 80 percent chance of good weather this evening for the launch of a 50-Million-dollar Air Force Delta-2 rocket from the Cape Canaveral Air Force Station.

It will be the 200th flight of the work-horse booster in 30 years. The 126-foot rocket is to put a 90-Million-dollar communications satellite into orbit about 21 minutes after launch.

The Inmarsat1 satellite is the first generation of a new breed of high-power communications satellites built by British Aerospace for the 62-nation International Maritime Satellite Organization.

The first flight of a much less powerful Delta booster on May 13th, 1960, was a failure. But three months later, another Delta successfully orbited the Echo communications satellite. Over the next 199 flights, only 11 other Delta launches were failures.

#90303u1718 10/30/1990 ~United Press International

NEW YORK (OCT. 30) UPI - The judge considering a sex abuse lawsuit against Mike Tyson Tuesday dismissed one of the charges against the former boxing champ, lowering the price tag on the suit to $3.5 million from $4.5 million.

Judge Michael Mukasey in U.S. District Court threw out 26-year-old Sandra Miller Reese's charge that Tyson ''inflicted intentional emotional distress'' upon her during a confrontation at a Manhattan nightspot.

Reese's $4.5 million civil lawsuit against Tyson, alleges that the onetime champ grabbed her buttocks and breasts in Bentley's disco on Dec. 10, 1988.

During the trial in U.S. District Court, Manhattan's top sex crimes prosecutor testified she was under the impression the former boxing champ apparently ''patted or touched'' the woman rather than forcibly grabbed her.

Linda Fairstein, head of the sex crimes unit in the office of Manhattan District Attorney Robert Morgenthau, was subpoenaed by Tyson's defense team to testify in the trial.

On Monday, the 5-foot 6-inch, 120-pound Reese testified Tyson grabbed and cursed when she protested.

''Why are you bothering me?'' the mother of two testified she told him. ''I'm a lady. treat me like a lady. Besides, I have a man.''

''He told me, ''I am the man, Mike Tyson, the heavyweight champion of the world,'' Reese testified.

She said he then grabbed her buttocks and breasts and pushed her.

Called to the stand Monday, Fairstein, referring to notes she took while interviewing Reese, quoted her as complaining she was ''grabbed,'' but after closely questioning her and asking for examples as to the amount of force allegedly used by Tyson, the prosecutor concluded Reese had been more likely been ''patted or touched.''

She said Reese had inquired about how much money she would get out of the case and the assistant district attorney said she had to explain the difference between and a civil and criminal complaint.

The prosecutor told Reese if she, Reese, pursued a criminal case against Tyson providing Fairstein found through further investigation Reese, in fact had a case, he could possibly get off with only a fine, if convicted or could even get some jail time.

Reese wanted to know how much of the fines she would get and Fairstein explained she would ge none of it, the proceeds would go tothe state. To get money she would have to initiate a civil suit, Fairstein said she told her.

Reese then said she would talk to a civil attrney with whom she already had been in contact before deciding to pursue the criminal case, Fairstein testified, adding Reese promised to call the prosecutor.

But she did not, and Fairstein said she telephoned the following day and was told by Reese she had decided against a criminal prosecution.

#90303u1727 10/30/1990 ~United Press International
(OCT. 30) UPI - Analysts waiting around for classic signs of a recession may have to wait a while longer.

The Commerce Department issued its third-quarter gross national product report this morning, and the figures were well above what had been expected.

Strong purchases of automobiles at the end of the 1990-model year helped boost the overall reading on goods and services up one-point- eight percent for the July-to-September period.

And that's well above the growth of eight-tenths of one percentage point that

some analysts had predicted.

A recession, in classic terms, happens when G-N-P figures are down for two consecutive quarters. But first quarter growth was one-point- three percent and second-quarter growth was seven-tenths of one percent.

There are other signs that the economy is cooling down- recession or NO recession.

The Commerce Department reports that sales of new single-family homes dropped 21 percent in September, with the largest decline in the depressed Northeast.

That means home sales last month continued the downward trend that has been going on all year. And they are now down 15 percent for the first nine months of the year.

The September figures show there is a seasonally adjusted supply of new homes that would stretch out eight-point-four months if sales continue as they have.

China disclosed today that its population hit one-pointBILLION people this summer... that's right one-BILLION 130-Million.

That staggering number is the result of the first national head count since 1982. And it indicates that despite serious efforts at birth control, China will NOT meet its goal of holding its population under one-point-two-BILLION by the end of the century.

The latest census was taken in July in all of China's 30 provinces, regions and major cities. Eight years ago, China's population was just slightly more than one-BILLION people.

Since the 1970's, China has been pushed a policy of ''one couple, one child.'' Couples that have only one baby are given benefits while families with more than one child are penalized.

The policy has generally worked better in the cities than in the country, where 80 percent of Chinese live.

In Detroit, police and volunteers are mobilized to prevent another repeat of the annual Devil's Night arson spree that has given the Motor City a black eye.

About 35-thousand citizens and nearly 35-hundred block clubs will be out tonight in hopes of stifling the annual Halloween Eve rampage by firebugs torching abandoned homes, cars and trash piles.

Last year, there were 223 fires over a three-day period. But that's way down from in 1984 when arsonists started 810 blazes.

This year, Mayor Coleman Young has ordered a 6 p-m to 6 a-m curfew for unescorted youths under 18. So far, more than 141 people have been arrested for curfew violations and police in recent weeks have towed away abandoned cars that might attract arsonists.

#90303u1763 10/30/1990 ~United Press International

CAPE CANAVERAL, FL (OCT. 30) UPI - The shuttle Columbia passed a critical fueling test Tuesday without springing any leaks, putting the orbiter back in service and clearing the way for a December launch try, the ship's fifth since May.

''We are elated by today's successful test,'' said Columbia skipper Vance Brand. ''We look forward to flying a tight bird, hopefully in early December."

Earlier in the day, NASA managers formally cleared the repaired shuttle Atlantis for blastoff Nov. 9 on a military mission and with no more leaks reported aboard Columbia, the agency's three-shuttle fleet appeared to be back on flight status for the first time spring.

Given a disappointing summer of setbacks and repeated delays, fixing Columbia was a top priority for NASA, which has endured months of criticism over the $1.5 billion Hubble Space Telescope and a variety of other problems.

''We ended up with a tight ship and as far as we're concerned right now the Columbia's ready to go fly as soon as we put it through its final launch preps '' said shuttle program manager Robert Crippen.

Added launch director Robert Sieck: ''There was a sense of victory that this (test) was behind us.''

With 10 television cameras and 17 special sensors mounted in Columbia's cramped engine room to spot out any leaks that might develop, technicians began pumping supercold liquid hydrogen through the shuttle's aft compartment and into its external tank shortly before 12:30 p.m. EST.

A few minutes later, high-speed fueling operations commenced. It was at that point the night before a planned May 30 liftoff that explosive hydrogen gas began building up near a massive 17-inch-wide fitting where fuel lines from the external tank enter the belly of the orbiter.

That leak later was fixed but two launch attempts in September ended in failure because of separate leaks inside Columbia's engine compartment. Engineers now believe the engine room leakage was present in May but that it was masked by a leak involving the ship's 17-inch- wide "disconnect" fitting.

In any case, no problems were detected Tuesday, much to the relief of NASA engineers and technicians who had replaced two suspect fuel valve seals and tightened virtually every fitting in the engine compartment that could have contributed to the leakage.

''Our leakage external to the orbiter was essentially zero,'' Sieck said. ''And inside the aft fuselage the total calculated leakage was between 100 and 150 parts per million, well within specifications (of 600 parts per million).

''Now we can start thinking about a launch date for Columbia,'' he said.

An official launch date will not be set until later, but an internal NASA guideline requires three weeks between missions. If Atlantis gets off on time, Columbia could be ready for takeoff on a 10-day astronomy mission by the end of the month or the first few days in December, six months behind schedule.

William Lenoir, chief of NASA's manned space program, wrapped up a two-day flight readiness review Tuesday by formally clearing Atlantis for launch Nov. 9 to ferry a secret military satellite into orbit.

Details about the 37th shuttle flight are secret, but sources requesting anonymity said Atlantis and its five-man crew are scheduled for takeoff around 6:47 p.m. Nov. 9 and that landing at Edwards Air Force Base, Calif., is planned for around 3:42 p.m. PST on Nov. 13.

The goal of the flight also is classified, but Atlantis's crew reportedly will deploy a reconnaissance satellite that may be used to monitor conditions in the Persian Gulf.

Like Columbia, Atlantis was grounded in June by a hydrogen leak involving damaged seals inside the ship's 17-inch disconnect fitting. The suspect hardware was replaced and Atlantis successfully passed a fueling test last week to set the stage for launch.

Columbia's problems were more difficult to resolve.

After the ship's second September launch delay, its fourth in as many months, NASA managers formally grounded Columbia and set up a special team of engineers to pinpoint the source of the leak once and for all.

Two partially crushed fuel line valve seals were found and replaced and dozens of fittings and fuel line connectors were tightened before Tuesday's test.

In the most elaborate leak hunt to date, NASA installed a battery of sensors inside Columbia's engine compartment and surrounded every major fuel line joint with plastic bags to help technicians isolate the source of any leak that might develop.

In addition, special see-through plastic panels replaced the doors leading into the aft section of the shuttle so cameras could peer inside. Engineers could not monitor the test in person because the engine compartment is flooded with inert nitrogen gas during fueling to minimize the chance for a fire.

SEATTLE (OCT. 30) UPI - Ken Griffey Sr., refueled after playing alongside his son for a month this past season, will return to the Seattle Mariners for the 1991 season.

Griffey, 40, said before leaving Tuesday for Japan as a member of an all-star team, he wasn't ready to retire and was looking forward to playing a full season with the Mariners.

Senior batted .377 with 3 home runs and 18 RBI in 21 games in September. He played sparingly (46 at-bats) before being released by the Cincinnati Reds in July.

''The last three months was an emotional roller-coaster, but playing with Junior and how well received I was in Seattle, it was fun again,'' said Griffey.''I thought about retiring, but I'm really not ready to retire.''

Griffey said Mariners president Woody Woodward and and his agent haven't worked out a contract, but he didn't anticipate any problems in that area.

Griffey, who was a member of the Big Red Machine in the 1970s, was voted a full World Series share - about $120,000 - by the Reds team that won the Series earlier this month.

The Griffeys and pitcher Randy Johnson are members of an all-star team that will play eight games in Japan in November.

TORONTO (OCT. 30) UPI - The Toronto Sun Publishing Corp. said Tuesday it has reached an agreement in principle to restructure The Houston Post's bank debt.

The Sun sold The Post to Consolidated Newspapers Inc. for $150 million in 1987. As part of the sale, The Sun received $100 million in cash, a $50 million subordinated note and the right to future additional payments

contingent on The Post's level of revenues.

The Sun and Consolidated Newspapers have been negotiating for over a year to restructure the terms of sale. Under a new deal, The Sun will lend about $6 million to The Houston Post Co. on a senior secured basis. The loan will bear interest and require quarterly interest payments.

The Sun also will exchange its subordinated note and contingent future rights for $45 million of convertible preferred shares of and warrants to purchase a substantial minority interest in The Houston Post Co. The Sun said it will not hold a common equity position when restructuring is completed.

Doug Creighton, chairman of The Sun, said he was pleased withs the new deal and that it should help strengthen The Post's longer term financial position. He added The Post will benefit from a reduced debt burden.

As a result of the deal, Creighton said The Sun will post an unusual write down of $20.57 million in the third quarter. The write down will account for the difference between the estimated value of the new preferred shares and warrants compared with the value of the subordinated note and contingent rights as carried in The Sun's books.

The new preferred shares and warrants will have a carrying value of $25 million after the write down. The new deal was expected to close in the fourth quarter. The Sun operates a number of daily newspapers in Canada and publishes a string of weekly shopping guides in Canada and Florida.

WASHINGTON (OCT. 30) UPI - Secretary of State James Baker will travel to seven countries in the Middle East and Europe next week to meet with key

leaders in the international alliance against Iraq's Saddam Hussein, the State Department said Tuesday.

Baker's week-long trip occurs as Saddam tries to split the coalition allied against him in the United Nations, where the Security Council has passed 10 resolutions condemning Iraq's invasion of Kuwait and has backed economic sanctions against Baghdad.

Administration and Saudi officials have said that while in the Middle East, Baker will discuss the ground rules for the use of military force against Iraq in situations other than as a response to an Iraqi attack on Saudi Arabia.

A State Department spokeswoman said Baker will leave Saturday for talks with the exiled Emir of Kuwait in Tayif and King Fahd of Saudi Arabia in Jeddah. Baker also plans to meet with Egyptian President Hosni Mubarak in Cairo and Turkish officials in Ankara.

Turkey and Egypt are supporting the U.S.-led embargo against Iraq, but both are suffering economically as a result of the sanctions.

Turkey estimates that the embargo is costing it up to $4 billion annually in lost trade with Iraq and oil pipeline fees. Egypt, which had 800,000 of its citizens living in Kuwait and Iraq, has lost the money those citizens used to send to their families in Egypt.

Baker will also hold talks in Paris and Britain and is scheduled to meet with Soviet Foreign Minister Eduard Shevardnadze at the end of his trip for one or two days. The site in Europe for the U.S-Soviet meeting has not been announced.

Some U.S. officials are concerned that a Soviet-led drive to reach a diplomatic solution with Iraq may be sending mixed signals to Baghdad.

To measure diplomatic advances and clarify U.S. goals, President Bush, Defense Secretary Richard Cheney and Baker have stepped-up the anti-Saddam rhetoric this week. All said that Iraq must withdraw from Kuwait and that a military option is still possible if economic sanctions fail.

The United States has insisted that a diplomatic solution cannot reward Saddam for his military aggression and that there can be no serious talks with the Iraqi president until his troops vacate Kuwait.

The United States now has more than 200,000 troops in Saudi Arabia as part of Operation Desert Shield, and administration officials are working on plans to deploy as many as 100,000 more troops to the region.

Absent from Baker's itinerary are two countries normally at the center of Middle East diplomacy: Israel and Jordan.

Baker said Monday Israel was left out because he didn't want to give anybody a pretext for saying that the anti-Iraq coalition is an American-Israeli conspiracy against Arabs.

U.S. officials have shown sympathy for Jordan's economic hardship during the crisis, including the care and feeding of hundreds of thousands of refugees who fled Iraq. But U.S. officials also have been annoyed at the Jordanian attempt to represent Iraq's views in talks with other Arab nations.

#90303u1802 10/30/1990 ~United Press International

MOSCOW (OCT. 30) UPI - The Soviet Union agreed to sell Czechoslovakia as much as 13 million tons of oil next year after six hours of talks Tuesday between their prime ministers.

Marian Calfa, head of the Czechoslovak government, arrived in the Soviet capital during the morning on a mission to try to ensure that Moscow would not cut oil supplies to his nation.

Calfa said his marathon bargaining session with Soviet Premier Nikolai Ryzhkov was ''difficult'' but had produced mutually acceptable solutions.

Ryzhkov said the talks had laid a ''good foundation'' for future economic relations between the Soviet Union and Czechoslovakia, which ended communist rule late last year after a popular democratic uprising.

Czechoslovakia in the past bought all of its foreign oil, about 16 million tons a year, from the Soviet Union for cheap rubles, but Moscow has announced that after Jan. 1, Eastern European countries will have to pay for their petroleum with hard currency.

''The Soviet side is prepared to supply Czechoslovakia with up to 13 million tons of oil'' next year, Calfa told reporters before leaving Moscow.

Calfa said Czechoslovakia will pay for the crude with a combination of consumer goods for the beleaguered Soviet people and petroleum- extraction equipment for the Soviet oil industry, which has blamed its declining production on decrepit machinery.

The two government heads also discussed the ongoing pullout of Soviet troops from Czechoslovakia and ''pointed to the need to accelerate efforts to resolve property and legal issues connected with the withdrawal,'' the official Soviet news agency Tass said.

Czechoslovakia previously paid for Soviet oil in rubles, which was the currency of trade within the Soviet-led Comecon bloc that is now in the process of dissolution following revolts against communist rule throughout

Eastern Europe.

''We understand the concern of the Czechoslovakian leadership about oil supplies from the Soviet Union,'' said Soviet Foreign Ministry spokesman Gennadi Gerasimov. ''We will not stop looking for a solution to the question.''

Czechkoslovakia reportedly has been negotiating with other countries, including Saudi Arabia and Iran, for new sources of oil.

(OCT. 30) UPI - Chrysler and the United Auto Workers Union have reached tentative agreement on a three-year contract covering about 67-thousand U-S hourly and salaried workers. The pact was reached after a marathon 28-hour bargaining session in Highland Park, Michigan. The union's 100-member Chrysler

Council must approve the contract before it can go to the rank- and-file for a ratification vote.

More tragedy in the Persian Gulf. Eight sailors were killed and three injured today when a boiler room steam pipe burst aboard the helicopter carrier U-S-S Iwo Jima as it sailed from Bahrain. One Marine was killed when a vehicle overturned during a night exercise in Saudi Arabia.

The State Department announced today that Secretary of State Baker will travel to several Mideast and Europeans countries next week to discuss the international alliance against Iraq. Baker will leave Washington on Saturday. First stop is Saudi Arabia, where he will meet with the exiled Emir of Kuwait.

NASA says the shuttle Columbia passed a crucial fueling test today. That could clear the way for a long-delayed astronomy flight in December, more than six months behind schedule. A spokeswoman says NO significant leakage of hydrogen fuel was detected inside Columbia's engine compartment.

With Columbia back on line, NASA's entire shuttle fleet may be operational again. Also today, the shuttle Atlantis was cleared for launch on November 9th on a secret military mission.

Supreme Court Justice David Souter asked a series of questions during oral arguments today for the only major abortion case before the high court this term. His line of questioning indicated that he is skeptical of a move to bar health-care workers from discussing abortion.

Israeli authorities say a bomb apparently exploded prematurely today, killing one Arab and wounding two others... apparently as they tried to plant the explosives in a Tel Aviv area store.

Thousands of people in Moscow held candles and prayed at a ceremony unveiling a stark grey boulder that is a monument to Millions of Soviet citizens once imprisoned in Soviet labor camps. The monument was placed outside the Soviet K-G-B headquarters.

A Disneyland spokesman says the grand-daddy of modern amusement parks will boost its admission price by two dollars for adults and children, effective November 1st. It will cost adults 2750 to get in the magic kingdom. Children under three are admitted free.

#90303u1832 10/30/1990 ~United Press International

SAN ANTONIO, TX (OCT. 30) UPI - Commerce Secretary Robert Mosbacher, happy at the unexpected jump in the third-quarter GNP, Tuesday said he hoped the news would send the economic pessimists "back into their holes for a while."

"The signal is we're in a slow to moderate growth period. We're neither in a recession nor have any reason to think we're about to enter into a recession," Mosbacher said. "I hope all the doomsayers and nay-sayers and cluck-cluckers have now gone back into their holes for a while," he said.

The Commerce Department reported earlier Tuesday that the nation's total output of goods and services rose 1.8 percent in the third quarter, exceeding the expectations of private sector economists who had predicted an increase of only 0.8 percent during July, August and September.

Much of the increase was credited to strong consumer buying, with the figures reflecting little economic fallout from the Persian Gulf crisis and resulting jump in oil prices.

"We're just beginning to see a rise in the cost of living" related to the Persian Gulf crisis, Mosbacher conceded, but predicted an expected jump in inflation would not prove too damaging.

"In the fourth quarter, I think we'll still see some growth," Mosbacher said. Mosbacher said he did not see any signs of a recession in the near future.

"We don't see any reason, frankly, in a realistic way for it to happen next year," he said, although he stressed the need to bring interest rates down and build up exports. Tuesday's numbers were an initial estimate, subject to revision before a final estimate is released in December.

Mosbacher, who was appointed Commerce Secretary after serving as national finance chairman for President Bush's campaign, said the "loudest screams" always are heard from those sectors of the economy suffering the most. "In truth, there are a lot of segments of the economy doing extremely well," he said.

#90303u1850 10/30/1990 ~United Press International

NEW YORK (OCT. 30) UPI - The dollar bounced Tuesday in New York dealings on news of a third-quarter U.S. economic expansion of 1.8 percent, stronger than expected, but it fell back as skeptical, pessimistic sentiment prevailed.

Currency traders said technical factors in dealings also pressured the dollar into giving up its gains on the Commerce Department report. They said players sold the U.S. currency when it failed to rise through key levels.

"People are still not convinced the economy has turned around," said Stephen Burnett, a trader with Bank fur Gemeinwirtschaft in New York, citing a degree of incredulity at the relatively strong third-quarter data. "Obviously, people do not believe in this economy," Burnett said.

In late New York dealings, the dollar was quoted at 1.5145 German marks, down from 1.5225 marks Monday, and 128.80 Japanese yen, up from 128.50.

He said participants abandoned short, or selling positions in the dollar when they first heard the number. They anticipated it would trigger a rally in the U.S. unit, troubled by a recessionary economic outlook.

Burnett said the dollar rose about 0.80 pfennigs against the German mark, but fell back after reaching a level just below 1.53 marks. It had an even wilder ride against the Japanese yen, rising above 130 before failing.

He said currency players were waiting for more economic data later this week - in particular the purchasing managers' index Thursday and unemployment data Friday - before taking more decisive stances on the dollar.

Other New York dollar rates: 1.2820 Swiss francs, off from 1.2930; 5.0685 French francs, down from 5.0925; and 1,134.25 Italian lire, off from 1,139.50. The pound advanced to $1.9570 compared with $1.9500.

In European action, the dollar rose sharply on the stronger-than-expected GNP figures and sharpening Persian Gulf tensions.

The GNP figures "meant dealers expecting further interest rate cuts from the Federal Reserve had to revise their estimates," said analyst Lisa Hoskins with Warburg Securities. "The dollar is stronger on that basis."

Other analysts said the U.S. currency also firmed on comments from Iraqi and U.S. officials regarding their war preparations.

The dollar rose in Frankfurt to 1.5250 German marks vs. 1.5150 Monday, and in Zurich also moved up, to 1.2960 Swiss francs vs. 1.2820. In London, the pound fell to $1.9505 compared with $1.9525.

The dollar concluded the session stronger in Paris, Brussels and Milan, at 5.0935 French francs vs. 5.0510, 31.30 Belgian francs vs. 31.18, and 1,139.50 Italian lire vs. 1,130.70.

The dollar soared against the yen in Tokyo after the Federal Reserve decided to cut its short term interest rate, a long-expected move. The dollar closed at 129 yen, jumping 1.65 yen from Monday's close of 127.35.

The Fed action boosted the dollar because most participants had discounted it and expect it to be the last monetary policy shift for a while. Gulf tensions also also sparked safe-haven dollar sales, dealers said.

In Zurich gold closed higher at $373.50 an ounce vs. $373, and also was up in London at $375 an ounce vs. $372.75 Monday.

Silver closed higher in Zurich at $4.15 an ounce vs. $4.10. It also moved up in London, to $4.17 an ounce vs. $4.10.

Republic National Bank in New York closed cash gold at $379.75 an ounce, up from $374.25 Monday. The New York Commodity Exchange settled contract gold at $379.70 an ounce, a solid gain from $373.70.

Republic closed cash silver at $4.23 an ounce, up from $4.145. Comex silver closed at $4.245 an ounce, a rise from $4.127.

CAIRO, Egypt (OCT. 30) UPI - Egypt's interior minister said Tuesday authorities in the past two months had smashed 13 terrorist groups that had been attempting to destabilize the county.

Mohammed Abdul Halim Moussa said the terrorist groups came to Egypt from Jordan, Iraq, Tunisia and Algeria.

''These groups have bases in Egypt of Palestinians, Jordanians of Palestinian origin or Palestinians living in Egypt and holding Egyptian passports,''

Moussa told the upper house of Parliament.

Moussa said that, because of the groups, police originally believed foreigners were responsible for the assassination of Egyptian Speaker of Parliament Rifaat El Mahgoub, who was gunned down in the center of Cairo two weeks ago. But during the weekend police arrested a dozen Egyptian Moslem fundamentalists authorities said were responsible for the crime.

An Interior Ministry source said Tuesday the fundamentalists were also suspected of being behind an assassination attempt against former Interior Minister Zaki Badr and the semi-official Al Ahram newspaper said Moussa, not Mahgoub, may have been the original target.

The source said four of the extremists were still being sought by police.

MOSCOW (OCT. 30) UPI - The Soviet Union agreed to sell Czechoslovakia as much as 13 million tons of oil next year, a deal concluded after six hours of talks Tuesday between their prime ministers.

Marian Calfa, head of the Czechoslovak government, arrived in Moscow on a mission to try to ensure the Soviet leadership would not cut oil supplies to his nation. Calfa said his marathon bargaining session with Soviet Premier

Nikolai Ryzhkov was "difficult" but had produced mutually acceptable solutions.

Ryzhkov said the talks had laid a "good foundation" for future economic relations between the Soviet Union and Czechoslovakia, which ended communist rule late last year after a popular democratic uprising.

Czechoslovakia in the past bought all of its foreign oil, about 16 million tons a year, from the Soviet Union for cheap rubles. But Moscow has announced that after Jan. 1, Eastern European countries will have to pay for their petroleum with hard currency.

"The Soviet side is prepared to supply Czechoslovakia with up to 13 million tons of oil" next year, Calfa told reporters before leaving Moscow. Calfa said Czechoslovakia will pay for the crude with a combination of consumer goods for the beleaguered Soviet people and petroleum-extraction equipment. The Soviet oil industry's declining production has been blamed on decrepit machinery.

"We understand the concern of the Czechoslovakian leadership about oil supplies from the Soviet Union," said Gennadi Gerasimov, Soviet Foreign Ministry spokesman. "We will not stop looking for a solution to the question." Czechkoslovakia reportedly has been negotiating with other countries, including Saudi Arabia and Iran, for new sources of oil.

The two ministers also discussed the ongoing pullout of Soviet troops from Czechoslovakia and "pointed to the need to accelerate efforts to resolve property and legal issues connected with the withdrawal," the official Soviet news agency Tass said.

CAIRO, Egypt (OCT. 30) UPI - A United Arab Emirates newspaper reported Tuesday that a number of Iraqi diplomats accredited in Arab and other foreign states had asked and been granted political asylum.

''A number of Iraqi diplomats have received an agreement of European states to grant them the right of political asylum because of their rejection of the Iraqi invasion of Kuwait,'' The Abu Dhabi-based Al Ittihad newspaper said, quoting Western diplomatic sources in London.

The newspaper said the names of the Iraqis were being kept secret for security reasons.

PHILADELPHIA (OCT. 30) UPI - Philadelphia Electric Co. said Tuesday a $27.4 million insurance settlement it will receive was not expected to affect the company's fourth-quarter earnings.

Insurance carriers for two former Philadelphia Electric officers agreed to pay $34 million to settle a shareholders' lawsuit filed in 1987. About $6.6 million of the settlement will go to lawyers for the shareholders and the rest will go to the company itself.

The lawsuit accused the company's former chairman and president of mismanagement by ignoring warnings that operating problems would force federal regulators to close the Peach Bottom Nuclear Power Plant. The plant was closed in March 1987 and did not reopen until two years later.

Philadelphia Electric spokesman Neil McDermott said the company was "reviewing the accounting associated" with the settlement to determine what impact, if any, it will have on the company's financial status. "At this point in time we don't expect there to be any impact on fourth quarter earnings," he said.

McDermott said one factor that may influence the impact of the settlement is a pending lawsuit filed against Philadelphia Electric by three utility companies which, along with PE, co-own Peach Bottom.

WASHINGTON (OCT. 30) UPI - Although Mayor Marion Barry has been sentenced to six months in prison for misdemeanor cocaine possession, a legal expert said Tuesday it could be several years before he begins serving his term, if at all.

At sentencing Friday, U.S. District Judge Thomas Penfield Jackson allowed the three-term mayor to remain free on personal recognizance until his appeals are exhausted. Defense lawyer R. Kenneth Mundy has said the process could take as long as 1 1/2 years.

Besides the six-month term behind bars, Barry was drew a year's probation, random drug tests and a $5,000 fine. If he goes to jail, Barry will be required to pay his incarceration costs, which officials estimate at about $5,000.

''The entire appeal process is very long because he has a right to appeal to the U.S. Court of Appeals ..., then he can ask for a rehearing for the entire court and then he can appeal to the U.S. Supreme Court,'' said Paul Rothstein, a criminal law expert and professor at Georgetown University School of Law.

''The chances of winning an appeal are extremely slim in any criminal case - roughly 80 percent fail,'' Rothstein said. ''The likelihood is that he will serve in jail the full six months.''

Rothstein and Paul Martin of the U.S. Sentencing Commission said it was likely that Barry will serve his time in a minimum-security facility such as Allenwood in Pennsylvania.

''It might be a little nicer but it is still a prison, and prisons aren't nice '' Rothstein said. ''They call it a country club, but it's a prison.''

While some local politicians said they believe Barry's sentence was harsh, Rothstein said it was ''reasonable'' for the drug possession charge on which he was convicted.

''The sentence is right down the middle because he could've been given zero time or a year,'' Rothstein said. ''It is in the reasonable range. It's viewed as a kind of a compromise.

''This is a drug war that we're in,'' he said. ''He is in a commanding and highly visible position and what he does influences many many people and what punishment is given him also influences many many people because the spotlight is on Mayor Barry. He is the mayor of the nation's capital and there is a war on drugs.''

(OCT. 30) UPI - A strong cold front hurled rain, wind and snow at the Pacific Northwest Tuesday, while clear skies and generally seasonable temperatures spread across the rest of the nation.

Rain soaked northern California, Oregon, Washington and Idaho, turning to snow at higher elevations, the National Weather Service said. An advisory for snow was posted for the Cascade Mountains of Washington.

The rain and snow rode in on a cold front that also brought gusty winds to the region.

Heavier rainfall totals during a six-hour period Tuesday morning included 2.36 inches at Crescent City, Calif; 0.74 inches at Eugene, Ore., and 0.41 inches at North Bend Ore.

Dry weather prevailed across the rest of the nation with sunny skies from southern and central California across the southern Plains to the southern and

Middle Atlantic Coast.

Tempearatures were in the 40s and 50s across the northern half of the nation. The mercury climbed into 70s and 80s in the southern Plains, desert Southwest, Middle Mississippi Valley and along the Gulf Coast.

#90303u1915 10/30/1990 ~United Press International

BOSTON (OCT. 30) UPI - Gov. Michael Dukakis and Amtrak officials Tuesday dedicated a new New York-to-Boston high-speed rail service that transports passengers between the Big Apple and the Hub in less than four hours.

The New England Express, which began running Sunday, cuts the travel time between New York and Boston from about five hours to three hours and 50 minutes, and Amtrak hopes to soon shave off more time and make the trip three hours and 20 minutes.

At a ceremony at Boston's South Station, Dukakis praised the faster rail-service as a means to cut back airport congestion. "The most single, easiest, quickest, and best way to decongest Logan is to move ahead as aggressively as we can with three-hour service or less from Boston to New York. This is a major step in that direction," the governor said.

The New England Express reduces travel time by eliminating stops. The train leaves South Station and makes stops only at Boston's Back Bay station, Route

128 outside the city, Providence, R.I., and New Haven, Conn., before pulling into New York's Penn Station.

Amtrak plans to make the trip even shorter by eliminating the need to change engines at New Haven. The diesel engine must be switched to an electric one en route to New York, and vice versa on the return trip. A congressional proposal would allocate $125 million for electrification of the tracks between New Haven and Boston.

An Amtrak official said there have already been numerous calls about the New England Express, which does not cost any more than the regular train service, although passengers must reserve their seats ahead of time.

#90303u1939 10/30/1990 ~United Press International

(OCT. 30) UPI - President Bush signaled NO change in U-S Persian Gulf strategy today at a meeting with congressional leaders at the White House. The session reportedly produced general agreement to stay the course in the Gulf,

relying on economic sanctions and the international military build-up to weaken Saddam Hussein's resolve to stay in Kuwait. Republican Senator William Cohen of Maine says he doesN'T ''have any impression we're moving closer to war.''

United Auto Workers President Owen Bieber says a tentative new contract reached today with Chrysler Corporation follows the pattern of the settlements reached at G-M and Ford. The three-year agreement covers about 67-thousand U-S workers... and now goes to the 100-member Chrysler Council. The pact was reached after Bieber held a private meeting with Chrysler Chairman Lee Iacocca in Highland, Michigan, that apparently moved the final bargaining session forward.

The leaders of the unions on strike against the New York Daily News met with Cardinal John O'Connor on the fifth day of their bitter labor dispute, as the paper's publisher called on strikers to refrain from violence. Union leaders said they hoped the meeting with O'Connor would encourage the paper to begin talks to end the strike. The paper has begun hiring replacements for the striking workers.

NASA today cleared the shuttle Atlantis for a November 9th blast-off on a secret military mission, and engineers conducted a critical fueling test of the grounded shuttle Columbia. The spaceplane appeared to pass the fueling test without springing any hydrogen leaks like those that forced the grounding of Columbia in May. Columbia is being pointed toward a December launch on a long-delayed astronomy mission.

President Bush sought to rally Republicans as Election Day nears by beating up on what he terms the ''irresponsible Democratic Congress.'' Bush told a Republican-sponsored rally of a few hundred people that Democrats are responsible for tax hikes in the new budget and the voters should send them a message by sending more Republicans to Capitol Hill. Bush says more Republicans in Congress means there will be more legislators fighting higher taxes and big spenders.

Concern about an AIDS drug. Researchers at the American College of Gastro-enterology meeting in San Francisco today urged doctors treating patients with the experimental drug D-D-I to re-evaluate its benefits. The drug's risks include potentially fatal inflammation of the pancreas, the vital gland that produces insulin and digestive enzymes. Researchers in Philadelphia say two-thirds of the AIDS patients in their study developed the pancreas inflammation.

WASHINGTON (OCT. 30) UPI - A boiler room accident that spewed scalding steam killed 10 sailors from the USS Iwo Jima in the Persian Gulf Tuesday, bringing to 42 the number of American forces who have died accidentally in Operation Desert Shield, officials said.

The incident on the 602-foot, 18,000-ton amphibious assault ship took place at 12:15 a.m. EST, just after the vessel had undergone routine maintenance in Manama, Bahrain, and was on its way to take part in an exercise in the North Arabian Sea, officials added.

Six sailors were killed aboard the Iwo Jima. Four others who were critically injured in the accident died later aboard the hospital ship USNS Comfort. The Navy was withholding the names.

In addition to that accident, Pentagon officials said one Marine was killed and three others critically injured Tuesday in a vehicle accident during a night exercise in Saudi Arabia.

Also, they said another three sailors riding in a military vehicle were injured Monday when a Marine sentry accidentally fired a weapon. One sailor was struck by two .50-caliber bullets, one suffered a concussion and the third was wounded by glass fragments, the Pentagon said.

Pentagon officials said the latest casualties brought the accidental death toll of the nearly 3-month-old Operation Desert Shield to 42. One additional

death is believed to have been a suicide.

A Pentagon spokesman said officials did not believe the numbers of accidental deaths were unusual, given the scale of Operation Desert Shield.

''You have a large number of troops being intensely trained and exercised,'' said Pentagon spokesman Bob Hall. ''One accident is too many. Is it alarming? No. Is it acceptable? No.''

Navy spokesman Lt. Cmdr. Alan Dooley said the Iwo Jima, which has its home port in Norfolk, Va., and arrived in the Persian Gulf on Sept. 16, was towed back to Manama after the accident occurred and its engines were shut down as a precaution.

The ship, which carries 685 officers and enlisted personnel and can hold 1,100 Marines, is powered by two steam boilers.

''The steam is under very high pressure'' of about 600 pounds per square inch, Dooley said. He added the temperature of the steam was 800 to 850 F.

Pentagon officials said the Iwo Jima was to have taken part in an amphibious exercise in the North Arabian Sea from Tuesday to Nov. 8.

The ship is part of the U.S.-led international force deployed in the gulf after Iraq's Aug. 2 invasion of Kuwait.

Dooley said all the casualties were Navy personnel and no Marines were involved.

Editors: the information number for families of personnel aboard the USS Iwo Jima is: 1-800-255-3808.

-30- 2899

#90303u1958 10/30/1990 ~United Press International

NEW YORK (OCT. 30) UPI - Stocks closed mixed in moderate trading Tuesday after the blue chips, bolstered by a drop in oil prices, staged a recovery from the day's weakness.

The Dow Jones industrial average, which lost 5.94 Monday, rose 17.82 to close at 2448.02.

Among broad market gauges, the New York Stock Exchange composite index rose 0.84 to 166.08 and Standard & Poor's 500-stock index gained 2.18 to 304.06. The price of an average share added 15 cents.

Declines led advances 819-669 among the 1,955 issues crossing the NYSE tape. Volume was 153,450,000 shares, compared with 133,980,000 traded Monday.

Stocks opened higher, buoyed by a better-than-expected report on third-quarter gross national product. The nation's total output of goods and services jumped an unexpected 1.8 percent in the third quarter on strong consumer purchases of cars, vans and trucks. Private economists, fearing that a recession had begun, expected an increase of only 0.8 percent.

"I think the higher opening was a little relief that GNP was better than expected," said Alfred Goldman, market strategist at A.G. Edwards & Sons Inc. in St. Louis. "If you believe one figure, which I do not, especially since it was distorted by inventory accumulation, it made some think the economy was not coming to an end. But then the market had second thoughts."

It also had a rise in oil prices and signs of heightened tensions in the Middle East to deal with. Secretary of State James Baker will travel to seven countries in the Middle East and Europe next week to meet with key leaders in the international alliance against Iraq, the State Department said Tuesday.

Administration and Saudi officials have said that while in the Middle East, Baker will discuss the ground rules for the use of military force against Iraq in situations other than as a response to an Iraqi attack on Saudi Arabia.

But crude oil prices, after gaining more than $1 in earlier trading, slipped toward the end of the day and closed down 14 cents to $34.54 a barrel. Analysts said the market was weary of the multitude of reports about the Middle East and couldn't muster the strength to support the earlier buying momentum.

The drop in oil prices helped push the blue chips into the plus column where they closed. But Goldman also cited technical factors in the Dow's rise. "Oil prices helped, but the market had given up 90 Dow points in five of the last six sessions," he said. "We had an oversold condition and so we had a knee-jerk lift, helped by buy programs."

Goldman said the program buying boosted the blue chips but not the rest of the market, accounting for the mixed close. "And since the broad market stayed negative and volume was moderate, I don't think one can take a lot of encouragement from today's action," Goldman said.

On the trading floor, Chase Manhattan was the most active issue, off 1/2 to 10 1/4.

Ford Motor followed, down two to 27 5/8 after reporting a plunge in third-quarter earnings because of costly buyer incentives, new product costs and losses in both its domestic and overseas automotive operations. And the results were bolstered by an accounting change.

Boeing was third, tumbling 1 5/8 to 44 1/2. Analysts were said to question the

role of special factors in the company's unexpectedly strong earnings report late Monday.

Among the other blue chips, General Motors lost 1/2 to 36 5/8 after reports saying it will temporarily idle workers at at least 11 North American vehicle assembly plants in November. Philip Morris was up 7/8 to 46 3/4, AT&T rose 1/2 to 33 7/8, IBM added 3/8 to 106 3/8, Coca-Cola jumped 1 1/8 to 44 7/8 and General Electric surged 1 7/8 to 52 3/4.

Elsewhere, Neiman Marcus soared 3 3/8 to 14 5/8. General Cinema reportedly said it would buy the shares it does not already own for $14.40 a share.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 189,571,140 shares, compared with 168,617,180 shares traded Monday.

Prices fell in moderate trading on the American Stock Exchange. The Amex Market Value index lost 0.72 to 288.07. Declines led advances 322-201 among the 772 issues traded. The price of an average share fell three cents. Composite volume was 12,368,450 shares vs. 8,878,750 traded Monday. Continental Airlines Holdings led the Amex issues, down 3/8 to 3 1/2. Wall Street observers could cite no reason for the stock's activity.

The National Association of Securities Dealers composite index fell 0.97 to 329.83.

LOS ANGELES (OCT. 30) UPI - California's real-estate slump worsened in the third quarter, as worries over the economic effect of the Persian Gulf crisis pushed down property loans by 16.2 percent, an information service reported Tuesday.

The third quarter's loan level of $50.7 billion in the state was also 14.5 percent below the figure for the year-ago quarter, Dataquick Information Services said.

"The situation in the Persian Gulf has made the financial markets very nervous " said Donald Cohn, president of the service. "Lenders are being careful and a lot of deals are being put on hold." "While residential lending is down somewhat, the big drop is in the riskier construction loan and major loan categories," Cohn said.

The declines came throughout the state. Southern California lending volume was down 13.9 percent from a year ago; the Central Valley was off 8.1 percent; The San Francisco Bay Area was down 16.2 percent and the Central Coast area plunged 24.9 percent.

Every county surveyed reported a year-to-year decline, with the smallest coming at two percent in El Dorado County, just east of the Sacramento area. The only other areas posting declines of less than four percent were Fresno and Solano counties, which have both become bedroom communities for workers in the San Francisco Bay Area.

Riverside County, once the fastest-growing county in the nation, posted a 22.7-percent decline, while Los Angeles fell 16.3 percent and Orange County declined 13.6 percent.

The report follows several similar disclosures of problems with the real-estate market in California, which went through a two-year boom cycle that ended early last year. The housing market has been particularly soft in coastal urban areas such as Los Angeles and San Francisco, where high prices have forced many potential buyers out of the market.

The California Association of Realtors reported last week that sales of existing single-family homes in September had fallen 10.7 percent, the largest drop this year and the sixth decline in seven months.

TRW Real Estate Information Services also reported last week that September housing sales - new and existing - plunged 23 percent from August for their lowest monthly rate in three years.

Earlier this week, Coldwell Banker Commercial Realty reported that two California cities in the Central Valley - Fresno and Bakersfield - had the highest and third-highest office vacancy rates of any suburban market at 38.6 percent and 31.6 percent, respectively.

NEW YORK (OCT. 30) UPI - Pan American World Airways, hinting at possible bankruptcy proceedings if its efforts fail, said Tuesday it was seeking waivers on about $150 million in payments to the Internal Revenue Service and two aircraft manufacturers.

The Pan Am Corp. unit, which has a long history of financial woes, also said it had not paid $30 million due the IRS to cover an employee pension plan and was ''presently in discussions with the IRS seeking to secure a deferral of these and other obligations.''

The airline said it had also secured short-term waivers on $120 million due to Airbus Industrie, the European aircraft consortium, and to Hartford, Conn.-based United Technologies Corp.

''If agreements cannot be reached on the long-term deferral of the payments due, the creditors have remedies available to them which, if exercised, could have a material adverse effect on Pan Am,'' the airline warned in a statement.

While creditors can demand to repossess assets of a company that owes money, corporations unable to meet their financial obligations can seek protection from their creditors under the Chapter 11 of the U.S. Bankruptcy Code.

Pan Am had already obtained a waiver last month and was expected to settle the payment with the IRS after the closing of the sale of the airline's Internal German Service to German carrier Lufthansa.

The amounts due to Pan Am's pension plans for which deferral is requested are secured by a lien on the Pan Am Shuttle.

The troubled carrier said Airbus and United Technologies have agreed to grant short-term waivers on about $120 million due them this week.

''Payments of $60 million each to Airbus and United Technologies were due upon the closing of the sale of our German routes to Lufthansa,'' Pan Am spokesman Jeffrey Kriendler said. ''We have obtained waivers for these payments.''

Kriendler did not specify the length of the waivers but said the payments were being delayed ''for weeks.''

Lufthansa paid Pan Am $150 million and the transaction was completed Monday, Kriendler said.

The amounts due Airbus and United Technologies are secured by aircraft, spare engines and spare parts, he said.

''These waivers were granted pending the creditors' review of the anticipated

favorable effects of the transaction between Pan Am and United Air Lines announced on Oct. 23,'' Pan Am said.

Pan Am last week signed a $400 million agreement to sell the UAL Corp. subsidiary a package of assets, including five valuable U.S.-to- London routes and facilities at Heathrow International airport.

The deal has been criticized by the Teamsters union and United's rival, American Airlines, which said Pan Am's assets were worth far more than $400 million.

Industry analysts and the Teamsters union have predicted that Pan Am was heading for bankruptcy unless the company could manage to get a fresh infusion of cash.

NEW YORK (OCT. 30) UPI - U.S. supplies of crude oil dropped for the seventh consecutive week as a result of lower Middle East imports and fell for the first time in 1990 below year-ago levels, the American Petroleum Institute reported Tuesday.

For the week ended Oct. 26, the weekly oil-industry survey found crude oil inventories fell to 339.5 million barrels from 340.4 million barrels in the prior week and slipped well below year-ago levels of 345.4 million barrels.

An API spokesman said it was the first time this year that crude supplies dropped below year-ago levels.

As world prices nosedived earlier this year, commercial stocks were built up to the point where they were 56 million barrels higher than a year ago prior to Iraq's Aug. 2 invasion of oil-rich Kuwait and the Persian Gulf crisis.

At this time last year, crude inventories rose 8 million barrels and were being built up in anticipation of refinery demands for the heating oil season.

Crude oil imports last week gained slightly to 5.1 million barrels a day from 4.8 million barrels a day in the previous week but were substantially lower than year ago imports of 6.9 million barrels a day.

Stocks of refined heating oil are much higher, however, than a year ago as refineries, until recently, were working at a high percentage of the nations' capacity.

U.S. refineries operated at 82.5 percent of capacity last week, compared with 83.3 percent a week earlierpcc ybyorxx. ybygrxx. ybedrxx. ybsirxx. uc to nff xda r fbc-oilstocks:605pes sked 10-30

U.S. crude stocks drop below year-ago levels

NEW YORK (UPI) - U.S. supplies of crude oil dropped for the seventh consecutive week as a result of lower Middle East imports and fell for the first time in 1990 below year-ago levels, the American Petroleum Institute reported Tuesday.

For the week ended Oct. 26, the weekly oil-industry survey found crude oil inventories fell to 339.5 million barrels from 340.4 million barrels in the prior week and slipped well below year-ago levels of 345.4 million barrels.

An API spokesman said it was the first time this year that crude supplies dropped below year-ago levels.

As world prices nosedived earlier this year, commercial stocks were built up to the point where they were 56 million barrels higher than a year ago prior to Iraq's Aug. 2 invasion of oil-rich Kuwait and the Persian Gulf crisis.

At this time last year, crude inventories rose 8 million barrels and were being built up in anticipation of refinery demands for the heating oil season.

Crude oil imports last week gained slightly to 5.1 million barrels a day from 4.8 million barrels a day in the previous week but were substantially lower than year ago imports of 6.9 million barrels a day.

Stocks of refined heating oil are much higher, however, than a year ago as refineries, until recently, were working at a high percentage of the nations' capacity.

U.S. refineries operated at 82.5 percent of capacity last week, compared with 83.3 percent a week earlier and 86.6 percent a year ago. At the end of September they were operating at 91.2 percent of capacity.

Inventories of distillate - used for home-heating oil and diesel fuel - rose to 138.1 million barrels from 136.9 million barrels a week earlier and remained above year-ago levels of 118.7 million barrels.

Distillate production remained steady at 2.9 million barrels daily, the same level as the previous week and a year ago.

Distillate imports rose to 322,000 barrels a day from 271,000 barrels a day in the previous week and were higher than year-ago imports of 204, 000 barrels a day.

#90303u2077 10/30/1990 ~United Press International

NEW YORK (OCT. 30) UPI - Jeff Torborg, whose Chicago White Sox made a surprising challenge to Oakland in the American League West, Tuesday was named American League Manager of the Year.

In a vote by the Baseball Writers' Association of America, Torborg received 128 points and 23 first-place votes of a possible 28. Tony La Russa, whose A's appeared in a third straight World Series, was second with 72 points and 4 first-place votes.

The White Sox, which trailed the A's by nine games, finished 94-68, their best record since 1983 and a dramatic improvement over 1989 in which they went 69-92.

Torborg's philosophy was simple - do the little things, and do them well: bunting, hit-and-run, speed, defense. The White Sox also had a bullpen anchored by 57-game savior Bobby Thigpen.

And despite being in a pennant race, Torborg resisted turning to veteran players, instead sticking with a lineup that was the youngest in the majors.

The team was reminiscent of the 1959 Go-Go White Sox, which won the AL pennant.

Torborg, 48, repeated cliches and they worked: stay focused, take it one game at a time. Eighty-three White Sox games were decided by two runs or less. Torborg said his stomach is just now starting to settle.

''I kept telling Sammy (Ellis, pitching coach) that we're going to play each night like it's the last game of the World Series,'' he said. ''He'd say 'What about the bullpen?' and I'd say I don't care about tomorrow. Let's win today.''

Joe Morgan, who guided Boston to first place in the AL East, was third with 28 points and was named on one first-place ballot.

Others receiving votes were Sparky Anderson of Detroit (12), Cito Gaston of Toronto (6), Bobby Valentine of Texas (1), Jim Lefebvre of Seattle (1) and Dour Rader of California (1).

Previous winners were La Russa with Chicago in 1983, Anderson (1984), Bobby Cox of Toronto (1985), John McNamara of Boston (1986), Anderson (1987), La Russa with Oakland (1988) and Frank Robinson of Baltimore (1989).

NEW YORK (OCT. 30) UPI - Moody's Investors Services raised the ratings on General Mills Inc.'s long-term unsecured debt Tuesday, citing strong performance in the company's consumer food operations and growth in restaurant operations.

The rating was raised to A1 from A2 for notes, debentures, Euronotes and industrial revenue bonds. Moody's also assigned a (P)A1 rating to the company's new shelf registration of debt securities.

The rating for two defeased debentures was raised to to Aa3 from A1 and the rating for commercial paper confirmed at Prime-1.

Moody's also rated General Mills' Employee Stock Ownership Plan notes A1/Prime-1, up from A2/Prime-1.

The credit rating agency said General Mills' consumer food operations, led by cereal products, generate three-fourths of the company's operating earnings and cash flow.

The agency said General Mills maintains relatively high leverage, but that risk is offset by strong fixed charge coverage and predictable cash flow.

General Mills is a consumer foods and restaurant company based in Minneapolis.

#90303u2138 10/30/1990 ~United Press International

CAPE CANAVERAL, Fla. (OCT. 30) UPI - A Delta rocket boosted a $90 million mobile communications satellite into orbit Tuesday in a spectacular night flight, marking the 200th launch of a workhorse Delta since the program's debut 30 years ago.

The $50 million 126-foot Delta 2's main engine and strap-on boosters ignited with a flash of fire and a thundering roar at 6:16 p.m. EST, instantly pushing the rocket away from the Cape Canaveral Air Force Station and into the darkening sky.

''We have ignition and we have liftoff. Liftoff of Delta number 200,'' said launch commentator Ray Adams as the slender rocket streaked away on a fiery flight visible for miles along Florida's ''space coast.'' ''This is the kind of flight we enjoy - watching that bird go up and do its job.''

Perched atop the Delta 2 in a protective nose cone was Inmarsat-2 F1, the first of a new generation of high-power communications satellites built by British Aerospace for the 62-nation International Maritime Satellite Organization, or Inmarsat.

Twenty-two minutes after launch, the rocket's third stage fired to put the solar-powered 2,100-pound satellite into a preliminary elliptical orbit. An on-board rocket was scheduled to fire later to boost the satellite into a circular orbit 22,300 miles above the Indian Ocean equator.

''Inmarsat-2 is a new kind of satellite, specifically designed to handle mobile communications applications,'' Inmarsat Director General Olof Lundberg said in a statement. ''It will ... provide communications to Earth stations small enough to be hand portable.''

The flight marked the 200th Delta mission dating back to May 13, 1960, when a less powerful version of the McDonnell Douglas Space Systems Co. booster debuted carrying an Echo 1 communications satellite.

That mission ended in failure, but a Delta launched three months later, on Aug. 12, 1960, was successful, kicking off one of the most reliable American rocket programs ever mounted. In 199 launches before Tuesday's flight, only 12 were failures.

Constantly upgraded to improve performance, Delta rockets have evolved through 16 different configurations. The Delta 2 currently in service was built by McDonnell Douglas specifically to launch 20 Air Force Global Positioning System satellites under contracts valued at $669 million.

McDonnell Douglas also markets the rockets on a commercial basis and prior to Tuesday's launch, the company's record stood at 21 successes in a row dating back to May 3, 1986, and a perfect 13 straight for the upgraded Delta 2, including six commercial launches.

Inmarsat-2 F1 is the first satellite owned and operated by the London-based Inmarsat consortium, which has focused on providing global satellite communications service for ships at sea using leased radio transponders aboard eight other satellites.

Ahmad Ghais, director of engineering and operations for Inmarsat, said the organization plans to greatly expand service in the 1990s to include users on the ground and in the air around the world. The company's motto for its expanded service is ''global mobile.''

''Anyone on the go should be able to use our satellites to communicate anywhere on Earth,'' Ghais said.

Inmarsat paid $160 million for its first wholly owned satellite, the Delta 2 rocket and ground services. The price tag also included the cost of about $70 million in insurance that was purchased commercially at a rate of 16.5 percent. The balance of the mission cost was self-insured by the company.

Inmarsat currently provides direct-dial voice, fax and data transmission services for ships at sea. But the company is aggressively marketing small terminals that can be used aboard aircraft or in the field.

Mobile transmission units currently cost about $15,000, but the price is expected to drop into the $5,000 range in a few years, bringing instant satellite communications into the reach of small business users.

#90303u2164 10/30/1990 ~United Press International

NEW YORK (OCT. 30) UPI - Striking Daily News reporters and editors gave the troubled tabloid little chance of surviving Tuesday, but despite facing the prospects of losing their jobs for good, vowed not to give into management.

In what one reporter called a ''soul-searching session,'' about 80 members of the Newspaper Guild, representing reporters, editors, photographers and advertising personnel at the newspaper met for more than an hour in sun-filled Robert Moses Park at 42nd Street and First Avenue, just blocks from the News's midtown headquarters.

Reporter Paul LaRosa said the meeting had been called ''to dispel notions that a negotiated settlement'' was still possible, especially now that management reportedly has begun hiring permanent replacements in the newsroom.

Guild members said that development forced them to realize they now face losing their jobs for good if they remain on strike, but also strengthened their resolve not to allow management to bust the unions so it can run the paper without them.

''I think to cross a picket line would be a basic act of betrayal,'' said Don Singleton, a News reporter for 26 years. ''Not one person here said, 'I'm going back.'''

''I won't cross the picket - it's not the way I was brought up,'' said News columnist Mike McAlary as he carried a strike sign outside the News building.

''This is a strike over the right to have a union,'' McAlary added. ''These people (The Chicago-based Tribune Co., which owns the Daily News) don't believe people have the right to have a union.''

''Those of us who are wavering, we're not going back without each other,'' said striking reporter JoAnne Wasserman.

Reuben Rosario, the News's Brooklyn courthouse reporter, said he could not ''in good conscience'' cross the picket line to work alongside people who had taken the jobs of people he has worked with for years.

An undetermined number of Guild members, including several photographers, returned to work, but union president Barry Lipton said he did not know how many had broken ranks.

''I can understand the concern that people have, especially when management is saying they're replacing them,'' Lipton said. ''They have to understand that not to stay out is to lose all hope, and would be contributing to the News's attacks on their brothers and sisters.''

News spokeswoman Lisa Robinson said when asked about the union defections ''there has been some movement afoot'' but she also declined to give numbers.

''We have hired replacement workers in all areas,'' Robinson said.

Reporter Don Gentile echoed many when he expressed doubts about how successful a prolonged strike can be in saving their jobs and the newspaper. ''We might be in a no-win situation.''

''I think the union will go down in flames,'' LaRosa said.

Lea Massato-Hamm, a sales representative, was equally pessimistic about the paper's prospects of survival, especially if distribution continues to be a problem for both management and advertisers. ''I think the Daily News is going to close,'' she said.

On Thursday, the first day of labor unrest, Massato-Hamm said several advertisers called about being remibursed because copies of the paper were never delivered to certain parts of the city.

''The bottom line is that if there's no paper on the stand, they lose business '' Massato-Hamm said. ''The Daily News knows they're going to lose all this money, but they're trying to break the unions.''

BOSTON (OCT. 30) UPI - New England's biggest banking company said Tuesday that defense contractors in the region are trying to adjust to less government spending by ''aggressively'' pursuing foreign and non- military markets.

But Bank of Boston Corp. could provide no evidence any of the companies were successful in actually shifting sales to other market segments.

The company, which has been badly hurt by a collapsing real estate market and plummeting public confidence in the economy, said its findings were promising for the region.

''This is encouraging news for the New England economy,'' said Ira Stepanian, Bank of Boston chairman and chief executive officer.

As for results of military contractors' efforts, Wayne Ayers, the bank's chief economist, said: ''We only have to work with what they tell us.'' And, Ayers said, the survey did not ask for details of new sales.

The banking company said more than 75 percent of the mostly small- and medium-size companies that responsed to its mailed survey ''said they have tried at least one new strategy ... over the past three years to tap into non-Department of Defense markets.''

Those new approaches most often have been new products and more aggressive marketing, the bank said.

''Most defense contractors ... appear to be moving aggressively to enter new markets and to reduce their dependence on defense spending,'' Bank of Boston said.

Exports by military contractors are already high, but much of that is military equipment and services, Ayers said.

However, he added, as U.S. military spending drops, ''it probably will mean that defense spending abroad will be beefed up as (other countries) shoulder more of their share'' of the cost of defense.

Ayers' figures showed that 21 percent of goods made by U.S. military contractors are exported, compared with 12 percent of all manufactured goods. Also, 25 percent of the military sector's services are sold abroad vs. just 3 percent of all services exported.

Bank of Boston, which said U.S. government military spending currently represents 8 percent of the region's total production, also predicted military spending will decline from 2 percent to 5 percent a year, adjusted for inflation, over the next few years.

''Our survey results suggest that the move to diversify and to increase exports for this export-oriented region could assist New England in getting back on a more solid footing,'' Ayers said.

#90303u2186 10/30/1990 ~United Press International

(OCT. 30) UPI - War has NOT broken out in the Persian Gulf, but U-S troops are at risk... as shown today in an explosion aboard a U-S warship in the region. U-S military officials say a boiler room blast early today on the U-S-S Iwo Jima killed six sailors instantly and critically injured four others who died later. In Saudi Arabia, a vehicle overturned... killing a Marine and bringing to 42 the number of Americans who have died in Operation Desert Shield.

Pan American World Airways says it is seeking waivers on some 50- Million dollars in payments to the Internal Revenue Service and to a pair of aircraft makers. The Pan Am Corporation also says it has NOT paid 30-Million dollars due the I-R-S to cover an employee pension plan. Last week, Pan Am signed a 400-Million-dollar deal to sell the U-A-L Corporation a package of assets... including five valuable routes between the United States and London.

A flash of fire and a thundering roar was seen and heard at Cape Canaveral tonight as a rocket blasted off and headed toward space. The mission to deploy a 90-Million-dollar satellite marks the 200th launch in the booster program's 30-year history. The Delta-2 rocket is carrying the first of a new generation of high-powered communications satellites built by British Aerospace.

A California winery worker has been found guilty of seven counts of murder in a bloody rampage that left six of his relatives and a co- worker dead. Ramon Salcido showed NO emotion as the jury verdit was read today in a Redwood City courtroom. Jurors deliberated four days before returning the verdict against Salcido for the killing spree that began April 14th, 1989. Salcido faces a possible death sentence or life in prison without parole.

#90303u2190 10/30/1990 ~United Press International

AUSTIN, TX (OCT. 30) UPI - The state said Tuesday it has sued the makers of an alleged fuel-saving device called the ''PetroMizer,'' saying the instrument is ineffective and advertisements for it are false and misleading.

''It's no surprise that someone would develop a scam such as this at a time when gasoline prices are increasing dramatically,'' said Attorney General Jim Mattox.

Named as defendants are Advanced Automotive Technologies, Inc.; Robert Morrison Jr., and Gaetano Francesco Sarcona, also known as Frank Sarcone and Frank Johns. Mattox said all of the defendants are based in Phoenix, Ariz.

The state's complaint alleges that the PetroMizer is nothing more than a magnet encased in plastic, which the user is directed to attach with plastic ties to the exterior portion of a vehicle's fuel line.

The defendants purchased full-page advertisements in daily newspapers in Austin, El Paso and Houston. The ads claimed the device would increase fuel efficiency, reduce hydrocarbon and carbon monoxide emissions and increase horsepower.

Mattox said, however, it is impossible for the device to affect a car's mileage, pollution or horsepower.

The ads also falsely claimed, the suit said, that the device had been endorsed by the Army, the California Air Resources Board, the Chrysler- Plymouth Corp., and the Westchester County, N.Y., Police Department, and developed with funding from the space agency.

The defendants are also being sued by the states of Iowa, Minnesota, Missouri and Tennessee.

The Texas complaint asked a state district court in Harris County to prohibit the defendants from engaging in deceptive business practices, make full refunds to consumers and pay civil penalties, court courts and attorneys fees.

#90303u2206 10/30/1990 ~United Press International

(OCT. 30) UPI - The nation's economic growth was surprisingly brisk in the third quarter, with analysts attributing the figures to a surge in consumer spending. But economics do NOT agree on whether the expansion is a signal that the nation may avoid recession... or simply marks a last hurrah before the big slide. One economist describes the economy as ''sloppy and slow-growing.''

President Bush tried today to rally Republicans for next week's congressional elections, blaming Democrats for tax increases in the budget. But Democratic congressional leaders say Bush is distorting the truth. House leader Richard Gephardt of Missouri says Bush wanted a- quote- ''a good deal for the wealthy, a raw deal for the elderly and a double deal for the middle class.''

Scientists have further encouraging results to report in the first attempt to

treat muscular dystrophy by implanting healthy muscle cells in patients. Dr. Peter Law of the University of Tennessee at Memphis says the method significantly boosted the strength of three boys' big toes. But Law remphasizes the method may never become a standard treatment for muscular dystrophy.

#90303u2223 10/30/1990 ~United Press International

NEW HAMBURG, Mo. (OCT. 30) UPI - A minor earthquake measuring 2.6 on the Richter scale struck the New Madrid Fault in southeastern Missouri early Tuesday, university officials said.

The temblor was recorded at 12:56 a.m. CST, said scientists at Memphis State University.

The epicenter of the quake was at New Hamburg, Mo., about 12 miles southwest of Cape Girardeau, scientists said. Cape Girardeau is about 100 miles southeast of St. Louis.

The temblor was considered an aftershock of the Sept. 26 quake measuring 4.6 on the Richter scale, which had the same epicenter, officials said.

The shaker was felt in parts of six states, authorities said. It was the fifth quake that was felt in the fault zone this year.

Concern about the possibility of a major earthquake along the fault has been growing this year since publicity about a prediction by New Mexico climatologist Iben Browning.

Browning has predicted a 50-50 chance of an earthquake measuring at least 6.0 on the Richter scale along the fault on or about Dec. 2-3.

#90303u2236 10/30/1990 ~United Press International

EAST ST. LOUIS, IL (OCT. 30) UPI - City Attorney Eric Vickers said Tuesday that East St. Louis will refund $474 million to investors for a redevelopment project that never got off the ground.

Vickers blamed litigation and TechniCo-op Inc., the Connecticut-based primary developer in the riverfront development plan, for the failure of the much-anticipated series of building projects.

''I think it was a good faith effort by the city. Construction was held up by litigation and trouble with the primary developer,'' Vickers said.

''I think the city as well as other municipalities were ripped off'' by Wall

Street bond broker Matthews & Wright, Vickers said, adding: ''I think the projects are viable. It's just a matter of finding financing - legitimate financing.''

Investors in Mayor Carl E. Officer's dream of revitalizing the poverty-stricken city's riverfront were promised refunds if work did not start on the projects by Dec. 15. Vickers said the refunds will be made.

The projects would have included an apartment complex, a port and a resource recovery plant.

Officials from two of the participating banks said they are notifying investors they will get their money back.

Premier Bank of Shreveport, La., sent notices Oct. 17 to bondholders telling them the bank will refund $223.7 million in port bonds.

National Westminister Bank in New York City is expected Thursday to inform investors in the $125.3 million resource recovery plant that they will get refunds.

The apartment complex investors will be notified of their refunds by National Westminister in about three weeks. The bank held $125 million in bonds for the proposed 1,250-unit complex.

Officer's revitalization plan, if it had been completed, would have provided badly needed jobs and tax revenue for East St. Louis, which has an estimated debt of more than $40 million - six times the municipality's annual income.

The Internal Revenue Service has been investigating the city's bond issue, keying on the tax-exempt status of the bonds.

If the IRS revokes the bonds tax-exempt status because the projects were not built, bondholders might have to pay taxes on the interest they earned for the last five years, possibly prompting investors to seek legal action against the city.

Matthews & Wright and three of its officials were charged with fraud last year by the Securities and Exchange Commission. The company settled the charges by quitting the bond underwriting business without admitting guilt.

Matthews & Wright made an estimated $19.5 million on the East St. Louis bonds. The city spent more than $15 million in bond proceeds on consultants and lawyers for the three projects.

All of the city's projects were supposed to be developed by TechniCo- Op Inc. of Bridgeport, Conn., the firm that introduced the city to Matthews & Wright.

Officer fired TechniCo-Op five months after the bonds were issued. The company filed two lawsuits against the city, one of which is still pending in New York City.

The mayor's riverfront development plan also is the focus of an investigation by the U.S. Attorney.

#90303u2254 10/30/1990 ~United Press International

REDWOOD CITY, Calif. (OCT. 30) UPI - Ramon Salcido was convicted Tuesday of murdering seven people, including two of his children, in a 1989 rampage in California's wine country triggered by what his defense claims was a psychotic depression.

Along with finding him guilty of six counts of first-degree murder and a single count of second-degree murder, jurors convicted the former winery worker of two counts of attempted murder.

The eight-man, four-woman jury was scheduled to return to San Mateo County Superior Court Nov. 7 to decide whether Salcido should be sentenced to death or life in prison without possibility of parole. If sentenced to death, an appeal is automatic in California.

Salcido, 29, showed no emotion as the verdict was read. Eleven sheriff's deputies stood guard in the court.

He was acquitted of a single count of attempted manslaughter in the wounding of Terry Butti, the wife of winery worker Kenneth Butti, 33, who was also wounded by Salcido.

The jury deliberated four days before returning its verdict in the April, 14, 1989 killing frenzy.

Salcido, arrested near his hometown in Mexico several days after the killings, slit the throats of his three daughters and shot his 24-year- old wife Angela to death.

He also killed his mother-in-law, Marian Richards, 47, her daughters Marie, 8, and Ruth, 12, and a winery co-worker, Tracy Toovey, 35.

The bodies of his daughters, 22-month-old Teresa, 4-year-old Sofia and 2-year-old Carmina, were abandoned in a Sonoma County dump after their throats were cut. Only Carmina survived.

Following his arrest, Salcido, his voice devoid of emotion, made a chilling confession to detectives as they escorted him back from Mexico on a jet borrowed from Peanuts cartoonist Charles Schulz.

After the verdict was announced Tuesday, Marteen Miller, Salcido's lawyer, said: ''It's not over until it's over,'' apparently referring to the sentencing hearing yet to come.

Miller told jurors at the outset that Salcido committed the killings but argued that he was in a drug and alcohol-induced state that made him incapable of premeditated murder.

During opening statements in the trial, Miller said her client has the mind of a 2-year-old and that he loved his children ''only as an extension of himself.''

Miller told the jury Salcido killed his children because he was angry with his wife, accusing the former model of infidelity.

Psychiatrists who examined Salcido found him to be ''severely mentally ill,'' Miller had said.

Salcido's tape-recorded confession recounted in gruesome detail how he slashed the throats of his daughters and hurled their limp bodies into a gully.

He told how he used a jack handle to bludgeon his mother-in-law to death and a butcher knife to cut the throats of her two young daughters.

He shot his wife with a .22-caliber pistol stolen from his father-in- law and later used it to kill a winery co-worker and wound another.

#90303u2258 10/30/1990 ~United Press International

DETROIT (OCT. 30) UPI - Thousands of volunteers took to the streets at dusk Tuesday in an effort to dampen Devil's Night, an orgy of arson that traditionally sweeps Detroit each year around Halloween.

A curfew for youths under age 18 was in effect from Monday to Thursday, an arson hotline was set up, a $1,500 reward was offered for every arsonist turned in, and pay television companies were giving away some of their services in an effort to keep young viewers home.

These efforts appear to be working. Since the Devil's Night mobilization began five years ago, fires have dropped 72 percent since the peak in 1984, when a record 810 fires burned during the three-day Halloween period. Last year, there were 223 fires during the same period.

This year, about 35,000 volunteers and 3,500 block clubs were patrolling streets during the 6 p.m.-to-6 a.m. curfew, which began Monday night and ends Thursday morning, when most of the trouble was expected. Police said 170

juveniles had been arrested since the curfew began.

About 60 fires, considered normal, were reported during the first day of the three-day curfew period, officials said. During 1989, 379 youths were arrested during the three days for curfew violations.

A hotline, 96-ARSON, also was established this year for residents to report individuals starting fires with a $1,500 reward going to the person who turns in an arsonist.

And 11 cable television companies in the Detroit area were unscrambling their signals Tuesday night so customers could receive without cost premium channels such as HBO, Cinemax, The Movie Channel and the sports station PASS.

Curfew violators are given a $50 tickets and ''are detained until their parents come and pick them up,'' a police spokeswoman said. She said the teenagers also must appear in court.

Many of the youths arrested Monday night were unaware a curfew existed, yelling as they were being arrested ''What curfew?'' But it has been a standard tool of control since the mid-1980s when Devil's Night became a period in which hundreds of fires were set in cars, garages, garbage bins, vacant houses and even occupied houses.

This year, Mayor Coleman A. Young and city workers launched their most aggressive anti-arson campaign. Besides the army of volunteers, seven special Fire Department command stations were established.

Department of Public Works crews have razed more than 600 abandoned buildings in the past several weeks, and the Police Department has towed abandoned cars that might attract arsonists. One recent count showed Detroit had more than 15,000 abandoned homes and buildings.

In one week, the city distributed about 6,000 yard signs bearing the city's new slogan, ''My Heart Is with Detroit.'' The signs are designed to instill civic pride and counter the charred image associated with Devil's Night.

''We hope that the period will come in the not-too-far future when the Halloween period will be looked upon as any other period and it will not be necessary to take unusual steps,'' Young said. ''But until that day comes, we will do whatever we have to do to keep it under control.''

Alarmed by the international publicity over Devil's Night, Young carefully controls access to arson statistics. No official figures are released until several days after Halloween - and those figures come from the mayor's office.

Traditionally, the areas hit hardest by Devil's Night arsonists are the older, poorer sections of the city with closely packed wooden houses pockmarked by

vacant buildings and crack houses. Many sections of the city, however, remain virtually untouched.

#90303u2303 10/30/1990 ~United Press International

WASHINGTON (OCT. 30) UPI - The Drug Enforcement Administration is investigating whether the Decmeber 1988 bombing over Scotland of a Pan American World Airways jumbo jet was linked to one of the agency's undercover operations, NBC News reported Tuesday.

The government was conducting an inquiry into an allegation that the bomb that destroyed Pan Am Flight 103, killing all 259 people aboard and 11 on the ground, was perhaps placed in the baggage of a 23-year-old Lebanese American acting as a DEA courier, the network said, citing anonymous sources.

There has been no conclusive evidence pinning the bombing on any one person or group, although Middle East political terrorism has long been suspected.

A DEA statement said there was no evidence to support reports that its undercover activities were linked to the bombing.

The new development suggested that drug operatives may have uncovered the top-secret operation targeting Middle East herion trafficking to the United States and retalitated by blowing up the plane over Lockerbie, Scotland, on Dec. 21, 1988, NBC News said.

The network report said Pan Am flights from Frankfurt, West Germany, including Flight 103, had been used several times by the DEA as part of its undercover operations to fly informants and suitcases of heroin into Detroit as part of a sting operation to catch drug dealers.

''Operation Courier'' was established by the DEA three years ago in Cyprus to infiltrate Lebanese heroin networks in the Middle East and their connections in the United States, NBC News said.

The network quoted law enforcement and intelligence sources as saying the Pan Am baggage area in Frankfurt was a key to the operation through the U.S. and West German governments. Informants would put suitcases of heroin on the Pan Am flights apparently without the usual security checks, it said.

Sources told NBC News that the fear now is that those who blew up the plane infiltrated the undercover operation and substituted a bomb for the heroin in one of the shipments.

The courier, according to sources quoted by the network, had been recruited as an informant. The DEA was trying to determine whether he was tricked by terrorists into carrying the bomb aboard the flight.

#90303u2318 10/30/1990 ~United Press International

NEW YORK (OCT. 30) UPI - Defense lawyers for Michael Milken said their client was an ''innovative financier who occasionally crossed the line'' but not a ''master criminal,'' as the government contends.

The statement came in a memorandum they filed with U.S. District Court Judge Kimba Wood released Tuesday.

A two-week presentencing hearing for Milken ended last week. The former head of Drexel Burnham Lambert Inc.'s junk-bond department, who pleaded guilty in April to six counts of securities fraud, faces a maximum jail term of 28 years.

A sentence may be handed down by Wood as early as next week.

The hearing had been ordered by Wood to determine if Milken had been involved in a broad conspiracy to manipulate the financial markets, as the government alleges, or had broken the law in a few isolated cases to help clients, as his lawyers claim.

Prosecutors' summary of the hearing is expected to be released on Wednesday.

In their 40-page memorandum, Milken's lawyers contended the government, despite four years of scrutinizing him ''to a degree unmatched in recent memory,'' failed to prove he had broken the law with regard to the three specific financial transactions considered at the hearing.

Defense lawyers also claimed that prosecutors had an unfair advantage in the hearing because they used the threat of prosecution and the promise of immunity to persuade witnesses to testify, while they had neither of those weapons at their disposal.

Milken's lawyers acknowledged that the stock of Wickes Cos., a company with businesses in automotive equipment and building supplies acquired in a leveraged buyout, had been manipulated prior to the buyout in April 1986, but they said the government failed to prove Milken had been involved in the manipulation.

To support their argument, defense lawyers said Cary Maultasch, a Drexel trader, and Michael Davidoff, a trader for the Boesky Organization - called ''the two persons most directly involved in the manipulation'' in the defense memorandum - testified that Milken never asked them to manipulate a stock.

Milken's attorneys questioned the credibility of another Drexel trader, Peter Gardiner, who had testified that he believed Milken had indeed been involved in manipulating Wickes stock.

The memorandum portrayed Gardiner as a ''confessed perjurer'' who lied repeatedly to the Securities and Exchange Commission and the Milken grand jury and who felt ''compelled'' to testify against Milken to avoid prosecution.

The defense also denied government allegations that Milken had bribed money managers in connection with the Drexel-financed leveraged buyout of Storer Communications Inc. in 1985 by selling them interests in a partnership that held Storer warrants later sold for many times their initial value.

''The government must concede that merely providing an investment opportunity to a client is not illegal,'' the memorandum stated.

The defense dismissed prosecutors claims that Milken should have disclosed the unusual arrangement, noting the responsibility for disclosing such information rested with Drexel's lawyers and compliance officers, not Milken.

In the third transaction, defense lawyers said the government failed to prove Milken received insider information regarding Drexel's underwriting of a bond-for-stock Caesar's World Inc. exchange offer in the summer of 1983.

The government claims that Milken had advance knowledge of the offer and that he directed his traders to purchase Caesar's World bonds prior to the announcement of the offer. The exchange offer sharply increased the value of the bonds.

But the defense memorandum said that witnesses failed to corroborate the government's version of events and that Milken was actually vacationing in Europe during the period the prosecutors claims he was directing the illegal trades.

The defense also denied government allegations that Milken attempted to obstruct a government investigation of Drexel, despite ''colorful descriptions'' at the hearing by Milken aides of ''hushed conversations over running faucets.''

''No witness was asked by Mr. Milken to destroy a document; no witness was asked to give false testimony; no witness was asked to withhold evidence from the government; no witness was ever intimidated,'' the memorandum asserted.

Defense lawyers asked Wood to bear in mind the ''positive aspects'' of Milken's life when setting a sentence, such as his business achievements and his community and charitable contributions.

SAN JOSE, CA (OCT. 31) BUSINESS WIRE - EMCON Associates (NASDAQ:MCON) Wednesday reported a strong quarter with an increase in the third quarter earnings of 22 percent, or 33 cents per share, vs. the 27 cents per share in the 1989 third quarter.

Net revenue increased 51 percent from $9,823,000 in 1989's third quarter to $14,843,000 for the quarter ended Sept. 30, 1990. Net income increased 31 percent over the like time frame to $1,453,000 from $1,105,000.

For the nine months ending Sept. 30, 1990, EMCON's net revenue was $40,587,000 an increase of 50 percent from net revenue of $26,996,000 in the like period last year.

Pro forma net income, before recognition of the effect of the settlement of the Kettleman Hills lawsuit, was $3,823,000, or 89 cents per share compared with net income of $2,890,000, or 71 cents per share in the comparable 1989 period. Pursuant to the terms of the settlement agreement, funds were disbursed Aug. 6, 1990.

EMCON provides comprehensive engineering and consulting services in waste management and environmental protection. Established in 1971, EMCON today is a leader in the design and development of waste management facilities and remediation and analytical programs. EMCON serves public and private clients throughout the United States.

LINCOLN, NE (OCT. 31) BUSINESS WIRE - Terrano Corp. (NASDAQ:TRNO) announced Wednesday that Humana Inc. of Louisville, Ky. (NYSE:HUM) will install Terrano's ILS-5 Laboratory Information System at Humana Hospital - Huntsville, a 323 bed acute care facility in Huntsville, Ala.

The system will be based on the Prime 50-Series hardware platform and will include Terrano's Anatomic Surgical Information Retrieval System, Transfusion Service Manager, Advanced Microbiology and Laboratory Management Modules plus multiple Instrument Interfaces.

This will be the first ILS-5 system to be intalled under the Paid-Up License Agreement between Terrano and Humana which was announced Oct. 16 and it will bring the total number of ILS-5 installations at Humana facilities to 17.

Terrano Corp. develops and markets integrated turn-key computer systems for radiology departments and clinical laboratories. The company is best known for the ILS-5 clinical laboratory system which is a comprehensive information management system for both hospital and private laboratories.

Terrano Corp. products are based on the IBM AS/400 and Prime Computer Inc. 50-Series family of computer systems.

#90304b0025 10/31/1990 ~Business Wire

SACRAMENTO, CA (OCT. 31) BUSINESS WIRE - Unify Corp. Wednesday released the most comprehensive set of Open Systems application development technologies yet designed for developers using IBM's RISC System/6000 line of high-performance workstations and servers.

Built around Unify's ACCELL/SQL 'Open Systems 4GL' technology, this full suite of software tools will allow IBM RISC System/6000 developers to easily write and better maintain complex applications across a number of different

graphical user interfaces (GUIs) and Unix relational databases.

''Our ACCELL application development package for the IBM RISC platforms is designed to meet the current and future productivity and migration needs of System/6000 workstation developers,'' said Bill Osberg, Unify's director of product marketing. ''Our Open Systems architecture allows System/6000 developers to support multiple databases and GUIs simultaneously, even in the most demanding network environments.''

IBM's RISC System/6000 family was designed to work in heterogeneous, open systems networks with workstations for IBM and other manufacturers. The family includes nine high-performance workstations and servers running AIX Version 3, a Unix-based operating system conformant with IEEE open software standards (POSIX 1003.1).

These machines offer a top performance of 41 MIPS and 13 MFLOPS, and incorporate a high-performance implementation of the IBM Micro Channel architecture and integrated network communications facilities including X.25, TCP/IP and the Network File System.

The ACCELL open systems application development toolset for IBM's RISC System/6000 family takes special advantage of these and other features, including IBM's high-performance floating point processors, superscalar processors and optimized graphics capabilities.

Unify Corp. is a leading supplier of Unix-based application development technology. This year, the company became the first and only firm to offer a common 4GL-based application development environment to support all leading Unix databases and graphical user interfaces.

NOVATO, CALIF. (OCT. 31) BUSINESS WIRE - Harding Associates Inc. (NASDAQ/NMS:HRDG) announced the opening of a new office in Northfield, Ill., a suburb of Chicago.

''Harding Associates has been serving clients in the Midwest for several years now,'' said Paul V. Rosasco, senior vice president for Harding, ''and the opening of this office will allow us to better serve existing clients as well as offer our broad range of environmental services to many of our national clients who have facilities in this area.''

The office will be managed by Robert W. Dennis, Ph.D., who has more than 15 years of industrial and consulting experience in environmental engineering and investigation and remediation of contaminated sites.

Dr. Dennis, 41, received a M.S. degree from the University of Notre Dame in 1976 in Environmental Health Engineering and his Doctorate in Civil Engineering in 1978. Prior to transferring to the Chicago area, he managed Harding's Novato office. Dr. Dennis is a Registered Professional Engineer.

Founded in 1957, Harding Associates, through its wholly-owned subsidiaries, Harding Lawson Associates and Harding Construction Services, provides engineering, environmental, and construction management services for both remediation of contaminated sites and the design of solid and hazardous waste facilities.

Besides the new office, located at 550 Frontage Rd., Suite 395, Northfield, Ill., the company has offices in California, Alaska, Arizona, Colorado, Hawaii Nevada, New Jersey, Texas, Washington and the District of Columbia.

SAN JOSE, CA (OCT. 31) BUSINESS WIRE - SEEQ Technology Inc. (NASDAQ:SEEQ) announced that net revenue for its fiscal year ended Sept. 30, 1990, was $45.1 million compared to $55.1 million for the prior year.

The company also reported a net loss for the year of $26.1 million, or $2 loss per share (13 million shares) compared with net income of $1.1 million, or 9 cents per share, for the prior year (13 million shares).

Net revenue for the fourth quarter ended Sept. 30, 1990, was $11.1 million compared to net revenue of $10.1 million for the like period last year.

There was a net loss for the quarter of $15.9 million or $1.18 per share (13.4 million shares) which includes a restructuring charge of $11.4 million. This compares to a net loss of $2.4 million, or 19 cents per share (12.9 million shares) for the like quarter last year.

The fourth quarter revenue of $11.1 million was an increase of 10 percent over the third quarter of the current fiscal year and is reflective of additional shipments of the company's newer advanced EEPROMs and data communication products.

As a result of the decision to convert the fabrication facility from full

production manufacturing to a pre-production and process development facility, SEEQ is taking a pre-tax charge of $11.4 million during our fiscal fourth quarter. The charge for restructuring includes equipment write-offs, facility lease costs, severance and incentive payments and the costs of foundry transfer.

SEEQ Technology Inc. is a leading designer and manufacturer of electrically erasable programmable read-only memories, Flash EPROMs, military UVEPROMs and Ethernet data communication products. SEEQ Technology Inc. is located at 1849 Fortune Drive, San Jose, Calif. 95131. Telephone: 408/432-7400.

LOS ANGELES (OCT. 31) BUSINESS WIRE - Los Angeles Times circulation increased 8 percent daily and 7.5 percent on Sunday -- reflecting the newspaper's largest Sunday circulation gain in nearly a quarter of a century and maintaining The Times' position as the number one daily metropoliatan newspaper in the United States.

Sunday circulation for the six-month period ended Sept. 30 increased 105,485 to 1,518,000, according to figures filed with the Audit Bureau of Circulations -- the largest gain since 1968. Daily circulation jumped 88,700 to 1,196,323.

Circulation increased sharply in Orange County and the San Fernando Valley, two key marketing areas for The Times. Orange County circulation is up 6.7 percent, or 11,224, daily and 19.2 percent, or 39,979, on Sunday. Circulation for the Valley and Ventura County editions, according to Times internal records, grew by 5.3 percent, or 11,460, daily and 4.1 percent, or 11,306, on Sunday.

''Becoming the nation's number one daily last spring was a historic milestone '' said David Laventhol, publisher and chief executive officer of The Times. ''These new circulation figures reflect continued growth for The Times and strengthening of our position in these important regional markets.''

SAN ANTONIO (OCT. 31) BUSINESS WIRE - Frank E. Holmes, chairman of United Services Advisors Inc. (NASDAQ:USVSP), Wednesday announced that the company posted consolidated net earnings of $211,768, 5 cents per share, for the

quarter ended Sept. 30, 1990, in comparison to net earnings of $309,778, 8 cents per share, for the like period one year earlier.

The decrease in earnings for the quarter ended Sept. 30, 1990, was principally attributable to an increase in marketing expenditures incurred in an effort to promote several of its existing mutual funds and in preparation for launching two new mutual funds.

The company also announced that the board of trustees of United Services Funds has approved increasing the fee charged for transfer agency accounts from $14 per account to $18 per account effective Nov. 1, 1990. These fees, which remain below the industry average for an in-house transfer agency, represent services related to maintaining and servicing shareholder accounts of United Services Funds.

This increase is expected to increase revenues for the company by approximately $500,000 annually.

United Service Advisors Inc. is a public company based in San Antonio and manages a mutual fund complex of eleven no-load funds. The company's stock is traded over the counter under the symbol USVSP.

SAN FRANCISCO (OCT. 31) BUSINESS WIRE - The PGT-PG&E Pipeline Expansion Wednesday announced that the Bechtel Corp., project manager, has awarded contracts to two firms -- Cooper Rolls and Solar Turbines Inc. -- for turbines and compressors for the $1.2 billion expansion project, which will transport additional volumes of Canadian natural gas to the western United States.

Bechtel awarded Cooper Rolls of Mt. Vernon, Ohio, a multimillion-dollar contract to provide three gas turbine compressor packages and 18 centrifugal compressors. The turbines and compressors are to be engineered by the first quarter of 1991.

Manufacturing is contingent upon regulatory approval, expected by early 1991 from the Federal Energy Regulatory Commission and the California Public Utilities Commission.

Solar Turbines Inc. of San Diego was awarded a several-million-dollar contract for a single turbine and compressor package.

The PGT-PG&E expansion, sponsored by Pacific Gas Transmission Co. (PGT) and Pacific Gas and Electric Co. (PG&E), will transport 755 million cubic feet a

day (MMcf/d) of Canadian natural gas to California and 148 MMcf/d to the Pacific Northwest.

Construction, scheduled to begin in early 1992, will involve installing approximately 900 miles of 42-inch and 36-inch pipeline, paralleling and interconnecting with the existing PGT and PG&E facilities from British Columbia to California.

#90304b0071 10/31/1990 ~Business Wire

PORTLAND, OR (OCT. 31) BUSINESS WIRE - PacifiCorp (NYSE,LSE: PPW) Wednesday reported third quarter 1990 earnings of $.43 per share -- the same as in the 1989 period -- while year-to-date earnings per share increased 1 percent to $1.33 from $1.32.

Consolidated revenues rose 5 percent, to $965 million, as electric operations, mining and resource development and telecommunications segments produced quarterly increases.

Electric operations, through Pacific Power and Utah Power, reported third quarter revenues of $539 million, a gain of 2 percent. Kilowatt-hour sales to other utilities increased 19 percent as the company began deliveries during the year to Nevada Power and the Sacramento Municipal Utility District under new long-term firm power contracts. Although retail kilowatt-hour sales grew 2 percent, retail electric revenue remained flat as a result of price reductions.

NERCO, PacifiCorp's mining and resource development subsidiary, reported revenues of $201 million -- a $27 million, or 15 percent, increase.

Revenue from coal sales, NERCO's mainstay business, rose 18 percent, or $20 million, on a 20 percent increase in sales volume. Oil and gas revenues rose $10 million, or 26 percent, as a result of increased production stemming from acquisitions and new well development. Precious metals revenue declined $3 million as NERCO sold 6 percent less gold at lower average prices. No silver sales were made in the third quarter 1989 or 1990 and NERCO recently announced the indefinite closure of its largest silver mine in Nevada pending sustainable price improvements.

In the telecommunications segment, Pacific Telecom posted quarterly revenues of $204 million, up 19 percent from a year ago. The gain reflects the sale of capacity on the North Pacific fiber- optic cable and the addition of revenue from North-West Telecommunications acquired in August 1990. Offsetting these gains were Alaskan long distance intrastate rate reductions and favorable

out-of-period revenue settlements posted in 1989.

Earnings contribution on common stock decreased slightly to $104 million.

Electric operations' earnings rose 10 percent or $7 million. This was primarily due to increased kilowatt-hour sales volume and the reversal of accrued interest relating to previously settled coal royalty issues.

NERCO's net income was up 9 percent. However, a 1989 after-tax gain of $6 million relating to the public sale of NERCO's common stock, allocated to that segment, led to a earnings contribution decline of $5 million.

Pacific Telecom's earnings contribution also declined $5 million. The decrease is largely the result of increased interest expense associated with the acquisition of North-West Telecommunications.

For the year-to-date, PacifiCorp's revenues rose 2 percent to $2.8 billion.

NERCO and Pacific Telecom reported revenue increases of 16 percent, or $77 million, and 8 percent, or $39 million, respectively. NERCO's revenues rose as a result of increased sales volumes of coal, gas and oil. Telecommunications' revenue rose as a result of sales of capacity on the North Pacific fiber-optic cable and increased revenue from local telephone operations largely due to the acquisition of North-West and increased access lines.

Despite a 3 percent increase in total kilowatt-hour sales, retail price reductions resulted in electric operations posting a 1 percent, or $16 million revenue decrease due to scheduled price decreases. Electric operations' accelerated cost-containment efforts, including the early retirement program, are expected to improve that business' future financial performance.

The 22 percent decline of financial services' revenue is associated with that business' reduced size.

Earnings contribution on common stock for the year declined 2 percent, to $321 million. Telecommunications' earnings rose 11 percent, or $5 million, on the basis of the $12 million after-tax gain from the February 1990 sale of a cellular telephone subsidiary. Electric operations' results were adversely affected by retail price reductions. NERCO's contribution declined $4 million due to the allocation of a $6 million after-tax gain relating to NERCO's stock sale in August 1989 which reduced PacifiCorp's ownership of the subsidiary from 89 percent to 82 percent.

Year-to-date earnings per share rose 1 percent to $1.33 as the average number of common shares declined 2 percent from the same period a year ago as a result of shares held for use in the telecommunications' acquisitions.

At Sept. 30, 1990, PacifiCorp's actual consolidated shares outstanding were

248 million compared to 246 million in the same period last year.

BEVERLY HILLS, CA (OCT. 31) BUSINESS WIRE - Litton's Data Systems division, Van Nuys, Calif., has won a $10.1 million contract from the U.S. Navy for production of 600 additional hand-held digital communications terminals and spare parts for the U.S. Marine Corps.

The book-size terminals, used to electronically format, display, transmit and receive alphanumeric messages and maps, are also used by the U.S. Army and Air

Force. More than 3,000 terminals have been produced by Litton for the three services. Production under this contract will continue at Data Systems division's facility in Colorado Springs, Colo.

The Marines use the terminals to provide information from forward observers and forward air control support teams back to direct air support centers. Both the Army and Air Force use the devices for similar forward area communications requirements.

Data Systems is a unit of Litton's Command, Control and Communications Systems group of divisions. It is a world leader in development and production of military electronic systems for command and control.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems to U.S. and world markets.

HOUSTON (OCT. 31) BUSINESS WIRE - Serv-Tech Inc. (NASDAQ:STEC) reported third quarter 1990 net income of $645,000, an increase of 127 percent compared with $284,000, before extraordinary credits, reported for the third quarter of 1989.

Earnings per share were 15 cents for the third quarter 1990, more than double fully-taxed earnings per share of 7 cents in the third quarter 1989. Revenues were $9,023,000 in the third quarter 1990, up 42 percent from the $6,350,000 reported last year.

For the nine months ended Sept. 30, 1990, net income increased 103 percent to $2,654,000, or 60 cents per share, compared with net income of $1,309,000, or 38 cents per share, before extraordinary credits, reported for the first three quarters of 1989.

Revenues were $30,086,000 for the first nine months of 1990, an increase of 31 percent compared with revenues of $22,918,000 for the 1989 period.

Including extraordinary credits for tax benefits resulting from the utilization of operating loss carryforwards, earnings per share for the three-and nine-month periods ending Sept. 30, 1989, were 11 cents and 58 centes, respectively.

There are no operating loss carryforwards available in 1990. The company's tax rate was 36 percent for the nine months ended Sept. 30, 1990.

Richard W. Krajicek, chairman of the board, said that he was extremely pleased with the 1990 third quarter results -- the best third quarter in the company's history. ''Increased emphasis by our customers on high quality repairs has increased the scope of our jobs, leading to higher revenues and improved gross margins.

''Looking ahead, the level of committed work and present bid activity indicate strong demand for the company's services will continue well into 1991.''

Following are the unaudited operating results for the three- and nine-month periods ending Sept. 30, 1990 and 1989.

#90304b0102 10/31/1990 ~Business Wire

PALO ALTO, CALIF. (OCT. 31) BUSINESS WIRE - The formation of WordMARC International Corp. was announced Wednesday by Jeffrey N. Weidler, president and chief executive officer of the new company.

WordMARC International is the successor company to MARC Software, manufacturer and distributor of WordMARC word processing software and related software products.

The new company will develop products for the multi-user, office automation market and continue manufacturing and distributing of WordMARC word processing software. ''The new organization will strengthen our ability to support our current customers,'' said Weidler. ''We will be able to offer our customers innovative products as well as enhance the capabilities of Composer+.''

Programmed Intelligence Corp. (PIC), Norcross, Ga., developers and distributors of Intelligent Query, a powerful, non-application-specific query and report writer, is the major shareholder in the new company. Rick Chitty, president of Program Intelligence, will serve as chairman of WordMARC International.

''We're extremely pleased to enter a new phase of WordMARC's growth with such a synergistic partner,'' said Weidler. ''We share similar strategic directions, and linking our two major products, we can offer our current and future customers true data base publishing capabilities as well as state-of-the-art word processing software.''

Drawing on its 10-year heritage in the minicomputer industry, WordMARC products are designed from the ground-up to support high-end distributed minicomputer applications running across multiple platforms and operation systems.

WordMARC brings the ability to integrate word processing, data base, spreadsheet and graphics information into a single document processing solution--independent of the hardware and operating environment.

WordMARC International Corp. develops, manufacturers and distributes WordMARC Composer+ word processing software and other related software products. WordMARC products are sold by direct sales force, by VARs and through OEM channels. There are more than 500,000 users worldwide in Fortune 1000 companies, scientific laboratories, government agencies and universities.

WordMARC International's corporate headquarters are located at 260 Sheridan Ave., Palo Alto, Calif. 94306, 415/326-1971.

FEDERAL WAY, WA (OCT. 31) BUSINESS WIRE - Pacific Nuclear Systems Inc., Federal Way, has announced its earnings for the third quarter of 1990.

Pacific Nuclear Systems, a nuclear services company specializing in the processing, handling and disposition of both low- and high-level nuclear waste reported net income of $510,000, or 11 cents per share, on revenues of $15.1 million for the third quarter ended Sept. 30, 1990. For the same period in fiscal 1989, the company recorded a loss of $207,000, or 4 cents per share, on

revenues of $11.7 million. Results for the nine-month period ended Sept. 30, 1990, show a loss of $3.2 million, or 68 cents per share, on revenues of $36.9 million. For the same period in 1989, the company recorded a net profit of $313,000, or 6 cents per share, on revenues of $37.7 million.

According to David F. Jones, chairman: ''This quarter's results reflect the profitable performance of our Services and Engineering groups. Additionally, the recent delivery and acceptance by Westingouse of the initial certified TRUPACTJII container was a significant milestone.''

Pacific Nuclear Systems Inc. and its subsidiary companies (Nutech Inc.; NuPac Services Inc.; Nuclear Packaging Inc.; PN Services Inc.; and Alaron Corp.) provide a wide range of services to the nuclear industry. The company, founded in 1983 and headquartered in Federal Way, is traded in the NASDAQ - National Market System under the symbol PACN.

SAN FERNANDO, CA (OCT. 31) BUSINESS WIRE - SFE Technologies (NASDAQ:SFEM) Wednesday reported that it had entered into a letter of intent to sell the major operating assets of its West-Cap Arizona subsidiary.

William Kuehn, chairman, said, ''The letter of intent provides the basis for the sale of West-Cap's business to a privately held company headquartered in the Midwest.'' He added, ''The proposed agreement is subject to the satisfaction of a number of conditions including the purchaser arranging satisfactory financing.''

Kuehn indicated that both companies expect the transaction to close this year. However, Kuehn further said, ''The letter of intent is only the first step in this process,'' and that, ''no assurances could be given that the proposed transaction will close or that it will close according to the proposed schedule.''

Kuehn also stated that, ''SFE's board of directors has approved the agreement subject to the negotiation of a satisfactory definitive purchase agreement and the satisfaction of the conditions necessary to closing.''

Kuehn stated that, ''The sale of West-Cap Arizona is an essential element in the company's strategy to restructure itself in order to preserve its options and maximize its financial flexibility.'' Additionally, Kuehn said, ''The sale of West-Cap does not affect the company's previously disclosed plans with regard to its San Fernando Electric division.''

He said that, ''The company's investment bankers, Brockett Tamny & Co., are continuing their efforts to locate a buyer of its San Fernando division while providing ongoing assistance to the company in the West-Cap sale.''

SFE Technologies is a leading manufacturer of passive electronic components. These products include multilayer ceramic (MLC) capacitors, wound capacitors and magnetic components. The company also produces circuit assemblies featuring surface mount technology. SFE Technologies has manufacturing facilities in San Fernando; Tucson, Ariz.; Concord, N.C.; and Nogales, Sonora, Mexico.

NEW YORK (OCT. 31) BUSINESS WIRE - ARIX Corp. (NASDAQ/NMS:ARIX) Wednesday announced an agreement with Informix Software Inc. to market the complete suite of Informix products, including the Wingz graphical spreadsheet on ARIX's symmetric multi-processor computer systems.

The Wingz port to ARIX's multiuser platform, with its support of X-Window terminal networks, addresses commercial needs for interconnected data management solutions and desktop tools, at a fraction of the cost of PC networks.

Wingz is a graphical spreadsheet that includes a powerful graphical programming language called HyperScript. With HyperScript, users can create customized applications for accessing data from an Informix SQL-based database. HyperScript is a complete development environment for end users, developers, and independent software vendors.

The Wingz port also includes Wingz-DataLink, a technology that will let users access a local or remote Informix SQL-based database via Wingz' graphical environment.

Wingz-DataLink will enable ARIX platforms to be tied into an enterprise-wide information systems network using SQL as the standard language for information retrieval. Even users with no previous SQL experience will be able to retrieve information from the corporate database by using simple point-and-click options.

Additionally, both companies announced plans to begin joint marketing activities. The partners plan training programs and sales promotions designed to encourage cooperation between sales organizations.

At UNIX Expo this year (booth no. 913) ARIX will display Informix's Corcoran

Gallery image processing demonstration on an ARIX X-Windows network, as well as a demonstration of the Wingz product.

ARIX Computer Corp. designs, manufactures, and markets high-performance UNIX-based symmetric multi-processor computer systems. ARIX has an installed base of more than 8,500 systems worldwide.

Informix Software Inc., is a leading supplier of information management software providing solutions from the database through the desktop. Informix products include powerful distributed database management systems, robust application development tools, and graphical and character-based productivity software for delivering information to every significant desktop platform.

#90304b0142 10/31/1990 ~Business Wire

MOUNTAIN VIEW, CA (OCT. 31) BUSINESS WIRE - ASK Computer Systems Wednesday announced that preliminary results of stockholder voting at its Oct. 26 annual meeting state that a dissident ASK stockholder, James P. Lennane, failed by a wide margin in his attempt to gain one seat on ASK's board of directors.

Lennane had originally tried to gain control of ASK's five-seat board. According to the preliminary tally provided by the independent inspector of elections, Lennane received less than four percent of the voted shares that he did not own.

The directors re-elected to ASK's board include Sandra L. Kurtzig, chairman, president and chief executive officer; Paul Ely, partner, Alpha Partners; Larry Sonsini, attorney-at-law, Wilson, Sonsini, Goodrich & Rosati; Thomas Unterberg, managing director, Unterberg Harris DeSantis; Robert Waterman, president, Waterman & Miller Inc.

''We appreciate the strong support our stockholders have shown for our board of directors and for our long-term strategy,'' stated Kurtzig. ''We are dedicated to making our stockholders' confidence pay off.''

According to Vincent DiCosta, vice president of the proxy solicitation firm D.F. King & Co., ''It's very unusual for a stockholder owning nearly 10 percent of a company's stock to fail to receive the additional shareholder

support required for one board seat.
 To my knowledge, this is the first time that this has occurred in a cumulative voting situation.''

According to the preliminary tally, the three proposals put forward by the company to increase the shares reserved in the Incentive Stock Option Plan, to adopt the 1990 Employee Stock Purchase Plan and to appoint Ernst & Young as independent accountants, received stockholder approval.

A proposal put forward by the dissident stockholder group requiring the board to formulate a strategic business plan, failed to be approved.

Definitive results of stockholder voting are expected to be announced by Nov. 8, 1990.

ASK Computer Systems is a leading supplier of management information systems, relational databases and application development tools. It recently completed its tender offer for Ingres Corp. of Alameda. ASK also completed a $60 million equity investment in the company by EDS Corp. of Dallas, and Hewlett-Packard of Palo Alto, representing 30 percent of ASK's outstanding shares.

     #90304b0153 10/31/1990 ~Business Wire
LOS ANGELES (OCT. 31) BUSINESS WIRE - LIVE Entertainment Inc. (NYSE:LVE) announced Wednesday that it has entered into a formal agreement with Vestron Inc. (NYSE:VV) to acquire substantially all of Vestron's assets and liabilities in exchange for a package of LIVE equity securities, according to Wayne H. Patterson, chairman of the board and chief executive officer for the company.

The agreement provides for the holders of Vestron's $115 million of subordinated debt to receive LIVE convertible preferred stock with a liquidation value of $21 million, plus their unpaid cash interest payment due Sept. 1, 1990, and contingent rights representing the right to receive future payments in LIVE common stock or cash if net revenues realized by LIVE from the exploitation of Vestron's program rights exceed certain levels.

Holders of Vestron's common stock will receive 10 percent of the contingent rights. All Vestron royalty and joint venture obligations, and substantially all Vestron trade creditor obligations, will be assumed by LIVE in full.

Vestron will file a ''consensual'' pre-negotiated Chapter 11 bankruptcy this week. A confirmed plan of reorganization is a condition to completion of the

transaction. The largest holders of Vestron's subordinated debt have agreed to support the agreement in the bankruptcy court.

LIVE Home Video Inc., a wholly owned subsidiary of LIVE Entertainment, will enter into an agreement to distribute Vestron programming pending the confirmation of a bankruptcy plan of reorganization and the consummation of the asset sale agreement, both anticipated in early 1991.

Vestron Inc., with headquarters in Stamford, Conn., produces, acquires and distributes home video. It has a home video catalog of approximately 1,200 titles, including such hits as ''Dirty Dancing'' and ''Platoon,'' and such acclaimed special interest titles as the ''National Geographic'' series.

LIVE Entertainment is a diversified entertainment software supplier, distributor and retailer, with headquarters in Los Angeles and is the parent company of Los Angeles-based home video supplier LIVE Home Video Inc., with a catalog of 1,300 titles; Minneapolis-based rackjobber Lieberman Enterprises Inc.; the LIVE Specialty Retail Group, with headquarters in Milford, Mass., which includes Strawberries Records, Tapes & CDs and the Waxie Maxie music chain; and indirect subsidiary VCL/Carolco Communications GmbH, a home video distributor based in Munich, Germany.

ANAHEIM, CALIF. (OCT. 31) BUSINESS WIRE - VERTEQ Inc. Wednesday announced the sale of its Quartz Division to Heraeus Amersil Inc. of Duluth, Ga., a worldwide supplier and fabricator of quartz.

With the sale, Heraeus Amersil obtains one of the largest U.S. fabricators of quartz products for the semiconductor industry. The sale includes the Quartz Division's facilities in Tempe, Ariz.; Fairfield, N.J.; Dallas; Fremont, Calif.; Brea, Calif.; and one facility in Munich, West Germany.

VERTEQ Process Systems Division continues to have manufacturing facilities in Anaheim and Rochester, N.Y.

''This sale will enable VERTEQ to build on the success of its rapidly growing Process Systems Division, which produces cleaning and drying equipment used in semiconductor wafer production,'' said Keith Norby, chairman and chief executive officer of VERTEQ.

''We are focusing our resources on the continued development and refinement of our existing product line, as well as upgrading manufacturing facilities and expanding marketing efforts in the U.S., Asia and Europe.''

VERTEQ already has made substantial investments in the Process Systems Division's quality programs and engineering and manufacturing capabilities in the last year. VERTEQ added a Class 10 clean room and a management information system, which integrates engineering, manufacturing and other company operations.

VERTEQ is a leading worldwide manufacturer of advanced rinser/dryers, megasonic and Sunburst cleaning systems, IPA Vapor Drying equipment and other automatic wet processing equipment.

VERTEQ is located at 1432 S. Allec St., Anaheim, Calif. 92803; phone 714/956-7330.

SCOTTSDALE, AZ (OCT. 31) BUSINESS WIRE - Go-Video (AMEX:VCR), the innovative consumer electronics company that introduced the world's first dual-deck video cassette recorder, VCR-2, now offers consumers the prospect of a whole new generation of exciting video applications with the introduction of a revolutionary wireless video system, Y.RLS.

Go-Video is the master licensee of a patented technology which, among other applications, eliminates the need for wired interconnection between VCRs or cable boxes and remote multiple television receivers.

''Once again, an American company, Go-Video, is responding to the consumer marketplace by offering simple-to-install, simple-to-operate technology,'' said R. Terren Dunlap, chief executive officer of Go-Video.

''Wireless audio transmission, such as the Walkie-Talkie, has been available to consumers for years, but never wireless video. With Y.RLS, you can now watch your favorite movie upstairs or out by the pool without having to move or wire your VCR.

''Thanks to Go-Video's technological innovation, consumers soon will be able to purchase a vast array of dazzling new video and entertainment products, as well as exciting applications for current ones, beyond their wildest imagination.''

Unique applications for Go-Video's wireless technology will be demonstrated on national television on PREVIEW's ''Best of What's New'' segment, airing

tonight on CBS. Check local listing for time. In New York, the show will be broadcast on Thursday.

Go-Video acquired the master license from the inventor who was responsible for initiating the change of the FCC laws which opened the market for wireless video technology for home use.

The company's experience in the video field enabled it to expand the technology to virtually any video device, from home VCRs to security systems. With Y.RLS, Go-Video expects to make significant inroads in the market through licensing, production and sales of this technology.

Go-Video is located at 14455 N. Hayden Rd., Suite 219, Scottsdale, Ariz. 85260

SAUSALITO, CA (OCT. 31) BUSINESS WIRE - The Multimedia Division of Autodesk Inc. (NASDAQ/NMS:ACAD) Wednesday announced that Autodesk 3D Studio, a professional-quality 3-D modeling, rendering and animation software package for 386/486-based personal computers, is now available in North America through the company's Professional Multimedia Reseller channel.

Setting a new price/performance standard at $2,995, Autodesk 3D Studio integrates all the tools professionals need to do 3D modeling and animation under a single user interface, including close links to other Autodesk products like AutoCAD, Autodesk Animator, Autodesk Animator Clips and CA Lab.

Software packages with comparable features cost far more and often require dedicated workstations or very expensive systems.

Thanks to the early acceptance of Autodesk 3D Studio, the company's new Professional Multimedia Reseller channel -- the exclusive source for Autodesk's new professional-level multimedia products -- has already signed up 225 resellers since its birth in August, and expects to ink another 75 by year's end.

Drawn from a select group of audio/visual, CAD and professional PC graphics dealerships, the resellers in this channel will marry computer and video technologies, thereby saving customers time and money.

Autodesk 3D Studio significantly reduces the cost of professional animation and high-quality still image production, making these capabilities widely available for corporate presentations, broadcasting, education, training and

industrial design.

Autodesk 3D Studio uses the Autodesk Device Interface (ADI), an open, de facto standard device driver format which is supported by more than 300 computer peripherals and software packages. ADI is being extended to support video and other multimedia peripherals.

Autodesk Inc. develops, markets and supports a family of computer-aided design engineering and animation software products for desktop computers and workstations. For more information call Autodesk toll-free at 800-879-4A3D -- 800/879-4233 or GO ADESK on CompuServe.

DENVER (OCT. 31) BUSINESS WIRE - Tele-Communications Inc. Wednesday announced that its board of directors, at a recent meeting, has appointed Gerald Sokol to the position of assistant treasurer.

Sokol has been with the company for three years where he has most recently been responsible for borrowing arrangements.

Bernard Schotters, vice president - finance, said ''Jerry Sokol has increasingly taken on responsibilities for our borrowing facilities and relationships. This is recognition of his very material contributions and performance.''

Sokol is a native of the Detroit area, a graduate of Oakland University in Michigan and has recently completed his MBA in finance at the University of Colorado.

Tele-Communications Inc. is traded over-the-counter with Class A common stock and Class B common stock trading separately under symbols of TCOMA and TCOMB, respectively. The company's 11-1/8 percent senior subordinated debentures, 7 percent convertible subordinated debentures, and TCI Rights are traded in the over-the-counter markets, the latter two under the symbols of TCOMH and TCOMR, respectively.

SALT LAKE CITY (OCT. 31) BUSINESS WIRE - Grand Valley Gas Co. (OTC:GVGC) Wednesday announced the execution of a Gas Supply Management Agreement with BC Gas Inc. (ToSE:BCG.), the largest natural gas distribution utility located in western Canada.

Under the agreement, Grand Valley is the authorized agent of BC Gas for the purchase of up to 50,000 MMBTU per day of United States sourced gas supplies for export to BC Gas. This quantity represents a potential increase in Grand Valley's sales volumes of approximately 20 percent above sales during fiscal 1990. The gas purchases will commence Nov. 1, 1991, and extend for an initial term of five years.

This unique opportunity will provide Rocky Mountain natural gas producers with access to the attractive western Canadian gas marketplace and expands Grand Valley's Canadian gas marketing activities.

Grand Valley Gas Co. is engaged in natural gas gathering and marketing services throughout the western United States and Canada. Grand Valley is one of the largest independent marketers of natural gas in the western region, providing competitive and reliable gas supplies to select utility and industrial markets.

#90304b0214 10/31/1990 ~Business Wire
SAN DIEGO (OCT. 31) BUSINESS WIRE - DocuFile Inc. (NASDAQ/USM:STPH.F; PSE:STP.P), developer of an optical disk filing system designed to replace cumbersome ''hard-copy'' archiving, has successfully completed its funding through an initial public offering.

DocuFile's stock will be traded under the name of holding company Standard

Platforms Holdings PLC.

Proceeds from the IPO, which raised just under $4 million, will be used to expand the company's U.S. operations. Sales in the United Kingdom yielded a profitable 1990 fiscal year for the organization.

The DocuFile system, called ''DataSafe,'' provides a number of advantages over traditional document processing methods, including rapid access to any single document and concurrent access by multiple users to the same files.

The system can be customized to address a wide variety of applications, enhancing productivity by allowing users to develop application programs that automate their particular document processing procedures.

DocuFile's initial penetration of the image processing market, projected to reach $2.6 billion by 1993, targets health care facilities and original equipment manufacturers.

For the OEM, DataSafe offers a turnkey data management system that readily accommodates the entire spectrum of mass storage requirements. The system's UNIX-based software, fast becoming a standard in the U.S. government, allows it to be easily customized to meet the high-volume data processing needs of government agencies.

The DataSafe system is also of particular interest to cost-conscious health care facilities because of its ability to replace independent medical records copying services with a lucrative ''in-house'' correspondence operation. For a 200-bed hospital, annual revenues can reach $70,000. In addition, direct savings on storage and retrieval expenses are calculated at $250,000 over a 10-year period.

Nine successful DataSafe installations in the United Kingdom include the U.K. Ministry of Defense, Interlink, and Securicor, the United Kingdom's largest overnight parcel delivery service.

Installations at Specialty Medical Clinic, San Diego, and the Pasadena Police Department are pending.

DataSafe's modular configuration makes the system flexible and upgradeable. File servers can be built from 16 GBytes to 1 Terabyte in modules of 16 GBytes. The system's high-performance UNIX software package runs on a variety of hardware platforms from a PC386 running SCO UNIX at the low end, through a choice of UNIX workstations.

#90304b0229 10/31/1990 ~Business Wire

VANCOUVER, BRITISH COLUMBIA (OCT. 31) BUSINESS WIRE - TOTAL Energold Corp. (NASDAQ:TGDGF, ToSE:TDG.) reported its results from group operations for the nine months ended Sept. 30.

Net sales for the period ended Sept. 30, including $2 million in precious metals, were $28.8 million, up from $23.7 million in the previous year. Cost of sales increased to $10.2 million from $7.7 million in the comparative period in 1989.

Operating earnings improved to $18.6 million from $16 million in 1989. The loss for the nine-month period was $4.6 million, or 14 cents per share, compared with $4 million, or 15 cents per share, for the first nine months of 1989.

TOTAL Energold's third quarter operating earnings of $7.3 million was a reflection of strong oil prices and the commencement of gold production. The loss for the period of $1.6 million, or 5 cents per share, included over $4 million in depreciation and depletion.

Funds generated from operations were $9.9 million, which was lower than the $10.7 million recorded in the comparative period in 1989.

In the nine months ended Sept. 30, the company's energy subsidiary, Ranchmen's Resources Ltd., reported a slight decline in oil production from 4,394 barrels of oil per day in 1989 to 4,223 in 1990, but an increase in gas production from 19.2 million cubic feet per day in 1989 to 22.2 million.

On June 22 the company acquired 6 million shares of Plexus Resources Corp. (51 percent) and consolidated its results from that period on. Plexus, located in Salt Lake City, Utah, has a 24.01 percent working interest and a 2.45 percent royalty interest in the Denton-Rawhide mine, which commenced production earlier this year. Projected production for the Denton-Rawhide is expected to exceed 80,000 ounces of gold and 399,000 ounces of silver a year.

TOTAL Energold Corp. is engaged in mineral exploration in Canada and the Western United States, and in oil and gas exploration and production in Canada through Ranchmen's Resources Ltd., a 56 percent owned subsidiary of TOTAL Energold.

TOTAL Compagnie Francaise des Petroles, one of the world's largest producers

and marketers of energy, holds 74 percent of TOTAL Energold's common shares.

#90304b0267 10/31/1990 ~Business Wire
KENT, WA (OCT. 31) BUSINESS WIRE - Sun Sportswear Inc. (NASDAQ: SSPW) Wednesday announced record net sales for the first nine months ended Sept. 30, 1990, of $61.3 million compared to net sales for the comparable 1989 period of $58.4 million.

The year to date sales increase resulted from continued strength in sales to the company's largest customer, and the success of two of its licensed products. The company's three largest customers continue to be Wal-Mart, Target and K mart.

Net sales for the third quarter ended Sept. 30, 1990, were $14.4 million compared to $16.9 million the comparable 1989 quarter. The company's operating results were approximately break even for the third quarter of 1990 compared to net income of approximately $0.9 million for the comparable 1989 quarter. The third quarter 1990 results were impacted by slower consumer spending and retail inventory reductions, resulting in order cancellations and delivery postponements by several customers. These factors, coupled with licensed products offered by some of its competitors earlier in the year, resulted in 1990 year to date net income and earnings per share of $2.2 million and $0.39, respectively, being below comparable 1989 results of $3.7 million and $0.81, respectively.

The company has reduced inventories by 12 percent from June 30, 1990, levels. At Sept. 30, 1990, the company's working capital was $22.0 million and stockholders' equity amounted to $23.5 million.

Sun Sportswear is one of the nation's largest screen-printers of casual sportswear for the mass merchandising segment.

#90304b0271 10/31/1990 ~Business Wire
CALGARY, ALBERTA (OCT. 31) BUSINESS WIRE - Norcen Energy Resources Ltd. (ASE:NCN) announced Wednesday that, for the third quarter of 1990, cash generated from operations increased 42 percent and earnings rose 32 percent compared with the third quarter of 1989.

Cash generated in the current quarter totalled $91.4 million, up from $64.3 million. Earnings amounted to $33 million compared with $25 million in the same period a year ago.

On a fully diluted per-share basis, cash generated was $1.07 compared with 87 cents per ordinary share and earnings were 40 cents, up from 34 cents per share.

The significant improvement in third-quarter performance reflected strong production gains for both oil and gas as well as the effects of the dramatic rise in crude oil prices during the latter part of the quarter.

For the first nine months of 1990, cash generated totalled $249.3 million, 27 percent higher than for the same period of 1989.

Earnings for the nine months were $83.8 million, essentially unchanged from $83.4 million a year earlier. On a fully diluted per-share basis, earnings were $1.02 compared with $1.13 per ordinary share.

Production of crude oil and natural gas liquids in the quarter averaged 57,000 barrels per day, up 22 percent from 46,600 barrels per day in the corresponding quarter a year ago. Natural gas production at 217.3 million cubic feet per day was up 24 percent.

These significant production gains reflected the acquisition of oil and gas producing properties from Westmin Resources Ltd. late in 1989 and increased crude oil production from the company's Australian operations.

During the quarter, Norcen participated in 61 working interest wells which resulted in 31 gross, or 3.2 net, oil wells and 13 gross, or 5.7 net, gas wells in Canada and 2 gross, or 0.2 net, gas wells in the United States.

#90304b0274 10/31/1990 ~Business Wire

VANCOUVER, BRITISH COLUMBIA (OCT. 31) BUSINESS WIRE - In September Energex arranged the terms and assisted in the due diligence and negotiations of a US$13 million acquisition of U.S. producing oil and gas properties on behalf of a London-based company (the ''Buyer'').

In consideration for the services rendered, Energex is finalizing the terms of an option agreement which will grant to Energex an option to buy a one-third interest in the acquired properties on the same terms and conditions that the Buyer acquired the properties. The option will extend for six months from the final closing which is anticipated to occur between mid-November and the end of December.

The properties consist of interests in approximately 150 wells located

offshore in the Gulf of Mexico and onshore in Oklahoma and Kansas. The offshore properties have flow rates which are sufficiently high to provide substantial increases in cash flow in the short term should gas prices increase while the onshore properties have a long reserve life and will, therefore, benefit from longer term increases in gas and oil prices.

In addition to earning the option, Energex has agreed to manage the properties for the Buyer on a fee basis.

Financing for the acquisition will need to be arranged. It is currently expected that the acquisition funds will be a combination of monies realized by the disposition of other assets, production related debt and a private placement of equity.

#90304b0292 10/31/1990 ~Business Wire

KANSAS CITY, MO (OCT. 90) BUSINESS WIRE - US Sprint will begin providing communications relay service throughout the state of Colorado on Nov. 1.

Known as Relay Colorado, the service will allow Colorado residents who are hearing- or speech-impaired or deaf to communicate over the telephone to hearing parties.

The Colorado Commission for Disabled Telephone Users awarded Sprint Services, a unit of US Sprint, the relay contract earlier this year.

''Deaf people in Colorado have been eagerly looking forward to this improvement in relay services, and they finally will have access to the telephone system which is equal to that of hearing persons,'' said Arnold H. Cook, chairman for the Commission for Disabled Telephone Users.

''This is the result of two years of hard work by legislators, the Commission and many deaf people,'' Cook continued.

Sprint Services will route all Relay Colorado calls through its Austin, Texas, relay center, which is fully operational 24 hours a day, 365 days a year. There will be no restrictions on the type, length or number of calls placed.

To communicate with the center, customers who are hearing- or speech- impaired or deaf will use a Telecommunications Device for the Deaf (TDD) to type their messages. A specially trained customer relay agent will view the message typed into the TDD system and then communicate it verbally to the hearing

party.

The agent will then listen to the verbal response, convert it into written form, and relay it back through the TDD system.

Relay Colorado calls may be initiated by either TDD or voice users. The toll-free access numbers are: 1-800-659-2656 (TDD) and 1-800-659-3656 (voice).

''We are committed to providing Colorado residents with the highest quality of service possible,'' said Dan Evanoff, vice president and general manager of Sprint Services. ''This improved service gives people who are hearing impaired or speech impaired the assurance that they will always have complete access to the telephone at any time, without having to wait for an available operator.''

Sprint Services is based in Overland Park, Kan., which is located in metropolitan Kansas City. The company provides a variety of voice services to a rapidly growing market. Another division of Sprint Services, Sprint Gateways, offers a full line of products in the 900 pay-per-call industry by using US Sprint's all-digital, fiber-optic network.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company with $7.5 billion in revenues. US Sprint provides a comprehensive array of voice, data and video communications products and services over the nation's only all-digital, fiber-optic network.

#90304b0367 10/31/1990 ~Business Wire

CHICAGO (NOV. 1) BUSINESS WIRE - Information Resources Inc. (NASDAQ:IRIC) Wednesday announced record revenues for the third quarter, the completion of the anticipated spin-off of its VideOcart subsidiary and the securing of a bank credit agreement allowing borrowings of up to $25 million.

For the quarter ended Sept. 30, 1990, sales totaled $42.0 million, a 21.2 percent increase over the third quarter of 1989. Earnings for the quarter from continuing operations increased to $618,000, or 3 cents per share, compared to $543,000, or 3 cents per share, in the third quarter of 1989.

Included in the third quarter 1990 results was a previously announced one-time additional tax expense of $1.5 million related to the sale and leaseback of the company's headquarters facility. Excluding this one-time charge, earnings from continuing operations would have been $2.2 million for the third quarter, or 11 cents per share.

As a result of the above and the previously announced one-time charge related to the VideOcart spin-off which totaled $580,000, equivalent to 3 cents per share, the company reported net earnings for the quarter of $38,000 compared to the prior year third quarter earnings of $273,000.

For the nine months ended Sept. 30, 1990, revenues totaled $120.6 million, up 20.8 percent over 1989, while earnings were $2.1 million, compared to a loss of $6.7 million for the like period last year.

Results for InfoScan were particularly strong for the quarter, with sales increasing 23.5 percent compared to the like quarter a year ago. During the quarter, a number of major consumer packaged goods companies signed multiyear agreements converting to InfoScan and other IRI products from their former suppliers.

The VideOcart spin-off was completed as of the close of business on Oct. 31, 1990 and was made to stockholders of record as of the close of business on Oct. 19, 1990. IRI distributed 8,863,340 shares of VideOcart common stock to

such stockholders on the basis of one share of VideOcart common stock for every two shares of IRI common stock held as of the record date.

As previously announced, IRI has received from the Internal Revenue Service a ruling to the effect that, among other things, the receipt of shares of VideOcart common stock by stockholders of IRI will be tax free. VideOcart shares will trade on NASDAQ under the trading symbol VCRT. Commencing Nov. 6, 1990, VideOcart shares will be included on the National Market List of NASDAQ.

Fulgoni noted that while the VideOcart spin-off represents an exciting opportunity for shareholders, it did dilute corporate resources. ''With the spin-off we are now able to focus our full attention on building our core information and software businesses,'' he said.

Chicago-based Information Resources Inc. provides a variety of information and computer decision support services.

KIRKLAND, WASH. (OCT. 31) BUSINESS WIRE - McCaw Cellular Communications Inc. (NASDAQ: MCAWA), today reported that it achieved record levels of revenue and cash flow in the third quarter of 1990.

In the three months ended Sept. 30, 1990, revenues increased 116 percent to $280.5 million from $129.7 million for the third quarter of 1989.

During the quarter, the number of cellular subscribers in markets McCaw owns or has the right to acquire a controlling interest combined with subscribers in LIN's markets, increased to 1,047,000 at Sept. 30, 1990, up 57 percent from 668,000 in the 1989 third quarter.

For the quarter ended Sept. 30, 1990, income from operations was $26.4 million vs. a loss from operations of $32.5 million in the prior-year period. The third quarter net loss was $80.0 million, an increase compared to the $44.9 million net loss for the quarter ended Sept. 30, 1989. Results for the third quarter as compared to the quarter a year ago were primarily affected by increased interest expense associated with McCaw's acquisition of a 52 percent interest in LIN Broadcasting and the consolidation for accounting purposes of LIN.

Net income for the first nine months of 1990 was $711.1 million, compared to a net loss of $230.1 million for the first nine months of 1989. Results for the nine months ended Sept. 30, 1990, include a non-recurring gain of approximately $1.2 billion during the first quarter from the sale of certain of the company's southeast cellular operations to Contel Cellular Inc. and the consolidation for accounting purposes of LIN, which is 52 percent owned by McCaw, as of March 5, 1990.

McCaw Cellular Communications Inc. is the nation's leading cellular company, with ownership positions in over 100 markets across the country, representing 106 million potential customers, or ''pops.'' Approximately 80 percent of the ''pops'' of McCaw and of LIN Broadcasting Corp., which is 52 percent owned by McCaw, are in the nation's 30 most populous markets and their contiguous service areas. McCaw Cellular operates major regional systems in California, Florida, Texas, the Pacific Northwest, the Midwest, the Rocky Mountain states and the Northeast, currently offering service primarily under the name Cellular One. LIN Broadcasting holds significant interests in cellular systems in New York, Los Angeles, Philadelphia, Dallas and Houston, and operates seven network-affiliated television stations. McCaw also is the nation's sixth largest paging service provider.

#90304b0613 10/31/1990 ~Business Wire

NEW YORK (OCT. 31) BUSINESS WIRE - LIN Broadcasting Corp. (NASDAQ:LINB) today reported record net revenues and cash flow from its cellular operations for the quarter ended Sept. 30, 1990.

Net revenues for the third quarter 1990 attributable to LIN's proportionate cellular operations were $82.7 million, up 74 percent, compared to $47.6 million in the third quarter of 1989. Cash flow (income from operations before depreciation and amortization) for the third quarter of 1990 attributable to LIN's proportionate interests in cellular telephone operations grew to $46.3 million, up 81 percent, compared to $25.6 million in the same quarter a year ago. (See following Supplemental Financial Data). As described further below, the increases in net revenues and cash flow in the third quarter of 1990 were due, in part, to the completion of the Metromedia transactions on Aug. 10, 1990.

At Sept. 30, 1990, the number of cellular subscribers in the five systems in which LIN has an interest grew to 513,000 vs. 328,000 subscribers at the end of the third quarter of 1989.

Net revenues for the third quarter attributable to LIN's seven broadcast television stations and its specialty publishing business were $36.1 million compared to $38.6 million in the third quarter of 1989. Cash flow attributable to LIN's media operations including broadcasting and specialty publishing operations was $15.4 million compared to $18.5 million in the 1989 third quarter. Approximately one-half of this decrease was due to lower cash flow from the specialty publishing business.

For the third quarter, LIN reported a loss of $5.8 million, or 11 cents per share, compared to net income of $24.6 million, or 46 cents per share, for the third quarter of 1989.

The third quarter consolidated statements of operations reflect the acquisition by LIN of an approximately 48 percent interest in the New York City non-wireline cellular system from the Metromedia Co. and other minority interest holders, and the consolidation for accounting purposes of that system's financial results. They also reflect LIN's sale to Metromedia of a 1.01 percent interest in the Philadelphia non-wireline system for a gain of $15.4 million. The Philadelphia sale reduced LIN's ownership position in that system to 49.99 percent and the results of that system attributable to LIN are now reported as equity in income of unconsolidated cellular affiliates.

LIN Broadcasting Corp. is engaged in cellular telephone operations, television broadcasting and specialty publishing. LIN has major ownership interests in cellular telephone systems serving the metropolitan areas of New York City, Los Angeles, Philadelphia, Dallas-Fort Worth and Houston, owns and operates seven network-affiliated television stations, and publishes advertiser supported hardcover magazines placed in the rooms of distinquished hotels in 37 metropolitan areas. McCaw Cellular Communications Inc. owns approximately 52 percent of LIN.

SAN DIEGO (OCT. 31) BUSINESS WIRE - ISIS Pharmaceuticals and Rhone-Poulenc S.A. Wednesday announced that they have signed a cooperative research agreement to discover and develop novel antisense oligonucleotides as potential human therapeutic products.

The terms of the agreement call for the companies to jointly pursue a mutually selected molecular disease target.

The cooperative research program, whose activities will be directed by a joint ISIS-Rhone-Poulenc management team, will focus on creating antisense oligonucleotides to be assigned with a number of human cancers.

It is anticipated that novel antisense oligonucleotides, targeted to the message of an oncogene protein, may inhibit expression of the protein, and thereby result in novel antisense therapies.

ISIS will receive research funding, milestone payments, domestic co-development rights and a royalty on discovered product sales. Rhone-Poulenc will hold exclusive license for therapeutic applications for all antisense compounds directed to the inhibition of the oncogene products of proteins discovered during the course of this agreement.

A Rhone-Poulenc visiting scientist will join the ISIS scientific staff. Financial terms of the cooperative research program have not been disclosed.

Professor Claude Helene, director of the Laboratorie de Biophysique at the Museum National d'Histoire Naturelle (associated with INSERM and CNRS) and scientific adviser of Rhone-Poulenc, said: ''The agreement with ISIS allows Rhone-Poulenc to be associated with a dynamic young firm in a very promising field, and it creates the conditions of a very good synergy in the research for novel antitumoral substances.'' Helene will serve as chairman of the ISIS-Rhone-Poulenc Joint Research Management Committee.

Located in northern San Diego County, ISIS Pharmaceuticals is a pharmaceutical company engaged in the discovery, development and marketing of novel human therapeutic products based on antisense oligonucleotides.

SANTA CLARA, CA (OCT. 31) BUSINESS WIRE - 3Com Corp. Wednesday announced a new organizational structure to foster the company's focu on global data networking.

Two product divisions, the Network Adapter Division (NAD) and the Network Systems Division (NSD), representing the company's components and systems businesses, respectively, have been created. These divisions are supported by the existing corporate and field operations groups.

Andy Verhalen, formerly vice president and general manager of the Transmission Systems Division, was named vice president and general manager of NAD, which is chartered to maintain and capitalize on 3Com's leadership position in the network adapter market. Verhalen also will join the company's executive committee.

The company's workgroup and enterprise systems divisions have been consolidated to form NSD. As a founder of the LAN industry and the key architect of the company's internetworking product strategy, Eric Benhamou, 3Com president and chief executive officer, will manage this division directly. NSD will be dedicated to enhancing the company's position in the enterprise-wide network systems business and maintaining 3Com's position in the workgroup systems business.

John Hart, formerly vice president, engineering at Vitalink Communications Corp. and recently recruited to be 3Com's vice president and chief technical officer, also joins the company's executive committee. Hart will preserve coherence among the research and development activities undertaken by NAD and NSD.

Additionally, the company announced Leslie G. Denend, executive vice president product operations, has resigned to pursue other career opportunities.

3Com Corp. is a leading independent gobal networking company, providing multivendor connectivity that spans organizations and businesses worldwide. The company designs, manufactures, markets and supports networking products and systems based on industry standards and open systems architecture.

AMHERST, NY (OCT. 31) BUSINESS WIRE - Mark IV Industries, Inc. (NYSE: IV), Wednesday announced that terms have been agreed upon for the acquisition of Klark-Teknik PLC (K-T), a leading U.K.-based manufacturer and distributor of specialized electronic products for the professional audio and live entertainment markets, in a cash tender offer valued at approximately $22.4 million.

The terms include an option for Mark IV to purchase 80 percent of Klark-Teknik's stock, which is currently held by management.

Klark-Teknik, with sales of $20.7 million for its fiscal year ended July 31, 1990, is a world leader in the design, manufacture and marketing of professional audio signal processing systems and sound mixing consoles used in radio, film and recording studios, as well as high-quality public address systems used in live events, theaters, and conference centers. Additionally, K-T distributes professional lighting products used in live entertainment.

Sal H. Alfiero, chairman and chief executive officer of Mark IV said, ''The acquisition of Klark-Teknik is consistent with Mark IV's stated mission to build our core businesses through internal development and strategic acquisitions. This company is a particularly good fit with the existing businesses in our audio group because it increases Mark IV Audio's presence in the professional broadcast and recording studio market and provides an entry into the mid- to high-value mixer and audio signal processing markets -- areas where we do not presently compete. In addition, the acquisition of Klark-Teknik enhances the Mark IV Audio group's European manufacturing capability in combination with Dynacord, a German firm acquired in February of this year.''

Klark-Teknik is headquartered in Kidderminster, England, with facilities in Hounslow, U.K. and Farmingdale, New York. South East Asian markets are covered by a recently established sales subsidiary in Singapore. Mark IV Audio, headquartered in Buchanan, Michigan, has facilities throughout the U.S. and Europe, and in Canada, Japan, Hong Kong and Australia.

Mark IV Industries, Inc., headquartered in the Buffalo suburb of Amherst, is a diversified manufacturer of products in three business segments: Technical Products and Systems; Engineered Products and Systems; and Transportation Products and Systems.

#90304b0632 10/31/1990 ~Business Wire

SAN JOSE, CA (OCT. 31) BUSINESS WIRE - A low-profile, high-capacity, single-disk 60-Mbyte, 2-1/2-inch fixed disk drive for large-scale data storage applications in advanced 286- and 386-based laptop portables and notebook

computers, and for use in memory arrays, FAX machines, printers and other systems, was announced Wednesday by Areal Technology Inc.

Called the MD-2060, the drive stores 62.9-Mbytes (formatted) on a single high-impact glass disk operating at very high storage densities. It operates at an average access time of 22 msec, and transfers data at 7.5 Mbits per second.

To speed systems throughput, it incorporates a 32-Kbyte buffer. The drive measures only 14.9mm (0.59 inches) high, including printed circuit board. This is almost 3mm lower than the nearest multidisk 60-byte competitors.

At the same time, system designers want these high capacities in lower profile packages. ''To design a computer system that can fit comfortably into a briefcase means that the disk drive must be as thin as possible,'' Kirby said. ''We have already seen height requirements lowered from 17mm (0.67 inches) to 14.9mm (0.59 inches) and we expect to see further height reductions in 2-1/2 inch drives.''

Use of single high-capacity glass disks allows the design of a drive that can not only meet the storage requirements of today's small systems, but that can conveniently fit in the limited space provided in portable systems, he explained.

The MD-2060 is now being manufactured at Areal's San Jose headquarters facility, and will begin large-scale volume production at Sanyo's Tottori City Japan, facility early next year as a result of manufacturing and equity agreements signed between the two companies.

Areal Technology Inc., was formed in 1988. The company maintains a 27,000-square-foot facility in San Jose and employs 60.

ARLINGTON, VA (OCT. 31) BUSINESS WIRE - Group Technologies announced Wednesday first shipments of its flagship product, Aspects 1.0, the first, real-time document conferencing software for the Macintosh.

''We expect Aspects to improve productivity by changing the traditional conference environment and have already experienced significant demand for the product,'' said Reid Lewis, president of Group Technologies. ''Aspects offers

a break-through solution that meets the changing needs of today's customer.''

Aspects is the first Macintosh software program to provide interactive, real-time collaborative computing between multiple users in different locations. This program allows users to simulate a conference room environment on networked or modern-linked Macintosh computers without leaving their desks.

Aspects eliminates the time and expense required to bring business teams together in a common location to work on a common project. It improves the speed at which ideas are developed among geographically dispersed workgroups and provides an efficient, cost-effective method of achieving group consensus, all in real-time.

Group Technologies, founded in August, 1988 in Arlington, Va., develops and markets Aspects software for real-time document conferencing on the Macintosh computer. The company's software allows long-distant communications visually as well as verbally and brings people and their ideas together more simply and completely than ever before.

DAYTON, OH (OCT. 31) BUSINESS WIRE - In a move to provide resellers with added marketing support, NCR Corp. Wednesday introduced a new co-marketing trade show program to provide resellers with attractive trade show components.

Through the NCR Trade Show Program, NCR will now provide direct resellers with trade show components for showing NCR systems and solutions in national, regional and local trade shows. In addition, resellers can be reimbursed for the trade show expenses through NCR's ValuePlan cooperative funding program.

Under the NCR Trade Show Program, NCR resellers may order NCR lighted backdrops and pedestals for usage at trade shows. NCR will also provide NCR logo and customized business logo signs, as well as NCR product literature and technical assistance.

Through this program, NCR's resellers are also able to benefit from the expertise of the NCR Displays and Exhibits department, a group that creates and manages displays for NCR trade shows.

NCR Corp., based in Dayton, develops, manufactures, markets and supports

business information processing systems for worldwide markets.

#90304b0637 10/31/1990 ~Business Wire

WILMINGTON, MASS. (OCT. 31) BUSINESS WIRE - Altron Incorporated (NASDAQ:ALRN) Wednesday announced its financial results for the quarter and nine months ended Sept. 29, 1990.

Sales for the quarter were $12,302,000 compared to $13,303,000 for the third quarter of 1989. Net income for the quarter was $170,000 or 5 cents per share, compared to net income of $280,000 or 8 cents per share during the same period a year ago.

Samuel Altschuler, chairman and president, stated that the third quarter results were adversely impacted by the lower than expected bookings early in the quarter and by an additional week of plant shutdown in the Multilayer Division to accomplish scheduled maintenance.
Bookings increased later in the quarter, and total bookings for the quarter were the strongest this year. This sets the stage for increased sales in the fourth quarter.

Sales for the nine months ended Sept. 29, 1990 were $39,480,000 compared to $39,657,000 for the same period last year. Net income for the first nine months of 1990 increased 20 percent to $1,045,000 or 31 cents per share as compared to net income of $870,000 or 26 cents per share for the first nine months of 1989.

The company continues to maintain a solid financial position. As of Sept. 29 1990, the company had working capital of $11,456,000 and a current ratio of 2.6.

Altron Incorporated manufactures and sells electronic interconnect products employing printed circuit technology to leading manufacturers of computer, telecommunication, instrumentation, and medical systems.

#90304b0641 10/31/1990 ~Business Wire

INDIANAPOLIS (OCT. 31) BUSINESS WIRE - Basic American Medical Inc. Wednesday announced operating results for the third quarter ended Sept. 30.

Net income for the nine month period ended Sept. 30, was $5.2 million compared with net income of $4.2 million in 1989. Net income per share for the nine months in 1990 was 66 cents compared to 54 cents in 1989.

Net loss for the three month period ended Sept. 30, was $1.1 million compared with net loss of $1.2 million for the comparable three month period in 1989. Net loss per share for the quarter was 13 cents in 1990 compared with net loss per share of 15 cents in 1989.

For the nine month period ended Sept. 30, operating revenues increased to $282.7 million from $234.6 million in 1989, a 20.5 percent increase. Operating revenues increased for the three month period ended Sept. 30, to $82.4 million from $69.0 million in 1989, a 19.4 percent increase. These increases were primarily attributable to higher admissions at the company's hospitals.

The reduced loss for the third quarter of 1990 and the higher income for the year were primarily attributable to higher admissions and lower provisions for estimated loss on disposal of certain operations, partially offset by higher expenses.

The company's operations are favorably affected by the state of Florida's increased seasonal residency during the winter months. Accordingly, the company's third quarter operating results may not be indicative of the company's operating results for the year.

Basic American Medical Inc. owns and operates acute care hospitals. It also provides services and products to the health care market, such as outpatient surgery, comprehensive medical rehabilitation, pharmacy services, medical equipment and furniture manufacturing and distribution. The company's common shares are traded under the NASDAQ symbol BAMI.

NEW YORK (OCT. 31) BUSINESS WIRE - IXI Ltd. of Cambridge, England Wednesday announced the X.desktop Software Initiative program.

Aimed at UNIX (R) software vendors, the two-phased program has been created to ensure that major UNIX software applications take full advantage of the advanced object management functionality of IXI's OSF/Motif (TM) compliant desktop manager, X.desktop (TM). The announcement was made at UNIX Expo in New York.

IXI also announced that the following companies have already joined the Software Initiative Program: Altered Image, Applix, Ashton-Tate, Crosswind Technologies, Empress, FourGen Software, Frame Technology, Informix, Ingres, Island Graphics, Lotus, Oracle, Quadratron, Uniplex and WordPerfect.

IBM, Unisys, Santa Cruz Operation, NCR, Dell and NEC are just some of the vendors shipping X.desktop as an integral part of the graphical user interface strategy for their UNIX systems. The X.desktop Software Initiative allows developers to take full advantage of X.desktop's wide availability on the majority of UNIX hardware platforms.

Phase One of the X.desktop Software Initiative preconfigures the default desktop in such a way that the application is launched from the desktop with no additional configuration by the user. Users simply click on the icon representing the application to start it or drag and drop a data file on the application. If the software has not been pre-installed on the system, a message box provides the user with useful product information and phone numbers for further inquiries.

Phase Two further integrates the application within the X.desktop user environment. Using a set of X.desktop commands, applications will instruct the desktop to get out appropriate icons or perform specific functions. Similarly, X.desktop will control the application through a utility called ''tellxdt'' allowing desktop commands to be sent from a program or shell script.

Uniplex, who ships X.desktop with Uniplex Windows office automation software, has already moved to Phase Two. As a result, Uniplex Windows users now have a total integration with the desktop and other software running on the computer, even applications and files located on distant computers over a network.

IXI Ltd., founded in 1987, is a leading developer and supplier of X-related software products and technology. IXI's corporate objective is to bring the power of UNIX to a wide range of users. IXI recently introduced X.deskterm, a sophisticated terminal emulator that allows character-based applications to run in the graphical world of OSF/Motif and X Windows.

NEW YORK (OCT. 31) BUSINESS WIRE - Management Technologies, which develops software for international banking, has licensed its new Universal Payments and Message System to three existing clients -- Algemene Bank Nederland (ABN), Banca Nazionale Del Lavoro, and Harris Bank.

The Universal Payments System integrates automated payment and message sending and receiving, providing banks with a single multicurrency system for all communications and payments, along with automatic reformatting and switching if one network is unavailable. The system is designed to work with CHIPS, CHIPS II, Fedwire, S.W.I.F.T., S.W.I.F.T. II, CHAPS and Telex or any other proprietary communications service.

It is fully compatible with MTI's ManTec integrated banking system and it can also be used as a standalone payments and message system in banks with other international banking software systems.

Management Technologies has offices in New York, London, Sydney, Toronto, and Cambridge, Mass. The company trades on NASDAQ under the symbols MTCI for its common stock and MTCIW for its warrants.

LONDON (OCT. 31) BUSINESS WIRE - LASMO plc, the international oil and gas exploration and production company, announced Wednesday that it has received approval from the Department of Energy for its plans to develop the Staffa field in the North Sea.

First oil from the field is expected at the end of 1991 at production rates of approximately 8,000 barrels of oil per day.

The Staffa field is located 460 km (286 miles) northeast of Aberdeen in 137 m (449 feet) water depth, and is some 10 km (6 miles) east of the giant Ninian oilfield. Staffa was discovered in 1985 and is estimated to contain recoverable reserves of approximately 10 million barrels of oil equivalent. The field will be developed using two subsea production wells linked via an 8-inch pipeline to the Ninian Southern platform, where produced oil will be processed and transported through existing pipeline facilities to the Sullom Voe terminal. Additionally, gas produced from the Staffa field will be sold to the Ninian field owners for use as fuel.

LASMO plc, the independent oil and gas exploration and production company with 1989 revenues of L263 million ($425 million at year- end exchange rates), has operations in 17 countries. LASMO shares trade on London's International Stock Exchange and in the US in ADR form (symbol 3LSMOY on the electronic OTC Bulletin Board). Shares are quoted on the SEAQ International System and prices may be accessed on the Reuters Equities 2000 service under the symbol LSMR.L, and on Quotron under the symbol LSMRU.EU.

STOCKHOLM, Sweden (OCT. 31) BUSINESS WIRE - Ericsson Wednesday signed a three-year general purchasing agreement with Swedish Telecom for the delivery of AXE digital switching equipment.

The agreement carried a minimum value of $60 million.

The agreement mainly covers deliveries of AXE equipment for the extension and modernization of Swedish Telecom's rural telecommunications network.

Sweden has one of the world's most modern telecommunications networks with a high degree of digitalization, a fact that makes it easy to introduce new features. In the past three years, Ericsson has delivered $100 million worth of AXE equipment to Swedish Telecom.

Ericsson is an international leader in telecommunications, recognized for its advanced systems and products for wired and mobile communications in public and private networks. Ericsson's wholly owned North American subsidiary is based in Richardson, Texas.

#90304b0671 10/31/1990 ~Business Wire
SALT LAKE CITY (OCT. 31) BUSINESS WIRE - Pinnacle Environmental Inc. (NASDAQ/NMS:PENV) Wednesday announced the results for its second quarter ended Sept. 30, 1990.

The company reported that revenues increased 126 percent to $2,780,764 for the second quarter, from the $1,230,000 posted for the same period in 1989. Net income for the three-month period rose 166 percent to $248,036 from $93,211 in 1989. Earnings per share were 10 cents compared with 7 cents for the second quarter of last year, based on 83 percent more shares outstanding in 1990.

For the six months ended Sept. 30, 1990, revenue gained 48 percent to $4,470,399 vs. $3,029,579 in the prior year. Net income grew 109 percent to $404,514 from $193,352 in 1989. Earnings per share were 18 cents compared with 14 cents for the six month period in 1989, based on 61 percent more shares outstanding in 1990.

Higher net income in the second quarter of 1990 compared to the second quarter of 1989 resulted from increased revenues and higher gross margins due to a broad increase in the demand for all of the company's services. The second

quarter also marked the first complete quarter in which Rex Industries Inc. and Insulation Distributors Inc., which were acquired on May 18, 1990, reported for the full period.

Pinnacle's financial position continues to be sound. Cash and short-term investments were $3,468,502 compared to $144,087 at March 31, 1990. Stockholders equity is $7,029,108, or $2.70 per share, compared to $1,616,164.

Pinnacle Environmental Inc. provides industrial asbestos abatement and insulation services. The company also distributes industrial insulation products, asbestos abatement supplies and fabricates specialty steel items.

The company's principal customers own or operate power generating facilities, petroleum refineries, chemical processing complexes, mineral smelters, steel mills and other industrial facilities. The company services the intermountain states of Utah, Idaho, Wyoming, Nevada, Arizona, Colorado and New Mexico.

Pinnacle's stock is listed on the NASDAQ National Market System under the symbol PENV.

#90304b0672 10/31/1990 ~Business Wire

SCOTTSDALE, ARIZ. (OCT. 31) BUSINESS WIRE - Famous Restaurants Inc. (NASDAQ:FAMS), operator of full-service Mexican and seafood restaurants, reported a net loss of $582,000, 10 cents per share, for the third quarter and income of $323,000, 5 cents per share, for the first three quarters ended Oct. 7, 1990, as compared to net income of $162,000, 2 cents per share, and $933,000, 15 cents per share, for the corresponding periods in 1989.

Revenues for the third quarter and first three quarters of 1990 were $23,314,000 and $79,073,000, respectively, compared to $23,438,000 and $70,987,000 for the corresponding periods in 1989.

Dennis B. Mullen, chairman, president and chief executive officer, stated: ''The disappointing results are due to continued sales weakness in many markets resulting primarily from the current recessionary economy. We increased our marketing and promotional expenses in the quarter and will primarily be promoting price-value offerings using newspaper the remainder of 1990 and into early 1991.''

The company currently operates 57 restaurants: 46 Garcia's Mexican Restaurants, nine Casa Lupita Mexican Restaurants and two Famous Fish Co. Restaurants.

Two new Garcia's Mexican Restaurants located in Pleasanton, Calif., and Ft. Lauderdale, Fla., have recently been opened. Both restaurants are experiencing strong initial sales. A Garcia's Mexican Restaurant is scheduled to open in December in Sacramento, Calif. There are also five franchised Garcia's Mexican Restaurants open.

HERNDON, VA (OCT. 31) BUSINESS WIRE - Stanley G. Peery, president of TEMPEST Technologies Inc. (NASDAQ:TTOI) announced Wednesday that the company incurred a net loss for the six months ended Sept. 30, 1990 of ($84,000), or (1 cent) per share compared with net income of $335,000, or 4 cents per share for the comparable period ended Sept. 30, 1989.

The net loss for the quarter ended Sept. 30, 1990 was ($88,000), or (1 cent) per share compared with net income of $104,000, or 1 cent per share for the comparable period one year earlier.

Revenues for the six months ended Sept. 30, 1990 were $4,079,000 as compared with revenues of $4,660,000 for the six months ended Sept. 30, 1989. Revenues for the quarter ended Sept. 30, 1990 were $1,974,000 as compared with revenues of $1,975,000 for the comparable period last year.

Peery stated, ''Revenues and earnings declined, compared to the same period last year, primarily due to the continued slowness of the TEMPEST marketplace and the government budget process.''

TEMPEST Technologies Inc., a publicly held company headquartered in Herndon, that designs, manufactures and integrates computer and peripheral equipment to comply with military standards, and TEMPEST specifications, and Infosec requirements established by the U.S. Government. Its shares are traded on the NASDAQ under the symbol ''TTOI''.

ARLINGTON, TEXAS (OCT. 31) BUSINESS WIRE - BizMart Inc., (NASDAQ: BZMT) one of the nation's fastest-growing office products superstore retailers, Wednesday reported that sales for the second quarter of fiscal 1991 ended Oct. 27 were up 115 percent to $62.7 million from $29.2 million for the like quarter a year ago, based on unaudited initial numbers.

Second quarter earnings and other financial results will be released during the week of Nov. 19.

''Comparable-store sales for our 21 Office Products Supercenters open during the second quarter of both years continued to grow at a very acceptable level, increasing by 23 percent despite uncertainties in our economy that may be impacting somewhat our larger-ticket sales,'' said Ron Stegall, president and chief executive officer.

''While sales more than doubled from last year's second quarter,'' said Stegall, ''our nine new stores in Houston continued to ramp-up slower than our earlier expectations for that market. But we remain confident about the longer term outlook for Houston.

''During the quarter, we maintained BizMart's expansion pace as planned, opening four new stores, including our first West Coast unit in Portland, Ore. '' Stegall added.

''The company is in excellent financial condition at the end of the quarter, with about $25 million in cash and no long-term debt. By next April, the end of fiscal 1991, we expect to have 57 Office Products Supercenters open.''

BizMart's 45 high-volume office products superstores in Texas, Missouri, Kansas, Colorado, Arizona, Nevada, New Mexico, Utah and Oregon sell more than 7,000 high-quality, brand-name products at everyday low prices that are discounted 40 to 60 percent from manufacturers' suggested retail prices.

CALGARY, Alberta (OCT. 31) BUSINESS WIRE - Ranger Oil Ltd. (TSE, NYSE, PSE: RGO)(LONDON: RGER) announces United Kingdom Department of Energy approval of its Annex B submittal for development of the Staffa oil field (interest 40 percent).

First oil from the field is expected at the end of 1991 at production rates of approximately 8,000 barrels of oil per day (3,200 net to Ranger).

The Staffa field is located 460 kilometres northeast of Aberdeen in 137 metres water depth, and is some 10 kilometres east of the giant Ninian oil field in which Ranger has an 11.5 percent interest. Staffa was discovered in 1985 and is estimated to contain recoverable reserves of approximately 10 million barrels of oil equivalent.

The field will be developed using two subsea production wells linked via an

8-inch pipeline to the Ninian Southern platform, where produced oil will be processed and transported through existing pipeline facilities to the Sullom Voe Terminal.

Additionally, gas produced from the Staffa field will be sold to the Ninian field owners for use as fuel. Total development cost will be approximately $40 million (U.S.).

Staffa is Ranger's second field to receive development approval this month, the first being the Ranger operated Anglia gas field (interest 35.6 percent).

Partners in the Staffa field are:

Ranger Oil (U.K.) Ltd.	40 Percent

NEW YORK (OCT. 31) BUSINESS WIRE - James W. Kinnear, III, president and chief executive officer of Texaco Inc. (NYSE:TX), White Plains, N.Y., was Wednesday elected to the board of directors of ASARCO Incorporated (NYSE:AR) it was announced by Richard de J. Osborne, chairman of the board of Asarco.

This increases to 14 from 13 the number of directors of the company.

Kinnear, 62, has been president and CEO of Texaco since and a member of its board of directors since 1977. He previously served as vice chairman of Texaco's board of directors from 1983 to 1986; executive vice president from 1978 to 1983; and senior vice president overseeing international marine and aviation sales, the petrochemical department, the marine department, and marketing and refining in Europe from 1976 to 1978.

He joined Texaco in 1954 and during his 36-year career with the oil firm, served in numerous sales, marketing, refining, and supply and distribution management positions.

A native of Pittsburgh, Pa., Mr. Kinnear attended St Paul's School in Concord N.H., and graduated with distinction from the United States Naval Academy with a bachelor of science degree in 1950. He is a director of Corning Incorporated, the American Petroleum Institute, the National Petroleum Council and the Business Council of New York.

He also is a member of the Business Round Table and the board of trustees of St. Paul's School. He served as an officer in the United States Navy from 1950 to 1954, attaining the rank of lieutenant commander and spent thirty

months in the combat zone in Korea.

Kinnear and his wife, the former Mary Tullis, have two daughters and two sons. The family lives in Greenwich, Conn.

ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services. Asarco had 1989 sales of $2.2 billion.

CHATTANOOGA, TENN (OCT. 31) BUSINESS WIRE - Astec Industries Inc. (NASDAQ/NMS:ASTE) Wednesday announced sales for the third quarter ended Sept. 30, 1990, of $35,387,000 and a loss of $3,766,000 for $1.04 per share, compared to sales of $37,921,000 and a loss of $2,358,000 for 64 cents per share for the third quarter ended Sept. 30, 1989.

Sales of the nine months ended Sept. 30, 1990, were $138,848,000, compared to sales of $150,678,000 for the nine months ended Sept. 30, 1989. The company

incurred a loss for the nine months ended Sept. 30, 1990 of $9,251,000, or $2.57 per share, compared to earnings of $1,853,000, or 49 cents per share for the nine months ended Sept. 30, 1989.

The weighted average number of common and common equivalent shares outstanding in the third quarter of 1990 were 3,604,063, compared to 3,704,597 during the third quarter, 1989. The weighted average number of common and common equivalent shares outstanding for the nine months were 3,604,063, compared to 3,753,011 for the third quarter, 1989.

Astec also announced today several developments in the ongoing patent litigation between its Barber-Greene subsidiary and CMI Corp. On Oct. 24, 1990, the U.S. District Court for the Northern District of Illinois amended a previous order and determined that Astec was liable for approximately $2.8 million in pre-judgment interest in addition to the previously announced jury verdict of approximately $4.5 million.

Accordingly, Barber-Greene's total liability to CMI in that litigation now stands at approximately $7.3 million. The pre-judgement interest portion of the judgement also includes interest that has accrued since the date of the jury verdict. The total liability exceeds the amount previously reserved by Astec with respect to this litigation and the company will reserve an additional $800,000 in the fourth quarter.

Astec Industries Inc. is a manufacturer of asphalt mixing plants, paving equipment, heat transfer equipment, aggregate crushing equipment, and excavating and trenching equipment is traded over-the-counter and is reported on the NASDAQ National Market System under the symbol ASTE.

#90304b0701 10/31/1990 ~Business Wire

CARLSTADT, NJ (OCT. 31) BUSINESS WIRE - ''Revenues are up by more than than 100% over fiscal 1989,'' announced Peter Cohen, president of Trilling Medical Technologies (NASDAQ:BURN), Wednesday as he reported preliminary results for the year which ended Aug. 31.

Since its new management team took the helm in May 1988, the manufacturer of Water-Jel burn care products has been on an accelerated growth path that has resulted in revenues increasing from just $400,000 in fiscal 1988 to more than $5 million in fiscal 1990. Included in revenues is other income of $500,000 previously carried on the balance sheet as deferred revenue.

''This year, we doubled the $2,500,000 in revenues reported for fiscal 1989, which itself represented a 500% increase in revenues over fiscal 1988. And we are projecting the company's first profitable year ever,'' explained Cohen.

''Fourth quarter revenues were particularly pleasing,'' stated Cohen. ''In addition to our regular customer base consisting of domestic and international industrial accounts, the company shipped orders to branches of the American military.'' Trilling's line of Water-Jel Sterile Burn Dressings are now specified for all naval surface ships, and Water-Jel Fire Blankets must be stocked by the army's
Deployable Medical (aka M.A.S.H.) Units. ''Heightened tensions in the Gulf region and Operation: Desert Shield have stimulated orders and renewed interest in the company's products,'' Cohen added.

Trilling has devoted resources and significant time over the last 15 months to educating the various branches of the United States military about its products and looks forward to its business with the government increasing in fiscal 1991.

''Water-Jel products are just beginning to gain a foothold in the industrial, military and international markets and we are convinced that even greater opportunities lie ahead in fiscal 1991, as Water-Jel continues to gain recognition and market penetration,'' said Cohen. ''We continue to look forward to Water-Jel's entry into the consumer market.''

In looking forward to fiscal 1991, Cohen stated that Trilling expects several announcements in the coming months regarding new products, markets and opportunities.

Trilling stock is traded on NASDAQ with the symbol BURN. Class A Warrants are BURNZ and its Class B Warrants, are BURNW.

#90304b0711 10/31/1990 ~Business Wire

WESTBOROUGH, MA (OCT. 31) BUSINESS WIRE - Epoch Systems Wednesday announced Renaissance, a new storage management architecture that includes a family of distributed applications enabling information stored on magnetic disks at the workstation and server level throughout UNIX networks to be automatically managed, backed up and archived.

These are the first products that specifically address storage management needs inherent in the client/server model. In a related announcement, Sun Microsystems has signed a joint development and marketing agreement with Epoch enabling Renaissance to operate on Sun's SPARC and Sun 3 platforms.

Epoch's Renaissance is a long-term strategy for centralized management of distributed storage. Utilizing industry-standard open network computing (ONC) remote procedure call (RPC) technology it:

-- organizes all types of storage media into an orderly, logica hierarchy;
-- extends across multi-vendor hardware and software platforms;
-- manages all of the network storage for efficiency of cost and performance;
-- and enhances productivity of users and administrators.

Renaissance InfiniteStorage manages the magnetic disk space on the network's workstations and servers, migrating files to the proper level in the storage hierarchy, and assuring that the local disks never fill up. As disks fill the software automatically scans them and migrates the least used files to an Epoch-1 server centrally located on the network. The users' most active files remain on local disks for optimum performance while the inactive files are stored on low-cost media. This process provides users of workstations and servers with virtually unlimited local storage.

All files remain on-line at all times, logically unmoved from their original location and completely accessible by users and applications throughout the network. When inactive files are accessed, they are automatically retrieved from the Epoch-1 and are loaded back onto the local high speed magnetic disks.

Renaissance InfiniteStorage increases the productivity of the users and systems administrators, enables the network and its systems to maintain peak performance by minimizing network traffic and disk fragmentation, and provides a long-term solution for storage management. The process is configurable, completely automatic and transparent.

Sun Microsystems Inc., headquartered in Mountain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, server and UNIX operating systems and productivity software.

Epoch Systems Inc. is a leading supplier of network storage management systems for users of high performance workstations in business, industry, education and government. The company is headquartered in Westborough, Mass. with sales and support offices located throughout the United States, Canada, Europe and Asia.

MUSKEGON, MICH. (OCT. 31) BUSINESS WIRE - SPX Corp. announced Tuesday that Robert W. Bishop, Group Vice President of the company's Kent-Moore Group in Warren, Mich., will retire at year end.

Bishop joined Kent-Moore in 1955 and progressed through various positions of responsibility at Kent-Moore to become Group Vice President of that unit in 1987.

During his more than 35 years of service with Kent-Moore and SPX, Bishop received two patents and was responsible for fostering the development of numerous innovative products and service programs.

Notable among these was his role in the founding of the company's Robinair Division and the establishment of its global distribution network, the development of Kent-Moore's leadership in the design and marketing of specialty tools and equipment for automotive and heavy duty dealer groups worldwide along with the management of franchise dealer equipment programs,

and his many contributions as an active member and past president of the Equipment Tool Institute.

Commenting on Bishop's planned retirement, Dale A. Johnson, president and chief executive officer of SPX said ''We owe Bob Bishop a great debt of gratitude for his years of leadership and service to SPX Corporation and to the automotive service industry at large. Through his career at Kent-Moore and SPX, Bob has been known as 'Mr. Customer Service.' That insistence on always meeting current and evolving customer needs has been a valuable contribution and model for both the present and future managers of the Company.''

SPX Corp., a Fortune 500 company, is a world leader in the production and distribution of specialty repair tools and equipment and repair parts to the motor vehicle service industry.

DALLAS (OCT. 31) BUSINESS WIRE Maxus Energy Corp. (NYSE:MXS) reported third quarter net income of $4.1 million, or after preferred dividends, a loss of 6 cents per common share, compared with a loss of $20 million, or 35 cents per common share, in the third quarter of 1989.

''The positive net income this quarter is primarily attributable to higher crude oil prices,'' said C.L. Blackburn, chairman and chief executive officer.

Sales for the recent three months of 1990 were $173.8 million compared to $147.1 million in the same quarter a year ago. Discretionary cash flow was $59.8 million this quarter compared to $31.6 million in the third quarter last year.

Results for the nine months were a net loss of $8.8 million, or after preferred dividends, a loss of 45 cents per common share, compared to a loss of $27 million, or 69 cents per common share, during the same period in 1989. Last year's results benefitted from the sale of the company's Canadian subsidiary.

Nine-month sales were $474.6 million in 1990 compared to $442.8 million in 1989. Year-to-date discretionary cash flow was $159.3 million compared to $107.9 million in the first nine months of 1989. The 1990 nine-month discretionary cash flow has already exceeded full-year 1989 discretionary cash flow of $148.2 million.

''The positive impact of our cost-cutting and debt reduction programs, coupled with our exploration record, is being reflected in our operating results in

the recent nine months,'' Blackburn said.

He pointed to DD&A (depreciation, depletion and amortization) which has declined to $139.3 million from $172.1 million for the same period last year. Interest expense declined to $60.7 million compared to $71.9 million for the first nine months of 1989.

BOSTON (OCT. 31) BUSINESS WIRE - Clinical Data Inc. (NASDAQ:CLDA), announced Wednesday that it is has sold its subsidiary, EnviroMed Inc., to Browning Ferris Industries (BFI) for a cash price of approximately $450,000.

The EnviroMed subsidiary acquired by BFI collects, tracks and disposes of medical and hazardous waste from small generators in New England, including doctors, dentists, and nursing homes.

After the sale, Clinical Data, through its Dutch subsidiary, Vital Scientific NV, will continue to manufacture photometric instrumentation used in the analysis of blood chemistry. The Drug Research Service Division will continue to provide Ambulatory ECG and Blood Pressure monitoring services to pharmaceutical companies and medical research institutes in the United States and Europe.

Israel M. Stein, M.D., president of Clinical Data commented, ''The sale of EnviroMed will allow the company to focus its efforts on the remaining businesses and apply greater resources to potential future opportunities.''

Clinical Data Inc. is a multinational medical company offering services and products for pharmaceutical research, hospital laboratories, and the physician's office. The company has developed ambulatory monitoring technology used in cardiovascular drug research. The company's Dutch subsidiary, Vital Scientific NV, designs and manufactures blood chemistry instrumentation marketed worldwide by E. Merck.

BRENTWOOD, TN (OCT. 31) BUSINESS WIRE - Republic Automotive Parts Inc. (NASDAQ/NMS:RAUT) today reported that its third quarter results reflected continued improvement in profits.

For the three months ended Sept. 30, 1990, net sales totaled $18,848,000 compared with $20,202,000 for the third quarter of 1989. Net income for the quarter was $786,000, or 27 cents per share, up from $361,000, or 12 cents per share, for the same period a year ago.

Net sales for the first three quarters of 1990 were $55,245,000 compared with $59,337,000 for the first nine months of 1989. Net income for the first nine months of 1990 totaled $1,392,000, or 48 cents per share, compared with $534,000, or 19 cents per share, for the same period a year ago.

Keith M. Thompson, president, noted that the lower sales for the quarter and first nine months were due primarily to the divestiture of Republic's distribution center in Phoenix in February 1990.

Republic Automotive Parts Inc. distributes replacement parts for the automotive aftermarket. The company operates 8 distribution centers and 71 auto parts stores in 13 states. The company's common shares are traded in the

NASDAQ National Market System under the symbol RAUT.

#90304b0737 10/31/1990 ~Business Wire

MILWAUKEE (OCT. 31) BUSINESS WIRE - Federated Bank S.S.B. Wednesday announced net income for the fourth quarter ended Sept. 30, 1990, of $220,660, or 9 cents per share.

This compares with a loss of $4,849,190 for the like quarter last year. Net income for the fiscal year ended Sept. 30, 1990, was $1,065,474, or 25 cents per share, vs. a loss of $4,086,307 in 1989.

On Aug. 1, 1990, Federated completed the acquisition of Hopkins Savings and Loan Association. As part of the merger conversion of Hopkins, 275,280 shares of Federated common stock were sold with net proceeds amounting to $1.2 million. Per share information is based only on the historical (Federated

pre-merger) operating results and combined bank net income since Aug. 1, 1990. Per share results prior to the merger have not been restated (and therefore are not meaningful for comparison) due to accounting standards. All other financial information has been restated to reflect the combined companies.

Core income from operations (before tax and excluding non-recurring gains or expenses and loan and REO loss provisions) was $353,000 for the fourth quarter of 1990, compared with a loss of $128,000 in the fourth quarter of 1989. Core income for fiscal 1990 was $1,250,000 as compared with $425,000 in fiscal 1989. ''Our strong improvement in 1990 is due in large part to improved net interest income as a result of our increasing interest rate spread,'' said Robert B. Pieters, president.

Fourth quarter income of 1990 was reduced by $277,000 of merger-related expenses, while the fourth quarter of 1989 was affected by a $4.7 million loss provision by Hopkins for loans and real estate owned (REO).

At year end, general reserves for loan losses were in excess of $2 million, or approximately 0.7 percent of net loans receivable. In addition, specific reserves amounted to $1.45 million, or 43 percent of real estate owned and in judgment. Loan delinquencies 60 days or more at Sept. 30, 1990, amounted to only 0.8 percent of loans outstanding compared to 1.5 percent one year earlier. With Federated's delinquencies continuing to decline, reserves for potential losses appear very adequate inlight of the current attention being paid to loss reserves and loan quality.

Federated Bank has 16 branch offices in Southeaster Wisconsin, with headquarters in Wauwatosa, Wis. Federated's stock is traded on the Over-the-Counter market under the NASDAQ symbol FEDF.

HOUSTON (OCT. 31) BUSINESS WIRE - Global Natural Resources Inc. (ASE: GNR) announced that its board of directors had approved Wednesday the issuance of 1.1 million common shares (4.9 percent of its outstanding shares) in exchange for common shares of Noel Group Inc.

The number of Noel common shares issuable to Global will be determined by a formula based upon the net value of Noel's assets at year-end. In the interim Noel will issue to Global a 10 percent debenture in the face amount of $7,012,500 automatically convertible into the Noel shares on Dec. 31.

The face value of the debenture will be adjusted at year end to an amount determined by multiplying the 1.1 million Global shares by the average Global

common stock price for the 10 trading days ending Dec. 28. The transaction was reviewed and approved by a committee of Global's independent directors, advised by Chemical Bank Investment Banking.

Noel also intends to acquire approximately 650,000-700,000 common shares of Global in the open market in addition to the 1.1 million shares to be acquired in the exchange. After giving effect to the exchange, and the additional open market purchases, Noel will own approximately 25 percent of Global's outstanding shares and Global would own, based on current market values, approximately seven to nine percent of Noel's common stock on a fully diluted basis.

Noel has privately placed approximately $36.1 million of similar debentures for cash with various institutions and individuals and expects to place an additional $24 million of such debentures by year end.

Noel, a private New York-based corporation which participates in the energy and other industrial fields through its ownership of significant equity positions in diverse operating entities, currently holds approximately 4,095,000 shares (18.3 percent) of Global's outstanding common stock.

Roger Chapman, president of Global said that, ''We are pleased that the Noel Group considers Global an attractive investment and to have the opportunity to have an equity participation in Noel's portfolio of energy based companies including Global's own shares. We look forward to sharing opportunities with the Noel Group and a long-term relationship which should be of mutual benefit to both Global and Noel.''

Global Natural Resources Inc. is a Houston-based energy company engaged in the exploration, development and production of oil and gas in North America; it also owns an interest in long-term oil and gas production sharing contracts in Indonesia and has a joint venture project in Tataria-USSR.

CONCORD, MA (OCT. 31) BUSINESS WIRE - GenRad Inc. has launched a major new version of its System HILO suite of design analysis, verification and test generation tools for the electronic equipment manufacturing industry.

The new release, System HILO 4, is designed to offer the best simulation capability within any EDA environment. The complete range of System HILO simulation tools have been enhanced for added functionality as well as higher levels of speed and accuracy.

System HILO 4 can operate with the industry standard VHDL (VHSIC Hardware Description Language) as well as GenRad's own hardware description language, GHDL. VHDL and GHDL modeling can be mixed freely at any level. Whether VHDL or GHDL is used, System HILO 4 provides a complete source level debug facility.

Language-driven design is gaining momentum as the design methodology for the future. It improves productivity by allowing the designer to work at the behavioral level. Logic synthesis is a key part of language level design methodologies and automated path from the behavioral level to a gate level implementation.

In addition, logic synthesis leads to better design implementation. An average speed improvement of 33 percent and an average area reduction of 24 percent is achieve when compared to circuits created by experienced ASIC designers using conventional methods.

Designs can also be translated and optimized for different foundries and cell libraries. Existing designs can be transferred to smaller geometry processes, giving smaller and less expensive versions of existing circuits.

HiDesignA will be multi-lingual, supporting high-level designs written in either VHDL or GHDL and will produce a schematic output of the synthesized implementation as well as a gate level netlist for the ASIC foundry. In addition, both languages will be usable together in a single design. HiDesignA will also support EDIF, PALASM, and ABEL, and will synthesize from finite state machine descriptions.

The designer will be able to inspect schematics of logic implementations as the design is synthesized. This schematic display will support such features as zooming, panning, and critical path highlighting.

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment to manufacturers and users of electronic and mechanical equipment, for design verification, product testing, and process quality management. The company's stock is traded on the New York Stock Exchange; its symbol is GEN.

#90304b0749 10/31/1990 ~Business Wire

ARLINGTON, TX (OCT. 31) BUSINESS WIRE - Total Assets Protection, Inc. (TAP) announced Wednesday it has signed a letter of intent for the sale of an 85

percent interest in its Advanced Communications (ADCOM) Division to Kertes Moss & Co., a Houston investment banking firm.

The management of ADCOM will participate in the acquisition. Under the terms of this letter agreement, ADCOM will be established as a separate corporation to facilitate the sales transaction which is anticipated to close on or before November 30, 1990.

This agreement is subject to arrangement of suitable financing and provides for the sale of the 85 percent interest in ADCOM for an approximate price of $1.1 million. TAP will retain a 15 percent interest in the new corporate entity.

TAP President J. C. Matlock noted that the TAP Board of Directors views this move as a key first step in the restructuring of operations for both TAP and ADCOM. The primary objective of this move will be to retain the linkage and synergy between the two entities, which provide distinct services to their respective customers, while providing additional capital to help fund future growth for both organizations. Matlock also noted that by maintaining an interest in ADCOM, TAP will continue to offer an integrated support concept, permitting it to provide a single source solution to its customers.

TAP is an international architectural, engineering and consulting company providing fail-safe solutions for information system environments. TAP services include the planning and design of computer centers and other technologically enhanced facilities, disaster recovery and contingency planning, communications consulting and security analysis. ADCOM provides technology integration services, primarily in the audio-visual communications field.

#90304b0753 10/31/1990 ~Business Wire

CHICAGO (OCT. 31) BUSINESS WIRE - Wells-Gardner Electronics Corporation Wednesday reported substantially higher sales and earnings for its third quarter and nine months ended September 30, 1990, confirming its previously disclosed estimate.

For the three months, net earnings from continuing operations grew to $430,000 or 11 cents a share, a significant improvement from the loss of $679,000, or 18 cents a share, recorded in the prior year's third quarter. With $60,000 in extraordinary items, this quarter's net earnings rose to $490,000, or 13 cents a share.

Last year's third quarter net loss of $881,000, or 23 cents a share, included a loss of $202,000 from discontinued operations. Revenues for the recent quarter more than doubled to $11,793,000 from $5,677,000 in the prior year's three months.

For the nine months, net earnings from continuing operations rose to $1,002,000, or 26 cents a share, versus a loss from continuing operations of $298,000, or eight cents a share, in the previous year's period. Extraordinary items in the recent nine months totalled $395,000, or 11 cents a share, making the net earnings $1,397,000, or 37 cents a share. In the prior year's period, the loss from discontinued operations accounted for $399,000, or 10 cents a share, of the net loss of $697,000, or 18 cents a share.

Looking ahead to the fourth quarter, sales should exceed the $8.6 million reported in the year ago fourth quarter even though we see increased signs of softness in certain markets.

The company also announced that it has entered into a Letter of Intent with James Electronics, Chicago, to sell its previously discontinued power supply business, effective October 1, 1990.

Wells-Gardner Electronics Corporation, designs and manufactures electronic products which are marketed both domestically and internationally. Its major products are video monitors for the data display and gaming industries.

#90304b0755 10/31/1990 ~Business Wire

CONCORD, MA (OCT. 31) BUSINESS WIRE - GenRad Inc., has announced its initiation of a project to market a new logic synthesis package in 1991. The project, named HiDesignA, will fully integrate logic synthesis into GenRad's System HILO ToolSuite, resulting in a sophisticated tool set for the design of

complex, high-density, high-speed ASICS.

GenRad acquired logic synthesis technology as part of its strategy of providing the industry's most complete tool set for the design and analysis of ASICs.

The logic synthesis technology was acquired from Aptor S.A., Grenoble, France, a subsidiary of Cap Gemini Sogeti (CGS). This package has been used for more than 100 designs of MATRA (MATRA MDS and MATRA MHS) and CNET (Centre National des Telecommunications). The company is now marketing its logic synthesis package to leading ASIC designers on a pre-introduction basis.

Logic synthesis provides the designer with two very important functions. The first is translation. Logic synthesis allows the designer to model and debug designs at a high level (e.g., Register Transfer Level (RTL)), then use a synthesis tool to translate the high-level design into a logic-level implementation (i.e., gate level).

By allowing the designer to describe a circuit at a high level, a designer can focus on the function and performance of the design and be assured that what is implemented matches the initial design specification.

The second function provided by logic synthesis is circuit optimization. This function maps a logic-level (i.e. gate level) design into an ASIC or full custom library and optimizes the circuit for speed and space.

Benchmarks have shown that logic synthesis can improve circuit speed by an average of 33 percent and reduce chip area by an average of 24 percent compared to circuits created by experienced ASIC designers using traditional methods. To date, the major interest in logic synthesis has been driven by its ability to optimize circuit design.

According to Roger Ball, Managing Director, GenRad's Design Automation Products Group, "The complexity of ASICs has increased dramatically as more and more systems are designed using ASICs. The average gate count of ASICs has progressed from 3,000 to 10,000 today.

The largest ASICs are in the hundreds of thousands of gates. It is impossible for a logic designer to enter the thousands of gates which make up contemporary ASICs using conventional Electronic Design Automation (EDA) tools.

#90304b0757 10/31/1990 ~Business Wire

CONCORD, NC (OCT. 31) BUSINESS WIRE - Cabarrus Savings Bank Inc. (OTC: CASB)

continues to be profitable in a moderate growth environment.

Third quarter earnings were $72,741, or 10 cents a share compared to $172,246, or 25 cents a share for the like period last year.

Other income was down $34,900 reflecting last year's non-reoccurring gain in the sale of real estate owned of $28,700. Compensation was up $36,400 including increased commissions on loan production and staffing to handle increasing loan volume.

Occupancy expenses were up $22,400 as a result of having the new Kannapolis office on line this year; deposit insurance premiums and advertising were up $11,000 and conversion/merger expenses were $34,200. Due to the uncertainty of national and local economic conditions, an additional $50,000 was allocated to loan loss reserves.

Management and the board of directors believe that the economic downturn will be short lived and second quarter next year will reflect a more productive and profitable operating environment.

Current year-to-date earnings are $263,106, or 38 cents per share compared to $402,418, or 58 cents per share the first nine months of last year. Total assets are $101.2 million, up 4 percent over third quarter last year.

Plans for the savings bank's conversion to a state-chartered commercial bank are proceeding. The hearing before the North Carolina Banking Commission is scheduled in November.

Upon approval, this will be the first conversion of a thrift to a commercial bank under the newly enacted legislation. This major step will position the bank to compete more effectively in a rapidly changing financial institution culture.

The process of merger with Carolina First BancShares of Lincolnton, N.C. continues. The proposed merger will require stockholder approval in the Spring of 1991 if negotiations are successful.

Cabarrus Savings operates full service offices in Concord and Kannapolis and loan production offices in Charlotte and Rock Hill, S.C.

#90304b0772 10/31/1990 ~Business Wire

NEW YORK (OCT. 30) BUSINESS WIRE - Petrolane Gas Service Limited Partnership (owned since Aug. 1, 1989 by QFB Partners) reported 1990 third quarter

revenues of $131.3 million, a 9 percent increase over 1989.

Earnings before interest, taxes depreciation and amortization for the 1990 third quarter were $9.2 million, a 19 percent decrease compared with 1989's third quarter. For the 1990 third quarter, the partnership had net loss after taxes of $33.9 million compared with net loss of $53.2 million for the third quarter of 1989.

Results of operations were adversely effected by a decrease in wholesale gallons sold, an increase in unit costs of propane resulting from the occupation of Kuwait by Iraq offset in part by higher interest expenses in 1989's third quarter related to the amortization of bridge loan fees in connection with the acquisition.

Petrolane Gas Service Limited Partnership reported 1990 nine months revenue of $509.9 million, a 5 percent increase over 1989. Earnings before interest, taxes, depreciation and amortization for the 1990 nine months were $72.1 million, an 11 percent decrease compared with 1989.

For the nine months ended September 1990, the partnership had net loss after taxes of $61.0 million, compared with net loss of $23.0 million, for the nine months ended September 1989. Results of operations were adversely effected by exceptionally warm weather in the 1990 first quarter, a reduction in wholesale business, higher unit cost of propane and higher ongoing interest expense due to the incurrence of debt to finance the acquisition.

Petrolane Gas Service Limited Partnerhsip is engaged in the domestic retail and wholesale distribution of liquified petroleum gas, predominantly propane for residential, commercial, industrial and agricultural uses. The company is the largest domestic retailer and one of the largest wholesale distributors of propane based on gallons sold.

QFB Partners is a general partnership formed by affiliates of Quantum Chemical Corp and CS First Boston Inc.

NISKAYUNA, NY (OCT. 30) BUSINESS WIRE - Environment One Corp.'s (BSE:EON) revenues grew 13.2 percent to 3,100,450 in the third quarter of 1990.

Revenues increased $362,158 from 1989's third quarter. There was a $10,296 loss for the period compared to earnings of $76,798 (2 cents per share) for the same period in 1989.

Delays in receipt and shipment of several major orders flattened third quarter performance - according to company president, Angelo Dounoucos. However, he expects the overall increasing trend in sales to continue for the remainder of the year and grow on into 1991.

Environment One is a manufacturer of environmental products and provider of environmental measurement services based in Niskayuna. The corporation's stock is traded over the counter and listed on the Boston Stock Exchange under the trading symbol - EON.

MINNEAPOLIS (OCT. 31) BUSINESS WIRE - MOCON (Modern Controls Inc.) (NASDAQ:MOCO) has been named to the Forbes list of 200 best small companies in America.

Forbes said it evaluated more than 4,300 companies nationwide with sales between $5 million and $350 million. The 200 best companies were ranked according to their five-year average return-on-equity, which shows annual profits as a percentage of net worth and measures how effectively shareholders' money is used.

MOCON ranked 65 this year, up from 108 in 1988 when they were first named to the list.

''We were very pleased with the Forbes selection,'' said W.N. Mayer MOCON's chairman and chief executive officer, ''and that our commitment to consistant earnings growth, shareholder returns and balance sheet strength were recognized.''

MOCON was 7 of the 12 Minnesota companies on the list.

MOCON is a leading developer, manufacturer and marketer of high technology instrumentation designed to test packages and packaging materials for permeation of gases and water vapor. The company also has a new line of thickness gauging systems used to measure plastics and coatings on and off the production line.

MOCON testing instrumentation is used in quality control and research laboratories in the food and pharmaceutical industries, to test plastic packaging materials for cost effective protection against loss of color, flavor, fragrance, texture, potency and freshness.

The company also manufactures weighing and sorting instrumentation that helps the pharmaceutical industry maintain the rigid weight tolerances needed in producing drugs in capsule and tablet form.

MOCON's shares are traded over-the-counter and are listed in the NASDAQ National Market System. The company's electronic NASDAQ trading symbol is MOCO.

COLUMBIA, SC (OCT. 31) BUSINESS WIRE - John W. Folsom, president and chief executive officer of South Carolina Federal Corp. (NASDAQ/NMS:SCFB), announced Wednesday that net income for the year ended Sept. 30, 1990, was $3,907,000, or $1.69 per share.

This compares with a net loss of $5,939,000, or $2.57 per share, for the previous fiscal year. Net interest income increased by $2,249,000, while noninterest expenses declined by $819,000.

For the fourth quarter of fiscal 1990, net income was $1,327,000, or 57 cents per share, compared with a net loss of $7,197,000, or $3.11 per share, recorded during the same period last year. For the quarter ended Sept. 30, 1990 compared with the same quarter in the previous year, net interest income

rose by $1,558,000, noninterest income increased by $359,000 and noninterest expenses declined by $869,000.

The losses recorded in the fourth quarter and year ended Sept. 30, 1989 were due to increases in the corporation's provisions for loan and real estate losses which primarily resulted from the devastating effects of Hurricane Hugo on major real estate development projects financed by the Bank.

Folsom commented: ''A significant improvement in the net yield on interest-earning assets and the control of noninterest expenses were the primary reasons for the increased earnings for the year ended Sept. 30, 1990.

''We have made significant progress in reducing nonperforming assets over the last fiscal year. Nonearning assets have decreased 34.6 percent and accruing loans which are ninety days or more delinquent have declined 80.4 percent from the levels at Sept. 30, 1989.''

At Sept. 30, 1990, total assets were $885,183,000, net loans were $703,520,000 and deposits were $687,727,000.

South Carolina Federal Corp. is the unitary thrift holding company of South Carolina Federal Savings Bank which currently operates 32 full-service offices and four mortgage loan offices in South Carolina.

#90304b0792 10/31/1990 ~Business Wire

MT. LAUREL, NJ (OCT. 31) BUSINESS WIRE - Tyco Toys (NASDAQ Symbol:TTOY) announced net sales for the third quarter were $168.9 million, a 6 percent increase over the $159.4 million for the comparable period last year.

Net income for the third quarter was $9.3 million or 94 cents per share fully diluted compared to $9.3 million or $1.10 per share fully diluted last year. Average shares outstanding increased to 12.2 million compared to 9.4 million last year.

Net sales for the first nine months of 1990 were $343.1 million compared to $268.9 million for the same period last year. Net income was $13.1 million or $1.57 per share fully diluted compared to $12.3 million or $1.85 per share fully diluted last year. Results for 1990 include a loss of $1.5 million (13 cents per share) from Nasta, compared to income of $929,000 (12 cents per share) in the comparable 1989 period.

Richard E. Grey, president and chief executive officer of Tyco stated, ''Third quarter and first nine months of 1990 sales reflect higher shipments of Dolls

together with Radio Control vehicles, Activity Toys and 3-D Viewers acquired from View-Master Ideal in June, 1989. International shipments were also higher while Nasta sales were sharply lower. Net income for the third quarter includes a special provision of $4 million reflecting Tyco's aggressive increase in fourth quarter advertising to stimulate retail sales.''

Grey further noted, ''As previously announced, earlier this month the company completed the acquisition of the remaining outstanding shares of Nasta. Also, the company has just completed the acquisition of Playtime Products Inc., a profitable direct import toy company. We expect to complete the integration of Nasta into Playtime by the end of this year and believe the combined operations will strengthen our position in direct import toys, and will be profitable in 1991.''

Tyco Toys Inc., markets a broad line of toy products.

#90304b0795 10/31/1990 ~Business Wire

PORTLAND, MAINE (OCT. 31) BUSINESS WIRE - Peoples Heritage Financial Group Inc. (NASDAQ:PHBK) Wednesday reported that the company's previously-announced results of operations for the three and nine months ended Sept. 30, 1990, issued by the company on Oct. 26, 1990, inadvertently did not include in the company's non-performing assets $8.4 million of loans which are being accounted for as being in-substance foreclosure and, thus, other real estate owned.

As a result, the company's total non-performing assets amounted to $145.0 million or 4.86 percent of total assets at Sept. 30, 1990 (as compared to the previously-announced $136.6 million or 4.57 percent of total assets) and the company's $84.0 million total allowance for loan losses amounted to 57.93 percent (and not 61.51 percent) of total non-performing assets at the same date.

The previously-announced results of operations for the three and nine months ended Sept. 30, 1990 are unaffected by these corrections. A revised Consolidated Balance Sheet is provided.

For further information, contact Peter J. Verrill, executive vice president and chief financial officer, Peoples Heritage Financial Group Inc., (207) 761-8507.

BRISTOL, CT (OCT. 31) BUSINESS WIRE - Frank J. Pascale, chairman and chief executive officer of Eagle Financial Corp. (AMEX: EAG), Wednesday announced the declaration of a 13 cents quarterly cash dividend payable Dec. 3 to shareholders of record as of Nov. 15.

This represents Eagle's 15th consecutive quarterly dividend and its third consecutive dividend at this level.

On Oct. 24, Eagle announced record annual earnings of $3,533,000, or $1.31 per share, for the fiscal year ended Sept. 30. Net income for the quarter ended Sept. 30, was $1,039,000, or 39 cents per share, compared to $832,000, or 31 cents per share, for the fourth quarter of fiscal 1989.

In making the announcement Pascale commented, ''Eagle continues to show consistent quarterly net income, a reflection of our focus on recurring earnings combined with efficient cost controls.''

Ralph T. Linsley, vice chairman and president, added, ''We are pleased to continue our quarterly dividend program in light of our strong earnings and a capital level that remains well in excess of regulatory requirements.''

Eagle also announced that its annual meeting is scheduled for Thursday, January 24, 1991 in Torrington, Conn.

Eagle Financial Corp. is a $480 million multiple savings and loan holding company for Bristol Federal Savings Bank of Bristol, and First Federal Savings and Loan Association of Torrington. Eagle has nine offices serving both Hartford and Litchfield Counties.

GLENDORA, CA (OCT. 31) BUSINESS WIRE - Foothill Independent Bancorp (NASDAQ:FOOT) reported earnings for the quarter ended Sept. 30, 1990, of $977,000, a 25 percent increase over the earnings of $783,000 reported for the same quarter of 1989.

Earnings for the nine months ended Sept. 30, 1990, were $2.71 million, a 9 percent increase over the earnings of $2,493,000 reported for the first nine months of 1989. Earnings per share increased to 32 cents and 90 cents, respectively, for the quarter and nine months ended Sept. 30, 1990, as compared with 26 cents and 82 cents, respectively, for the same periods of 1989.

J.T. Waller, president and chief executive officer of the company, stated that the improvements in earnings reflects continued strong loan demand and the success of the company's marketing programs that are designed to attract new loan and deposit business.

Waller also announced that the company paid a 4 cents per share cash dividend on Oct. 25, 1990, to all shareholders of record as of Oct. 11, 1990. This dividend represented the eleventh consecutive quarterly cash dividend paid by the company.

Foothill Independent Bancorp is a one-bank holding company that conducts a commercial banking business in the San Gabriel and Pomona Valleys of Southern California through its wholly owned subsidiary, Foothill Independent Bank, a California state chartered bank.

At Sept. 30, 1990, the company had total assets of approximately $246 million, total deposits of approximately $224 million and total shareholders' equity of approximately $16.5 million.

#90304b0832 10/31/1990 ~Business Wire

TORONTO (OCT. 31) BUSINESS WIRE - The Horsham Corp. Wednesday reported record earnings for the third quarter and nine months ended Sept. 30, 1990. (Note: all dollar amounts in this press release are expressed in United States currency).

This reflected the strong operating performances at Clark Oil & Refining Corp.

its 60 percent owned subsidiary and American Barrick Resources Corp., its 21.5 percent - owned affiliate.

In addition, Horsham recognized a gain from Barrick's third quarter share issue.

Horsham's net earnings for the third quarter were US $40.3 million, or US $0.45 per share fully diluted, compared with US $10.9 million, or US $0.13 per share fully diluted, for the comparable period of 1989.

For the nine months Horsham earned US $62.3 million, or US $0.70 per share fully diluted, compared with US $32.6 million, or US $0.40 per share fully diluted, in the comparable period of 1989.

This year's earnings include a gain of US $17.6 million, or US 19 cents per share fully diluted, as a result of American Barrick issuing shares at a price in excess of Horsham's carrying value.

''Horsham's earnings benefitted from Clark's strong refining margins in the second and third quarters due to higher capacity utilization in the refining industry and Clark's low cost crude inventories,'' said Jeremy Garbutt, president and CEO.

Clark contributed US $19.1 million in the third quarter and US $34.4 million in the nine months to Horsham's earnings, compared with US $9.7 million and US $23.6 million in the comparable periods of 1989.

Clark's refining margins increased to US $7.44 per barrel in the quarter compared with US $3.78 per barrel in the year earlier period. For the nine months, refining margins averaged US $5.64 per barrel, compared with US $4.31 per barrel in the comparable period of 1989.

American Barrick, which increased its earnings by 65 percent to US $43.1 million in the nine months, contributed US $26.9 million to net earnings including Horsham's US $17.6 million gain from the share issue.

The Horsham Corp. is a major North American company listed on the New York, Toronto and Montreal stock exchanges under the ticker symbol HSM.

FRANKLIN, Tenn. (OCT. 31) BUSINESS WIRE - At a special meeting of shareholders held Oct. 29, 1990, shareholders of Diversicare Corporation of

America (NASDAQ:DIVC) approved a merger proposal which has resulted in the company no longer being publicly owned.

As a result of the merger, Diversicare Ltd., which previously owned 95 percent of the company's outstanding common stock, now owns 100 percent of the common stock. Pursuant to the terms of the merger, all other shareholders of the company are entitled to receive $2.40 per common share.

Diversicare Corporation of America owns or operates 40 nursing home facilities in 5 states. The company also owns 22 home health care companies operating in 4 states.

The company's stock was formerly traded in the over-the-counter market under the NASDAQ symbol DIVC.

Diversicare's parent entity, Counsel Corp. is a financial management company engaged in three main areas of business: real estate (Counsel Property Corp. and Counsel Management Inc.); health care (Diversicare Inc. and Diversicare Corporation of America); and merchant banking (Counsel Capital Corp.).

WALTHAM, Mass. (OCT. 31) BUSINESS WIRE - Steven D. Edelson is founder and chairman at Edsun Laboratories Inc.

Edsun's flagship product is a recently introduced integrated circuit called CEG/DAC. This product is used to permit low cost, low resolution color terminals attached to IBM personal computers to display over 700,000 colors and smooth (non-jagged) lines.

Edelson earned his BS in Electrical Engineering from MIT and his MBA from Harvard Business School.

With reference to IBM's recent announcement of XGA (Extended Graphic Array). Edelson said, ''IBM has endorsed enhanced color display for high end machines, and it would be reasonable to migrate it through the product line in coming years. The IBM design is specific to the micro channel bus architecture.''

Edelson went on to say, ''Although IBM's integration of the RAM/DAC into the controller was necessary for a 1990 introduction, follow-on chipsets for OEM's will be able to take advantage of the 16-bit RAM/DAC's which are just coming into the market. Separation of the controller and the DAC will dramatically improve the yield of XGA silicon.''

Edsun plans to support XGA with enhanced color products in 1991.

Edsun Labs develops, manufactures and markets enhanced visual performance semiconductors. The company was founded by Edelson in 1983 and is privately held.

CHICAGO (OCT. 31) BUSINESS WIRE - Andersen Consulting Wednesday announced that it has signed a non-exclusive international marketing agreement with Dell Computer Corp., Austin, Texas.

Dell adds another alliance link to Andersen's Business Integration Partnership Program. Sales from the agreement are expected to equal several million dollars in the first year.

As part of Andersen Consulting's information systems services, Dell will ship its computers based on the Intel 386, 386SX and 486 microprocessors directly to Andersen clients.

Andersen Consulting has helped organizations apply technology for competitive advantage since 1954, when it installed the first computer for commercial use. The firm helps clients use information in all phases of their management -- strategic, industry, operations and financial. The organization's worldwide client base has access to more than 20,000 consulting professionals serving clients through 157 offices in 45 countries. Andersen Consulting is a business unit of the Arthur Andersen Worldwide Organization.

Dell Computer Corp. pioneered the direct marketing of personal computers in 1984. The company designs, develops, manufactures, markets, services and supports a complete line of personal computers compatible with industry standards. Dell is recognized in independent surveys as having the highest customer satisfaction level in the industry for its personal computers. Information on the company and its products can be obtained through its toll-free number: 800/274-3355.

Intel is a registered trademark and 386 and 486 are trademarks of Intel Corp.

BOSTON (OCT. 31) BUSINESS WIRE - Capitol Bancorporation (NASDAQ:CAPB), the holding company for Capitol Bank and Trust Co., Wednesday reported that the company had a loss for the third quarter ending Sept. 30, 1990, of $498,000, or 16 cents per share, compared to a loss of $4,132,000, or $1.32 per share, for the third quarter of 1989.

The loss is attributed to the continuing effect of the bank's non-performing assets which increased to $94 million at Sept. 30, 1990, from $84 million at June 30, 1990. The loss has been partially offset by recognition of tax benefits amounting to $1.8 million in the third quarter of 1990 as compared to $2.1 million in 1989.

Capitol Bancorporation is a holding compny with approximately $479.9 million in assets and capital of $6.7 million at Sept. 30, 1990.

#90304b0854 10/31/1990 ~Business Wire

WHITE PLAINS, NY (OCT. 31) BUSINESS WIRE - IBM Wednesday announced it has entered into new agreements with Index Technology Corporation to develop AD/Cycle (a) business tools that use the services of IBM's Repository Manager/MVS (a) host product, and IBM's Personal System/2 (a) and Operating System/2 (a) Extended Edition (OS/2 EE) workstation platforms.

AD/Cycle products and services -- from IBM and IBM business partners -- provide the application development functions of IBM's Systems Application Architecture (a) (SAA(a).

Under the new agreements, Index Technology will work with IBM to develop new

AD/Cycle products that help data-processing professionals working on personal computers to define and manipulate information stored in the repository through dictionary-like functions. This information includes database and data-structure definitions. The new cooperative products use technology from Index Technology's forthcoming Excelerator series for OS/2.

The development of such ''cooperative'' products -- which use both the power of the mainframe and versatility and speed of the programmable workstation -- will help programmers build and execute applications faster and easier.

''IBM is committed to providing superior application development tools to our customers,'' said Earl F. Wheeler, IBM senior vice president and general manager, Programming Systems. ''These agreements with Index Technology will accelerate our schedule for bringing AD/Cycle products to our customers.''

Dr. Fred L. Luconi, president and chief operating officer of Index Technology Corporation, said, ''Besides working together on the marketing and sales of AD/Cycle products, the joint development of AD/Cycle technology and products is a crucial element of our business partnership with IBM. We will work with IBM to provide the full range of AD/Cycle tools that will help organizations improve dramatically the way they develop systems.''

The technology licensing and joint development agreements announced today enhance earlier efforts between IBM and Index Technology Corporation, an original AD/Cycle business partner. IBM has an equity investment in Index Technology and markets the company's Excelerator (b) Series of computer-aided software engineering products. These support the enterprise modeling, maintenance, and analysis and design phases of AD/Cycle.

#90304b0862 10/31/1990 ~Business Wire

SHREVEPORT, La. (OCT. 31) BUSINESS WIRE - Crystal Oil Co. (ASE:COR) Wednesday reported the operating results for the three and nine months ended Sept. 30, 1990 and 1989.

	Three Months Ended		Nine Months Ended	
	9/30/90	9/30/89	9/30/90	9/30/89
Revenues	$ 7,463,000	$ 6,872,000	$21,909,000	$22,393,000
Income before provision in lieu of income taxes	992,000	1,167,000	3,009,000	3,998,000
Net income/a	$ 560,000	$ 681,000	$ 1,670,000	$ 2,364,000
Increase to equity/b	924,000	1,141,000	2,876,000	25,152,000
Income per common equivalent share	2 cents	3 cents	7 cents	10 cents

Weighted average of common and common equivalent shares outstanding	24,740,929	24,752,072	24,740,831	23,834,730

(a) Includes the effect of a non-cash charge to operations of $366,000 and $460,000 in the three months ended Sept. 30, 1990 and 1989, respectively, and $1,158,000 and $1,558,000 in the nine months ended Sept. 30, 1990 and 1989, respectively, for a provision in lieu of income taxes for financial reporting purposes only.

Because of the company's quasi-reorganization in 1986, the offest to such charge is to increase paid-in capital.

(b) Includes the effect of the closing of a discount to market common stock rights offering in which the company raised approximately $21,230,000, net of expense in 1989 and the net effect of non-cash charges to operations for a provision in lieu of income taxes for financial reporting purposes only which is recorded as a credit to additional paid-in capital in 1990 and 1989.

BELTSVILLE, MD (OCT. 31) BUSINESS WIRE - John Hanson Savings Bank, F.S.B., Wednesday announced the consummation of its reorganization into a Savings Bank holding company, John Hanson Bancorp Inc.

The Savings Bank's common stock is now wholly-owned by John Hanson Bancorp Inc. and each share of common stock of John Hanson Savings Bank previously outstanding now represents one share of common stock of the new holding company.

The reorganization was approved by the stockholders of the Savings Bank at a special meeting of stockholders, held in June, 1989. John V. Pollock, president of John Hanson Bancorp Inc. and of the Savings Bank said, ''The reorganization into a holding company form will provide us with greater flexibility in the pursuit of our required financial goals.''

John Hanson Savings Bank F.S.B., headquartered in Beltsville , a wholly-owned holding company of John Hanson Bancorp Inc. has 15 branch offices and is a federally chartered and insured savings bank. The stock of John Hanson Bancorp Inc. continues to be traded on the National Association of Securities Dealers' Automated Quotation (NASDAQ) National Market System under the symbol ''JHSL.''

#90304b0874 10/31/1990 ~Business Wire

PROVIDENCE, RI (OCT. 31) BUSINESS WIRE - Nortek Inc. (NYSE:NTK) announced Wednesday that Ralph R. Papitto, chairman and chief executive officer of Nortek Inc. since its founding in 1967, has retired and that Richard L. Bready Nortek's president since 1979, has been elected to succeed him as CEO.

Papitto, 64, also said he resigned as a director of the company ''to help give the new management team the freedoms necessary to effectively operate Nortek'' and that he will leave the day-to-day operations of the company to pursue other interests, but will remain as a consultant through 1993.

In addition to agreeing to consult for a period of three years and to the termination of his existing employment contract, which was renewable by Papitto through 1998, Papitto has entered into a five-year standstill agreement and a four year non-compete agreement with the company and has surrendered options covering a total of 413,333 shares of company stock.

The payments made by the company to Papitto in connection with these and other agreements will result in an after-tax charge of $5.7 million in the current quarter.

The company also reported that Bready and three of his associates Dennis J. McGillicuddy, Barry Silverstein and D. Stevens McVoy who are not affiliated with Nortek have purchased approximately 680,000 shares of company common stock from Papitto at a price of $9.50 per share. The group has also agreed to purchase 285,000 shares of company common stock from Nortek at a price of $9.50 per share. Coupled with the 498,000 shares beneficially owned by Bready these purchases result in his being the largest beneficial owner of the company's stock.

Bready said that ''Ralph Papitto has built Nortek from a start-up to a Fortune 500 company with well over a billion dollars in sales. Ralph is our founder and we will miss him, but we are comforted by the knowledge that, although he is retiring, he will still be available as a consultant to give us strategic advice, particularly in the area of acquisitions and divestitures.''

Nortek Inc. is a diversified Fortune 500 corporation, manufacturing and marketing residential and commercial building products and commercial ventilating and air conditioning systems.

#90304c0005 10/31/1990 ~Comtex

WASHINGTON (OCT. 31) COMTEX - The 8-K report filed at the SEC shows on Sept. 26, 1990, an appeals court dismissed a suit filed by Florafax International Inc.(TICKER: FIIF) seeking payment of a promissory note from Equidyne Industries Inc.

Florafax reports Equidyne made the note in exchange for investment securities in Feb., 1980.

Florafax filed suit in December, 1985, seeking payment of the note, which had been accelerated in February, 1985, due to a payment default.

Florafax reports the original note was in the amount of $1.20 million, and at the date of the lawsuit, with interest, expenses and costs, totaled approximately $1.03 million.

In November, 1986, Florafax settled its claim against certain defendants, but states it specifically preserved in the settlement agreement its equitable lien on real property previously owned by Equidyne.

The appeals court said that the settlement agreement with some of the defendants in November, 1986, extinguished the equitable lien and Florafax's promissory note.

Florafax says it intends to pursue an appeal of this decision.

WASHINGTON (OCT. 31) COMTEX - The 8-K report filed at the SEC shows on Oct. 9 1990, a subsidiary of Geriatric & Medical Centers Inc.(TICKER: GEMC), Geriatric & Medical Services Inc., sold a 255-bed skilled and intermediate nursing care facility to AHF/Montgomery Inc. for $9.41 million.

The facility is located at 600 West Cheltenham Avenue, Philadelphia, PA.

Part of the purchase price, $8.21 million, was paid in cash and the balance was financed by delivery to Geriatric & Medical Centers Inc. of a 20-year tax-free subordinated revenue bond for $1.20 million.

The net book value of the assets sold was around $2.46 million.

Sale of the facility enabled Geriatric & Medical Centers to reduce bank debt by approximately $7.40 million, the company reports.

WASHINGTON (OCT. 31) COMTEX - The 8-K report filed at the SEC shows on Sept. 30, 1990, the board of directors of Omega Health Systems Inc.(TICKER: OSHI) elected Andrew W. Miller to fill the seat on the board which was vacated by Dr. Irvin Borish.

Miller additionally was appointed to serve as the company's chairman and chief executive officer.

Larry Thomas, executive vice president and director, announced plans to take a position as president of a health care organization, necessitating his resignation as officer and as an employee of Omega.

He will continue to be active as a member of the company's board of directors, however.

In other news, a holder of an outstanding warrant to purchase 200,000 shares of Omega's common stock at $2 per share and 100,000 shares of Omega's common stock at $3 per share, has advised Omega of his intention to exercise the warrant when it becomes eligible for exercise in January, 1991.

By DOLLIE F. RYAN

LOS ANGELES (OCT. 31) UPI - Jeff Stein can see through the clothes you're wearing.

He isn't a psychologist, a soothsayer, a Superman or a voyeur. Stein is president and founder of Camp Beverly Hills Clothing and a style connoisseur with a knack for reading people by the way they dress.

If, for instance, you like baggy clothes - think of Jack Nicholson or Diane Keaton - Stein sees you as a confident person, but with a hint of mystery.

Or, if you feel good wearing white riding trousers with double- breasted suits - the way Tony Curtis did in ''The Great Race'' - Stein believes you are basically insecure with a need to impress people.

''I don't really think people realize they broadcast a message with the clothes they choose to wear,'' Stein says. ''It's a lot like body language. You cross your legs or arms for reasons you're only vaguely aware of.''

Stein's observations are neither novel or scientific, but he believes his insight into why people dress the way they do is worth something, so he currently is negotiating to publish a book on the topic.

Among Stein's observations:

-People who dress frumpy (as opposed to baggy) are trying to hide inside their clothes, though secretly wanting to be noticed, like Rosanna Arquette or Carol Kane.

-Lacy, antique willowly clothing shows someone who is romantic, feminine and dreamy, such as singer Stevie Nicks of Fleetwood Mac.

-A woman in a man's suit is exotic, playful and confident in her sexuality. Think of Marlene Dietrich or rock singer Annie Lennox.

-Women who wear neutral tones want to appear calm and in control such as the character Candice Bergen portrays in the TV series ''Murphy Brown''.

Stein, 47, has his own clothing likes and dislikes. He prefers women in short form-fitting skirts worn with suit jackets, and noted that actress Fay Dunaway often sports this ensemble.

He believes the combination reflects power and sophistication and is worn by a woman who wants to be taken seriously, using her sexuality as a ''means only '' he says.

On the other hand, Stein had a problem with the white satin gown styled in the ''Snow White'' mode that actress Kim Basinger wore to this year's Academy Awards ceremony.

''She did something so trendy it didn't seem suitable,'' he says. ''She's a great beauty. I think she just miscalculated.''

Stein labeled Basinger a ''fashion victim'' - someone insecure with a need to be better than others.

For himself, Stein prefers a denim shirt with a jacket and vintage tie, which, he says, translates into someone who is non-conformist, creative, credible and confident.

A New York native, Stein moved to Beverly Hills in 1974 to work for Columbia Pictures. He left the job six years later to seek his fortune as an independent film producer.

During that time, he developed the idea of a store specializing in authentic Army-Navy clothing. Camp Beverly Hills Clothing was born in 1977, and eventually blossomed into a multimillion-dollar company offering lines in perfume, lingerie, sunglasses and even furniture.

As the result of his business success, Stein made several television and radio

appearances and began thinking about his clothing-psychology concept.

''What I'm interested in is style more than the clothes,'' he says. ''I don't like to shop, it has never been my thing. What attracted me to this is an ability to make a style statement ... It's not the clothing that fascinates me but the concept behind it.''

Dressing to express oneself is good for one's mental health, Stein says, but he acknowledges that not everyone is free to because of constraints imposed by others, including employers.

''I think if people got more creative with clothing and were able to express themselves through what they wear, they would be happier and do better in life '' he says.

PARIS (OCT. 31) - The Soviet Union has obtained a credit of 1.5 billion francs (about 270 million dollars) from the Soviet Union for the purchase of between three million and four million tonnes of cereals, the French department for external economic relations said on Wednesday.

The sum is part of the five billion francs made available to the Soviet Union during a visit to Paris earlier this week by Soviet leader Mikhail Gorbachev.

The credits, with a life of two years, will be guaranteed by the French COFACE export insurance authority.

The initial sum will be used firstly for the purchase of soft wheat, and might be used to buy up to 500,000 tonnes of barley.

Recent rumours of wheat sales to the Soviet Union have boosted the French grain market.

PORT-LOUIS (OCT. 31) - South African Deputy Trade Minister Theo Alant is to meet next weekend in Mauritius with a group of Mauritian businessman whose companies trade with Pretoria, it was announced.

No official meeting is scheduled to take place during the visit.

A Mauritian delegation headed by Benoit Arouff, the president of the government's export promotion committee, may visit Pretoria in the near future to negotiate a trade agreement between the two countries, informed sources said.

The Mauritian delegation is expected to attempt to open South Africa to Mauritian tea and textile exports.

Mauritius has commercial relations with South Africa, but the two countries do

not have diplomatic ties.

AMMAN (OCT. 31) - Libya has expelled from its territory all members of a Palestinian guerilla group which had pledged to attack U.S. and western interests if western forces attacked Iraq.

A statement issued by the Palestine Liberation Front (Plf) and circulated in Amman expressed shock at the Libyan move.

''We are shocked by the Libyan decision which included closing down our offices on Libyan territory,'' the group, led by Abu Abbas, said in the statement.

Abu Abbas, whose real name is Mahmoud Abbas, is a member of the Palestine Liberation Organisation (Plo) Executive Committee who masterminded the 1985 hijacking of the Achille Lauro Italian cruise ship.

He moved to Baghdad soon after the hijacking and has since stayed in the Iraqi capital. The Plf is a splinter group of the Palestine Liberation Organisation.

''While regretting the move that was taken by a revolutionary and friendly anti-imperialist and anti-Zionist regime, we hope that it will not affect the historic ties between Libya and the Palestinian people,'' the Plf statement said.

The English-language Jordan Times daily Wednesday quoted Plf sources as saying that the move, made last week, was the result of pressure from the United States and Egypt.

The sources said Abu Abbas had also been banned from entering Libya after his group launched an abortive attack on Israeli beaches last May. The United States suspended its dialogue with Plo following the attack.

PARIS (OCT. 31) - French President Francois Mitterrand will have talks here Monday with King Hussein of Jordan, officials announced Wednesday.

The monarch, who will be accompanied by Foreign Minister Marwan al-Kassem, is to arrive in France for a working visit Sunday, according to authoritative sources in Amman.

Talks between the two leaders were expected to focus on the visit here by Soviet President Mikhail Gorbachev last Sunday and Monday, according to Amman

sources.

During his visit Mr. Gorbachev called for an all-Arab conference to settle the Gulf crisis triggered by the Iraqi invasion of Kuwait on August 2.

Mr. Kassem on Tuesday said that Jordan welcomed the proposal.

King Hussein will attend the two-day World Climate Conference in Geneva on November 6 after his visit to France.

#90304d0200 10/31/1990 ~French/German News Agency

RIYADH (OCT. 31) - Finance and economics ministers of the six-member Arab Cooperation Council (Gcc) will meet in Muscat on Saturday to explore ways of boosting cooperation among their states, it was announced here Wednesday.

The Gcc secretariat General said the finance and economics ministers of Saudi Arabia, Kuwait, Qatar, Bahrain, Oman and the United Arab Emirates will discuss the how to bolster cooperation, especially ways to support national and joint financial institutions and to legislate economic steps aimed at achieving more unity among their people.

The meeting also will be attended by the governors of the Gcc's central banks, the Gcc statement said.

The finance ministers will also review the results of talks held recently between the Gcc states and the European Community on concluding a free trade agreement, it added.

Earlier, the Gcc's foreign ministers said at the end of their two-day extraordinary session in Riyadh that they planned new peace moves to resolve the Gulf crisis sparked off by Iraq's invasion of Kuwait on August 2.

But they reaffirmed their stance on the need for a total and unconditional Iraqi withdrawal from Kuwait and the restoration of the legitimate government there led by exiled Emir Sheikh Jaber al-Ahmed al-Sabah.

CAIRO (OCT. 31) - Egypt's Foreign Minister Esmat Abdel Meguid left here for Saudi Arabia Wednesday where he will have one-day talks on the Gulf crisis with his Syrian and Saudi counterparts.

Meguid was accompanied by Osama el Baz, political adviser to Egyptian President Hosny Mubarak.

-30- 477
#90304d0270 10/31/1990 ~French/German News Agency
VIENNA (OCT. 31) - NATO and the Warsaw Pact leaders will next month sign a treaty on cutting conventional forces in Europe (CFE) just before a summit Conference on Security and Cooperation in Europe (CSCE), CSCE sources said here Wednesday.

The signing ceremony on November 19, the first day of the CSCE summit in Paris will be attended by the 12 heads of government whose countries were not involved in the CFE negotiations.

The 34-member CSCE comprises the United States, Canada and all European countries except Albania.

Leaders of the 16-nation North Atlantic Treaty Organization (NATO) and the six-nation Warsaw Pact will also sign a declaration of non-aggression, in line with a NATO resolution adopted in London last July.

The signature of a three-part document on a "united, peaceful and democratic Europe" as well as "guidelines" and "institutions" was to be the summit highlight on November 21, the last of the three-day meeting.

The first part is a declaration of intent spelling out that the rule of law, democracy and human rights are as necessary to a united, peaceful and democratic Europe as friendly relations among CSCE members.

The second sets guidelines on matters including security, human rights, economics, the environment, culture, and the Mediterranean Sea. Sources within the CSCE preparatory committee said a broad agreement had been reached on opening the 22-nation CFE talks to all other CSCE nations by 1992.

The third part calls for minister meetings at least once a year, the creation of a CSCE secretariat, probably in Prague, and a conflict-prevention centre, probably in Vienna.

Differences subsist over plans for a CSCE parliamentary body, with the U.S. Congress reportedly opposed to a move that could make the existing parliamentary assembly of the Council of Europe redundant.

French President Francois Mitterrand is to open the summit with an address to CSCE leaders at the Paris Conference Centre on November 19.

#90304d0280 10/31/1990 ~French/German News Agency
TOKYO (OCT. 31) - Japanese industrial-machinery giant Komatsu Ltd. said Wednesday its net profit climbed 20.5 percent from a year earlier to 9.2

billion yen (67 million dollars) in the six months to September.

The company, the world's second-biggest manaufacturer of construction machinery, said sales grew 14 percent to 333 billion yen (2.4 billion dollars) boosted by new products and strong demand in Southeast Asia.

Construction machinery sales leapt 16.4 percent to 268 billion yen (1.9 billion dollars) while sales of industrial machinery climbed 13.2 percent to 36 billion yen (263 million dollars).

But sales of components and other items fell 3.8 percent to 29 billion yen (210 million dollars), reflecting a slowdown in defense orders, it said.

Komatsu said that Southeast Asian infrastrucure projects had boosted demand for construction equipment, offsetting slower demand from the United States and Europe. But it warned that the "overall flatness of overseas markets" carried "the potential for further slackening in the future."

The company forecast its net profit to climb 21.6 per cent to 21 billion yen (152 million dollars) in the year to March with sales advancing nine percent to 685 billion yen (five billion dollars).

-30- 1453

#90304d0350 10/31/1990 ~French/German News Agency

BAGHDAD (OCT. 31) - Former Japanese Prime Minister Yasuhiro Nakasone is expected here Saturday to start a three-day visit during which he is to meet President Saddam Hussein, a Japanese embassy spokesman announced Wednesday.

Mr. Nakasone is to discuss the release of some 350 Japanese nationals currently held in Iraq and Kuwait, the spokesman added.

Nearly 140 of the 350 have been held hostage at strategic sites in Iraq since the Iraqi invasion of Kuwait August 2, he said.

Western and Japanese citizens have been used as "human shields" by Iraqi authorities anxioys to deter a U.S.-led attack on Baghdad.

The present Japanese prime minister, Toshki Kaifu, said Monday that Mr. Nakasone's visit was part of Japan's efforts to secure "contacts with Iraq at all levels".

President Hussein last week criticized a decision by Tokyo to send non-combat troops to the Gulf, describing it as "an act of hostility toward Iraq".

Mr. Hussein also maintained that Japan's contribution of four billion dollars to help finance the multinational force in the Gulf reflected "pressure by the United States."

-30- 1309
#90304d0400 10/31/1990 ~French/German News Agency
KARLSRUHE, GERMANY (OCT. 31) - Germany's highest court on Wednesday ruled that the decision by two West German states to grant voting rights to foreigners in local elections was unconstitutional.

The court said that "the power of the state in the Federal Republic derives from German citizens," and therefore only German citizens were entitled to vote.

In a groundbreaking move, the northern state of Schleswig-Holstein and the city of Hamburg, both run by left-wing majorities, enfranchised foreigners before municipal elections in February last year.

But Chancellor Helmut Kohl's conservative Christian Democratic Union (CDU) and the Bavarian CSU, a CDU ally, took the matter before the constitutional court, arguing that the franchise of foreigners had altered the makeup of the electorate in the two states.

The opposition Social Democratic Party's (SDP) parliamentary group Vice-President Willfried Penner denounced Wednesday's decision, saying that "The constitution must be modified to permit foreigners the right to vote," and in particular for European Economic Community nationals.

Germany counts more than five million foreigners, one third of them Turkish nationals.

-30- 1400
#90304d0420 10/31/1990 ~French/German News Agency
ABU DHABI (OCT. 31) - The sirens were sounded, gas masks were donned and a voice on the megaphone told people to stay in their homes and switch their air conditioners off.

This was the scene at the graduation ceremony of about 800 civil defence volunteers in Abu Dhabi Tuesday, during a demonstration that showed the graduates' skills in defending citizens, the Uae's daily Gulf News reported Wednesday.

The exercise was part of preparations in the Uae and other Gulf states to teach people how to survive a nerve gas attack should a war between Iraq and its enemies in the U.S.-led western alliance break out in the Gulf region.

''Let it be known that whereas Uae nationals have volunteered for the nation's defence, here they have also volunteered to defend lives,'' Brigadier General Suhail Mohammed Abdullah, Inspector General at the Uae ministry of Interior,

was quoted by the paper as saying.

He added that the volunteers, who have been training for three weeks, are well prepared for any emergency, including fires, chemical warfare or radiation.

Volunteers demonstrated what would happen in a nerve gas attack, and some fell to the ground and began to convulse, while others representing the civil defence team, rushed to the scene wearing complete chemical warfare protection gear.

Female volunteers wore gas masks over their ''hejab'' (veil) and simulated attending to a nerve gas victim.

#90304d0600 10/31/1990 ~French/German News Agency

MOGADISHU (OCT. 31) - Somalia's police chief Brigadier-General Abdurahman Abdi Hussen has vowed to crack down on demonstrators in the wake of bloody demonstrations that left three people dead and 31 injured last week.

Brig.-Gen. Abdurahman told journalists on Tuesday that the demonstrations were staged by "hooligans and anarchists bent on looting."

Organisers of the October 23 demonstration said it was held to protest against the continued detention of political prisoners under security laws that were theoretically scrapped when a new constitution took effect on October 12.

The number of political detainees in Somalia is unknown. Nine prisoners went on strike two weeks ago in the central prison here in protest against their detention without trial. They were arrested in July last year for allegedly distributing seditious literature.

Last week police in combat gear patrolled the main streets of the Somali capital of Mogadishu as President Siad Barre inspected shops looted during the demonstration.

Brig.-Gen. Abdurahman said intermittent gunfire was heard in the city because guards of government officials and embassies often fired warning shots.

He warned that action would be taken against them if they did not stop firing without reasonable cause.

He praised police for maintaining law and order at great personal risk, saying 13 policemen had been killed in the past three months.

#90304d0620 10/31/1990 ~French/German News Agency

PARIS (OCT. 31) - The Bank of France on Wednesday cut its key rates by one quarter of a point, reducing its tender rate from 9.5 percent to 9.25 percent, and its repurchase rate for five to 10 days from 10.25 percent to 10 percent.

The bank said that the move was justified by the "firmness" of the French franc and by recent statistics on money supply.

-30- 531

#90304d0630 10/31/1990 ~French/German News Agency

HONG KONG (OCT. 31) - The government Wednesday gave the go-ahead to local magnate Li Ka-shing's pan-Asia satellite television plan using Hong Kong as its base.

The approval, given on condition that the network would serve "an audience principally outside Hong Kong," was contained in an official compromise policy aimed at ending a feud between local satellite and cable television interests.

To appease competition worries expressed by Hong Kong Cable Communications Ltd., the colony's policy-making Executive Council slapped a three-year ban on Cantonese programmes carried by satellite.

Cantonese is the predominant southern Chinese language spoken here.

HutchVision, a fully owned subsidiary of Mr. Li's Hutchison Whampoa Ltd., planned to launch at year-end a 400 million U.S. dollar satellite television service for a potential audience of 2.3 billion people from Japan to India.

The six-channel service, using Hong Kong as its base, would be beamed via AsiaSat 1, which was boosted into orbit in April.

HutchVison's managing director, Richard Li, welcomed the Hong Kong government's "definitive decision," adding that he would make "a final announcement" on the issue soon.

The colony's satellite television ruling Wednesday also bars licensees from financing "their business through subscription in Hong Kong" during Cable Communications' license exclusivity, expected to be around six years.

Cable Communications is an international consortium led by Hong Kong tycoon Sir Yue-kong Pao's Wharf Group. It was handpicked by the government about 14 months ago to launch a 705 million U.S. dollar cable television network here next year.

#90304d0640 10/31/1990 ~French/German News Agency

BONN (OCT. 31) - The German government has promised the Philippines a total

of 97 million marks (64 million dollars) in capital aid and technical assistance, Bonn said Wednesday.

The Ministry for Economic Cooperation said the aid above all will help the economic reconstruction of the areas on Luzon Island which were devasted by an earthquake last July.

The aid will also be used for improving electricity supplies in Manila and for health care and agricultural projects, it said.

The package includes 70 million marks' worth of capital aid and 27 million marks' in technical cooperation assistance, Bonn said.

-30- 784

#90304d0670 10/31/1990 ~French/German News Agency

MANILA (OCT. 31) - The Philippine peso was devalued 8.7 percent to a new low of 28 pesos to one U.S. dollar Wednesday in a move to encourage exports and overseas remittances and end speculation, officials said.

Since the start of the year, this represents a 24.5 percent depreciation against the dollar, 32 percent against the yen and around 60 percent against leading European currencies.

Central Bank (CB) governor Jose Cuisia said the depreciation would boost exports by 300 to 350 million dollars and shrink imports by 100 to 150 million dollars this year alone.

The Philippines' trade deficit from January to August 1990 amounted to 2.56 billion dollars, about 50 percent higher than the corresponding deficit in 1989.

But Mr. Cuisia acknowledged that the benifits of the depreciation, coupled with planned fiscal reforms, would be fully felt only in 1992.

The immediate effects would include a rise in the cost of imports and of servicing the country's 27 billion dollar foreign debt.

The country's balance of payments deficit could hit 800 million pesos (28.6 million dollars) this year, Mr. Cuisia said.

Manila has failed to hold to its basic agreement with the International Monetary Fund and is expecting an IMF mission to shape a new financial agreement.

Mr. Cuisia added that the experience of other Southeast Asian countries that allowed their currencies to depreciate in the 1960s and 1970s -- as the Philippines protected the peso -- showed that an early depreciation would spur

long-term growth.

He said the rising cost of oil and the continuing financial shortages made it necessary to take measures to generate foreign exchange or there would be even higher inflation as well as shortages of basic commodities.

MUSCAT (OCT. 31) - King Hussein of Jordan arrived here Wednesday to start a 48-hour visit and talks with the Omani leader, Sultan Qaboos bin Said, official sources reported.

They said the two leaders would examine prospects for a peaceful resolution of the situation in the Gulf, where the Iraqi occupation of Kuwait will enter its fourth month on Friday, the sources said.

Several Gulf states, notably Saudi Arabia, have criticized what they say has been Jordanian sympathy for Iraq, as well as Amman's opposition to the deployment of foreign troops in the Gulf.

But Oman, although a partner of Saudi Arabia in the Gulf Cooperation Council, has continued to maintain good relations with Jordan.

MOSCOW (OCT. 31) - Moldavian nationalists have gone on the rampage in the southwestern Soviet republic, seizing communist party buildings, kidnapping army officers and threatening to kill border guards, according to media reports here Wednesday.

In one incident, more than 3,000 nationalist "volunteers" Tuesday night seized two checkpoints on the Soviet-Romanian border, threatening to kill the frontier guards and their families if interior ministry troops were not withdrawn from the south of the republic, Tass news agency reported.

Quoting Soviet border officials, Tass said the "volunteers", who want to crush a secession attempt by the 150,000 strong Gagauz minority in the south of their republic, also threatened to tear down the border posts and cross into Romania to seek aid.

The nationalists agreed to leave the border posts after several hours of negotiations with authorities Wednesday morning, the agency added.

Two regiments of interior ministry troops -- one based in the Ukraine, the other in Kishinev, the Moldavian capital -- have been rushed to the Gagauz territory to prevent the Moldavian "volunteers" from entering the area.

The volunteers had converged on the region at the weekend after the ethnic-Turkish Gagauz went ahead with elections to their own "independent" parliament, in defiance of the republican parliament in Kishinev which declared the move illegal. Kishinev has declared a state of emergency in the Gaugaz region.

PARIS (OCT. 31) - Western economies appear to have settled nervously into what analysts see as a "phoney crisis" because of Iraq's occupation of Kuwait, which goes into its fourth month on Friday.

Motorists do feel the pinch of dearer petrol at the pump, businesses face increased transport costs, and oil-dependent industries like chemicals, the airlines and shipping clearly take a more pessimistic view of the near term.

Major Western automobile companies are also bracing for troubled times ahead.

But by and large, the mood appears to be business more or less as usual in most manufacturing industry and services sectors, as business people get used to living with present uncertainties.

Three months into the Gulf crisis "we still have a fear-of-war and hope-of-peace situation," a senior Western energy official said. But, he added, "this is not an oil shock."

International economists, who see the problem as serious enough but manageable so far, agree that a real shock is inevitable if a shooting war erupts in the Gulf, with soaring crude prices, a drop in output and a collapse of business confidence.

Oil prices have broadly doubled since Saddam Hussein's forces invaded Kuwait on August 2 and the world community responded with an embargo on Iraqi oil and crude from occupied Kuwait.

Major European oil importers paid between 30.50 and 31.15 dollars a barrel for their September crude purchases, against just over 21.50 dollars in August and about 15 dollars in June.

This has begun to show up in rising oil import bills and moderately higher inflation rates in major consumer countries, as signs of somewhat slower economic growth have begun to emerge in member countries of the Organization for Economic Cooperation and Development (OECD).

In Western Europe and Japan consumer and business confidence on the whole seems to be holding up well, and so does investment, international economists

said, citing reunified Germany as an "engine of growth."

BONN (OCT. 31) - The German central Bundesbank is to remain in Frankfurt instead of moving to Berlin with the government as required by its 1957 statute, the German parliament decided late on Tuesday.

When the Bank was created, it was stipulated that it would establish its headquarters in the same place as the government, but that for as long as Berlin was not the seat of government, it would be based in Frankfurt.

German press reports said that the decision to maintain the bank's headquarters in Frankfurt signalled an ambition for it to become the future central bank for the European Economic Community.

BEIJING (OCT. 31) - A national census has put the Chinese population at about 20 million higher than projected, officials said Wednesday, calling for stricter family planning measures in the world's most populous country.

State Statistics Bureau Director Zhang Sai downplayed "the relative failure" of family planning efforts in China, whose population was counted at 1,133,682,501 as of July 1, according to preliminary census results.

The Chinese government instituted a draconian birth control policy aimed at stemming a population explosion after the communists came to power in 1949.

The official People's Daily in a Wednesday editorial blamed sporadic baby booms and "ineffective family planning programs in many areas" for an annual population increase of 17 million.

"As a result, population control is still an arduous task for China," it said, and called for action from officials at all levels.

But the communist party organ said the census figures show that China has achieved "fruitful results in controlling population growth and in raising the people's living standard."

Mr. Zhang said at a news conference that the margin of error in the census was reduced to 0.6 per 1,000 citizens or 6.8 million people, roughly the population of Switzerland or Cambodia.

The only surprise in the census was the high number -- about 55.5 million -- of unreported deaths, he added. Observers said many families fail to report

deaths so they can keep collecting rice or other commodities rationed to the deceased.

Preliminary results, released late Tuesday, await final tabulation by computer. For now, many questions are unanswered, including the number of "black babies" hidden to avoid punishment for violation of China's policy of one child per family.

NEW DELHI (OCT. 31) - India returned its attention to a political crisis Wednesday as a second minister quit the cabinet of embattled Prime Minister Vishwanath Pratap Singh, who himself offered to step down.

The crisis was briefly overshadowed by its cause -- a bitter row over a crumbling 16th-century Moslem mosque in the northern town of Ayodhya, stormed by hundreds of Hindus Tuesday.

But it was quickly back in the limelight as sports minister Bhakta Charan Das resigned, slamming the government for steering the country into chaos and questioning "our dubious right to stay in office."

Mr. Das joined environment minister Maneka Gandhi, who quit after the crisis erupted October 23 with the loss of legislative support for the National Front coalition.

He said the Front had driven India to a "situation where vast social strife and confrontation (have) posed a danger to the unity and integrity of the country."

"The whole nation is burning and we are trying to save our government," he said.

Mr. Das referred to tensions over the temple-mosque dispute and widespread protests over a plan reserving almost half of all government jobs for the lower castes.

Hindu-Moslem violence over the dispute has left more than 100 people dead in a week. Six people were killed in police gunfire Tuesday when Hindus stormed the mosque, which they claim was built after demolition of a temple.

The government's attempts to thwart Hindu plans to raze the mosque and replace it with a temple prompted the revivalist Bharatiya Janata Party to withdraw its vital legislative backing for the government on October 23.

Mr. V.P. Singh, who then refused to quit and declared he would prove a majority in parliament on November 7, offered to step down late Tuesday if his

coalition wanted him out.

#90304d0930 10/31/1990 ~French/German News Agency
Paris (OCT. 31) - The French national bank announced here Wednesday a one-quarter percentage point cut in its two leading interest rates, saying the franc's recent sturdiness vis-a-vis the Deutschmark permittedd the move.

The intervention, or discount, rate was lowered to 9.25 percent and the rate for five to ten-day security repurchasing agreements to 10.0 percent.

The bank said it felt it could lower the rates because for weeks now the franc had remained steady against the mark, at the same time that prices had remained relatively stable.

In an immediate market response to the move, the Cac index on the Paris stock exchange rose 1.1 percent to 1,631.22 points.

#90304d0950 10/31/1990 ~French/German News Agency
TIRANA (OCT. 31) - Albania, Europe's poorest nation and until recently a paragon of Stalinist-style communism, is making its first attempts to encourage the free-market techniques that are sweeping the rest of eastern Europe.

President Ramiz Alia has said that "a new economic mechanism" will be set up in 1991, giving enterprises some financial independence with a view to making them profitable.

And a timid step towards a market economy was taken when the government gave about 100 people permission to open stores such as butcher's, baker's and cobbler's shops, as long as they employed only family members.

"Practice will prove if the experiment should be broadened to include other sectors," said Professor Hekuran Mara, one of the country's most influential economists.

Despite the higher prices charged by these private enterprises, the experiment has proved popular both with the entrepreneurs and their customers.

Even Mr. Mara admitted to buying meat from a private butcher, because in state-run shops it was rationed to one kilo (2.2 pounds) a week per family.

Xhavit Gazheli, 50, opened a butcher's shop three months ago in the capital.

Mr. Gazheli, who used to work in a state-run butcher's shop earning 500 leks (50 dollars at the official exchange rate) a month, said he now made twice

that.

The average salary is 475 leks (47.50 dollars), the minimum is 400 leks (40 dollars), a qualified labourer earns 600 leks (60 dollars) and the official maximum salary is 1,200 leks (120 dollars).

#90304d1020 10/31/1990 ~French/German News Agency

BONN (OCT. 31) - The German parliament urged the government to take rapid steps to curb global warming on Wednesday during a debate on the protection of the atmosphere.

The lawmakers cited scientists' warnings that temperatures could climb by four degrees in the coming decades, having disastrous consequences for much of the world.

Environmental Minister Klaus Toepfer said the Cabinet would present a ''common position for action'' in November.

The parliament was debating the so-called Enquete Commission's final report on protecting the atmosphere.

Christian Democrat (Cdu) Bernd Schmidbauer, the commission's chairman, said that by 1991 laws should be on the books promoting energy savings and the greater use of wind and sun power.

While the German government believes a reduction of carbon dioxide emissions - a major factor in global warming - by 25 per cent by 2005 is possible, the commission demands a cut of at least 30 per cent.

Partisan disagreement arose on nuclear energy and a highway speed limit. A proposal by the Social Democrats (Spd) to impose a speed limit on top of energy taxes to help reduce carbon dioxide emissions was rejected.

And although the ruling coalition of the Cdu and Free Democrats wants to maintain the status quo on the use of nuclear energy, the Spd, Green Party and Alliance 90 are pressing for a total ban.

SANUR BEACH, Indonesia (OCT. 31) - The Association of Southeast Asian Nations (ASEAN) moves one step closer to becoming a regional common market by adopting a new import tariff measure to boost trade among its six members, officials and analysts said Wednesday.

ASEAN economic ministers at a meeting here endorsed Tuesday an Indonesian

proposal for enforcing common tariffs, initially on a selected number of manufactured goods, in a bid to bolster still meagre intra-ASEAN trade.

The scheme, which Philippine Secretary of Trade and Industry Jose Conception described as a "radical approach," would complement an existing ASEAN program granting preferential tariffs for goods traded among member countries.

"We are moving in the right step towards liberalising trade as well as probably even investment in the region," Mr. Conception said Tuesday after the two-day meeting.

ASEAN, formed in 1967 to promote economic cooperation in non-communist Southeast Asia, groups Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand.

Manila has been the most vocal in calling for the creation of a common market while Indonesia, until recently, had been reluctant fearing it would see its huge market of 184 million people flooded by goods from ASEAN countries.

Attitudes have changed as ASEAN members accept the need for closer economic cooperation in the face of the European Community's single market in 1992 and the United States' free trade pact with Canada.

In Indonesia, a wave of deregulation measures since the mid-1980s, has also led staunch supporters of trade protection to change their minds.

Industry Minister Hartarto, once nicknamed "Mr. No" for his persistent refusals to open Indonesia's manufacturing sector to foreign competition, is now "Mr. Go" in ASEAN circles, Indonesian sources said.

#90304d1180 10/31/1990 ~French/German News Agency

HEERLEN, Netherlands (OCT. 31) - The Dutch DSM chemicals firm said on Wednesday that it is to build a caprolactam factory in South Korea with two local partners and will be responsible for half of the total cost of about 200 million dollars.

The partners are the Kolon textile company and the Nam Hae fertiliser manufacturer.

DSM will hold 50 percent of the new company, Kolon 30 percent and Nam Hae 20 percent.

At full capacity, the factory will produce 100,000 tons a year of caprolactam, a basic product for the manufacture of nylon-6 which is used in textiles, carpets and cogged wheels.

The agreement will make DSM the biggest producer in the world.

#90304d1220 10/31/1990 ~French/German News Agency

LONDON (OCT. 31) - A Malaysian toy manufacturer is hoping to revive its failing prospects with a "Gulf War" board game which it will bring out just in time for Christmas.

Yim Tam Tak, managing director of the Yimi toy company of Kuala Lumpur, said he hoped to sell between 300,000 to 500,000 boxes of the board game.

According to a report in Wednesday's British daily, The Independent, the Yimi toy company was "being deluged" with inquiries from shops in Britain, Europe and the United States.

Mr. Yim, denying that the board game might be considered tasteless while hostages were being held and soldiers were preparing for war, said: "We don't have any ill intention. We don't take sides or make political points. Everything in the game depends on strategy and the calculation of possibilities. Either side can win."

He said the company had been working on a very similar board game to be called "Superpowers," based on the struggle between the Soviet Union and the United States. But then the Cold War ended and would have scuppered the company's plans if Iraq had not invaded Kuwait in August.

The Yimi toy company changed its U.S.S.R v. U.S.A game into a U.S.A v. Iraq game. "It's the same game, really," Mr Yim told The Independent. "The map on the box is different, but the rules have not changed and some of the players are the same."

#90304d1230 10/31/1990 ~French/German News Agency

TOKYO (OCT. 31) - Japan's tax revenue in September totaled 2.867 trillion yen (about 22.2 billion dollars), up 9.4 percent from a year earlier, the finance

ministry reported Wednesday.

The year-on-year growth compared with a rise of 20 percent in August.

The September figure indicated that high-pitched tax revenue growth has apparently peaked, ministry officials said.

The officials said that the September revenue included income tax of 1.312 trillion yen (10.17 billion dollars), up 21.8 percent from a year before.

Revenue from corporate tax grew 0.9 percent to 481.7 billion yen (3.73 billion dollars), the officials said.

-30- 821

#90304d1240 10/31/1990 ~French/German News Agency

MOSCOW (OCT. 31) - The Russian Supreme Soviet on Wednesday voted to assume control over all resources and property in the republic, other than those belonging to the Soviet Defence and KGB ministries.

The parliament voted by 200 to nil, with three abstentions, to grant its council of ministers full economic powers, including the right to ratify all foreign trade agreements which affect the Russian federation.

The Russian federation, the largest and most powerful of the Soviet republics, was no longer responsible for any of the foreign trade agreements concluded by the union government.

Foreign businesses wishing to operate on its territory would have to register with the Russian Council of Ministers, according to the law.

Hard currency, gold and diamonds reserves held by the union government were the common property of all 15 Soviet republics and the Russian share of these assets could only be used with the republic's consent.

Changes in property laws, including privatizations, would be handled by the Russian government, which reserved the right to overturn any union law which might contradict its own legislation.

-30- 1336

#90304d1360 10/31/1990 ~French/German News Agency

TOKYO, Oct 31 (AFP) - Japan said Wednesday it would make no more financial contributions to help the U.S-led multinational force in the Gulf.

"The government is not considering extending any further financial support," Finance Minister Ryutaro Hashimoto told a special committee debating a bill to send non-combatant Japanese forces to the Gulf.

Japan has so far pledged two billion dollars to the multinational force as well as another two billion dollars in aid to countries in the region hard hit by the United Nations embargo against Iraq.

Prime Minister Toshiki Kaifu rejected an opposition call for a major revision of the controversial U.N. Peace Cooperation bill, although he said he would consider a partial revision.

The bill calls for the creation of a U.N. peace cooperation corps which would be non-combatant and would be deployed aboard in peacekeeping activities.

Meanwhile, Deputy Foreign Minister Hisahi Owada left for Moscow for talks with Soviet presidential envoy Yevgeny Primakov on the Gulf crisis.

Observers noted that it is rare for Japan to consult with the Soviet Union on an international crisis.

Mr. Owada should leave Moscow on November 2 to visit Britain, Italy, France and the United States for similar consultations. He will return to Tokyo around November 10, foreign ministry officials said.

Former premier Yasuhiro Nakasone, scheduled to leave for Iraq on Saturday, said he would do his utmost to persuade Iraqi President Saddam Hussein to hold peace talks and free foreign hostages.

"I don't know if I can do what I expect to, but I will throw myself into the task," he was quoted as saying by his aides.

-30- 1860

#90304d1390 10/31/1990 ~French/German News Agency

MOSCOW (OCT. 31) - U.S. Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze are expected to meet next week in Geneva to discuss arms control and the Gulf crisis, the Soviet Interfax news agency reported Wednesday quoting foreign ministry sources.

The meeting would probably be held on Nov. 8 or 9, Interfax added.

In Washington, the State Department announced earlier that after Mr. Baker's tour of the Middle East he would meet Mr. Shevardnadze somewhere in Europe next week.

In addition to the situation in the Gulf and Middle East, the two men would discuss the reduction of conventional forces in Europe (CFE) and strategic arms reductions (START), U.S. State Department spokeswoman Margaret Tutwiler said.

A CFE agreement is expected to be reached before the Conference on Security and Cooperation in Europe to be held later this month in Paris, while a START agreement is expected before the end of the year.

-30- 1147

#90304d1400 10/31/1990 ~French/German News Agency

LONDON (OCT. 31) - The head of 8,000 British troops based in the Gulf said Wednesday that a military offensive against Iraqi occupation forces in Kuwait was becoming ''increasingly likely''.

Air Chief Marshall Sir Paddy Hine said his troops would be fully operational in two weeks at the most, and that they would be able to implement any political decision to wage war.

Hine said he thought it unlikely that Iraqi would undertake an unconditional pullout from Kuwait, which it invaded August 2 and later annexed.

Coordination between the multinatinal force in the Gulf region was functionning well, but Hine said he would welcome the nomination of a commander in chief for all these armies.

This commander should be a United States officer because the U.S. has the strongest contingent with about 210,000 troops, Hine added.

#90304d1420 10/31/1990 ~French/German News Agency

ANKARA (OCT. 31) - Turkey considers recent clashes between the ethnic Turkish minority in Moldavia and Moldavian militants as an internal Soviet affair, the Turkish foreign ministry said Wednesday.

Foreign ministry spokesman Murat Sungar said that Turkey would examine the events within the context of recent changes in the Soviet republics, and emphasized that the affair was a "Soviet domestic matter."

He also announced that a foreign ministry delegation would visit the Soviet republic of Turkmeniya to discuss possible development of economic relations, and to deal with bilateral relations between Turkey and the southern Soviet republics, notably the Turkish-speaking areas.

The initiative reflects Turkey's new policy of developing ties with these areas following the reopening of the Sarp border post on the Black Sea in 1988.

Turkey's attention has been principally concentrated on Moldavia, Georgia, the Ukraine and Azerbaijan.

-30- 1141
#90304d1490 10/31/1990 ~French/German News Agency
MOSCOW (OCT. 31) - Georgia's pro-independence "Round Table-Free Georgia" coalition seemed headed for victory in the parliamentary elections, according to initial results released Wednesday.

The multi-party election -- the first in the Soviet Caucasian republic since the Bolsheviks came to power -- was held Sunday.

Georgians voted twice. Once, on a first-past-the-post territorial basis and once on a proportional basis for a party list.

A total of 125 deputies were to be elected on the territorial basis and 125 more on the proportional basis.

With one third of the votes counted in the proportional election, "Round Table-Free Georgia" led with 57 per cent of the vote, followed by the Communists with 25 per cent of the vote, Tass news agency said. Nine other parties or coalitions shared the remaining votes.

According to unofficial results, the "Round Table-Free Georgia" coalition had also won 34 seats outright on the territorial basis, while the Communist party had won 16, Tass said.

Tass earlier reported that the Communists had won 22 seats.

Four independent candidates were also elected, along with one representative of the Popular Front and one from the "Democratic Georgia" party, Interfax news agency said.

Runoff elections are to be held in about 60 electoral regions where electors either boycotted the polls or where none of the candidates polled more than half the votes.

The leader of "Round Table-Free Georgia", Zviad Gamsakhudia, said that if his coalition won, it would ask the Georgian parliament to adopt a declaration of independence.

#90304d1510 10/31/1990 ~French/German News Agency
BONN (OCT. 31) - Bavaria's Christian Social Union (Csu), part of the German ruling coalition, urged the government of Chancellor Helmut Kohl on Wednesday to increase contacts to Saudi Arabia and make it clear that its safety was a central German concern.

Ortwin Lowack, the Csu's foreign policy spokesman, said safeguarding Saudi oil fields from ''Iraq's lust for power'' was a vital German interest.

The German government must underscore its friendship with Saudi Arabia so as not to ''appear in an unfavourable light'', he said.

According to Lowack, that was ''all the more urgent'' because the Saudi foreign minister ''barely avoided a loss of face'' during his recent visit to Germany.

Lowack was alluding to Bonn's announcement during the visit that it would not supply Saudi Arabia with arms.

#90304d1660 10/31/1990 ~French/German News Agency

JERUSALEM (OCT. 31) - Israeli Defence Minister Moshe Arens has suggested laying off the 130,000 Palestinians working in Israel and giving their jobs to unemployed Jews, Israeli army radio reported Wednesday.

It said the cabinet would discuss Arens' proposal, which also envisages the creation of new jobs in the occupied territories to absorb the redundant Palestinians.

Israel, where unemployment is currently running at about 10 per cent, will need hundreds of thousands of new jobs in the next few years to provide work for the influx of Jews from the Soviet Union.

This year alone, more than 150,000 Jewish immigrants are expected from the Soviet Union.

In the occupied West Bank and the Gaza Strip, the unemployment rate among Palestinians stands at 25 per cent.

-30- 985

#90304d1700 10/31/1990 ~French/German News Agency
JERUSALEM (OCT. 31) - Israeli immigration reached a record high in October, when 21,000 people -- including 20,000 Soviet Jews -- entered the country, Integration Minister Yitzhak Peretz announced Wednesday.

"By our previsions, the numbers for November and December should be even higher," according to Mr. Peretz, who said 19,500 immigrants came to Israel in September.

Since the start of the year, 134,500 immigrants have arrived, including 122,000 from the Soviet Union, the minister added.

Finance Minister Yitzhak Modai recently warned that Israel would need an annual industrial growth rate of eight per cent in order to absorb the influx.

"By the end of 1992 we will have to build 250,000 housing units and create 500,000 new jobs," he said.

#90304d1830 10/31/1990 ~French/German News Agency
KAGITUMBA, RWANDA (OCT. 31) - Fighting erupted Wednesday between Rwandan government forces and rebels at Kagitumba, on the Ugandan border, witnesses who saw the fighting from the Ugandan side said.

On Tuesday the Rwandan army reoccupied Kagitumba, the border post where rebels of the Rwandan Patriotic Front (RPF) set up their rear camp when they invaded north-east Rwanda from neighbouring Uganda on October 1.

The rebels had withdrawn from Kagitumba a few hours earlier, probably into the hills of the nearby Akagera national park, Ugandan army commanders said.

The witnesses said the rebels had apparently attacked from the park on Wednesday. The number of casualties was unknown.

Government forces entered the border post after shelling it for most of the day Tuesday, Ugandan soldiers at the border said.

Government troops supported by tanks and armoured personnel carriers besieged the post in the morning hours of Tuesday. Hundreds of troops were transported to the border post in dozens of buses and lorries.

#90304d1870 10/31/1990 ~French/German News Agency
MANAMA (OCT. 31) - The foreign ministers of Saudi Arabia, Egypt and Syria met in the Saudi city of Jeddah Wednesday to discuss recent Soviet moves to find a peaceful solution to the Gulf crisis.

The Qatari News Agency reported that Saudi Arabia's Saud al-Faisal, his Egyptian counterpart Esmat Abdel-Meguid and Faruk al-Sharaa from Syria debated the outcome of a mission by Soviet Presidential envoy Yevgeni Primakov to Arab capitals.

Primakov has conferred with officials in Egypt, Iraq and Saudi Arabia, where he also met members of the exiled Kuwaiti government. Moscow has not confirmed reports saying his trip, which received a cool response in Washington and London, was unsuccessful.

The Jeddah meeting was expected to last one day. Saudi Arabia, Egypt and Syria are spearheading the Arab front against Iraq's August 2 invasion of Kuwait. Egyptian and Syrian forces are based in Saudi Arabia to fend off a possible Iraqi attack.

In Washington, Iraq's ambassador to the United States, Mohammed Al-Mashat, delivered an impassioned plea for a negotiated settlement of the Gulf crisis, saying Iraq was ''ready now'' to begin negotiations ''with any nation''.

His statement came as Iraqi President Saddam Hussein put his military staff on alert Tuesday for a possible military assault by a U.S.-led multinatinal force in Saudi Arabia.

In Paris, French Foreign Minister Roland Dumas Wednesday said the proposal of Soviet President Mikhail Gorbachev on Monday to find an inter-Arab solution to the Gulf crisis was ''interesting'', and he supported this idea for a ''peaceful solution'' of the crisis.

''Any solutionn should occur under the condition of an (Iraqi) withdrawal from Kuwait... and the release of all hostages who were held wrongly in Iraq,'' Dumas added.

#90304d1990 10/31/1990 ~French/German News Agency

PARIS (OCT 31) - The oil market continues to be well supplied, and supply and demand appear to be in better balance than at the end of September, the International Energy Agency said here on Wednesday in a report on the market situation.

"The level of stocks is normal, supply adequate and price fluctuations are not linked to fundamental market factors," German representative Ulrich Engelmann, who chaired the meeting, said.

The IEA, which groups 21 countries, said that oil companies would have to draw 0.7 million barrels per day from stocks in the fourth quarter of 1990 and 0.4 million in the first quarter of 1991 in order to balance supply and demand.

The IEA had earlier said that they would have to draw down 1.5 million barrels and 1.3 million barrels.

But the report warned that "the oil market remains at the mercy of new disruptions" and governments "must continue to be ready to act if the market situation requires it".

-30- 1146

#90304d2070 10/31/1990 ~French/German News Agency

JOHANNESBURG (OCT. 31) - South African nudists at an isolated colony have been ordered to cover up after tough Afrikaner farmers blamed them for drought in the area, according to a radio report Wednesday.

Beau Brummell, a former rock singer, and now owner of a nudist colony near the conservative town of Warmbaths, some 120 kilometres (75 miles) north of here, said farmers in the area were blaming nudists soaking in the blazing African sun for the crippling drought.

He said he had asked nudists intending to visit his colony to cover up this coming weekend because he had had complaints from farmers that his guests were the cause of the drought.

"We will be wearing bathing costumes to bring on the rain so we can fill the dams ... so we can go nude again", Mr. Brummell told commercial radio 702.

MOVE TO KIDNAP INDIAN SPACE RESEARCH CHIEF FOILED, OFFICIAL SAYS

NEW DELHI (OCT 31) - Police in the southern city of Bangalore Wednesday arrested five men they said planned to kidnap Udipi Ramachandra Rao, chairman of the Indian Space Research Organisation.

The United News of India quoted the city's commissioner of police as saying the group had hoped to obtain the release of an arrested Hindu leader.

NEW YORK (OCT 31) - German elder statesman Willy Brandt was due to have talks with United Nations Secretary-General Javier Perez de Cuellar late Wednesday on a humanitarian mission to Iraq to try to secure the release of Western hostages.

Brandt, former West German Social Democratic (Spd) chancellor and head of the Socialist International, is expected to gauge Perez' view on the possibility that he might travel to Baghdad as a U.N. envoy to mediate the release of 400 Germans and other foreigners.

U.N. spokeswoman Nadia Younes Tuesday pointed out that Perez had already named a special envoy, Prince Sadruddin Aga Khan. However, the Iraqis have refused to allow Aga Kan into the country.

In Germany, Oskar Lafontaine, the top opposition Social Democratic Party candidate in the forthcoming all-German general elections said Wednesday he advocated a mission by Brandt.

Speaking in the German city of Duesseldorf, Lafontaine said the decision whether to send Brandt to Baghdad could hardly be left to the Bonn government alone. Bonn opposes such a humanitrian mission.

Relatives of some of the German hostages have asked Brandt, honorary Spd chairman, for help.

Brandt has told the Iraqi ambassador to Germany, Abdul Jabbar Omar Ghani, that he would not allow himself to be used as a ''propaganda object''. The mission to Baghdad would concern the fate of all the Western hostages, he stressed.

COLOMBO (OCT 31) - The Canadian government Wednesday expressed concern over human rights abuses in Sri Lanka and urged Colombo to ensure respect for the law and to take steps to punish violators.

A statement from the Canadian High Commission (embassy) here said Canadian Secretary of State for External Affairs Joe Clark had expressed concern over human rights abuses in Sri Lanka.

"While there has been some improvement in the general human rights situation in recent months, it is evident that a greater commitment will be required to ensure respect for the law and to bring the perpetrators of human rights to justice," Mr. Clark said.

"It remains the ultimate responsibility of the government of Sri Lanka, as the duly constituted authority, to ensure that rights are respected and to set the patterns of conduct for others to follow," he added.

Human rights organisations have alleged continuing human rights abuses in Sri Lanka. The European Economic Community (EEC) has called on Colombo to "observe its international obligations in the field of human rights."

At the Sri Lanka Aid Consortium meeting in Paris last week, Western donor nations referred to an EEC statement that said Colombo's human rights performance would be studied when formulating future assistance plans.

Mr. Clark urged Colombo to ensure food and medicine are delivered to northern Sri Lanka for distribution by the International Committee of the Red Cross and appealed to the separatists not to hinder the humanitarian efforts.

"We are witnessing a very serious situation in humanitarian terms in northern Sri Lanka. Every effort must be made to ensure that innocent civilians in the north do not become victims of the current conflict," Mr. Clark said.

Due to the fighting there, the distribution of food and medicine has become difficult and Tamil groups have frequently reported starvation among the civilian population.

Unofficial and official figures indicate that more than 4,500 people have died in violence in the predominantly Tamil northeast since June 11.

JERUSALEM (OCT. 31) - Masked assailants stabbed to death a Palestinian man Wednesday after accusing him of collaborating with the Israeli authorities, Arab sources said.

Fahed Ibrahim Abu Jallah, 28, was killed in the Khan Yunis community of the Israeli-occupied Gaza Strip by several masked men, the sources said.

If the killing is confirmed, it would be the the 257th of a Palestinian on charges of collaborating since the start in December 1987 of the anti-Israeli uprising, according to a Palestinian toll.

BONN (OCT. 31) - The defence ministry announced Wednesday that it will assist the U.S. Air Force with transport flights in Europe following the transfer of American forces stationed in Germany to Saudi Arabia.

The defence ministry said as of Thursday the German Air Force would provide the Americans with six Transall planes to carry mail, spare parts and other freight to Britain, Italy, Spain and Greece.

''The move is designed to close gaps in the European transport commando caused by the Gulf crisis,'' a ministry spokesman said.

A u.S. Air Force unit, stationed in Frankfurt, said no troops or ammunition

would be transported by the Bundeswehr planes.

The Americans asked for German assistance after a Frankfurt-based U.S. Air Force transport commando was sent to Saudi Arabia to join the multinational task force in the Gulf.

NEW YORK (OCT. 31) - Citicorp, the country's largest banking group, said Wednesday it would reduce its staff worldwide by 2,000 employees by the end of 1991 as part of a corporate reorganization program.

It was the first indication of how extensive the bank's restructuring scheme was since Citicorp announced several months ago that it planned to shrink its corporate financing activities.

Several U.S. banks have been facing difficulties due to a slumping real estate market and fewer business takeovers on Wall Street.

Citicorp spokeswoman Anne Luzzatto said staff cuts would basically involve mid-level management and specialists in leveraged buyouts.

Some 700 jobs had been cut in North America, she added, with another 400 expected to be sacked by the end of this year, while another 900 jobs would be eliminated next year in the bank's European and Asian branches.

The bank has 17,000 employees worldwide, with its biggest overseas branches in Japan, Europe and Australia.

The staff cuts were expected to reduce company costs by 250 million dollars a year, Luzzatto said.

TOKYO (OCT. 31) - Japan's exports of color television sets skyrocketed 88.1 percent from a year earlier to 385,000 units in September, the Electronic Industries Association of Japan said Wednesday.

Exports to China jumped 796.4 percent, while those to Hong Kong and the Soviet Union surged 167.2 percent and 243.6 percent respectively.

Japanese exports of video-cassette recorders also rose 4.4 percent to 26.12 million units, with sales to China moving up 199.6 percent and those to Singapore rising 14 percent.

But domestic shipment of color television sets declined 11.4 percent to

692,000 units and those of video-cassette recorders dropped 17.5 percent to 430,000 units.

BANGKOK (OCT. 31) - Laotian diplomats on Wednesday held discussions with Burmese anti-narcotics officials in Rangoon, official Radio Rangoon said in a broadcast monitored here.

The Laotian diplomats held talks with Burmese Narcotics Suppression Division chief Colonel Ngwe Soe Tun at the Police Headquarters in Rangoon on a proposed Laotian-Burmese joint anti-narcotics drive along the border, the radio said.

The borders of Laos, Burma and Thailand converge at an area known as the Golden Triangle, the largest opium-growing and heroin-producing area in

Southeast Asia.

From there comes over 50 percent of the heroin sold in Europe and the United States.

In another report, Laos state-run Radio Vientiane said 14 Burmese men were repatriated at the border with Laos on Friday after being arrested by the Laotian authorities in 1988 and sentenced to up to eight years in prison for producing heroin in Laos' northern province of Oudomsai.

Paris (OCT. 31) - Supplies on world oil markets are adequate three months after the start of the Gulf crisis, the Paris-based International Energy Agency (Iea) said Wednesday.

The supply situation on oil markets was better at present than last month, the Iea governing board said after a meeting.

''Stock holding is normal, supplies are sufficient and price fluctuations are not related to basic market data'', German board meeting chairman Ulrich Engelmann said.

Oil companies will have to use 0.7 million barrels per day from their stocks to match demand in the fourth quarter of 1990, 0.7 million bd less than predicted.

In the first quarter of 1991 this figure would narrow to 0.4 million bd, the agency said.

However, in view of the continuing Gulf crisis the agency urged governments ''to be ready to act if the market situation made this necessary''.

WASHINGTON (OCT. 31) - President George Bush and visiting Vatican Secretary of State Agostino Cardinal Casaroli discussed the Gulf crisis here Wednesday and expressed hope that a peaceful settlement could be found, the White House said.

During the 40-minute meeting, the president "expressed appreciation for the Vatican's support for U.N. sanctions against Iraq and reiterated our position that nothing short of complete implementation of the U.N. Security Council's resolutions is acceptable," a White House statement said.

"Both leaders expressed the hope that a peaceful resolution to the current crisis (sparked by the August 2 Iraqi invasion of Kuwait) could be found," it added.

Cardinal Casaroli, who came to the United States to receive the "Prisoner of Conscience" Award from the Appeal of Conscience Foundation in New York, had a private meeting with Vice President Dan Quayle after his talks with Mr. Bush, the White House said.

The cardinal later headed for New York for a luncheon with U.N. Secretary General Javier Perez de Cuellar.

SAN SALVADOR (OCT. 31) - Leaders of nine Salvadoran political parties will travel to Mexico for two days of talks with Salvadoran guerrilla leaders on the prospects for peace in this Central American nation, officials said Wednesday.

The political leaders were due to meet in San Salvador Wednesday to work out last-minute details of the meeting Thursday and and Friday in Mexico City with the leadership of the Farabundo Marti National Liberation Front (FMLN).

The encounter should give both sides an opportunity to exchange views on the stalemated peace negotiations between the government and the rebels, said an official of one of the particpating parties, the National Revolutionary Movement headed by Guillermo Ungo.

Other parties to be represented at the talks include the ruling National Republican Alliance (ARENA), the Christian Democratic Party (PDC), the Social Christian Popular Movement (MPSC) and Democratic Action (AD).

Representatives of the government of President Alfredo Cristiani and the FMLN are to meet Sunday in Mexico City to prepare for the next round of peace negotiations, which was supposed to begin November 4 but may be postponed.

Mr. Cristiani said the goal of the preparatory meeting was to re-energize the negotiating process, which has stumbled on rebel demands for sweeping reforms of the armed forces.

MANAGUA (OCT. 31) - President Violeta Chamorro Wednesday fired Central Bank Chairman Francisco Mayorga over a disagreement on how quickly to convert to a new national currency, government officials said here.

Mr. Mayorga opposed Mrs. Chamorro's decision for an immediate an massive changeover to the new currency, the gold cordoba, arguing in favor of a more gradual change to better fight inflation, they added.

Observers said Mr. Mayorga's dismissal and other changes in the government responded to a need for a closer knit cabinet to carry out the social and economic pacts signed last Friday by Mrs. Chamorro's administration, labor unions and business leaders.

Last April, Mrs. Chamorro inherited a much troubled economy from the leftist Santinista National Liberation Front, and has been faced with growing labor unrest and financial hardships.

Mr. Mayorga was replaced by Central Bank Vice Chairman Raul Lacayo.

The government also reestablished the Ministry of External Cooperation, which had been eliminated when Mrs. Chamorro took over from the Sandinista administration. Erwin Krugger, director of state-run industries, was named to head the new ministry, government sources said.

Mrs. Chamorro's personal secretary, Jose Adan Guerra, took over Mr. Krugger's former post, they added.

#90304d2960 10/31/1990 ~French/German News Agency

MANAMA (OCT. 31) - Kuwait's exiled prime minister, Sheikh Saad al-Abdullah al-Sabah, was quoted as saying Wednesday that his Iraqi-annexed country would not give up an inch of its soil.

Crown Prince Saad said the minimum Kuwait would accept as a solution to the Gulf crisis was strict implementation of United Nations Security Council

resolutions.

He made his remarks in an interview with the London-based Lebanese weekly Al Hawadess. Excerpts from the interview, which will be published on Friday, were carried by the Kuwaiti News Agency (Kuna).

The Security Council resolutions, which Iraq has rejected, call for a total and unconditional withdrawal of Iraqi troops from Kuwait and the restoration of the legitimate authority there led by exiled Emir Sheikh al-Ahmed al-Sabah.

Saad's remarks represented an outright rejection of proposals for a compromise involving a land swap. Two border islands - Bubiyan and Warba - had been cited by some foreign news media as a possible price which Kuwait might have to pay for an Iraqi troop pullout.

#90304d3010 10/31/1990 ~French/German News Agency
NEW YORK (OCT 31) - The Palestine Liberation Organisation Wednesday asked Arab states to halt trying to strip Israel of its membership in the United Nations, a Plo representative said.

The deputy head of the Plo observer mission at the U.N., Nasser al-Kidwa, said the Arab group at the U.N. General Assembly would instead present a resolution calling on Israel urged to implement earlier Security Council and General Assembly resolutions on the Palestinian-Israeli conflict.

The Plo and all 20 Arab states ecxept Egypt had tried during the past eight years to get Israel ousted from the U.N. because of the Jewish state's refusal to abide by U.N. resolutions demanding it withdraw from Palestinian and other Arab territories it has occupied since 1967.

The Arab group presented each year a resolution to this effect, but failed to get it endorsed by the General Assembly

In 1989, the anti-Israeli motion was rejected by 95 nations, while 37 voted for it. The Soviet Union and East European states, the Plo's former staunch supporters, abstained then for the first time.

-30- 1288
#90304d3070 10/31/1990 ~French/German News Agency
BERLIN (OCT 31) - The head of the German Bundesbank, Karl Otto Poehl, Wednesday criticised the decision taken last weekend by EEC leaders to fix a date for the second phase of European monetary union without giving clear guidelines of what it actually meant.

The German central bank chief said in a speech that he regretted that the 12

European Economic Community heads of state and government had "not made it clear" what the second phase of monetary union should entail.

"The Rome communique, which contains some very positive elements ... is incomprehensible as far as I'm concerned regarding the description of the second phase," he said.

Mr. Poehl also said it was "surprising that the EEC summit had not discussed the deadlock in farm talks which is blocking international trade negotiations in GATT. "It's the most urgent problem," he said.

Britain was the only EEC member to disagree with fixing January 1, 1994 as the date for the introduction of the second phase of European monetary union which would create a European central bank and eventually a single currency for all 12 nations.

In Frankfurt, Sir Leon Brittan, EEC Commission vice-president, said there was "no need for Britain's final decision (on participating in a single currency) to be taken until much closer to 1994".

Mr.Poehl said the Rome communique indicated that the future European central bank would be charged with "reinforcing coordination" of national monetary policies.

"We don't need a new institution to do that," Mr. Poehl said.

The Rome communique also said the European central bank would initially "monitor the development of the European currency unit".

"This sentence makes no sense at all," Mr. Poehl said.

He said the communique "does not form a foundation for a decision with such wide-ranging effects."

-30- 2048

#90304d3080 10/31/1990 ~French/German News Agency

NEW YORK, UNITED NATIONS (OCT. 31) - The Palestine Liberation Organization (PLO) has moved to soften an Arab amendment seeking Israel's expulsion from the United Nations, diplomats said Wednesday.

The General Assembly Wednesday put off for 12 days the annual renewal of the credentials of member countries to give the Arab group time to reformulate their amendment on Israel's accreditation, they said.

For the past eight years, the Arab group has submitted amendments demanding that Israel's credentials be rejected. Each year the effort has been turned back, leaving Israel's membership intact.

But this week the Arab group was putting the finishing touches on an amendment to the accreditation list that -- at the PLO's request -- would remind Israel of its obligation to conform to all Security Council resolutions passed since the creation of the Jewish state, especially those concerning the status of Jerusalem and the occupied territories, said PLO representative Nasser al-Kidwa.

It is unlikely that Israel could be excluded from the General Assembly, since a majority of countries believe that the accreditation process should be free of political considerations.

Nevertheless, in 1974 South Africa was excluded from the assembly during a similar review of credentials because of its policy of apartheid. Since then, Pretoria has not re-submitted its credentials.

The exclusion or the suspension of a member state is decided by the General Assembly on the recommendation of the Security Council, according to articles 5 and 6 of the U.N. charter.

The PLO's apparent gesture of moderation came at a time when the organization has become increasingly isolated.

It has lost some Arab support for its perceived pro-Iraqi stand in the Gulf crisis and its long-sought dialogue with the United States was cut off by Washington early this year over a PLO faction's attack on an Israeli beach.

#90304d3120 10/31/1990 ~French/German News Agency

DUBLIN (OCT. 31) - Ireland's deputy prime minister and defence minister, Brian Lenihan, was dismissed Wednesday by Prime Minister Charles Haughey because of the so-called "Dublingate" political scandal, official sources said.

The scandal centres on allegations that in 1982 Mr. Lenihan put improper pressure on President Patrick Hillery to name Mr. Haughey prime minister of a minority government without calling elections after the collapse of the government in January 1982.

Mr. Lenihan's dismissal came just a few minutes after debate began on a parliamentary no-confidence motion in the Irish parliament, or Dail, which the government narrowly won by 83 to 80.

Mr. Lenihan, a close friend of Mr. Haughey's and a candidate in Ireland's November 7 presidential elections, has repeatedly denied the allegations against him.

-30- 1015
#90304d3150 10/31/1990 ~French/German News Agency
WASHINGTON (OCT. 31) - Economic sanctions against Iraq have brought most development projects there to a standstill, and are crippling industry, particularly the oil sector, a State Department spokesman said Wednesday.

Sanctions are costing Iraq 1.5 billion dollars a month in lost oil revenues, and have led to shortages of some staples, said spokesman Margaret Tutwiler.

''We are beginning to see some signs of real shortages in Iraq,'' said Tutwiler. ''The sanctions have brought most of Iraq's development projects to a virtual halt. While food is still readily available Baghdad is rationing basic commodities such as bread, sugar, and soap. The costs of some basic commodities have jumped 800 percent since the invasion.''

It was still too early to say how quickly sanctions-induced shortages could prompt the Iraqi government to see reason, she added.

''It is important to remember, however, that the aim of these sanctions is to change the behavior of the government of Iraq,'' she said. ''No one can say at this point, how rapidly these shortages will translate into meaningful decisions, particularily since Saddam Hussein has made clear that his army will be the last to be touched by shortages and that he does not care how much the people of Iraq may suffer to protect that army.''

She said oil exports have been curtailed by 97 percent, compared to pre-invasion figures.

The import of industrial goods, raw materials and machines has dropped to less than one-tenth what it was before the crisis, she added, resulting in shortages of lubricants, replacement parts and chemicals vital to industry.

#90304d3180 10/31/1990 ~French/German News Agency
BUCHAREST (OCT 31) - The Romanian senate on Wednesday rejected the government's plan to liberalize prices on Thursday, demanding that the move be put off until January 1.

The Senate's permanent officers later met behind closed doors with Prime Minister Petre Roman.

Romanian radio reported that a meeting between parliamentary deputies and senators was scheduled to be held on Thursday to debate Mr. Roman's October 18 proposal, which called for 75 percent devaluation of the Romanian leu in addition to the freeing of prices.

Some senators complained that the government proposal was not "a true

liberalization of prices, but an increase in prices."

The government has maintained that price increases will affect only wholesale costs and not consumer unit costs for such basic products as electricity, coal food and children's clothing.

Minister of Economic Orientation Eugen Djimarescu has promised that the government will make up the difference until January 1, 1991, through a 14 billion lei (400 million dollar) price support program.

The announcement of plans for price liberalization has caused runs on products ranging from gasoline to food.

Meanwhile, President Ion Iliescu ruled out any danger of a military coup in Romania. He said "discussions" had taken place within the army on the subject of its role in the process of democratization.

In an interview broadcast on Wednesday by Austrian television, he also denied that his National Salvation Front had provoked violence between anti-government protestors and miners in June, but admitted "certain errors."

#90304d3310 10/31/1990 ~French/German News Agency

NICOSIA (OCT. 31) - President Ali Akbar Hashemi Rafsanjani on Wednesday vowed that his country would spare no effort to prevent the outbreak of war in the Gulf, the official Iranian news agency IRNA reported.

"We believe that the Persian Gulf crisis is not in the interest of any country in the region and we have called on Iraq to end its occupation of Kuwait," Mr. Rafsanjani said according to an IRNA dispatch monitored here.

He said Iran would "do all within its power to prevent the outbreak of war" in the region, IRNA added. He did not elaborate.

Iran was among the first countries to denounce Iraq's August 2 invasion of

Kuwait and has repeatedly called on the end of the occupation of the tiny emirate.

Mr. Rafsajani's latest remarks were made during talks in Teheran with the Nigerian minister of state for external affair Ibrahim Zakarya.

#90304d3610 10/31/1990 ~French/German News Agency

BUCHAREST (OCT. 31) - Romanian Prime Minister Petre Roman on Wednesday hailed the start of his government's price liberalization policy as "the most radical measure since the revolution" which overthrew President Nicolae Ceausescu last December.

The new measures, which are to come into force from Thursday, were earlier criticized by members of the country's senate, who have asked that they be postponed until January 1.

Mr. Roman on Wednesday met with senators in committee, to try and overcome their opposition to price liberalization, which some members of parliament had described as nothing more than a disguised increase in prices.

Speaking on television, Mr. Roman said: "Now truth starts in the economic field."

The government has maintained that price increases will affect only wholesale costs and not consumer unit costs for such basic products as electricity, coal food and children's clothing.

Minister of Economic Orientation Eugen Djimarescu has promised that the government will make up the difference until January 1, 1991, through a 14 billion lei (400 million dollar) price support program.

The announcement of plans for price liberalization has caused runs on products ranging from gasoline to food.

Meanwhile, President Ion Iliescu ruled out any danger of a military coup in Romania. He said "discussions" had taken place within the army on the subject of its role in the process of democratization.

In an interview broadcast on Wednesday by Austrian television, he also denied that his National Salvation Front had provoked violence between anti-government protestors and miners in June, but admitted "certain errors."

NEW YORK, UNITED NATIONS (OCT. 31) - U.N. Secretary General Javier Perez de Cuellar recommended to the Security Council Wednesday that the U.N. peace keeping force -- the so-called "blue helmets" -- in Central America be reduced.

The secretary general recommended the land and air contingents of the force be cut from 413 to 158 by mid-December, and suggested extending its mandate to May 1991.

Diplomatic sources said the council likely would approve the recommendation when it meets to consider it before November 7.

Mr. Perez de Cuellar did not mention reducing the group's naval force of four patrol boats and 29 forces in the Gulf of Fonseca along the coasts of Nicaragua, Honduras and El Salvador.

Mr. Perez de Cuellar said now that the blue helmets had successfully completed overseeing demobilization of the Nicaraguan contra rebels, they would return to their original mission to verify the end of aid to irregular forces and insurgents in the region.

However, he said, the group's capacity is "very limited" because of clandestine operations which are difficult to detect partly due to the area's harsh geography and climate.

KATHMANDU (OCT. 31) - A 52-year-old Greek woman has conquered 6,920-metre (22,700-foot) Mt. Tukuche without the aid of oxygen, the Nepalese Tourism Ministry said Wednesday.

Eleni Stamatakis, described as a national service manager from Athens, reached the summit of Mt. Tukuche on October 24 via the northwest ridge along with two Nepalese mountain guides.

Mrs. Stamatakis was now on her way back home, the ministry said.

The ministry also said an Italian expedition has climbed Mt. Ama Dablam successfully.

Kurt Fritz, a 30-year-old mountain guide from Sludarno, reached the 6,812-metre (22,346-foot) summit on October 26 without the aid of oxygen, the ministry said.

Two other members of the expedition, Ronald Lesso, a 29-year-old driver from Staben, and Tarernini Heinrieh, 31, a mountain guide from Schlender, scaled the peak on October 27.

WASHINGTON (OCT. 31) - The State Department Wednesday welcomed the agreement by Lebanese militias to pull out of Beirut, seeing it as a first step towards restablishing governmental authority in all of Lebanon.

"We welcome the news that militias have agreed to leave Beirut," spokeswoman Margaret Tutwiler said.

"We believe that this is a good first step in reestablishing the Lebanese government's authority over all of Lebanon," she added.

"We continue to support the Lebanese government's efforts to implement the Taif Agreement and to achieve the dissolution of all armed militias, the withdrawl of all foreign forces and the full independence and sovereignty of Lebanon," Miss Tutwiler went on to say.

All militias operating in Lebanon agreed Tuesday to pull out of Beirut, complying with the Taif Agreement, signed last year in Saudi Arabia by Lebanese members of Parliament.

The agreement called for a return to constitutional rule in Lebanon in benefit of the Muslim majority, and an end to the country's 15-year civil war, during which it was occupied by Syrian, Israeli, Iranian and Lybian forces.

JOHANNESBURG (OCT 31) - The United Nations High Commissioner for Refugees (UNHCR) should become involved in the repatriation of some 20,000 South African refugees, the National Co-ordinating Committee (NCC) said here Wednesday.

The body, which is reponsible for the repatriation of all South African exiles said in a statement issued here that although it noted the political difficulties because of the U.N. stand on sanctions, the UNHCR could be of "immense benefit" to the repatriation programme.

The NCC committed itself to ongoing dialogue with the UNHCR in the hope that it will remove all the obstacles to UNHCR involvement in the repatriation process without "violating existing international and U.N. sanctions" against South Africa, the statement added.

Meetings had already been held with the UNHCR by the NCC, the South African government and certain South African "liberation movements", the statement said.

The NCC has been set up by the black nationalist African National Congress (ANC) to organise the repatriation of exiles.

The ANC estimates that the repatriation programme would cost in the region of 350 million rands (137 million dollars).

BOGOTA (OCT 31) - Colombian President Cesar Gaviria Wednesday rejected negotiations with members of the Medellin cartel who are holding a group of kidnapped journalists, including a prominent newspaper editor and the daughter of a former president.

Mr. Gaviria made the comment in a speech at the headquarters of the secret police -- the Department of Administrative Security (DAS) -- which was partly destroyed in December by a bomb set off by the cartel.

It followed an offer by a group of notables, including two ex-presidents, a leftist politician and a Roman Catholic cardinal, to engage in a "humanitarian" mediation to win the release of the journalists.

Referring to that effort, Mr. Gaviria said it was "not an attempt to seek a dialogue that is impossible."

He reiterated an earlier promise to guarantee the rights of drug traffickers who surrender to the authorities but said that those involved in terrorist actions, "we will treat with all the severity of the law."

"The Extraditables," as the Medellin cartel refers to itself in public statements, said Tuesday they were holding the journalists as a guarantee against police reprisals against their relatives.

But authorities here believe the journalists were kidnapped to draw the

government into negotiations on issues such as its policy of extraditing drug traffickers wanted by the United States.

Six journalists -- including Diana Turbay, daughter of former President Julio Cesar Turbay -- were taken hostage 61 days ago after setting out on what they thought was to be a trip to interview a Colombian rebel leader.

Two other people, including the managing editor of the newspaper El Tiempo, were kidnapped September 19 and also were believed to be in the group of hostages.

PARIS, (NOV 1) - French Agriculture Minister Louis Mermaz, whose country last week was among those that held up an EEC agreement on farm subsidies policy for the General Agreement on Tariffs and Trade, said here Wednesday that he was not sure the crisis would be resolved at new talks Monday.

Mr. Mermaz said in a television interview that if no new proposition was made by the European Commission, Monday's meeting in Brussels might not even take place.

The European Economic Community has been trying to reach agreement on a package of cuts in farm subsidies to propose to GATT.

The issue of EEC farm support is a major irritant in trade relations with the United States and other major exporting countries.

The EEC deadlock has been threatening to capsize the entire current round of GATT talks, known as the Uruguay Round.

The Commission, the EEC's executive arm, had proposed a global round of cuts equivalent to 30 per cent of total farm subsidies to be phased in over 10 years, but countries with large farm sectors, in particular France and Germany, held out for lower levels.

Other countries, notably Britain, wanted deeper cuts.

On the TV programme, Mr. Mermaz said it was "better to take one's time than to capitulate in the middle of the battle."

However he added: "if we miss the GATT boat, it will be a disaster."

AUCKLAND, NEW ZEALAND (NOV. 1) - Troubled Air New Zealand said here Thursday

it was firing more staff and would raise its fares by 15 per cent.

The new job losses follow 600 firings earlier this year when the airline quit its Fokker Friendship domestic flights.

Air New Zealand has not said how many staff would be involved, but chief executive Jim Scott said several hundred more staff would go.

Airline chairman Bob Matthews said the company would also apply for fare increases of up to 15 percent on international and domestic flights, to match fuel price rises.

Air New Zealand has been struggling for the last two years since Australia's Ansett Airlines entered the domestic market here. The company also faces tough competition on its international routes.

CAPE TOWN (NOV. 1) - Two legislative bills aimed at removing race and sex discrimination in mines and mining rights from the lawbooks were published here Wednesday, state-run radio reported.

Discrimination on the grounds of race in the acquisition of prospecting and mining rights will be removed by the Mining Rights Amendment Bill, which will also strike down restrictions on the residence rights of certain race groups on proclaimed mining land.

Sex discrimination will be removed in terms of the Mines and Works Amendment Bill, in terms of which women would be allowed to work underground in accordance with accepted International Labour Organisation (ILO) agreements.

Women are also to be allowed to work at night on mines in terms of the new bill, the radio added.

#90304d8280 10/31/1990 ~French/German News Agency

AUCKLAND, NEW ZEALAND (OCT. 31) - Wilson and Horton Ltd, publishers of the top-selling Herald newspaper, said Wednesday they had no information to "reasonably explain" a drop in their share price.

The company, New Zealand's second-biggest newspaper and magazine publisher, has suffered a fall in its share prices for the past week in the wake of speculation it was to buy the loss-making New Zealand Listener magazine.

On Wednesday, the shares were trading at 580 New Zealand cents (356 U.S.).

The New Zealand Stock Exchange asked for an explanation, and in reply company directors said intensive discussions were under way over the magazine.

"As far as the company is concerned, there are no matters that could or should affect the fluctuation in share price," the directors said.

Wilson and Horton last week reported a 10.8 per cent fall in operating profit to 23.4 million dollars (14.4 million U.S.) for the September half-year.

But directors said that had been the third largest proft in company history.

"It has a very strong balance sheet with 65 per cent shareholders' equity ratio, has a strong cash flow and is acknowledged by the market to be a conservatively geared and managed company," they said.

MANILA (OCT. 31) - Scientists have successfully bred the Philippines' vanishing national animal, the tamaraw buffalo, for the first time in captivity, press reports said here Wednesday.

The male calf, christened Jun Jun, was born on October 18 at a government breeding station in the tamaraw's last refuge, Mindoro island southwest of Manila, newspapers quoted project officials as saying.

The tamaraw is smaller than the carabao or water buffalo found in Southeast Asian rice paddies. It is an official national symbol of the Philippines.

Only 200 are known to exist, from 10,000 at the turn of the century, and they are threatened by poachers, logging and development in Mindoro, which has become a tourist spot because of its beaches and rugged terrain.

Scientists want a "fallback population" of tamaraws in another part of the country to guard against an epidemic that could wipe out the animals in Mindoro, the Daily Globe newspaper said.

#90304d8450 10/31/1990 ~French/German News Agency

SANUR BEACH, INDONESIA (OCT. 31) - The Association of Southeast Asian Nations (ASEAN) moves one step closer to becoming a regional common market by adopting a new import tariff measure to boost trade among its six members, officials and analysts said Wednesday.

ASEAN economic ministers at a meeting here endorsed Tuesday an Indonesian proposal for enforcing common tariffs, initially on a selected number of manufactured goods, in a bid to bolster still meagre intra-ASEAN trade.

The scheme, which Philippine Secretary of Trade and Industry Jose Conception described as a "radical approach," would complement an existing ASEAN program granting preferential tariffs for goods traded among member countries.

"We are moving in the right step towards liberalising trade as well as probably even investment in the region," Mr. Conception said Tuesday after the two-day meeting.

ASEAN, formed in 1967 to promote economic cooperation in non-communist Southeast Asia, groups Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand.

Manila has been the most vocal in calling for the creation of a common market while Indonesia, until recently, had been reluctant fearing it would see its huge market of 184 million people flooded by goods from ASEAN countries.

Attitudes have changed as ASEAN members accept the need for closer economic cooperation in the face of the European Community's single market in 1992 and the United States' free trade pact with Canada.

In Indonesia, a wave of deregulation measures since the mid-1980s, has also led staunch supporters of trade protection to change their minds.

Industry Minister Hartarto, once nicknamed "Mr. No" for his persistent refusals to open Indonesia's manufacturing sector to foreign competition, is now "Mr. Go" in ASEAN circles, Indonesian sources said.

Under the Preferential Tariff Arrangements (PTA), each member grants between 25 and 50 per cent tariff discounts on goods imported from other ASEAN countries. More than 15,000 items currently come under the scheme.

The program, however, has not been that effective in boosting ASEAN trade given the member states different tariff structures, officials said, noting that some governments also raise their tariffs as soon as certain goods were imported under the PTA, rendering the discount meaningless.

ASEAN ministers Tuesday agreed to start increasing the preference margins on some items to 75 per cent as well as calling for every member country to charge the same preferred tariff rates.

Intra-ASEAN trade has also been limited in the past because member countries produce similar goods, especially primary commodities, which more often than not put them in direct competition.

But with industrialisation making rapid progress in the region, regional trade could be now bolstered with a greater flow of manufactured goods, officials said.

Mr. Hartarto said the new scheme of common effective tariffs was intended for manufactured products, such as cement and pulp, and not for agricultural goods.

The scheme would facilitate the "free flow of goods. It is not quite yet free trade," one official said.

ASEAN ministers, however, have commissioned their senior officials to undertake initial studies on the possibility of promoting free trade in the region as part of the task of drafting a new ASEAN economic treaty.

"It will be a free trade based on ASEAN concepts, and not modelled on others," said one official.

The study was expected to be completed before ASEAN leaders meet for their fourth summit planned in Singapore for the end of 1991, at which economic cooperation will be the main focus, officials said.

#90304d8570 10/31/1990 ~French/German News Agency

TOKYO (OCT. 31) - The March 1993 target date for inaugurating Kansai International Airport, being built on an artificial island in Osaka Bay, appears less and less likely as problems plague the ambitious project.

The Transport Ministry has for the first time hinted of a delay on the airport some 400 kilometers (250 miles) southwest of here, saying the date was an objective and not "an international promise."

The new airport is needed to reduce congestion at Toyko's international airport at Narita, which is operating at its maximum capacity of 360 air movements a day.

Engineers involved in the project have come up against a serious problem in recent months: The man-made island four kilometers (2-12 miles) off southern Osaka is sinking under its own weight at a rate faster than expected.

To make the 511-hectare (1,278-acre) island at a point where the sea is 18 meters (60 feet) deep, engineers had said 166 million cubic meters (5.5 billion cubic feet) of earth would be needed.

With the settling problem, another 22 million cubic meters (733 million cubic feet) and more time will be required.

At the current rate, the ground will sink 8.5 meters (28 feet) before the airport's opening instead of the seven meters (23 feet) projected by the contractor, Kansai International Airport Co.

"We were not confident ourselves when we made our first prediction" of seven to 12 meters (23 to 40 feet), said Akio Nakase, a professor at the Tokyo Institute of Technology. "The airport company took the lower figure."

Construction on the main building, the passenger terminal designed by Italian architect Renzo Piano, is three months behind schedule after the finance ministry asked that it be reduced in size and the United States called for international bidding on the project.

Twenty-seven months are left in the original schedule to complete the gigantic 311,000 square meter (3.5 million square foot) terminal. The Narita terminal, a third of the size, took 34 months to build.

In a bid to finish on time, the contractor took a series of urgent measures in October:

- Night work was begun on essential facilities.

- Use of an nearly finished access bridge, instead of ferry boats, to take workers more quickly to the site. This four-kilometer (2-12-mile) rail and road links the airport to the road and rail network.

- Prefabricating construction material away from the site.

When it finally opens, Kansai airport will operate around the clock, have a 3,500-meter (11,550-foot) runway and be able to handle 450 air movements and 30 million passengers a day, twice as many as Narita.

The airport island will later be enlarged to 1,200 hectares (3,000 acres) and have two 4,000-meter (13,200-foot) runways and a 3,400-meter (11,220-foot) auxiliary runway.

The airport project is of much concern to business in the Kansai region, which includes the cities of Osaka, Kyoto and Kobe with a population of 23 million.

Some 40 Japanese and foreign airlines are keen to serve Kansai, which will be one hour by air and three hours by high-speed train from Tokyo.

The airport will have 30 to 44 stores and 24-hour restaurants serving 156,000 people per day.

Kansai businessmen have already lauched a campaign to host the summit of the Group of Seven industrialized nations in 1993 in the Osaka area.

SEOUL (OCT. 31) - South Korea's electronics maker Goldstar Company has

concluded deals to export a total of 769 million dollars worth of plant facilities manufacturing color televisions, washing machines and electronic ovens to the Soviet Union, the company announced here Wednesday.

The announcement said that a color television plant worth 250 million dollars and capable of producing 1.5 million sets a year is to be exported over three years to the Soviet Kirghiz Republic starting from next month.

The Soviet Electronics Ministry is to buy a plant producing video-cassette recorders (VCR) at a cost of 130 million dollars and another making electronic ovens worth 140 million dollars, the announcement added.

The Soviet Defense Ministry will also buy an electronics oven factory worth 55 million dollars, while the Soviet Radio Ministry agreed to buy a VCR plant worth 44 million dollars.

The company also said a 150 million dollar joint venture project with the Soviet Izhorsky Zavod Co. to build a washing machine plant in Leningrad capable of producing 200,000 units a year will have its production capacity doubled to 400,000 units a year.

BEIJING (OCT. 31) - The fall edition of the Guangzhou trade fair has ended with Middle East and African oil-exporting nations buying fewer goods because of the Gulf crisis.

The showcase for Chinese exports resulted in contracts worth 5.7 billion dollars, a slightly higher turnover than at the spring fair, the official China Daily and the New China News Agency said.

Some 42,000 buyers attended the fair, more than half of them from Hong Kong, China's biggest trading partner. They ordered 2.48 billion dollars' worth of products ranging from textiles to traditional Chinese medicines.

But at the end of the 15-day fair on Tuesday, the big disappointment was a 50 percent drop in the value of orders placed by Middle East and African oil-exporting states.

Organizers blamed the slump, to 49.39 million dollars from more than 100 million dollars at the spring fair in April, on lower attendance of businessmen from those countries as a result of the Gulf crisis.

Soviet and East European buyers, making their first appearance at the fair since it was first held in 1957, made only a modest impact, signing just five million dollars in contracts.

Organizers said the 142 buyers had been invited to prepare for a planned switch from barter to cash trade with the Soviet Union and Eastern Europe.

Textiles, China's biggest export money-maker, was also the most popular commodity at the fair, with 1.1 billion dollars in contracts signed.

Buyers from the European Economic Community (EEC) contracted to buy goods worth 715.85 million dollars, followed by the United States with 501.73 million dollars and Japan with 457.78 million dollars.

#90304d8900 10/31/1990 ~French/German News Agency

LONDON (OCT. 31) - In an unprecedented decision, the Nottinghamshire police force has been found guilty of racial discrimination against an Indian officer who was seeking a promotion.

The case marked the first time that a British police force had been convicted of discrimination against one of its own members.

Surinder Singh, 33, said that he had been subjected to racist comments in 1987 when he attempted to obtain a promotion to the post of detective.

After 82 days of hearings, an industrial tribunal ruled Tuesday that Mr. Singh had not been treated on an equal footing with other colleagues who were seeking the same promotion.

It also decided that two other Asian officers had been treated unfairly due to their race.

"Obviously, I am very pleased about the result," said Mr. Singh, adding that "Hopefully it will enlighten the police force and make it better for the future."

Nottinghamshire Chief Constable Dan Crompton said that "I am determined to do everything possible to ensure that no such discrimination ever occurs in the future."

He noted that the Nottinghamshire police had the fourth highest number of racial minorities in its ranks among British police forces.

#90304d8930 10/31/1990 ~French/German News Agency

TOKYO (OCT. 31) - Japan's two biggest shipbuilders, Mitsubishi Heavy Industries Ltd. and Ishikawajima-Harima Heavy Industries Co. Ltd., announced Wednesday modest increases in earnings for the six months to September,

Mitsubishi, the country's biggest shipbuilder and also its largest manufacturer of power plants, aircraft and arms, said its net profit jumped 13.6 per cent from a year earlier to 35.5 billion yen (257 million dollars). Sales inched up 1.9 per cent to 1,030 billion yen (7.5 billion dollars).

Ishikawajima-Harima, ranked second in shipbuilding but first in the production of jet engines, said its net profit grew 15.3 per cent to 7.3 billion yen (53 million dollars) in the same period. Sales climbed 6.6 per cent to 303 billion yen (2.2 billion dollars).

Mitsubishi's sales advanced in most sectors except shipbuilding and steel structures, where sales dropped 6.1 per cent to 126 billion yen (913 million dollars). Sales of power systems also fell, by 8.5 per cent to 300 billion yen (2.2 billion dollars), the company said.

But sales of machinery rose 8.6 per cent to 271 billion yen (two billion dollars) while sales of aircraft and "special vehicles" such as tanks grew 9.4 per cent to 168 billion yen (1.2 billion dollars).

Sales of airconditioners, refrigerators and other machinery climbed 13 per cent to 166 billion yen (1.2 billion dollars). Exports surged 27.9 per cent to 253 billion yen (1.8 billion dollars) in the same period.

The company forecast a net profit of 83 billion yen (601 million dollars) in the year to March on sales of 2,250 billion yen (16.3 billion dollars)

Ishikawajima-Harima's sales expanded in all sectors except steel structures and transportation equipment, where sales plunged 32.4 per cent to 56 billion yen (406 million dollars). Exports also fell sharply, by 54.4 per cent to 37 billion yen (268 million dolars)

But sales of plants soared 61.7 per cent to 69 billion yen (500 million dollars) while sales of aircraft engines and space-related equipment rose six per cent to 56 billion yen (406 million dollars). Sales of ships and ocean structures rose 4.2 per cent to 42 billion yen (304 million dollars).

Machinery sales jumped 57.5 per cent to 38 billion yen (275 million dolars) while sales of other machinery inched up 1.1 per cent to 40 billion yen (290 million dollars).

The company forecast its net profit would reach 15 billion yen (109 million dollars) in the full year on sales of 720 billion yen (5.2 billion dollars).

#90304d8940 10/31/1990 ~French/German News Agency

TOKYO (OCT. 31) - Japan's Daishowa Paper Mfg. Co. Ltd. said Wednesday its net profit plunged 46 percent from a year earlier to 2.2 billion yen (16 million

dollars) in the six months to September, citing lower paper prices.

The company, Japan's second-biggest paper manufacturer with activities in Australia and Canada, said sales rose 2.4 percent to 173.4 billion yen (1.3 billion dollars) in the same period.

Daishowa said the plunge in earnings reflected lower prices for general paper which offset a small rise in paperboard prices. Other factors included increased energy costs and higher interest rates, it said.

The company expects a net profit of seven billion yen (51 million dollars) in the year to March on sales of 358 billion yen (2.6 billion dollars).

#90304d9070 10/31/1990 ~French/German News Agency

BEIRUT (OCT. 31) - Warring Lebanese Shiite factions backed by Syria and Iran have approved a new cease-fire aimed at ending their bloody conflict that has raged here and in southern Lebanon since April 1988.

A joint communique Tuesday from the pro-Syrian Amal movement and the Iranian-backed Hezbollah said the truce came into effect at midnight Tuesday (22H00 GMT).

The statement said the two sides would "arrange an exchange of prisoners ahead of an overall and definitive settlement" to their struggle for supremacy among Lebanese Shiite Moslems, the country's largest single community.

Representatives of the factions were to meet Wednesday to discuss reconstruction of the Iqlim al-Touffah region of southern Lebanon, scene of fierce inter-Shiite combat since last December, and the evacuation of the wounded.

The new accord was worked out during a meeting Tuesday morning of Amal and Hezbollah representatives at Syrian military intelligence headquarters in Anjar, eastern Lebanon.

Syria's military intelligence chief in Lebanon, General Ghazi Kanaan, and the Iranian ambassador to Syria, Hassan Akhtari, also took part in the talks.

There have been several Amal-Hezbollah cease-fire accords in the past, the most far-reaching of which was approved in January 1989, but none has so far held.

#90304d9100 10/31/1990 ~French/German News Agency

SEOUL (OCT. 31) - South Korea's two airlines were in a dogfight Wednesday

over government plans to add more international routes to the smaller carrier, with the union at the larger Korean Air threatening a crippling strike.

Union leaders at Korean Air (KAL) said they would go on strike next month if the government did not rescind plans to add cities in Southeast Asia and the United States to the fledgling Asiana Airlines.

KAL, which during most of its 25 years enjoyed a monopoly in the domestic air service, has never taken well to pushy Asiana's plans to expand.

The national flag carrier is private and is the 10th largest in the world with a fleet of 70 aircraft, compared to Asiana's 14 planes, the largest of which are Boeing 767-300s.

"They are so greedy," said an official at two-year-old Asiana, hinting that KAL itself was stirring up labor trouble to force the government to take back the flights.

The row began last week when Transportation Minister Kim Chang-Shik announced that Asiana could make three weekly flights from December to Southeast Asian cities where KAL had more than seven flights a week, with an excess of 70 per cent passenger load per flight and 150,000 passengers a year.

Only Bangkok, Taipei, Hong Kong and Singapore fit the category, leading the Asiana official to say that the new plans were in fact "protecting" KAL.

Asiana would be able to add other cities in the United States and Japan from next year on, Mr. Kim said. Currently, Asiana's only foreign destinations are the Japanese cities of Tokyo, Fukuoka, Nagoya and Sendai.

The Asiana official said the company would be able to handle the new routes with the 14 new airplanes, including four jumbos, that it ordered from Boeing and is due to receive before the end of 1992.

Asiana would also talk to Airbus this week about a possible future deal, he said.

Mr. Kim said the flight expansions would help the development of South Korea's passenger service industry.

But KAL and its employees have cried foul. They point out that they had only received four additional flights and charged the government with showing favoritism.

The president of the KAL trade union, Sok Hwa-Kyung, threatened to ground many of KAL's 70 planes with a massive strike on November 19 if the government did not scrap its plan.

The company, though it says it was also enraged by the government's decision, is trying to calm down the union, said a KAL official.

"The management will do its best to prevent a strike from being carried out because it will damage innocent passengers," he said.

The spokesman denied that management had encouraged workers to threaten a strike as a way to put pressure on the government.

A strike, which would be the first in KAL history, would probably be illegal, as the government has put in place tough regulations against labor action in sectors such as transporation and telecommunications.

"They are blocked from striking. In any case that strike should not happen," the KAL official said.

He however called the government's decision "a great favor to Asiana" and said that far from helping the industry, adding flights to Asiana might run one of them into the ground.

He recalled that British Caledonian had gone bust because of competition for the same cities from other British carriers. British Airways eventually absorbed British Caledonian last year.

The KAL official said South Korea's two airlines should instead follow the example of Air France and Air-Inter. The two French airlines fly complementary routes, with the larger Air France handling longer routes and Air-Inter picking up domestic routes and the occasional flight to Africa.

Manila (OCT. 31) - Moslem separatists shot dead eight people, including three boys, whom they had held hostage, in an unprecedented execution Wednesday in Marawi city in the southern Philippine island of Mindanao, military authorities said.

The victims had been hogtied and shot in the head at close range, apparently in retaliation for the rescue operation the military launched to free them from the secessionist Moro National Liberation Front (Mnlf), officials said.

Mnlf rebels seized the victims on Tuesday in Marawi city to dramatise their demand for the scrapping of a government hydro-electric plant project they claimed would destroy their farms.

The kidnapping precipitated a gunfight with an army patrol, resulting in the killing of one rebel and the wounding of two others, officials said.

The rebels had earlier threatened to kill their hostages if the army did not stop its operations to rescue the victims - five employees of the government power firm and three boys aged 12 to 15.

The military said it was the first time in the history of kidnapping in Mindanao that the victims were executed. All previous kidnap victims were released unharmed by Moslem rebels.

The Mnlf has been fighting for self-rule for the island of Mindanao, the country's second largest, for the past two decades.

Manila (OCT. 31) - The Soviet national airline Aeroflot wants to gain landing rights in the Philippines in order to establish a weekly Moscow-Manila flight, Soviet diplomats disclosed here Wednesday.

They said that negotiations by Moscow and Manila on the question would start soon in the Philippines' capital.

To date, Aeroflot has gained landing rights in four other Southeast Asian nations - Indonesia, Malaysia, Thailand and Singapore, parallel to the expansion of Soviet commercial ties in the region.

None of the airlines of the region have yet to establish air links to Moscow, industry officials noted.

KATHMANDU (OCT. 31) - Four members of an Italian climbing team have scaled the 6,812-meter Mount Amadablam, the Nepalese Tourism Ministry announceded here Wednesday.

The ministry said Kurt Pritz, 30-year-old mountain guide from Sludarno, and Nepalese high altitude guide Tham Bahadur Magar reached the summit on October 25.

The ministry said two other climbers, expedition leader Ronald Lesso, 29-year-old car driver from Staben, and Tarernini Helnrieh, 31-year-old mountain guide from Schlender, were also successful.

Similarly, Mrs. Eleni Stamatakis, a 52-year-old national service manager from Athens, had climbed to the top of the 6,920-meter Mount Tikuche in western Nepal.

The ministry said she climbed the peak along with Dawa Phuri Sherpa, 28, and

Pemba Tshiring Sherpa, 33, both Nepalese high altitude guides.

Meanwhile, a seven-member Austrian team to the 7,205-meter Langtang Ri peak had called off its attempt on October 21 due to ''very strong winds''.

The Austrian team was led by Peter Konzert, a 48-year-old businessman from Innsbruck.

FRANKFURT (OCT. 31) - The German central Bundesbank on Wednesday made available 25 billion Deutschemarks (about 16.6 billion dollars) to the banking system through two repurchase arrangements, the bank said.

The bank injected 16.4 billion marks for 33 days at rates ranging from eight per cent to 8.15 percent.

Banks had sought 43.2 billion marks.

The bank made available 8.6 billion marks for 63 days at rates of 8.25 per cent to 8.45 percent.

Banks had sought 32.1 billion marks.

On Friday two arrangements totalling 27.7 billion marks fall due.

Last week the Bundesbank made available 13.1 billion marks through a 29-day arrangement at rates from eight percent to 8.15 percent.

Paris (OCT. 31) - Britain is the biggest advertising market in Europe, ahead of France and Germany, the French advertising industry association Aacc said in a study here Wednesday.

The British advertising market total some 13.9 billion dollars annually, comfortably ahead of France and Germany, each at about 11.2 billion dollars, the Aacc study said.

Western Europe, with its 410 million consumers, combines for a total advertising volume of some 61 billion dollars, far behind the figures in the U.S., where 94 billion dollars is spent annually on advertising in a market of 246 million consumers, said the Aacc.

Riyadh (OCT. 31) - Iraqis have begun fasting to save food and cope with the steep rise in prices, according to a report published in the Saudi capital Wednesday.

The Saudi daily Asharq Al-Awsat, based in London and printed in Riyadh and other Saudi cities, quoted a Kuwaiti student who, it said, had escaped from Baghdad University recently, as saying that Iraqis are fasting to save food and money while university professors are working as taxi drivers to earn their living.

Mufreh Saud al Namous, a chemistry student at Baghdad University, was quoted as saying that because of the scarcity of basic foodstuffs and the astronomical rise in prices as a consequence of the world embargo on Iraq, the Iraqi people are fasting to meet living requirements.

''It is familiar to see students and professors at the (Baghdad) University refraining from taking lunch at the university restaurant in view of the high prices,'' Namous said in an interview with the paper.

Besides publishing his photo, the paper carried a picture of Iraqis standing in a long queue at bakeries in Baghdad. Iraq is reeling under the United Nations-sanctioned economic blockade imposed in response to Baghdad's invasion of Kuwait on August 2.

Namous was quoted as saying that, as a result of the worsening economic conditions in Baghdad, it is not unusual to see some university professors using their private cars as taxis to earn their living.

In sharp contrast, the Kuwaiti student told the paper that the sons of Iraqi President Saddam Hussein, Oudei and Kassi, as well as the son of Iraqi Foreign Minister Tariq Aziz were seen riding the most luxurious vehicles, such as Mercedes, Porsche and Ferrari.

He was quoted as saying that the import of such cars to Iraq is banned except for members of the ruling Baath Party Command and their sons.

AMMAN (OCT. 31) - South Korean Vice Minister of Foreign Affairs Yoo Chong Ha arrived here from Cairo Wednesday for talks with Jordanian officials on the situation in the Gulf and bilateral cooperation, a Korean diplomat said.

He added that Mr. Yoo, who is heading a nine-member delegation representing the trade and industry ministries, would also discuss South Korean assistance to cash-strapped Jordan, now facing severe difficulties because of the Gulf crisis.

"Korea has already committed itself to helping the countries directly hit by the repercussions of the ongoing crisis," the diplomat told AFP.

The Jordanian finance ministry recently said the the government was seeking 1.5 billion dollars in emergency aid to help offset expected losses of up to 2.2 billion dollars over the next 10 months.

The Jordanian economy has been heavily dependent on trade with Iraq, currently the target of sweeping United Nations sanctions because of its August 2 invasion of Kuwait.

According to official statistics Jordanian exports to South Korea in 1989 were valued at 15 million dollars, while imports were estimated at 23 million dollars.

The visiting delegation was due to leave for Damascus on Monday.

TOKYO (OCT. 31) - Japan's housing starts in September rose 5.2 per cent from a year earlier to 152,093 units, the Japanese Construction Ministry said Wednesday.

Construction of houses for sale soared 38.3 per cent to 35,249 units in the month despite earlier speculation of a downward trend because of high intrest rates, ministry officials said.

Newly built condominiums also jumped 65.3 per cent to a record 23,251 units during the month.

Ministry officials said the housing industry tends to build more houses before possible tax reforms are imposed.

JERUSALEM (OCT. 31) - The Israeli army has put its new tank, the Merkava III, into service, the Jerusalem Post newspaper reported Wednesday.

The first Merkavas, which Western military experts say are among the most modern tanks in the world, will be deployed in the Golan Heights, captured from Syria during the 1967 Six-Day War.

The Merkava III is armed with a 120-millimeter cannon developed in Israel and uses domestically manufactured ammunition. It is said to have greater range, precision and penetrating power than comparable tanks in the armies of

Israel's adversaries.

Israel's approximately 3,800 tanks currently face 4,100 tanks on the other side of the Syrian border.

#90304d9980 10/31/1990 ~French/German News Agency

LONDON (OCT. 31) - The Marks and Spencer store chain on Wednesday reported an increase of 10.3 percent in pre-tax half-time earnings to 230.3 million pounds (448 million dollars) from 208.7 million pounds in the same period of last year.

Sales totalled 2.65 billion pounds compared with 2.5 billion pounds.

This was in line with forecasts by analysts who had expected profits of between 225 million pounds and 235 million.

An interim dividend of two pence was declared compared with 1.85 pence last time. Earnings per share rose to 5.4 pence from five pence.

Marks and Spencer shares rose four pence to 233 pence.

The company is regarded as a barometer of leading stores, and has a reputation for performing strongly whatever the circumstances. It has reported an increase at a time when many major British retailing groups are suffering severely from high interest rates.

BUENOS AIRES (OCT. 31) EFE - Two Argentine provincial governors have resigned amid growing popular discontent and protests by public workers who have not been paid for three months.

Nestor Perl and Ricardo De Aparici, governors of Chubut and Jujuy provinces respectively, presented their resignations Tuesday to the provincial legislatures.

Perl resigned shortly after the provincial Chamber of Deputies voted Tuesday to start a political trial against him for negligence and misappropriation of public funds.

In recent weeks, three mass protests have been held against Perl's administration of Chubut, a province in Patagonia, 1,900 km south of Buenos Aires.

The marches were organized by a committee representing public workers,

retirees and small businesses.

Interior Minister Julio Mera Figueroa said that in Jujuy province, 1400 km northwest of Buenos Aires, "an uprising on the part of some sectors of the population" had begun.

On two occasions last week, public workers in Jujuy surrounded the governor's headquarters in the provincial capital. Police thwarted the workers' attempts to seize the building.

The Jujuy legislature had voted to start a political trial against De Aparici, but the trial may now be suspended as a result of his resignation, officials said.

In both provinces, public employees have not received wages since August.

CAIRO (OCT. 31) - The Arab League officially returned its headquarters to Cairo on Wednesday, 11 years after Egypt was expelled from the organization and operations switched to Tunis.

Secretary General Asaad al-Asaad was in Cairo for the move, which was approved at an Arab League ministerial meeting in March.

Egypt was readmitted to the 21-member league in May 1989, 10 years after its explusion for becoming the first Arab nation to establish diplomatic ties with Israel.

Although members voted in favor of Egypt's readmission and the retuome under renewed Arab fire for its strong stand against Iraq for its invasion of Kuwait in August.

The Arab League has split over the crisis, with about half its members condemning the invasion and the remainder abstaining or voting against such resolutions.

Arab diplomats had said Tuesday that the return of operations to Cairo could be delayed until the end of the year as refurbishing of the headquarters had not been completed.

#90304e0021 10/31/1990 ~Latin America New Agency

AMMAN (OCT. 31) EFE - Jordan's King Hussein left the capital Wednesday for Oman to discuss the Gulf crisis with Sultan Qaboos, Bin Said, Radio Amman reported.

It is to be the first visit by Hussein to a Gulf nation other than Iraq since the outbreak of the crisis following Baghdad's invasion of Kuwait on August 2.

Hussein is also to discuss Gulf events with French President Francois Mitterrand during the monarch's November 5 visit to France.

The king has made several visits abroad since the crisis erupted, in a bid to find a peaceful resolution.

Jordan has been particularly hard hit by United Nations-ordered embargo of neighboring Iraq following the invasion.

#90304e0022 10/31/1990 ~Latin America New Agency

SEOUL (OCT. 31) EFE - Police, hurling tear gas cannisters, stormed university campuses Wednesday to prevent the screening of banned North Korean movies which the authorities have said could incite radical student revolts.

The tear gas spread a thick white cloud of smoke over the campus of the Seoul-based University of Korea as some 300 students resisted the 1,000-strong police force with stones and petrol bombs.

The police were making their fourth attempt in two months to stop viewings of the communist-produced movies.

At the University of Kyunghee on the outskirts of the capital, students built barricades with tables and chairs to prevent police from forcing their way in while the movies were being shown.

Similar incidents broke out at universities in Kwangju in the south.

The prime ministers of communist North and U.S.-backed South Korea held

reconciliation talks two weeks ago, but the meetings produced no concrete results.

#90304e0032 10/31/1990 ~Latin America New Agency

COPENHAGEN (OCT. 31) - The Danish government Wednesday turned down an opposition request to mediate in the Gulf crisis and said it would not play along with Iraq by sending a delegation to Baghdad to seek the release of the 31 Danish hostages.

Former social democrat prime minister Anker Joergensen's offer to act as mediator between Denmark and Iraqi President Saddam Hussein was rejected by Foreign Minister Uffe Ellemann-Jensen, who said that playing Saddam's game would destroy international pressure on Iraq.

Denmark, a member of the European Community, Sunday agreed to an EC declaration in Rome that individual member states would not negotiate with Baghdad for the release of hostages.

Since Iraq's August 2 invasion of Kuwait, hundreds of foreigners have been held by Baghdad, many at strategic military installations, to deter a possible attack from multinational forces amassed in Saudi Arabia.

#90304f1849 10/31/1990 ~United Press International

CHICAGO (OCT. 31) UPI - A late sell-off pressured the grain market to session lows Wednesday on the Chicago Board of Trade, but soybeans recovered their losses during the final minutes of trading.

Commercial buying sparked the rally in soybeans after prices reached their lowest levels in about three months. November beans fell to a low of $5.89 and closed at $5.92, up 1 1/2 cents on the day.

Gains in soybeans were limited by the posting of delivery notices for more than 24 million bushels of November beans.

Grain futures were mixed but mostly lower at the final bell. Commercials and commission houses dominated the selling, but losses were tempered by an increase in basis levels.

Morocco was in the market for 150,000 tons of wheat, Japan was said to have bought 75,000 tons of wheat and South Korea reportedly bought a small amount of corn.

Light country movement and the winding down of harvest activity supported corn and soybean prices, along with hopes of near-term export sales.

At the close, corn was off 1 3/4 to up 1/4, soybeans up 2 1/4 to down 1/2, wheat unchanged to down 2 1/4 and oats up 1/4 to 1.

YANGON (OCT. 31) XINHUA - MYANMAR MINISTER FOR PLANNING AND FINANCE DAVID ABEL HAS ANNOUNCED THAT RICE PRICES WILL FALL IN THE COUNTRY.

THE RICE PRICE CAN FALL TO SEVEN KYATS OR 8.5 KYATS PER PYI (ONE PYI OF RICE EQUALS TO 2.127 KILOGRAMS) FROM THE CURRENT PRICE OF 11 OR 12 KYATS PER PYI.

ACCORDING TO OFFICIAL EXCHANGE RATE, ONE U.S. DOLLAR EQUALS ABOUT 6.5 KYATS.

UNDER CURRENT RICE PRICES, ORDINARY PEOPLE'S LIFE IN THE COUNTRY IS QUITE HARSH.

THE MINISTER'S DISCLOSURE CAME AFTER GOVERNMENT OFFICIALS HELD A MEETING TUESDAY TO DISCUSS BRINGING DOWN PRICES OF COMMODITIES AND BUYING PADDY.

THE REAPING SEASON FOR PADDY IN MYANMAR HAS BEGUN AND WILL END EARLY NEXT YEAR.

ABEL STATED THAT ABOUT 13.64 MILLION TONS OF PADDY ARE EXPECTED TO BE REAPED FOR THE 1990/1991 FISCAL YEAR ENDING ON MARCH 31 NEXT YEAR.

ACCORDING TO OFFICIAL STATISTICS, THE COUNTRY'S ANNUAL DOMESTIC CONSUMPTION OF

PADDY IS ABOUT 11.9 MILLION TONS.

MYANMAR IS AN AGRICULTURAL COUNTRY WITH A POPULATION OF FORTY MILLION, RICE IS THE STAPLE FOOD OF EVERY FAMILY IN THE NATION.

#90304h0087 10/31/1990 ~Chinese News Agency

LAGOS (OCT. 31) XINHUA - THE NIGERIAN GOVERNMENT HAS ABORTED A PLANNED BAN ON EXPORT OF RAW COCA BEANS.

ANNOUNCING THE GOVERNMENT DECISION HERE YESTERDAY, NIGERIAN INFORMATION MINISTER ALEX AKINYELE EXPLAINED THAT THE PROPOSED BAN HAS BEEN ABORTED BECAUSE THE COUNTRY HAS NO ADEQUATE COCOA PROCESSING FACILITIES AT PRESENT.

NIGERIA DECIDED EARLIER TO BAN THE EXPORT OF RAW COCOA BEANS FROM NEXT JANUARY HOPING TO GET MORE FOREIGN EXCHANGE BY EXPORTING PROCESSED COCOA PRODUCTS.

BUT THE BAN HAS BEEN OPPOSED BY COCOA FARMERS AND EXPORTERS OF THE COUNTRY. THEY HAVE ARGUED THAT NEARLY HALF OF THE COCOA OUTPUT WOULD BE WASTED AS A RESULT OF THE INADEQUACY OF THE NATION'S PROCESSING ABILITY.

NIGERIA PRODUCES ABOUT 180,000 TONS OF COCOA BEANS ANNUALLY WHILE ONLY 90,000 TONS CAN BE PROCESSED IN THE THREE EXISTING PLANTS IN THE COUNTRY.

MINISTER AKINYELE ADMITTED THAT THE REALITY DEMANDS ADEQUATE PROCESSING FACILITIES BEFORE A BAN ON RAW COCOA EXPORT COULD BE EFFECTED.

NINE MORE COCOA PROCESSING PLANTS ARE EXPECTED TO BE ESTABLISHED IN THE NEAR FUTURE, OF WHICH SIX WITH A PROCESSING CAPACITY OF 73,000 TONS ANNUALLY WILL START FULL OPERATION IN JUNE NEXT YEAR.

INFORMED NIGERIAN SOURCES SAID THAT EXTERNAL PRESSURE MAINLY FROM THE LONDON CLUB OF CREDITORS WAS PART OF THE CAUSE FOR THE ABORTION OF THE BAN. THE CLUB WARNED THAT NIGERIA MIGHT SUFFER LOSS FOLLOWING THE BAN.

-30- 1559

#90304h0101 10/31/1990 ~Chinese News Agency

BUCHAREST (OCT. 31) XINHUA - ROMANIAN BUS AND TRUCK DRIVERS WENT ON A STRIKE TUESDAY FOR HIGHER PAY, CUTTING OFF TRAFFIC AT MANY SECTIONS OF THE COUNTRY'S COMMUNICATION LINES.

STRIKERS SAID THAT THE GOVERNMENT FAILED TO MEET THE DEMAND FOR WAGE RISE THEY ADVANCED FOUR MONTHS AGO, AND THAT THEY ARE ALSO ASKING FOR THE IMPROVEMENT OF SPARE PARTS SUPPLY AND A READJUSTMENT OF BUS FARE AND TRANSPORTATION FEES.

THE GOVERNMENT PRESS OFFICE, HOWEVER, DECLEARED THE STRIKE "UNJUSTIFIED," SAYING WAGES HAVE BEEN RAISED FOR MANY DRIVERS, IN ADDITION TO A LONGER VACATION WITH PAYMENT, AND AN INCREASED SUBSIDY FOR NIGHT SHIFT AND LONG-DISTANCE INTERNATIONAL TRAFFIC.

PRESS OFFICIALS ATTRIBUTED THE SHORTAGE OF MOTOR VEHICLE SPARE PARTS TO THE DROP OF PRODUCTION IN MACHINE BUILDING INDUSTRY.

THE STRIKE BEGAN WITH 1,300 DEMONSTRATORS DRIVING VEHICLES THROUGH DOWNTOWN BUCHAREST TO SHOW PROTEST. THE MUNICIPAL GOVERNMENT AND POLICE BUREAU TERMED THE DEMONSTRATION AS ILLEGAL, SAYING IT WAS STARTED WITHOUT PERMISSION FROM THE LOCAL AUTHORITIES.

#90304h0102 10/31/1990 ~Chinese News Agency

HANGZHOU (OCT. 31) XINHUA - CHINESE RICE EXPERTS FOR THE FIRST TIME IN THE WORLD REAPED A RICH HARVEST OF RICE ON NON-EARTH FLOATING MATERIAL IN A POND IN EAST CHINA'S ZHEJIANG PROVINCE THIS MONTH.

ON A TWO-MU (0.13 HA) SPECIAL RICE "FIELD", MADE FROM ARTIFICIAL MATERIALS, IN A POND ON THE OUTSKIRTS OF HANGZHOU, CAPITAL OF ZHEJIANG PROVINCE, SONG XIANGFU, A RICE EXPERT AND DIRECTOR OF A RESEARCH PROJECT, HARVESTED 992 KG OF RICE, EQUAL TO 7,440 KG PER HA.

THE POND IS QUITE DEEP COMPARED WITH ORDINARY RICE FIELD, FOR WHEN SONG JUMPED INTO THE POND TO HARVEST THE RICE, WATER CAME UP TO HIS WAIST.

ABOUT 20 OTHER CHINESE RICE EXPERTS WATCHED SONG HARVESTING THE RICE. "THIS IS REALLY A MIRACLE IN THE HISTORY OF RICE-GROWING," SAID DR. XU GUANREN, DIVISION MEMBER OF THE CHINESE ACADEMY OF SCIENCES.

CHINA BEGAN RESEARCH INTO GROWING RICE WITH HYDROPONICS IN 1988. DURING THE PAST TWO YEARS EXPERTS FROM THE CHINESE RICE INSTITUTE MANAGED TO FIND AN IDEAL SUBSTITUTE FOR EARTH.

THEY PLANTED RICE ON IT AND APPLIED COMPLEX COMPOUND FERTILIZER DEVELOPED BY THEMSELVES.

EXPERTS SAY THE NEW HYDROPONICS HAS PROVED SUPERIOR TO GROWING RICE ON LAND.

THIS YEAR, HANGZHOU WAS HIT BY TYPHOONS FOUR TIMES AND BY A TWO-MONTH DROUGHT, BUT THE RICE GROWN ON THE SPECIAL MATERIAL FLOATING IN POND WAS NOT AFFECTED, SAID SONG.

THE RICE EXPERTS DID NOT SAY WHAT KIND OF MATERIAL THEY USED TO MAKE UP THE RICE BED AND HOW MUCH IT COST TO PRODUCE THE RICE.

YET, ALL THE RICE EXPERTS ON THE SPOT SAID THEY BELIEVED THAT THE SUCCESS SHOWS THAT CHINA IS IN THE LEADING POSITION IN THIS FIELD. HYDROPONICS OF RICE ALSO DEMONSTRATES BRIGHT PROSPECTS, AS CHINA HAS ABOUT 24,800 LAKE COVERING 835,400 SQ KM AND RESERVOIRS TOTALING 4.3 MILLION HA, EXPERTS SAY.

WITH A POPULATION OF 1.16 BILLION CHINA FACES A SERIOUS PROBLEM OF SHRINKING CULTIVATED LAND AND GROWING POPULATION. IT IS ESTIMATED EACH YEAR THE POPULATION WILL INCREASE BY 15 MILLION OR MORE AND CULTIVATED LAND SHRINK BY AT LEAST 400,000 HA.

NEW DELHI (OCT. 31) XINHUA - INDIA AND AUSTRIA HAVE AGREED TO STEP UP BILATERAL TRADE TO 1 BILLION U.S. DOLLARS IN THE NEXT FIVE YEARS FROM THE PRESENT LEVEL OF 100 MILLION DOLLARS, LOCAL PRESS TODAY QUOTED THE AUSTRIAN AMBASSADOR TO INDIA AS SAYING.

ADDRESSING THE MEMBERS OF THE INDIAN MERCHANTS' CHAMBER IN BOMBAY ON TUESDAY, THE AMBASSADOR, C. CORNARO, INDICATED THAT THERE IS ENORMOUS SCOPE FOR FURTHER CO-OPERATION BETWEEN INDIAN AND AUSTRIAN INDUSTRIES IN THE AREAS OF WIDENING BILATERAL TRADE, TRANSFER OF TECHNOLOGY AND SETTING UP JOINT VENTURES.

CURRENTLY, INDIA'S EXPORTS TO AUSTRIA CONSIST MAINLY OF LOW VALUE-ADDED ITEMS LIKE LEATHER AND LEATHER GOODS, TEXTILES, GARMENTS, COFFEE, TEA AND SPICES.

INDIA CAN INCREASE ITS EXPORTS TO AUSTRIA IN NEW AREAS LIKE COMPUTER SOFTWARE, AUTO ANCILLARIES, DRUGS, JEWELRY ITEMS AND IRON ORE.

INDIA'S EXPORTS TO AUSTRIA IN 1988-89 AMOUNTED TO 533.7 MILLION RUPEES (31.4 MILLION U.S. DOLLARS) AS AGAINST IMPORTS FROM AUSTRIA WORTH 1,091.7 MILLION RUPEES (64.2 MILLION U.S. DOLLARS).

#90304h0123 10/31/1990 ~Chinese News Agency

RIO DE JANEIRO (OCT. 31) XINHUA - STARTING NOVEMBER 1, MINIMUM WAGE EARNERS IN BRAZIL WILL MAKE 8,329.55 CRUZEIROS A MONTH, AN INCREASE OF 29.64 PERCENT OVER THE PREVIOUS FIGURE.

THE MINIMUM WAGE WAS ADJUSTED TO REFLECT CHANGES IN THE PRICES OF STAPLE GOODS AS REGISTERED BY THE BASIC BASKET INDEX (ICB) DURING THE MONTHS OF SEPTEMBER AND OCTOBER.

ACCORDING TO FIGURES RELEASED BY THE BRAZILIAN INSTITUTE OF GEOGRAPHY AND STATISTICS (IBGE), THE BASIC BASKET INDEX WEIGHED IN AT 12.62 PERCENT OF THE MINIMUM WAGE IN SEPTEMBER AND AT 15.11 PERCENT IN OCTOBER.

OCTOBER'S OFFICIAL INFLATION RATE WAS 13.71 PERCENT. THE FIGURE WAS MEASURED BY THE READJUSTMENT INDEX OF ECONOMIC INDICATORS.

THE MINIMUM WAGE IN BRAZIL IS NOMINALLY ADJUSTED EACH MONTH. HOWEVER, EVERY TWO MONTHS WAGES ARE MODIFIED ACCORDING TO THE BASIC BASKET INDEX, WHILE INTERVAL MONTHS SEE A VERY MINOR ADJUSTMENT IN TERMS OF REAL INCOME.

UP TO OCTOBER 31, THE MINIMUM MONTHLY WAGE WAS 6,425.14 CRUZEIROS AT A DOLLAR PARITY OF 106 TO ONE.

BEIJING (OCT. 31) XINHUA - CHI HAOTIAN, CHIEF OF THE GENERAL STAFF OF THE CHINESE PEOPLE'S LIBERATION ARMY, TODAY CALLED ON MILITARY OFFICIALS TO CREATE AN ENVIRONMENT FOR STUDY AND RESEARCH IN ORDER TO IMPROVE THEIR THINKING AND PROFESSIONAL QUALITIES.

CHI MADE THE REMARKS AT A CEREMONY HELD FOR XINHUA NEWS AGENCY -- CHINA'S NATIONAL WIRE SERVICE -- TO PRESENT "CHINA YEAR BOOK" TO THE GENERAL STAFF OF THE CHINESE PEOPLE'S LIBERATION ARMY.

"CHINA YEAR BOOK," WHICH IS PUBLISHED ANNUALLY IN BOTH CHINESE AND ENGLISH EDITIONS, INTRODUCES PARTY AND GOVERNMENT PRINCIPLES, POLICIES AND LAWS, THE COUNTRY'S MAJOR EVENTS AND ACHIEVEMENTS IN SOCIAL DEVELOPMENT, POLITICS, ECONOMY, FOREIGN RELATIONS, MILITARY AFFAIRS, SCIENCE AND TECHNOLOGY, CULTURAL ACTIVITIES AND PEOPLE'S LIFE.

CHI POINTED OUT THAT IF THE OFFICERS WANT TO OFFER "GOOD ADVICE" BASED ON WIDE KNOWLEDGE, IT IS IMPORTANT TO PLACE EMPHASIS ON COLLECTING MATERIAL, MAINTAINING A GOOD COMMAND OF CURRENT EVENTS, AND BECOME FAMILIAR WITH MILITARY ACTION BOTH AT HOME AND ABROAD.

GUO CHAOREN, VICE-PRESIDENT OF XINHUA NEWS AGENCY, AND HE QIZONG, DEPUTY CHIEF OF GENERAL STAFF OF THE CHINESE PEOPLE'S LIBERATION ARMY, WERE ALSO PRESENT AT THE CEREMONY.

#90304k0050 10/31/1990 ~Japanese News Agency
TOKYO (OCT. 31) KYODO - THE FINANCE MINISTRY IS CONSIDERING HOLDING AN AUCTION OF SOME 300 BILLION YEN WORTH OF 20-YEAR GOVERNMENT BONDS ON THURSDAY, MINISTRY SOURCES SAID WEDNESDAY.

THE COUPON RATE IS LIKELY TO BE SET AT AROUND 7.3 PERCENT PER ANNUM. THE MINISTRY NOW BELIEVES THE RECENT RECOVERY OF THE BOND MARKET, HELPED BY THE YEN'S UPTREND AND STABILIZATION OF CRUDE OIL PRICES, WOULD MAKE THE SALE OF SUCH BONDS SMOOTH, THE SOURCES SAID.

UNDER THE INITIAL PLAN, THE MINISTRY WAS TO ISSUE 1.2 TRILLION YEN WORTH OF 20-YEAR GOVERNMENT BONDS IN FOUR AUCTIONS IN THE CURRENT FISCAL YEAR. BUT THE ISSUING AMOUNT WILL BE REDUCED SINCE IT SKIPOPED THE ISSUANCE IN AUGUST, THE SOURCES SAID.

-30- 873
#90304k0066 10/31/1990 ~Japanese News Agency
TOKYO (OCT. 31) KYODO - JAPAN'S TAX REVENUE GROWTH SHOWED SIGNS OF LEVELING OFF IN SEPTEMBER DUE MAINLY TO A FALL IN INCOME FROM INHERITANCE TAX AND A MODERATE GROWTH OF CORPORATE TAX, THE FINANCE MINISTRY REPORTED WEDNESDAY.

THE MINISTRY SAID TAX REVENUE IN SEPTEMBER TOTALED 2,867.45 BILLION YEN, UP 9.4 PERCENT OVER A YEAR BEFORE.

THE YEAR-ON-YEAR GROWTH RATE COMPARED WITH A RISE OF ABOUT 20 PERCENT IN PREVIOUS MONTHS.

MINISTRY OFFICIALS SAID THE HIGH-PITCHED TAX REVENUE GROWTH OF THE PAST HAS APPARENTLY PEAKED, PREDICTING A FURTHER SLOWDOWN IN CORPORATE TAX REVENUE IN VIEW OF POOR BUSINESS RESULTS POSTED BY FINANCIAL INSTITUTIONS.

THE OFFICIALS SAID THE REVENUE FOR THE WHOLE OF THE CURRENT FISCAL YEAR WOULD BE SLIGHTLY ABOVE THE ESTIMATE INCORPORATED IN THE NATIONAL BUDGET.

THE MINISTRY SAID TAX REVENUE FOR THE FIRST HALF OF FISCAL 1990 TOTALED 18,145.75 BILLION YEN, UP 20.0 PERCENT OVER A YEAR BEFORE BUT DOWN MORE THAN 2 PERCENTAGE POINTS FROM THE TOTAL FOR THE APRIL-AUGUST PERIOD.

IT SAID THE SEPTEMBER REVENUE INCLUDED INCOME TAX OF 1,312.32 BILLION YEN, UP 21.8 PERCENT OVER A YEAR BEFORE.

REVENUE FROM CORPORATE TAX GREW A MILD 0.9 PERCENT TO 481.86 BILLION YEN WHILE THAT FROM INHERITANCE TAX FELL 25.1 PERCENT TO 127.97 BILLION YEN, THE MINISTRY SAID.

-30- 1463
#90304k0085 10/31/1990 ~Japanese News Agency

SINGAPORE (OCT. 31) KYODO - EXPORTS OF GOODS MADE IN SINGAPORE TO JAPAN AND THE EUROPEAN COMMUNITY SHOWED HEALTHY GROWTH IN AUGUST BUT THE REPUBLIC SOLD LESS TO ITS OTHER MAJOR MARKETS IN THE UNITED STATES AND MALAYSIA, THE TRADE DEVELOPMENT BOARD SAID WEDNESDAY.

STATISTICS RELEASED BY THE BOARD SHOWED THAT THE TOTAL EXPORTS, INCLUDING REEXPORTS, GREW 2.3 PERCENT IN NOMINAL TERMS IN AUGUST OVER A YEAR BEFORE TO 8,001 MILLION SINGAPORE DOLLARS (4,706 MILLION U.S. DOLLARS).

BECAUSE OF MORE PETROLEUM PRODUCTS AND DATA PROCESSING MACHINES CONSUMED BY JAPAN, DOMESTIC EXPORTS (NOT INCLUDING REEXPORTS) TO JAPAN RECOVERED STRONGLY BY 22.2 PERCENT TO 573 MILLION SINGAPORE DOLLARS, REVERSING THE SLUGGISH TRENDS WHICH HAD PREVAILED SINCE APRIL.

THE BOARD CLASSIFIES SINGAPORE-MADE OIL AND NONOIL PRODUCTS AS DOMESTIC EXPORTS WHILE REEXPORTS ARE EXCLUDED.

BUT DOMESTIC EXPORTS TO THE UNITED STATES, WHICH IS THE REPUBLIC'S LARGEST EXPORT MARKET, DROPPED 0.5 PERCENT TO 1,543 MILLION SINGAPORE DOLLARS DUE TO FEWER EXPORTS OF NONOIL SINGAPORE-MADE GOODS SUCH AS RADIO SETS, OFFICE MACHINES, TELECOMMUNICATION EQUIPMENT, AND WOVEN CLOTHING.

DOMESTIC EXPORTS TO THE UNITED STATES EXPANDED 9 PERCENT IN JULY THIS YEAR.

MEANWHILE, CONTINUING THE ROBUST 20.1 PERCENT EXPORT GROWTH IN JULY, DOMESTIC EXPORTS TO THE EUROPEAN COMMUNITY JUMPED 22.9 PERCENT TO 884 MILLION SINGAPORE DOLLARS, THE BOARD SAID.

PRODUCTS POPULAR IN THE EUROPEAN COMMUNITY IN AUGUST WERE DATA PROCESSING AND OTHER OFFICE MACHINES AND HOUSEHOLD ELECTRICAL APPLIANCES SUCH AS VIDEOCASSETTE RECORDERS AND RADIOS.

WITH LESS DEMAND FOR PETROLEUM PRODUCTS, ELECTRONIC VALVES AND TELECOMMUNICATIONS EQUIPMENT, DOMESTIC EXPORTS TO MALAYSIA FELL 9.6 PERCENT TO 413 MILLION SINGAPORE DOLLARS COMPARED WITH THE 19.1 PERCENT GROWTH IN JULY.

IN NOMINAL TERMS, TOTAL DOMESTIC EXPORTS OF OIL GREW 14.4 PERCENT TO 1,297 MILLION SINGAPORE DOLLARS IN AUGUST DUE TO SOARING OIL PRICES WHICH FOLLOWED IRAQ'S INVASION OF KUWAIT ON AUGUST 2.

THE BOARD SAID IMPORTS ROSE 5.4 PERCENT TO 9,120 MILLION SINGAPORE DOLLARS, RAISING THE REPUBLIC'S TOTAL TRADE TO 17,121 MILLION SINGAPORE DOLLARS.

IMPORTS ON THE WHOLE ROSE BECAUSE SINGAPORE BOUGHT MORE COLOR TELEVISIONS,

CIGARETTES, INTEGRATED CIRCUITS, COMPUTER PARTS, AND MOTOR TANKERS, THE BOARD SAID.

IT ALSO NOTED A RISE IN THE IMPORT OF CRUDE PETROLEUM MAINLY FROM SAUDI ARABIA AND THE UNITED ARAB EMIRATES AND REFINED SPIRITS FROM CHINA AND THE EMIRATES.

-30- 2687

#90304m0001 10/31/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 31) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The Nikkei drifts down 48 points. ... The FTSE rallies at midday, up 23 points. ... The dollar is stronger against most major currencies. Sea crude is down 65 cents to $33.75. ... Sales of new single-family homes fell 6% from August to September. ... FORD reports third- quarter earnings fell nearly 79% to 22 cents a share, less than half what most analysts were expecting. ... CHRYSLER and the UNITED AUTO WORKERS union have reached a tentative agreement on a three-year contract. ... "USA Today" says it has learned the SECURITIES AND EXCHANGE COMMISSION is investigating whether FINANCIAL NEWS NETWORK dramatically inflated its operating results. ... CARL ICAHN says he is not satisfied with USX CORP.'s plan to transfer control of its steel division to a wholly owned subsidiary.

WHAT'S AHEAD:

The COMMERCE DEPARTMENT reports on personal income and factory orders at 10 a.m. ... GENERAL CINEMA says it will buy the 40% of NEIMAN- MARCUS that it doesn't already own for $240 million.

FROM THE BULLS:

This is a "crisis related decline rather than the initial shot in a bear market," says the still bullish STEPHEN LEEB in "Indicator Digest." "In almost all cases, a crisis low turns out to be a a major low," says Leeb who thinks yields on many top flight companies are at "absurdly high levels." There is still risk, cautions Leeb: "Short term, this is still a panic driven market." (CNBC "World Business" 10/31)

FROM THE BEARS:

Many money managers are waiting to sell into a stronger "bear-market rally," says PAUL HENNESSEY, head of equities trading at BOSTON CO. He says yesterday's gains were magnified by a lack of willing sellers with few institutions willing to sell shares with the DJIA below 2450. "When the Dow

[industrials] get above 2500, you'll find more buyers." (WSJ, 10/31)

STOCK MARKET:

"The GNP numbers relieved some fears among those who believe the economy is falling into an abyss, but the market is always looking ahead," says ALFRED GOLDMAN of A.G. EDWARDS. A.C. MOORE of ARGUS RESEARCH says he thinks the GNP increase "might well represent the economy's last hurrah before a recession in the fourth quarter." ("USA Today", 10/31)

The longer term trend could be turning down, if not sharply down, says PETER ELIADES at "Stock Market Cycles." While he says the market could see a good rally and another top in the November 8-13 time period, he remains extremely bearish over the intermediate term. "The bear market should resume in earnest between November 8 and January 18," says Eliades. (CNBC "World Business", 10/31)

"Traders are still conditioned to buy peace and sell war," says A.C. MOORE, research director at ARGUS RESEARCH. "You get an immediate knee-jerk response to peace rumors." (WSJ, 10/31)

"The catalyst to [yesterday's] rally was having a minor down day in crude oil " says JON GROVEMAN of LADENBURG THALMANN. He says there is "a massive wall of resistance" between 2500 and 2550, but says if the market can "penetrate that level, people would be comfortable in assuming the worst is over." On the other hand, if the market falls through 2420, it "could go substantially lower." ("Investor's Daily", 10/31)

Having counted on Congress to heed President Bush's call to restore capital gains to favor under the tax code, many investors are likely to feel they were instead dealt a loss in the deficit reduction legislation approved on Saturday. "A lot of people put off selling and got killed by the market,' says DAVID BERENSON, national director of tax policy for ERNST & YOUNG IN WASHINGTON. "They walked into an economic loss because they waited." With their hopes for sizable benefits dashed, he adds, "a lot of people will be running for the exits" in doing year-end tax-loss sales. Investors need to decide whether to "act now and avoid the rush," he says. (NYT, 10/31)

STOCK TIPS:

GRUNTAL & CO. recommends buying stock in WAL-MART STORES INC., the discount chain with more than 1,500 stores in 34 states. Gruntal says the company's earnings are expected to grow 20% to 25% annually in the next few years. ("USA Today", 10/31)

If the economy slips into a shallow, protracted recession, fast- growing companies such as AUTODESK, NOVELL and US WEST NEWVECTOR will feel the pinch but will still prosper relative to many larger businesses, says GORDON FINES,

manager of the $200 million IDS GROWTH SPECTRUM ADVISORS FUND of Minneapolis. "As long as you're going to have some money invested, these are diamonds in the rough." Mr. Fines cautions that such stocks could still drop 10% or more if the Dow Jones Industrial Average plummets to the low-2000 range. But if interest rates fall, "there's no reason these stocks couldn't trade at 20 times earnings." (WSJ, 10/31)

ROBERT HORMATS at GOLDMAN SACHS INTERNATIONAL says only those who "have a strong stomach and don't easily lose sleep" should buy Japanese stocks now. "Caution is our bottom line on Japan," says GAVIN DOBSON at MURRAY JOHNSTONE INTERNATIONAL. MERRILL LYNCH's TOM ROBINSON says the Nikkei would be fairly valued "at around 20,000" - compared to its close yesterday of 25,242. ("USA Today", 10/31)

The balance sheets of life insurance and casualty insurance companies look quite different from one another, says MICHAEL FRINQUELLI, a managing director at SALOMON BROTHERS. "The life insurance industry has about 20% of its assets in real estate, the casualty companies [have] about 5%." Casualty insurers are the better bet "unless we have another mega-earthquake," says Frinquelli. He says the industry will weather a recession and that cash flows are adequate to cover real estate exposures, but still worries about a possible loss of public confidence in insurers. His favorite is ST. PAUL COMPANIES, but he also likes CHUBB in the non-life category. His favorite life stocks include AMERICAN GENERAL. AETNA is a recent recommendation from STEPHEN LEEB at "Indicator Digest." He calls the company a "showcase of safety." (CNN "Business Morning" & CNBC "World Business", 10/31)

-30- 6506

#90304m0002 10/31/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 31) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"People were so uniformly bearish about the dollar that it's inevitable that it will bottom out," says MARK CLIFFE, chief economist at NOMURA INTERNATIONAL LTD. in London. (WSJ, 10/31)

With a recession waiting in the wings, "the outlook is not very appealing" for the dollar, according to MERRILL LYNCH's BRUCE STEINBERG. ("Investor's Daily" 10/31)

A major reason for the dollar's expected rebound is a continued improvement in the U.S. trade picture. At the currency's present levels, U.S. exports are highly competitive overseas, and that should boost the dollar, says RICHARD WITTEN, vice president in charge of foreign exchange at GOLDMAN, SACHS & CO.

In the first half of next year, he says "the U.S. will probably be running a significant trade surplus with Western Europe and a significantly reduced trade deficit with Japan." (WSJ, 10/31)

FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN will continue "grudgingly easing monetary policy," according to ALEXANDER PARIS of BARRINGTON RESEARCH ASSOCIATES. He says the Fed has been slowly easing since May, and believes both the economy and the stock market are closer to the end of their respective problems than they are to the beginning. (FNN "Marketwrap", 10/30)

"The stage is set for a more noticeable response than what we've seen so far from the Fed," says RICHARD EAKLE, president of EAKLE ASSOCIATES. He remains hopeful that the Fed will act soon to cut interest rates again following its rate cut on Monday. He adds that the September unemployment report due out Friday could be the Fed's next cue to ease. (WSJ, 10/31)

The GNP figures will not have "much impact on what the Federal Reserve would or would not do," according to MICHAEL BOSKIN, chairman of the White House Council of Economic Advisers. He points out that the Fed has "to take into account not only where the economy is but where they expect it to go." Boskin believes the economy is not as weak as many think and predicts that it will continue to grow, even though "the next quarter or two may be somewhat weaker." ("Investor's Daily", 10/31)

"We've got to stumble through next week's auction," says TIM SCALA of SEQUOR GROUP. He says that partially as a result of the dollar's problems, Japanese investors may "stay away" from the quarterly refunding. "We're a little bit concerned about that," says Scala. (FNN "Marketwrap", 10/30)

"The GNP data are more likely to leave the Federal Reserve hawks more secure in resisting cries for [a monetary policy] ease," says ROBERT McGEE of TOKAI BANK. "The longer they wait before easing policy significantly, however, the lower [bond yields and other interest] rates ultimately will go and the deeper the recession will be." ("Investor's Daily", 10/31)

"Even as the economy slips into recession, the bond market will have difficulty maintaining momentum toward lower levels of interest rates," says ALAN LEVENSON, director of United States financial services at WEFA INC., an economic consulting firm in Bala Cynwyd, Pa. "At the depth of what we see as a mild recession, I don't see bond yields falling below 8.25%." (NYT, 10/31)

THE ECONOMY:

"The economy definitely was not in recession," says LACY HUNT of C M & M GROUP. "In spite of all the forecasts the economy managed to move ahead." (FNN "Marketwrap", 10/30)

"Reports of the American economy's demise are premature," according to BEAR

STEARNS chief economist LAWRENCE KUDLOW. "The economy is probably more resilient, in more areas than [it has] been given credit for." He says that while "we're still somewhere between Dante's Inferno and the Pearly Gates," the economy, as a whole, is still expanding. ("Nightly Business Report", 10/30)

"There is nothing in here [yesterday's GNP report] that would cause me to change my forecast," says DOUGLAS LEE, chief economist at WASHINGTON ANALYSIS CO. "I am predicting a recession that lasts three quarters with declines of between 1% and 2% decline, in the fourth quarter." ("The Washington Post", 10/31)

Yesterday's GNP report "makes it very hard to claim that the U.S. was in recession in the third quarter of this year," says GAIL FOSLER of the CONFERENCE BOARD. But she adds, "the mood is clearly a lot bleaker than the actual [numbers]." ("Investor's Daily", 10/31)

"We can see in [yesterday's GNP] report in particular that the composition of growth doesn't look to be sustainable," says ROBERT GAY of MORGAN STANLEY. He believes the fourth quarter numbers will show the U.S. to be in a recession. (FNN "Marketwrap", 10/30)

"Anyone who lived in North America this summer probably thinks that inflation went up," says NEAL SOSS of FIRST BOSTON. He says "lots of sectors of the economy feel very starved for cash," and that creates the factors that define a technical recession. Soss feels the Fed should have eased earlier and, had it done so, could have avoided the current economic problems. (CNN "Moneyline", 10/30)

New home sales have fallen to an 8 year low with a 6% drop in September. "Frankly, we don't foresee any turnaround in housing sales until probably in mid-1991, when we expect the economy to turn around from recession," says RICHARD PEACH, an economist with the MORTGAGE BANKERS ASSOCIATION. (NYT, 10/31)

IN WASHINGTON:

"Our best guess is that the economy will grow, although the next quarter or two will probably be somewhat weaker," says MICHAEL BOSKIN, chairman of the COUNCIL OF ECONOMIC ADVISERS. ("The Washington Post", 10/31)

-30- 5947

#90304p1612 10/31/1990 ~PR Newswire

ATLANTA (OCT. 31) PR NEWSWIRE - T2 Medical Inc. (NASDAQ:TSQM) announced it has reached an agreement in principle to acquire the business and assets of Extendacare Health Services, through a cash purchase transaction of $10 million plus future cash consideration not to exceed $5 million.

The acquisition is expected to be completed during the first quarter of T2's 1991 fiscal year. This transaction is subject to the execution of certain definitive agreements and other customary conditions.

The Dallas home infusion therapy company was started in 1986 by Christine Burns. The company's 1990 revenue is expected to exceed $7 million.

"We are extremely pleased with the prospect of adding Extendacare to the ever-expanding T2 family. Extendacare's home infusion therapy marketing and management philosophy is extremely synergistic with T2's strategic direction. The acquisition of Extendacare will signficantly increase T2's home infusion therapy market share in the Dallas/Ft. Worth Metroplex area and give us tremendous momentum in expanding our Texas and Southwest presence," said Thomas E. Haire, chairman of T2 Medical Inc.

T2 Medical Inc. is a leading provider of home infusion therapy in the United States. Infusion therapy is the administration to a patient of nutrients, antibiotics, and other drugs and fluids, either intravenously or through a feeding tube. T2 Medical Inc.'s headquarters are in Alpharetta, Ga.

CONTACT: Thomas E. Haire, chairman, or Dale R. Benzine, both of T2 Medical, 404-442-2160

#90304p1613 10/31/1990 ~PR Newswire

GREENWICH, CONN. (OCT. 31) PR NEWSWIRE - NAC Re Corporation (NASDAQ: NREC) today reported that earnings excluding realized investment gains and losses increased 41.2 percent to $6,935,000 or 66 cents per share for the quarter ended Sept. 30, 1990, compared with $4,910,000 or 47 cents per share for the 1989 third quarter. Earnings excluding realized investment gains and losses for the nine months ended Sept. 30, 1990, were $18,456,000 or $1.74 per share, compared to $17,340,000 or $1.65 per share for the 1989 comparable period. Earnings were reduced in the 1989 third quarter and nine month period by 23 cents per share as a result of Hurricane Hugo.

Net realized investment losses, net of tax, for the 1990 third quarter and nine month period were 2 cents per share and 4 cents per share, respectively. This compares to net realized investment gains, net of tax, for the 1989 third quarter and nine month period of 6 cents per share and 15 cents per share, respectively.

Net income for the 1990 third quarter and nine month period were $6,750,000 or 64 cents per share and $18,008,000 or $1.70 per share, respectively. This compared to net income for the 1989 third quarter and nine month periods of $5,608,000 or 53 cents per share and $18,940,000 or $1.80 per share, respectively.

The statutory composite ratio for the 1990 third quarter was 107.5 percent versus 110.7 percent for the same period last year. For the nine month period ended Sept. 30, 1990, the composite ratio was 108.5 percent compared with the 1989 nine month ratio of 108.0 percent. The composite ratios for the 1989 third quarter and nine month period were increased by 6.3 percent and 2.2 percent, respectively, as a result of Hurricane Hugo losses.

Net premiums written for the 1990 third quarter and nine month period were $55,203,000, and $160,980,000, increases of 12.9 percent and 12.8 percent, respectively. The increase in net premiums written is principally attributable to increased participations in existing business and growth in non-traditional treaty business.

Pre-tax net investment income for the 1990 third quarter was $13,228,000, an increase of 16.2 percent over $11,382,000 in the comparable 1989 quarter. Pre-tax net investment income for the first nine months of 1990 rose 12.7 percent to $37,823,000 compared with $33,567,000 for the same prior year period.

The "fresh start" loss reserve discount favorably affected the 1990 and 1989 nine month periods by $300,000 and $150,000, respectively.

Cash flow from operations was $81,231,000 for the 1990 nine month period, a decrease of 24.9 percent from the first nine months of 1989. The decrease in cash flow is principally attributable to increased paid claims activity.

Consolidated assets were $871,624,000 at Sept. 30, 1990, an increase of 11.6 percent over $780,733,000 at the end of 1989.

Statutory surplus of the reinsurance subsidiary, NAC Reinsurance Corporation, was $195,153,000 at Sept. 30, 1990.

Stockholders' equity as of Sept. 30, 1990, amounted to $197,781,000 or $19.04 per share. A quarterly dividend of 5 cents per share was declared in the third quarter of 1990. The company has repurchased 85,000 shares of its common stock as of Oct. 31, 1990. A total of 304,619 shares remain authorized for repurchase under the 900,000 shares repurchase program which began in January 1988.

#90304p1623 10/31/1990 ~PR Newswire

ROCHESTER, NY (OCT. 31) PR NEWSWIRE - Eastman Kodak Company (NYSE: EK) today reported increased sales and sharply higher operating earnings for the third quarter. Operating earnings increased 22 percent to $835 million, compared with $682 million in the same period a year ago. A $909.5 million charge associated with the Polaroid patent litigation resulted in a net loss of $206 million for the quarter.

The U.S. District Court in Boston recently awarded $454.2 million in damages and $455.3 million in interest to Polaroid in the 14-year- old patent infringement suit involving instant cameras and film.

Without the provision for the litigation judgment, the company would have recorded net earnings of $358 million in the quarter, up 19 percent from $300 million a year ago. Positive cash flow for the quarter exceeded $500 million. On a per-share basis, the loss of $.64 per share for the third quarter compared with earnings of $.93 per share a year ago. Without the effect of the litigation charge, earnings per share would have been up 18 percent to $1.10.

For the first three quarters of 1990, the company had net earnings of $377 million, compared with earnings of $589 million in 1989. Without the litigation provision, net earnings would have been $941 million for the year to date. Earnings from operations were up 43 percent to $2.18 billion, compared with $1.52 billion a year ago. (Year-to-date 1989 operating and net earnings were adversely affected by $350 million of restructuring costs -- $227 million after-tax). On a per-share basis, earnings declined to $1.16 from $1.82 in 1989. Without the effect of the litigation charge, year-to-date earnings per share would have been $2.90.

OYSTER BAY, N.Y. (OCT. 31) PR NEWSWIRE - Gregory E. Fischbach, chairman and chief executive officer for Acclaim Entertainment, Inc. (NASDAQ: AKLM), has been named "1990 Long Island Businessman of the Year" by the Wharton Business School Club of Long Island. Fischbach will be honored at the club's annual dinner, to be held on Wednesday, Nov. 14, at 6:30 p.m., at the Westbury Manor in Westbury, N.Y. Keynote speaker for the evening will be David Thomburgh, director of the Wharton Small Business Development Center.

"I am honored to be selected from a community of such prestigious business leaders," said Fischbach. "And, it is doubly gratifying to be recognized by the Wharton Business School Club of Long Island, a distinguished organization of business professionals."

Acclaim was established by Fischbach and partner Jim Scoroposki in 1987, and became publicly held in 1988. Based in Oyster Bay, N.Y., the company is a leading publisher, marketer and distributor of software for the Nintendo Entertainment System and Game Boy, and also produces hand- held video games and remote controllers. Acclaim recently reported its third consecutive record fiscal year, during which net income increased 56 percent, and net sales were $141.5 million.

"We're pleased to be presenting this award to Gregory Fischbach because he has brought to Long Island one of the fastest-growing companies in the country," said Adam Weissman, president of the Wharton Business School Club of Long Island.

The Wharton Business School Club of Long Island is one of several regional clubs composed of alumni of the prestigious Wharton Business School of the University of Pennsylvania, ranked as one of the leading business schools in the country. On an annual basis, the club's board of directors honors an outstanding business executive in the Long Island business community. Past honorees include Leonard Lauder, president, Estee Lauder; Saul Steinberg, chairman, Reliance Group; Robert Israeloff, founding partner, Israeloff, Tratner & Company, and John Salam, chairman, Audiovox Corporation.

CHARLOTTE, MICH. (OCT. 31) PR NEWSWIRE - Spartan Motors, Inc. (NASDAQ-NMS: SPAR) announced today that net income for the third quarter ended Sept. 30, 1990, rose 178 percent to $702,085 or 15 cents per share, from $252,629 or 6 cents per share, for the third quarter last year. Third-quarter revenues rose 70 percent to $13,817,650 from $8,109,749 a year ago.

The company also recorded its highest nine-month results. Net income rose to $1,858,189 or 40 cents per share, on revenues of $39,388,965 from net income of $909,733 or 20 cents per share on revenues of $26,873,691 for the same nine-month period a year ago.

George W. Sztykiel, Spartan president and CEO, said the company continues to enjoy high volumes of fire truck and motorhome chassis orders and shipments.

He noted that the fire truck manufacturing business is a fairly stable one, even in recessionary times. Spartan's gains are coming primarily from the company's ability to capture a larger market share, as fire departments increasingly switch to custom trucks and as larger manufacturers step away from this specialized niche market.

In the motorhome area, Spartan produces custom chassis for the top-of-the-line models which customarily are purchased by consumers less affected by economic slowdowns. In the past, the company's motorhome chassis production was limited by space constraints. Following completion of the company's expansion program, Spartan has made significant inroads into this niche market. Production remains strong though the industry is experiencing some slowdown, Sztykiel noted.

He pointed out that Spartan recently introduced the industry's lowest-cost, rear engine chassis for under-16,000-pound vehicles, such as RVs and small, light-duty tour/transit buses. Spartan sees not only a large domestic but also a significant potential overseas market for this chassis.

Spartan recently also announced a stock buy-back program, after its shares had declined in price and, in management's opinion, represented a good investment.

Spartan Motors, Inc. is the leading manufacturer of custom designed fire truck chassis, motorhome chassis and other specialty and emergency vehicle chassis.

FORT WORTH, TEXAS (OCT. 31) PR NEWSWIRE - Paul I. Stevens, chairman and chief executive officer of Stevens Graphics Corporation (AMEX: SVGA SVGB) announced today that the company reported a decline in earnings for the third quarter ending Sept. 30, 1990, after 14 consecutive quarters of increased earnings. The company also reported on the progress of its Soviet Union packaging press

systems order.

For the nine months ended Sept. 30, 1990, net income was $2,600,000, sales were $96,927,000, and earnings per share were $0.29. These figures compare to the same period of 1989 when the company had net income of $5,487,000 or $0.69 per share on sales of $88,401,000.

For the third quarter ended September 30, 1990, the company had a loss of $2,180,000, or ($0.24) per share on sales of $25,240,000. This compares to the same period of 1989 when the company had net income of $1,665,000 or $0.21 per share on sales of $29,539,000.

Stevens stated, "Stevens Graphics' lack of earnings for the third quarter have been impacted by the downturn in the U.S. economy. The combination of the impending recession for the U.S. economy overall and the capital equipment sector recession already upon us, which includes printing and packaging equipment, has caused a dramatic slowing of orders for our industry and our company. The softness in new orders that we have experienced has intensified as the year has progressed. We anticipate our fourth quarter performance to improve over this quarter, but we do not anticipate our orders will generate earnings sufficient to meet our previously planned expectations."

Stevens Graphics received a major order for packaging machinery from the USSR in 1989. Approximately half of that order, valued at $13.2 million, has been shipped, received in the USSR, and is awaiting installation by Stevens Graphics personnel. The second half of the order was shipped in late October 1990.

Payment on the first shipment was due in late September 1990, and as of this date has not been received. The buyer involved is one of the most reliable Soviet trading companies, which has a good reputation for honoring its obligations, although in many cases with delays. Stevens Graphics is pursuing collection of this receivable through both the customer and the Vnesheconom Bank, which provides the funding, and the company expects that the amount due will be collected fully.

Stevens Graphics Corporation, headquartered in Fort Worth, Texas, is the only U.S. based company that designs, manufactures, markets and services web-fed offset, gravure, flexographics, and intaglio printing and packaging press systems, collators, and related pre-press, printing, and post-press equipment on a worldwide basis. The company serves the packaging, commercial, business forms, and currency/securities segments of the U.S./North American and international printing and packaging industries. Corporate strategy is to create a larger company, by internal growth and acquisition of industry-related companies, that provides "complete systems solution" lines of products.

CLEVELAND (OCT. 31) PR NEWSWIRE - M.A. Hanna Company (NYSE/MSE: MAH) today announced that it has agreed to acquire Synthecolor S.A. of France from Perstorp AB, a diversified chemical producer based in Sweden. Terms of the agreement, which is subject to the approval of the French Ministry of Finance, were not disclosed.

With annual sales of nearly $25 million (U.S.), Synthecolor is the leading producer of formulated colorants for the plastics industry in France. The company employs 86 people at its main production facility near Paris and a warehouse and sales office near Lyon.

"Synthecolor marks Hanna's entry into the European formulated colorants industry," said Hanna Chairman Martin D. Walker. "The company provides a solid foundation for expansion with a strong market position, state-of-the-art technology and an experienced and successful management."

Synthecolor produces a variety of custom-formulated colorant and additive masterbatches for plastic product manufacturers in France, the Benelux countries, Portugal and Switzerland. The company has design capacity of over 26 million pounds of product annually.

With 18 colorant facilities in the United States and Canada, M. A. Hanna is the leading producer of custom formulated colorants for the plastics industry in North America. Hanna also is a world leader in polymer compounding and the distribution of fabricated plastic shapes and plastic resins.

SAN FRANCISCO (OCT. 31) PR NEWSWIRE - Centex Telemanagement Inc. (NASDAQ: CNTX) today reported financial results for the third quarter and nine months ended Sept. 30, 1990.

Net income in the third quarter was a record $2,591,000, or 27 cents per share a 41.2 percent improvement over the $1,835,000, or 19 cents per share, Centex earned in the same quarter of 1989, despite an increase in the effective tax rate from 21 percent to 36 percent. Operating income reached a new high of $3,701,000, a 93.9 percent increase over last year's $1,909,000 and the 12th consecutive quarterly increase since the company's initial public offering in

September 1987. Client billings totalled $30,036,000, a 39.5 percent increase over last year's $21,528,000.

For the first nine months of 1990, net income totalled $7,124,000, or 73 cents per share, a 44 percent increase over the $4,949,000, or 51 cents per share, Centex earned in the same period of 1989. Operating income rose to $9,862,000, an 86.2 percent increase over last year's $5,296,000. Client billings reached $83,636,000, a 38.9 percent increase over last year's $60,228,000.

Commenting on these results, Peter A. Howley, Centex's chairman, president and chief executive officer, stated, "We are very pleased with our financial and operational performance in the third quarter and year to date. Efforts initiated in 1989, particularly the development of new value added services have been instrumental in our year to date growth. More importantly, they greatly broaden our ability to serve as a comprehensive single point of contact for small and medium-sized companies."

Howley credited Centex's record third-quarter performance to several key efforts undertaken in 1989. "Last year we made a significant investment in improving client services and strengthening our internal staffing and management tools in preparation for growing our business beyond the $100 million mark. That investment is clearly paying off in 1990."

Centex served a record 8,893 clients at the end of the third quarter of 1990, a 34.4 percent increase over the same quarter of last year. During the quarter the company opened a new branch office in Philadelphia, its first branch in Pennsylvania, raising to 16 the total number of Centex branches nationwide. Thirteen of the 16 branches were profitable, before allocation of corporate overhead, at the end of the third quarter, including four of Centex's seven branches outside California. Howley added, "The exciting potential of our Eastern Region is just beginning to be seen. California, of course, remains a huge attractive growth market."

Centex Telemanagement Inc. is a pioneer in providing comprehensive telecommunications management services to small and medium-sized businesses. Centex provides a single point of contact for smaller businesses, which face increasing complexity and confusion resulting from the expanding number of local and long-distance telecommunications options.

Centex analyzes the telecommunications needs of its clients and selects the best mix of services from various third-party providers to be shared by its clients under Centex management. In exchange for a management fee, Centex also provides a broad range of sophisticated management services, such as call accounting and voice messaging. Centex clients generally receive these high-quality telecommunications services at significant cost savings. Centex currently serves over 8,800 clients through 16 branch offices in seven states.

MENLO PARK, CALIF. (OCT. 31) PR NEWSWIRE - Mediagenic (NASDAQ: MGNC) today announced that it has reached an agreement in principle with a group led by EGL Holdings to sell ZSoft Corp., a wholly owned subsidiary of Mediagenic. EGL Holdings, an Atlanta-based venture capital firm, will acquire the assets and certain identified liabilities of ZSoft for approximately $3.8 million in cash.

Under the terms of the agreement, Mediagenic will continue to manufacture and distribute ZSoft products for a period to be negotiated. Mediagenic and EGL Holdings anticipate completing the transaction by the end of November. This transaction is subject to the approval from the Board of Directors of both Mediagenic and EGL Holdings. Upon closing the transaction, Mark Zachmann, ZSoft's founder and president, will dismiss his lawsuit against Mediagenic which was filed earlier this year. Zachmann is a participant in the buying group and plans to continue as president of the ZSoft business after closing.

Atlanta-based ZSoft Corp. is a leading publisher of IBM graphics utilities software for MS-DOS and Windows. ZSoft was acquired by Mediagenic in October 1988. In September of last year, Mediagenic discontinued its Apple-compatible business products division. With the divestiture of ZSoft, the company's restructuring to focus soley on IBM-compatible entertainment software and Nintendo video games will be completed. According to Bruce Davis, chairman and CEO of Mediagenic, the decision to sell ZSoft and concentrate only on entertainment software is substantially motivated by the company's need to improve its working capital position and direct its resources to improving its competitive position in certain significantly profitable segments of the entertainment software market.

The ZSoft transaction follows the announcement last month of an agreement between Mediagenic and Philips Consumer Electronics Company (PCEC), providing for an 18-month postponement in payment of the patent infringement damages awaarded earlier this year.

Headquartered in Menlo Park, Mediagenic is an international developer and publisher of entertainment software for IBM-compatible computers and Nintendo video game systems. The company publishes its cartridge, floppy-disk and CD-ROM titles under the Activision, Electric Dreams and Infocom brands and serves as an exclusive distributor for products from Absolute Entertainment and Interplay Productions.

HARTSVILLE, SC (OCT. 31) PR NEWSWIRE - Alexander "Alex" Watson has joined Sonoco Products Company (NASDAQ-NMS: SONO) as senior vice president, announced C.W. Coker, chairman and chief executive officer.

"We are very pleased to have Alex join our company. He has outstanding credentials within the packaging industry worldwide. His expertise will add significant depth to Sonoco's management team," said Coker.

Alex Watson, formerly Director General of CMB Packaging S.A., will be responsible for the continuing development of Sonoco's global growth strategy and the company's business development program, including acquisitions.

"I am looking forward to my association with Sonoco, a packaging company which has both the financial capability and management commitment for growth. The packaging industry remains highly fluid and can provide significant opportunities for expansion to a company with the reputation for quality and integrity Sonoco has earned," said Watson.

He was an Executive Director of Metal Box plc when it merged its packaging businesses with Carnaud S.A. to form CMB Packaging in 1989. CMB Packaging is currently the world's third largest packaging company.

He joined Metal Box in 1964 and held a variety of positions. While executive director of Metal Box, he was responsible for that company's packaging interests in Europe, Asia, the Pacific, North and South America.

Currently, Watson is non-executive director, Multinational Business Developments. He will retain this position. In addition to these business interests, Watson serves as vice president-Institute of Packaging in the United Kingdom, member of the Marketing Group of Great Britain, and a member of the Ad Hoc Council of the European Government Business Relations Council.

He has a B.A. and M.A. degree from Emmanuel College, Cambridge. He attended Bath University and completed the advanced management program at the Harvard University Business School in 1986. He is a frequent speaker on packaging-related topics at conferences and seminars around the world.

Watson and his family reside in Chalfont-St.-Giles, England. He will continue to be based in London.

Sonoco is a major manufacturer of industrial and consumer packaging products with more than 15,000 persons employed at operations in 20 countries.

#90304p1639 10/31/1990 ~PR Newswire

DETROIT (OCT. 31) PR NEWSWIRE - General Motors Corporation (NYSE: GM) earned $109 million in the third quarter of 1990, before a special restructuring charge to bring its cost structure more in line with the projected level of North American operations, Chairman Robert C. Stempel reported today. Including the special charge of $2.1 billion after taxes, General Motors recorded a net loss of $2.0 billion. In the third quarter of 1989, GM earned net income of $517 million. GM sales and revenues totaled a record $30.8 billion in the third quarter of 1990, compared to $28.8 billion in the comparable quarter of 1989.

The one-time charge after taxes of $2.1 billion for the special restructuring is primarily attributable to redundant facilities and related employment costs. The special charge comprehends the closing of four previously idled U.S. assembly plants (C-P-C Framingham, Mass.; Lakewood, Ga.; Pontiac, Mich.; and B-O-C Leeds, Mo.). It also includes provision for other North American manufacturing and warehouse operations which will be consolidated or cease operating over the next three years. GM has previously advised the respective employee and union representatives of the status of these operations. The charge has no impact on the corporation's cash flow.

In the third quarter of 1990, the profit performance of GM's overseas operations (excluding Brazil) continued at a near record level. The corporation's three major subsidiaries, General Motors Acceptance Corporation (GMAC), Electronic Data Systems Corporation (EDS), and GM Hughes Electronics Corporation (GMHE), made significant contributions to 1990 third-quarter net income. The corporation benefited from higher worldwide unit volume and higher productivity in the quarter which was more than offset by higher sales allowances in North America, reflecting the increasingly competitive marketplace.

Reflecting the special charge, General Motors registered a 1990 third-quarter net loss of $3.54 per share on $1-2/3 par value common stock. Before the special charge and the technical attribution of additional earnings to Class E and Class H common stocks not required in 1989, the corporation earned $0.02 per share. In the third quarter of 1989, the corporation earned $0.72 per share.

Since Electronic Data Systems Corporation was acquired by General Motors in October 1984, the subsidiary has reported increased third- quarter earnings for five consecutive years. Reflecting the continuing strong growth of its business, EDS reported record 1990 third-quarter earnings of $128 million, up from $111 million in 1989. Third-quarter earnings attributable to Class E common stock rose to a record $0.54 per share, up from $0.46 per share in the third quarter of 1989.

In the third quarter, worldwide factory sales of vehicles to GM dealers totaled 1,767,000 units -- up 4.1 percent from the same period in 1989.

During the 1990 period, total U.S. industry retail sales were 10.0 percent below the third quarter of 1989. GM dealers in the U.S. sold 1,274,936 cars and trucks in the 1990 third quarter -- down 10.3 percent from the year-ago level of 1,421,440 total vehicles. Despite lower U.S. industry sales in the 1990 calendar year through September, General Motors is the only domestic manufacturer to have outperformed the market and increased its U.S. market share for cars, for trucks and total vehicles.

ST. LOUIS (OCT. 31) PR NEWSWIRE - Jones Medical Industries, Inc. (NASDAQ: JMED) today announced a 64-percent increase in net income on a 45-percent sales increase for the third quarter ended Sept. 30, 1990, compared to the same quarter of 1989.

Net income rose to $607,000, or 15 cents per share, on sales of $4,651,000, for the three months ended Sept. 30, 1990, compared with $369,000, or 11 cents per share, on sales of $3,208,000 for the same period of 1989. Average shares outstanding were up sharply to 4,131,494, at Sept. 30, 1990, as a result of a July 19, 1990, public offering of 750,000 shares compared to 3,454,550 a year ago.

For the nine months ended Sept. 30, 1990, net income grew 86 percent to $1,668,000, or 45 cents per share, on sales of $13,751,000, a 57-percent increase. These results compared with net income of $895,000 or 26 cents per share on sales of $8,778,000 for the same period of 1989. Average shares outstanding at Sept. 30, 1990, were 3,746,177 compared to 3,454,550 a year ago.

Chairman Dennis M. Jones commented, "The accomplishments made during the third quarter were very significant. First, we completed our first full four quarters with Thrombinar(R) and Panthoderm(R), acquired from The Rorer Group (RPR) in September 1989, with more than $6 million in sales of these two new Jones Medical products. This represented approximately a 20-percent increase in sales of these products, over the prior twelve months.

"Secondly, 'trailing 12 months' results at Sept. 30, 1990, were $18,295,000 in sales; $2,367,000 in net income, or 65 cents per share; compared to $11,817,000 in sales; $1,242,000 net income, or 36 cents per share a year ago, a 55-percent increase in sales and a 91-percent increase in net income.

"Thirdly, we completed a secondary offering of common stock, which provided approximately $9 million of new equity capital, with which to recapitalize our

balance sheet and prepare for our next acquisitions.

"An impressive third quarter indeed, but on to the future. In view of the above results, it is especially appropriate to reiterate our recently established goal of taking this young, dynamic company to $100 million in sales by 1995. To do so, we must continue to actively pursue acquisitions of synergistic product lines and operating companies. At the present time, we are as active as ever with increasing opportunities, as the result of our greater financial strength, our growing visibility as a vibrant public company and the rapid consolidation ongoing in the pharmaceutical industry. We are therefore confident that we will soon add to our uninterrupted string of eight synergistic and well-timed acquisitions of the past eight years."

#90304p1643 10/31/1990 ~PR Newswire

PRINCETON, N.J. (OCT. 31) PR NEWSWIRE - Cytogen Corp. (NASDAQ: CYTO) announced today it has received authorization under the U.S. Food, Drug and Cosmetic Act to begin human clinical evaluation of three cancer imaging products covered under two Investigational New Drug (IND) applications.

The first IND is for CYT-372, an additional monoclonal antibody- based imaging agent for colorectal cancer. The second IND is for CYT-380, a monoclonal antibody fragment which initially will be evaluated as an imaging agent for breast and non-small cell lung cancers.

CYT-372 will be marketed as OncoScint(R) CR372 and is a product line extension of OncoScint CR103, which is one of the company's two products currently awaiting FDA marketing approval. CYT-380 will be marketed under the trademark OncoTc and represents the first products Cytogen will evaluate in humans that use technetium-99m as the diagnostic isotope.

In commenting on these new products, Cytogen Corp.'s executive vice president, Thomas J. McKearn, M.D., Ph.D., said, "The use of antibody fragments is preferable for imaging breast and lung cancers because the background radioactivity will clear the blood pool more quickly and allow the involved lymph nodes to be visualized. Technetium-99m is the isotope of choice in such applications. We have developed a very user- friendly procedure for chelating technetium when preparing these products." He also noted, "Cytogen is the only biotechnology company that has developed chemistries for using both indium and technetium in its cancer imaging franchise, giving us a tremendous advantage in developing products for a variety of applications."

Cytogen Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in order to optimize the function of the antibody as a delivery vehicle. With major emphasis on human cancer, current product development efforts at Cytogen are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

NEW YORK (OCT. 31) PR NEWSWIRE - More than 300 companies are shipping products based on UNIXR System V Release 4 this year, encompassing a full range of advanced systems and software, UNIX International announced today at the UNIX Expo show.

The market unification brought about by the introduction of Release 4 last year, leading to this year's product shipments, has resulted in the emergence of a large and growing System V Release 4 market.

The audit conducted by UNIX International (UI) registers a total of 323 vendors shipping Release 4 products in 1990. An analysis of UI members shows that all of UI's principal members and 75 percent of its general members either are now shipping product or are committed to in the near future. In addition, many firms outside UI's membership also indicated product availability this year.

A geographic breakdown indicates nearly equal numbers of vendors based in the Americas (144) and Europe (158). The remaining 21 firms are Asian companies, and include most of the Asia/Pacific open systems vendors. According to the survey, the 323 vendors represent more than 750 applications and system products that will reach the marketplace this year and are designed to take advantage of enhancements in Release 4.

Worldwide, more than two-thirds of major open system vendors will have product

available based on System V Release 4. Key companies include ICL, Olivetti, Philips and Siemens/Nixdorf (formerly Siemens) in Europe; Fujitsu, NEC, Oki and Toshiba in Asia; and AT&T, Motorola, NCR and Sun Microsystems in the United States.

Many Independent Software Vendors (ISVs) with applications running on proprietary systems are capitalizing on the new markets by migrating their applications to platforms running UNIX System V Release 4. In UNIX International's ISV program alone, some 200 software developers already have begun migration to Release 4 in the less than four months since it was launched.

Van Aggelakos, vice president of NCR Corporation, described the survey results as signifying the emergence of an enlarged marketplace and broad market presence for SVR4.

When introduced in November 1989, System V Release 4 united more than 80 percent of the installed base, then some 10 million UNIX systems users. That market, now estimated at more than 16 million, is currently the fastest growing sector of the industry.

UNIX International is a nonprofit organization responsible for directing the evolution of UNIX System V. Founded in December 1988, its growing membership now numbers more than 180 users, software vendors, systems vendors, value-added resellers, standards bodies, academic institutions and government bodies worldwide.

#90304p1652 10/31/1990 ~PR Newswire

WILMINGTON, DEL. (OCT. 31) PR NEWSWIRE - Beneficial Corporation (NYSE: BNL) today reported third quarter earnings of $32.6 million, up 5 percent from earnings of $31.0 million in the third quarter of 1989. Reflecting a reduced preferred dividend requirement this year, earnings per share increased 10 percent to $1.40 from $1.27 in the 1989 period, and represented Beneficial's fifteenth consecutive quarter of increased core operating earnings per share on a year-to-year basis.

For the first nine months, earnings increased 10 percent to $98.1 million from $89.3 million in the first nine months of 1989. Earnings per share rose 16 percent to $4.22 from $3.65 in 1989.

Total receivables at Sept. 30 were $7,453 million, up $219 million during the third quarter, compared to a gain of $94 million during the third quarter of 1989. Removing the distortive impact of foreign exchange translation in both

periods, and the sale of a $21 million credit card portfolio in the United Kingdom during the 1989 period, receivables outstanding increased $185 million in this year's quarter, compared to a comparable gain of $89 million in 1989's third quarter.

For the nine months, receivables increased an excellent $552 million, up from a gain of $282 million in the 1989 period. Removing the impact of foreign exchange translation in both years, the 1990 gain was $497 million, up from $313 million in 1989. Strongest growth continued in high-quality real estate secured loans, which now total more than $4.6 billion, 63 percent of the total portfolio.

Credit quality continues healthy by any historical measure, despite a marginal increase in the net chargeoff percentage for the quarter. Third quarter net chargeoffs rose to $23.0 million, up from $19.6 million in the 1989 quarter. As a percentage of average receivables, net chargeoffs increased modestly to 0.30 percent of the portfolio from 0.28 percent in the 1989 period.

For the nine months, net chargeoffs increased to $71.0 million, or 0.95 percent of average receivables, up from $57.4 million, or 0.82 percent of average receivables, in the first nine months of 1989. Annualized, the nine month net chargeoff ratio equates to 1.27 percent, well in line with the company's operating plans going into the year. At Sept. 30, the reserve for credit losses was 2.98 percent of receivables, covering annualized nine month net chargeoffs 2.3 times, an extremely conservative ratio by industry standards.

Contractual loan delinquency continues significantly lower on a year-to-year basis. At Sept. 30, all loan and sales finance balances delinquent two months and greater improved to 3.64 percent of outstandings, down from 4.77 percent at Sept. 30, 1989 but up modestly from 3.45 percent at June 30, 1990.

Beneficial Corporation provides financial services through its various subsidiaries located throughout the United States and in Canada, the United Kingdom and Germany. The 1,074 offices comprising the Beneficial Finance System meet a broad range of consumer credit needs. In addition, consumer credit related insurance is the major thrust of Beneficial's insurance subsidiaries.

MADISON HEIGHTS, MI (OCT. 31) PR NEWSWIRE - Code-Alarm, Inc. (NASDAQ: CODL), leading manufacturer of vehicle alarms and home-security systems, announced today that earnings for the third quarter ending Sept. 30, 1990 will not meet analysts' expectations.

Rand Mueller, president and CEO of Code-Alarm, stated, "Consolidated sales for the quarter ended Sept. 30, 1990 are generally in line with expectations and are significantly ahead of net sales for the same period last year. However, operating results at Tessco Group Inc., Code-Alarm's contract manufacturing subsidiary, were substantially below management's expectations." Mueller added, "Softness in the retail automotive sector resulted in margins that were lower than anticipated.

Code-Alarm expects to release third-quarter results soon.

PASADENA, CA (OCT. 31) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) today announced receipt of a contract from the U.S. Postal Service to provide engineering services for new general mail and vehicle maintenance facilities at Santa Clarita, Calif.

The facilities, to be situated on a 65-acre site in the Santa Clarita Valley, will cover approximately 780,000 square feet and will cost an estimated $71 million. The new facilities will serve residents of the northern San Fernando Valley in Los Angeles County -- including the cities of Van Nuys, Ventura, Northridge, Reseda, and Granada Hills.

Jacobs' contract calls on the Pasadena-based engineering and construction firm to supply all architectural and engineering design services, with an option to provide supplemental design services during construction. Jacobs' design work is scheduled for completion in September 1991, to be followed by 26 months of construction activity.

The award follows the recent completion by Jacobs of the 502,000- square-foot Alhambra General Mail Facility and Warehouse in the City of Industry, Calif., and similar facilities for the Postal Service in Bakersfield, Calif.

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural, construction, construction management and maintenance, and operations services to government and industry worldwide.

ST. PETERSBURG, FLA. (OCT. 31) PR NEWSWIRE - Medcross, Inc., (NASDAQ: MDCR)

said today it has hired a Florida firm, Clearwater-based Investor Relations Consultants, Inc., (IRC) to assist Medcross in communicating with the investment community.

Medcross President Robert M. Irvin said IRC's initial assignment will be to advise Medcross on ways to communicate its evolving business strategy to brokers and investors.

"As a young company in a diversified industry, we need to make sure that our financial goals and means of achieving them are well understood by our shareholders and those who influence investment decisions. IRC, the most experienced firm of its kind in the Southeast, specializes in helping companies like ours tell our story in the right way to those who need to hear it," Irvin said.

Medcross specializes in assisting hospitals and physicians acquire and operate advanced medical equipment and facilities. Its services include kidney-stone and gall-stone treatment equipment and facilities; computerized tomography; and management of ambulatory surgical and diagnostic imaging centers. Medcross is recognized for being one of the first providers of mobile renal lithotripsy units in the United States.

In addition, the company is presently seeking acquisitions for diversification and growth purposes.

BOSTON (OCT. 31) PR NEWSWIRE - At a meeting held for securities analysts here today, Teradyne, Inc. (NYSE: TER) announced the introduction of a new VLSI Test System, the J971, capable of testing integrated circuits having up to 512 pins at speeds up to 200 megahertz. The company also announced the receipt of orders totaling $15 million for the system, with letters of intent for an additional $10 million, from seven companies. Customers include Inmos, Matsushita Electric, MIPS Computer, Motorola, Sharp, a major U.S. computer manufacturer, and a major Japanese electronics company. The first systems are scheduled to be shipped in the first quarter of 1991.

Introduced concurrently in the United States, Japan, and Europe, the J971 will test microprocessors, advanced RISC processors, microcontrollers, digital signal processors, and high performance ASIC devices. The system is available in various configurations to provide optimum price/performance ratios over a wide range of applications, according to Ed Rogas, vice president and general manager of Teradyne's Semiconductor Test Division, which will produce the system at its plant in Agoura Hills, Calif. System prices start at $600,000.

BUFFALO, N.Y. (OCT. 31) PR NEWSWIRE - Comptek Research, Inc. (AMEX/BSE: CTK) will continue to provide development and support services for the Joint Tactical Information Distribution System, or JTIDS, under a new five-year contract awarded by the U.S. Navy's Fleet Combat Direction Systems Support Activity, located in Dam Neck, Va.

Comptek is an incumbent contractor on the JTIDS program, which is a multi-function information distribution system for air, surface and subsurface

platforms. The system is designed to provide jam-resistant communications during coordinated combat operations. The company has worked on JTIDS since 1980.

The five-year contract, which is effective immediately, has a value ceiling of $7.8 million in the first year, with $31.4 million in follow- on option years. Traditionally, the company has received $2-3 million in revenues annually from this contract. Comptek's JTIDS work involves about 50 employees in the Buffalo-based firm's offices in Virginia Beach, Va. Under this contract, the company furnishes to the Navy engineering services to analyze and provide independent verification and validation for the computer software and documentation utilized by this sophisticated communications system.

"Comptek prides itself on providing high-quality, cost-effective services in command, control, communications and intelligence," commented Dr. John R. Cummings, Comptek's chairman. "I am particularly pleased that we have been selected to continue work on this important tactical system, which is vital to effective military operations in today's global political environment."

Comptek Research, Inc., with 13 offices and subsidiary locations in the United States, develops command, control, communications and intelligence systems and electronic warfare systems, primarily for the Department of Defense. Related activities include providing specialized technical services and manufacturing precision electronics.

SMITHTOWN, N.Y. (OCT. 31) PR NEWSWIRE - United-Guardian, Inc. (AMEX: UG) today announced that its major division, Guardian Chemical, has been renamed Guardian Laboratories to more accurately reflect its current operations, particularly in view of the recent issuance of U.S. patents on its solvent for certain types of kidney stones, a non- staining iodine for surgery, as well as the development of a non- antibiotic for the treatment of mastitis in dairy cows, which does not cause contamination of the milk.

"Our Guardian Laboratories division has established alliances with a number of major pharmaceutical companies for several of our products to initiate broad marketing support," observed Alfred Globus, chairman and CEO, United-Guardian, Inc. He said the division is expected to earn almost $.30 per share pre-tax during the next fiscal year.

Guardian Laboratories is also involved in the development and manufacturing of a 100 percent degradable, waterproof plastic film. Its uses would include

waterproof coatings for paper shopping and trash bags, which would be fully biodegradable.

United-Guardian, Inc. develops and manufacturers pharmaceuticals, specialty and fine chemicals, and cosmetic bases for a wide range of industries. The Guardian Chemical name had been in use since 1952; and the division has long had a reputation for strong research and new product development.

LOS ANGELES (OCT. 31) PR NEWSWIRE - Trust Co. of the West (TCW) announced today the following management promotions: Jeffrey E. Gundlach has been named senior vice president; Barry Kurokawa and Brian T. Mahoney have been promoted to vice presidents.

Gundlach joined TCW in 1985 and has served as vice president in mortgage-backed securities and specialized cash and as vice president of fixed

income. Prior to joining TCW, he served as senior loss reserve analyst in the finance department of Transamerica Corp. He holds a bachelor of arts degree in mathematics and philosophy from Dartmouth College and attended Yale University.

Kurokawa, newly promoted to vice president of equities research, was previously assistant vice president. He joined TCW in 1987 as an equities research analyst. He was an analyst and portfolio manager at the Bank of California prior to joining TCW. He received a bachelor of science degree in business and finance from California State University at Los Angeles and an master of business administration from Loyola Marymount University.

Mahoney, who served as assistant vice president in the special placement area joined TCW in 1989, was promoted to vice president. He also served as an associate at J.P. Poindexter & Co., and as a financial analyst at Morgan Stanley. He holds a bachelor of arts degree from Williams College and a master of science degree in accounting from New York University.

Trust Co. of the West, headquartered in Los Angeles, is among the West's largest independent trust companies, with approximately $20 billion currently under management.

RICHMOND, BRITISH COLUMBIA (OCT. 31) PR NEWSWIRE - Great Canadian Office Supplies Warehouse, Canada's first warehouse-style office supplies and equipment superstore chain announced today the grand opening of its location in Victoria, British Columbia.

George J. Handgis, president and chief executive officer, stated, "With this warehouse opening in Victoria, British Columbia, Great Canadian Office Supplies Warehouse will continue its transformation of office products retailing in Canada. Canadian businesses and individual consumers have paid too much for too long for quality, brand name office-related products. Great Canadian's rising sales volume and market share validate our deep discount approach to the Canadian office product market."

Handgis added, "The success that we have experienced in the early stages of our expansion is a direct result of our merchandising, our excellent locations and the dedication of our employees."

Stephen E. Capasso, executive vice president and chief operating officer, added, "Great Canadian is well-positioned for whatever turn the Canadian economy takes in the coming months and years. Should a recession occur, we

believe that small- and medium-sized businesses and individual consumers will seek retailers which offer the greatest value. No other office product retailer in Western Canada can match Great Canadian's combination of selection prices, quality and service."

A one-stop resource for small- to medium-sized businesses and individual customers, Great Canadian Office Supplies Warehouse offers over 7,000 business-related products at discounts of up to 70 percent off retail prices recommended by manufacturers or listed by other retailers. In addition to a wide selection of quality, brand name office products, including supplies, business machines, office furniture, computers and computer software, Great Canadian features complete business service centers offering copying, printing, mailing, and FAX services. The company anticipates opening up to 10 warehouses in Canada by 1991.

KAILUA-KONA, HAWAII (OCT. 31) PR NEWSWIRE - Cyanotech Corp. (NASDAQ: CYAN) today announced its second consecutive quarterly profit for the quarter ended Sept. 30, 1990. This follows a seven- year history of operating losses for the company. Net income for the third quarter of 1990 was $75,000 on total revenues of $548,000. Product sales for the third quarter of 1990 increased 58 percent from the comparable quarter in 1989 which was partially offset by a decrease in research contract revenue. For the first nine months of 1990, product sales have increased 35 percent over the same period in 1989. Net loss for the nine months ending Sept. 30, 1990 was $75,000 due to a poor first quarter. This compares to losses of $773,000 incurred in the similar period in 1989.

"I am very pleased with our third quarter results," said Dr. Gerald R. Cysewski, president and chief executive officer. "Especially since we experienced one-time expenses for closure of our Woodinville operation and consolidation of the company's operation in Kona, Hawaii. The consolidation was completed under budget and 45 days ahead of schedule." Management believes that the consolidation of the company's operation in Kona should result in operating cost reductions and increased organizational efficiency.

Cyanotech's improved financial performance is the result of focused production and marketing efforts, decreased operating expenses and increased sales of its higher margin phycobiliproteins products. For the nine months ended Sept. 30, 1990, total operating expenses were down 21 percent while total revenue was up by 16 percent compared to the same period in 1989. Gross margins on product sales have increased from those achieved in 1989.

As in the second quarter of 1990, the company remains in a tight cash flow position. Focused efforts have increased Spirulina production 80 percent over original capacity estimates for the Kona facility. Sales continue to increase but have not yet equalled the rapid ramp up of production. The company hopes to balance Spirulina sales and production by year end.

Cyanotech charted a new direction with financial restructuring and management reorganization during the first quarter of 1990. Cyanotech is now a major world supplier of both Spirulina, a nutritional product, and phycobiliproteins fluorescent pigments used in medical research. "The positive effect of Cyanotech's new structure and direction is now very evident," states Dr. Cysewski.

#90304p1677 10/31/1990 ~PR Newswire

ARLINGTON, VA (OCT. 31) PR NEWSWIRE - Columbia First Bank, a Federal Savings Bank (NASDAQ: CFFS) today announced results for the year and quarter ended Sept. 30, 1990.

For the year, the bank reported a net loss of $2.9 million ($1.01 loss per share) compared to net income available to shareholders of $27,000 ($0.01) income per share) for the 12 months ended Sept. 30, 1989.

For the quarter, the bank reported a net loss of $5.3 million ($1.83) loss per share) compared to a net loss of $438,000 ($0.15 loss per share) for the same quarter of 1989.

The $3.0 million decline in earnings during the fiscal year ending Sept. 30, 1990, from the previous year resulted from a $13.9 million increase in the provision for loan losses offsetting a $3.9 million improvement in net interest income, $2.8 million recovered in settlement of insurance claims and litigation, and $3.4 million in gains recognized on extinguishment of debt.

The bank's operating results during fiscal year 1989 included $4.5 million in legal and other expenses associated with the 1989 annual meeting and related litigation and a $4.5 million gain on sale of FHLMC stock.

The $4.9 million decline in fourth quarter results from the previous year period was caused by an $11.2 million increase in the provision for loan losses offsetting a $1.8 million improvement in net interest income and gains recognized on extinguishment of debt totaling $2.8 million.

The increased provision for loan losses reflected the continued deterioration of the Mid-Atlantic region real estate market and increased loan balances in certain loan portfolio segments. The allowance for loan losses at year-end is $10.3 million representing .71 percent of total loans.

Residential mortgages and loans used in the "Qualified Thrift Lender Test" formula equals 87 percent of Columbia First's total loan portfolio as of Sept. 30, 1990. Delinquency in this category is significantly less than local and national figures. The bank's total loan portfolio as of fiscal year-end was $1.4 billion.

Columbia First Bank currently operates 27 banking offices and five loan origination offices in Virginia, Maryland, and the District of Columbia, with total assets of $2.1 billion. The bank's capital base exceeds all current Office of Thrift Supervision requirements.

#90304p1680 10/31/1990 ~PR Newswire

HAMILTON, MN (OCT. 31) PR NEWSWIRE - Ribi ImmunoChem Research Inc. (NASDAQ: RIBI) announced today its financial results for the third quarter and nine months ended Sept. 30, 1990.

Sales revenues for the third quarter of 1990 increased 56 percent achieving $227,808 as compared to $146,369 in the third quarter of 1989. Total revenues as a result of higher sales, increased 24 percent in the third quarter of 1990, achieving $339,817 as compared to $273,033 for the third quarter of 1989.

The net loss for the third quarter of 1990 decreased to $533,194 or $.06 per share, compared to $703,488 or $.08 per share in the third quarter of 1989.

Sales revenues for the nine months ended Sept. 30, 1990, increased 35 percent, achieving $747,908 as compared to $552,624 in the comparable period in 1989. Total revenues increased 10 percent in the nine months ended Sept. 30, 1990, achieving $1,055,309 as compared to $960,278 for the comparable period in 1989 despite lower investment income.

The net loss for the nine months ended Sept. 30, 1990, decreased to $1,778,878 or $.20 per share, compared to a net loss of $2,125,789 or $.24 per share for the comparable period in 1989.

"Our 1990 third quarter and nine month financial results are very satisfactory and surpassed our expectations," said Robert E. Ivy, chief executive officer, president and chairman. "Strict money management, increased ales revenues and interest earnings from a $1 million equity infusion by S.R. One Ltd. in June allowed us to limit our cash burn to $455,700 in the third quarter, compared to $515,300 and $583,300 in the first and second quarters of 1990."

#90304p1699 10/31/1990 ~PR Newswire
PITTSBURGH (OCT. 31) PR NEWSWIRE - National Steel Corp. today reported a net profit of $11.4 million for the year's third quarter, bringing net profits for the first nine months of the year to $20.3 million.

Net profit for the third quarter and first nine months of 1989 was $12.6 million and $54.8 million, respectively.

Net sales for the third quarter of 1990 were $633.8 million compared to $609.1 million in the same 1989 period. For the first nine months, sales approximated the $1.9 billion of the previous year.

Net income for the third quarters of 1990 and 1989 was favorably impacted by extraordinary credits which represent tax benefits from net operating loss carryforwards not previously recognized of $.5 million and $3.4 million, respectively. Earnings for the first nine months of the two years benefitted similarly from such extraordinary credits of $2.7 million and $15.0 million.

Looking ahead, Hagiwara expressed concern over the softening domestic and world economies and the increased cost pressures being exerted as a result of the Mideast crisis. "We had initially expected that the economy would grow stronger during the second half of 1990," Hagiwara said. "The effects of the

situation in the Mideast have clouded the economic picture for late 1990 and early 1991."

National's chief executive also noted that he anticipates an adverse impact on fourth quarter earnings as the result of a mine fire that has forced the temporary sealing of the Mathies coal mine in Finleyville, Pa.

National Steel Corp. is the nation's fifth largest steelmaker with production facilities in Ecorse, Mich., near Detroit; Portage, Ind., near Chicago; and Granite City, Ill., near St. Louis. The company is headquartered in Pittsburgh and employs about 12,000 people. It is owned 70 percent by NKK Corp. and 30 percent by National Intergroup Inc. (NYSE: NII). In 1989, National Steel shipped 4,957,000 tons of steel and had sales of $2.6 billion.

#90304p1702 10/31/1990 ~PR Newswire

NORTHBROOK, ILL. (OCT. 31) PR NEWSWIRE - Woodhead Industries Inc. (NASDAQ: WDHD) announced today that a review of preliminary results indicates that revenues and earnings will be reported at record levels for the fiscal year ended Sept. 29, 1990.

Commenting on the company's performance, Alan Reed, chairman and chief executive officer, said "We expect that our earnings per share for the year will exceed $1.50 -- up from $1.36 last year. We are especially pleased with Woodhead's strong performance in our fourth quarter, since that has been a seasonally weak time for our industry. The softening economy is clearly having a negative impact on the performance of most industrial companies but our growth trend of recent years has continued. We have the advantage of participating in market niches that are experiencing growth and that are not highly sensitive to broad economic trends. In addition, our product lines are increasingly focused on high-margin, value-added products; we have discontinued many of the less profitable commodity products that were mainstays just a few years ago and that provides a real boost to earnings."

Final audited financial results for Woodhead's 1990 fiscal year will be released in mid-November. For the nine months ended June 30, 1990 the company reported net sales of $55 million, net income of $3.7 million and earnings per share of $1.14. Earnings per share for the trailing 12 months ended June 30, 1990, were $1.49; revenues for the 12- month period were $72 million.

Woodhead Industries Inc. is headquartered in Northbrook, Ill. The company develops, manufactures and markets specialty electrical devices and motion control products with a broad range of industrial applications.

NEW YORK (OCT. 31) PR NEWSWIRE - Ogden Corporation (NYSE: OG) announced today that its Fairfax, Va.-based subsidiary, OGDEN/ERC Government Systems, was awarded an $8 million, 3-year contract by the Naval Air Systems Command (NAVAIR) to provide systems engineering, analyses and related services to its AIR 713 Information Resources Management Division.

Under the contract, ERC will perform engineering and analytical services supporting the development, testing, operation and maintenance of various Naval Air weapons systems, subsystems, components and associated support systems. Among those to be supported will be the F-14, F-18, AV-8, A-6, JVX, Sh-60B, P-3 and E-2 aircraft; the Harpoon, Phoenix, Sidewinder and Sparrow missile systems. Examples of specific systems include automated aircrew escape, petroleum utilization, data processing and monitoring, manpower, weapons and navigation.

ERC will analyze and simulate systems effectiveness, hardware reliability and maintainability, aircraft availability and capability in performing current and future missions -- to identify problem areas and recommend solutions. ERC will also provide software systems analyses and/or computer programming supporting technical and managerial functions.

OGDEN/ERC Government Systems serves government and industry clients in the defense and space technologies, software and systems engineering and engineering and support services markets worldwide.

#90304p1711 10/31/1990 ~PR Newswire

WHITE PLAINS, N.Y. (OCT. 31) PR NEWSWIRE - Eastchester Financial Corporation (NASDAQ: ECFC), holding company for Eastchester Savings Bank, today reported a net loss of $6.0 million or $1.54 per share for the quarter ended Sept. 30, 1990. This compares to the net income of $407,000 or $0.10 per share for the comparable quarter for 1989.

For the nine months ended Sept. 30, 1990, the net loss was $6.2 million or $1.60 per share as compared with net income of $3.4 million for the comparable 1989 period, which includes the results of the company and the bank prior to the bank's conversion from mutual to stock ownership in April 1989.

The decline in earnings this quarter, and for the nine month period ended Sept. 30, 1990, is principally attributable to an increase of $5.4 million and $8.1 million in the provision for loan losses, as compared to the prior year periods, and to a lesser extent, professional fees related primarily to the company's proposed acquisition by North Fork Bancorporation and charged to earnings during the three and nine month periods ended Sept. 30, 1990. "We continued to increase our allowance for loan losses as a result of the further deterioration of the real estate market in our area," said Malcolm J. Delaney, president and chief executive officer.

The third quarter provision increases the allowance for loan losses to $9.1 million or 2.7 percent of total loans compared with $1.7 million or .48 percent of loans at Dec. 31, 1989. On an annualized basis net charge-offs, as a percent of loans, were .77 percent and 0 percent for the first nine months of 1990 and 1989, respectively. The level of non- performing assets in the 1990 third quarter was $25.2 million or 4.9 percent of total assets as compared with $20.5 million or 3.9 percent of total assets at June 30, 1990.

Net interest income for the three months ended Sept. 30, 1990 increased to $4.5 million from $4.4 million for the comparable 1989 figure. The increase in net interest income resulted from an increase in yields on interest earning assets and a decrease in the company's cost of funds, partially offset by lost interest on non-performing assets.

Other operating expenses increased to $3.2 million during the third quarter of 1990 versus $2.4 million for the comparable period of 1989. This increase resulted primarily from higher professional fees, including $500,000 related to the merger.

Total assets equalled $516.9 million at Sept. 30, 1990, while deposits

totalled $435.3 million. Stockholders' equity was $71.8 million representing 13.9 percent of total assets. "Our strong capital position provides a distinct competitive advantage over our peers and gives us flexibility in dealing with problems in these difficult economic times," said Delaney.

Eastchester had previously announced on Oct. 8, 1990, a revised agreement with North Fork Bancorporation providing for the acquisition of Eastchester at $15.50 per share, subject to regulatory approval. The revised agreement also allows Eastchester, until Nov. 16, 1990, to solicit or receive inquiries from any other parties interested in the possible acquisition of the company and, as appropriate, to provide information to and enter into discussions and negotiations with such parties in connection with any such indicated interest. That announcement on Oct. 8, 1990, stated that Eastchester planned to make a substantial addition to its loan loss reserve and that the new agreement with North Fork reflected these plans. Eastchester does not expect the increase, which was announced on Oct. 15, 1990, and reflected in the results announced today, will have an adverse effect on the proposed acquisition of Eastchester by North Fork.

#90304p1712 10/31/1990 ~PR Newswire

WEST ORANGE, NJ (OCT. 31) PR NEWSWIRE - Micro Healthsystems, (NASDAQ: MCHS), a manufacturer of Bedside Nursing Patient Care Systems and Healthcare Financial Management Systems, showed record revenues and net profits for the second quarter and first half year ended Sept. 30, 1990.

"Our strong growth trend is being driven by an increasing number of hospitals installing computerized nursing and patient care systems which are easing the nursing shortage and contributing to better care," S.M. Caravetta, chairman and chief executive officer, said. "With the continuing growth of Bedside Charting and Patient Care Systems and our recently announced strategic alliance with Baxter Healthcare Corporation, a subsidiary of Baxter International (NYSE: BAX), we anticipate continued growth through this year and beyond," Caravetta added.

Revenues for the second quarter rose by more than 40 percent to $2,386,000 from $1,680,000 in the comparable period a year ago. Net income after taxes more than doubled to $440,000, or 20 cents per share, on a weighted average of 2,111,000 shares outstanding. This compared with a net after-tax income of $200,000, or 12 cents per share, on a weighted average of 1,833,000 shares outstanding in the second quarter last year.

Revenues for the six months increased by more than 50 percent to $5,091,000 from $3,307,000 in the first half of last year. Net income more than doubled to $892,000, or 42 cents per share, on a weighted average of 2,105,000 shares outstanding, against $419,000, or 24 cents per share on a weighted average of 1,833,000 shares outstanding, for the first six months of last year.

The company's MedTake(R) Bedside Nursing Patient Care System is the dominant provider in the market with some 70 percent of the installed bedside terminals Caravetta pointed out. "However, we have just scratched the surface of this expanding growth area. The U.S. market alone is comprised of more than 1.2 million beds of which approximately 2 percent are being serviced by computerized bedside units. We believe that our marketing alliance with Baxter will help accelerate our growth in this area," Caravetta said.

In addition to its Bedside Nursing Patient Care Systems, Micro Healthsystems offers hospital clients and a series of Healthcare Financial Management products, including an Inpatient Management System; an Integrated Hospital Financial System; A Home Care Management System; A Physician's Billing and Management System for hospital-based and private physician group practices; and a Facilities Management program for out-patient billing and accounts receivable to hospitals, utilizing Micro Healthsystems' own staff.

MINNEAPOLIS (OCT. 31) PR NEWSWIRE - North Atlantic Technologies, Inc. (NAT) today reported a loss for its third quarter ended Sept. 30, 1990, of $225,795 or $.12 per share compared with earnings of $354,943 or $.20 per share for the same period in 1989. Sales for the third quarter were $567,378 compared with $1,093,221 in the third quarter of 1989.

For the nine months ended Sept. 30, 1990, sales were $2,616,429 versus $3,587,851 for the first nine months of 1989. A loss of $331,058 was recorded for the first nine months of 1990 compared to earnings of $479,303 for the same period in 1989.

Year-to-date, new order bookings are at a level 30 percent ahead of last year, and backlog continues to increase. The management of the company believes that operations will return to profitability in 1991 due to increased order placement levels resulting from the company's investments in marketing activities during 1990.

NAT manufactures heat recovery systems which it sells to industrial companies for energy recovery and environmental applications. Its headquarters are in Minneapolis.

MINNEAPOLIS (OCT. 31) PR NEWSWIRE - Medtronic, Inc. (NYSE: MDT) today announced commercial release of the world's smallest cardiac pacemaker.

Weighing only 17 grams (six-tenths of an ounce), the Micro Minix(TM) pacemaker sets new standards for the miniaturization of pacemaker circuitry and battery technology. It is 40 mm. (1-9/16 inches) high, 32 mm. (1-1/4 inches) wide, and 7 mm. (slightly more than 1/4 inch) thick.

Small as it is, the Micro Minix pacemaker delivers a full range of pacing capabilities for either the atrium or ventricle of the heart that beats too slowly. It holds special appeal for low-weight patients or others in which a smaller subcutaneous implant pocket is important.

The Micro Minix incorporates an IS-1 (International Standard-1) configuration in the connector block, the component that accommodates endocardial leads carrying electrical impulses to the heart wall. IS-1 ensures compatibility among leads and pulse generators from different manufacturers without the need for adaptors.

Introduction of the Micro Minix pacemaker in the United States market follows a worldwide process of clinical evaluation that began Feb. 2, 1990, when Dr. Keith Dawkins implanted the new pacemaker for a 79-year-old man at Southampton General Hospital, England.

Medtronic, Inc., headquartered in Minneapolis, is a leading developer and manufacturer of biomedical devices for improving cardiovascular and neurological health.

SAGINAW, MICH. (OCT. 31) PR NEWSWIRE - Mark L. Nelson, founder, president and chief executive officer of Polar Molecular Corporation (PMC), announced today that an investor group comprised of members of the board of directors and others have committed approximately $1.2 million in cash and notes convertible to shares of PMC common stock for additional working capital.

"This action," said Nelson, "along with current revenues, will enable the company to operate with a comfortable cash position for the remainder of this fiscal year. It also underscores our confidence in the company's success," said Nelson. "This will allow us to focus our efforts on revenue building through exploitation of contracts such as the previously announced agreement with Paul Newman - Bob Sharp, and a contract with a major refiner, as well as other business opportunities we are now pursuing."

"The company expects to be operating profitably by the close of its fiscal year ending March 31, 1991," said Nelson.

#90304p1720 10/31/1990 ~PR Newswire

CINCINNATI (OCT. 31) PR NEWSWIRE - Zonic Corp. (NASDAQ: ZNIC) had substantial increases in earnings and sales for both the second quarter and first six months of its current fiscal year.

For the second quarter ended Sept. 30, 1990, Zonic had net earnings of $109,000, a 45 percent increase over restated net earnings of $75,000 for the second quarter of the previous fiscal year. Earnings per share increased to 4 cents per share compared with restated earnings per share of 2 cents per share in the year-ago period, a 44 percent increase.

Sales for the quarter were $1,863,000, a 38 percent increase over $1,351,000 for the year-ago fiscal second quarter.

Earnings for the first six months of the current fiscal year were $159,000 or 5 cents per share compared with restated net earnings of $110,000 or 4 cents per share in the year-ago period.

Sales for the six month period were $3,301,000, up 28 percent from $2,581,000 in the previous six month period.

New orders for the second quarter were $1,248,000, up 23 percent from $1,011,000 for the comparable period. Backlog at the end of the second quarter ended Sept. 30, 1990 was $3,475,000 compared with $3,178,000 at the end of the year-ago fiscal second quarter.

Zobrist said that the favorable results were attributed to sales of a broad range of Zonic's products including the Zonic A&D 3500 series Analyzers, SYSTEM 7000 Parallel Signal Processors and XCITE Vibration Exciters.

He said Zonic had also received an additional $376,000 order from NASA for its SYSTEM 7000 which will be used for wind tunnel studies at NASA's Langley research facility. Zobrist said Zonic also participated with NASA in structural integrity tests of the space shuttle with the $1,200,000 Shuttle Modal Inspection System delivered to NASA last year.

Zonic's earnings for the prior five years have been restated by a total of $166,000 to properly reflect taxes, interest and penalties incurred for payroll and other related tax filings, deposits and payments. The restatement reduced last year's fiscal second quarter net earnings from $91,000 to $75,000 and reduced earnings per share by seven tenths of 1 cent for the quarter.

Zonic Corp. manufactures, markets and services data acquisition and computer graphic systems which are used in industrial applications utilizing computer-aided engineering, computerized machinery monitoring and maintenance systems. The company's headquarters are located in the Greater Cincinnati metropolitan area with sales and service facilities in North America, Western Europe and the Pacific Rim.

#90304p1721 10/31/1990 ~PR Newswire

CINCINNATI (OCT. 31) PR NEWSWIRE - Zonic Corp. (NASDAQ: ZNIC) had substantial increases in earnings and sales for both the second quarter and first six months of its current fiscal year.

Gerald J. Zobrist, president and chief executive officer, said that this marks

the 12th consecutive quarter of increased earnings and sales over comparable periods for Zonic.

For the second quarter ended Sept. 30, 1990, Zonic had net earnings of $109,000, a 45 percent increase over restated net earnings of $75,000 for the second quarter of the previous fiscal year. Earnings per share increased to 4 cents per share compared with restated earnings per share of 2 cents per share in the year-ago period, a 44 percent increase.

Sales for the quarter were $1,863,000, a 38 percent increase over $1,351,000 for the year-ago fiscal second quarter.

Earnings for the first six months of the current fiscal year were $159,000 or 5 cents per share compared with restated net earnings of $110,000 or 4 cents per share in the year-ago period.

Sales for the six month period were $3,301,000, up 28 percent from $2,581,000 in the previous six month period.

New orders for the second quarter were $1,248,000, up 23 percent from $1,011,000 for the comparable period. Backlog at the end of the second quarter ended Sept. 30, 1990 was $3,475,000 compared with $3,178,000 at the end of the year-ago fiscal second quarter.

Zobrist said that the favorable results were attributed to sales of a broad range of Zonic's products including the Zonic A&D 3500 series Analyzers, SYSTEM 7000 Parallel Signal Processors and XCITE Vibration Exciters.

He said Zonic had also received an additional $376,000 order from NASA for its SYSTEM 7000 which will be used for wind tunnel studies at NASA's Langley research facility. Zobrist said Zonic also participated with NASA in structural integrity tests of the space shuttle with the $1,200,000 Shuttle Modal Inspection System delivered to NASA last year.

Zonic also had increased international business with new orders from England, India, Korea, Israel and Canada, Zobrist said.

The Zonic chief executive said that during the quarter, Zonic introduced its new Workstation 7000 to the test and measurement market place. He noted that this is a new lower cost entry system for customers desiring the capabilities of Zonic's SYSTEM 7000 but with reduced budgets. Initial market acceptance of the new produce line is encouraging, Zobrist said.

Zonic's earnings for the prior five years have been restated by a total of $166,000 to properly reflect taxes, interest and penalties incurred for payroll and other related tax filings, deposits and payments. The restatement reduced last year's fiscal second quarter net earnings from $91,000 to $75,000 and reduced earnings per share by seven tenths of 1 cent for the quarter.

Zonic Corp. manufactures, markets and services data acquisition and computer graphic systems which are used in industrial applications utilizing computer-aided engineering, computerized machinery monitoring and maintenance systems. The company's headquarters are located in the Greater Cincinnati metropolitan area with sales and service facilities in North America, Western Europe and the Pacific Rim.

#90304p1722 10/31/1990 ~PR Newswire

NEW YORK (OCT. 31) PR NEWSWIRE - Time Warner Inc., the world's leading media and entertainment company, has joined with the United Nations Association of the USA and the Weyerhaeuser Family Foundation in sponsoring a national literacy conference at the United Nations on Dec. 3, 1990.

The one-day conference marks both the finale of International Literacy Year in the U.S. and the kick-off of a decade of action towards eradicating illiteracy. Fifteen national literacy organizations will participate in the Dec. 3 conference, which will include seminars on practical ideas and models for combating illiteracy.

The conference is expected to draw over 500 learners, educators, literacy professionals and volunteers, policy makers and business executives from around the world.

According to statistics compiled by the United Nations, nearly one billion adults in the world cannot read or write, and one hundred million children have no access to basic literacy training. In the United States alone, one-third of the adult population lack the literacy skills needed to function effectively in the workplace.

To help combat illiteracy, Time Warner Inc. in 1985 developed Time To Read, a not-for-profit program designed to improve the reading skills of functional illiterates and marginal readers. Today Time To Read operates at 66 sites in 14 states.

In addition, Time Warner publishes Sports Illustrated For Kids, a monthly magazine aimed at readers ages eight and up, and provides 250,000 free subscriptions to students in 1,350 schools in low income neighborhoods across the country.

In announcing Time Warner's co-sponsorship of the UNA National Literacy Conference, Steven J. Ross and N.J. Nicholas Jr., co-chief executive officers of the company, said, "This is a unique moment in history.

Old barriers to human communication and understanding are falling. As a global media and entertainment company, we feel a great responsibility to assure that today's communications technologies and vast array of product are used constructively to make a positive difference."

Ross and Nicholas added: "We also know that without efforts like the United Nations Association's Literacy Conference, companies like ours will not be able to find employees with the skills necessary for us to compete effectively in tomorrow's marketplace."

HOUSTON (OCT. 31) PR NEWSWIRE - Gamma Biologicals, Inc. (AMEX: GBL) today reported net income of $357,000, or 8 cents per share, on sales of $3,828,000 for the quarter ended Sept. 30, 1990. For the same period last fiscal year, net income was $465,000, or 10 cents per share, on sales of $4,657,000.

For the six months ended Sept. 30, the company earned $758,000, or 17 cents per share, on sales of $7,630,000. These results compare with net income of $824,000, or 18 cents per share, on sales of $9,426,000 for the six months ended Sept. 30, 1989.

"Domestic sales continue to increase and earnings remain strong," reported Chairman David E. Hatcher. "International sales are lower, as anticipated,

due to the sale of the Italian subsidiaries."

Gamma Biologicals manufactures and markets a wide range of highly refined and specialized testing products, known as diagnostic reagents, as well as specialized instrument systems. Gamma markets to hospitals, blood banks, medical laboratories, physicians' offices and research institutions. The company's common stock began trading on the American Stock Exchange on June 8, 1990.

DALLAS (OCT. 31) PR NEWSWIRE - Chili's, Inc. (NYSE: EAT) announced today that results for the first quarter ended Sept. 30, 1990, set new records for the company with revenues of $101.6 million, an increase of 22 percent over the $83.4 million reported for the first fiscal quarter of 1990. Income before income taxes increased to $9.2 million, 31 percent above the $7.0 million reported in fiscal 1990. Net income rose 30 percent to $6.1 million from $4.7 million reported in the first quarter of fiscal 1990, while primary earnings per share increased 14 percent to $0.50 from $0.44. Comparable store sales rose 2.3 percent between the two first quarter periods.

The company opened one company-operated Chili's restaurant and one joint venture Chili's restaurant during the quarter, bringing the total number of Chili's restaurants to 213 operating in 35 states. The company opened one Regas Grill restaurant for a total of 10 restaurants operating in seven states.

Chili's Grill and Bar operates full-service restaurants featuring a casual atmosphere and a limited menu of freshly prepared chicken, beef and seafood entrees, hamburgers, ribs, fajitas, sandwiches, salads, appetizers, desserts and a full-service bar.

The Regas Grill restaurants are casual, upscale dinner house restaurants that feature fresh seafood, prime rib, steaks, pasta, salads, sandwiches, appetizers, desserts and a full-service bar.

Chili's is also engaged in the development of Romano's Macaroni Grill concept, an upscale Italian theme restaurant, and operates one such restaurant in San Antonio, Texas. A second restaurant opened on Oct. 1, 1990 in Addison, Texas.

DETROIT (OCT. 31) PR NEWSWIRE - Grand Trunk Corporation, parent company of three U.S. railroads, has entered a joint venture with Corporate Flight, Inc., a pioneer in business aviation management, located at Detroit Metropolitan Airport.

Gerald L. Maas, president of Grand Trunk Corporation, and Robert G. Carnell, president of Corporate Flight, announced the agreement Tuesday night at an exclusive dinner party for more than 150 area executives at the Detroit Athletic Club.

Introduced at the celebration was Mr. Yoji Toyama, newly appointed president of Mazda North America (MANA), who was meeting southeastern Michigan automotive and transportation leaders for the first time.

As the party invitation suggested, it was a celebration for persons interested in "Planes, Trains and Automobiles". President Maas of Grand Trunk said, "The theme is certainly appropriate since Grand Trunk has been a leading name in Midwest transportation for 132 years. Working hand-in-hand with the auto industry," he continued, "our technical advancements reach from the first days of the assembly line to futuristic concepts."

Grand Trunk Corporation, headquartered in Detroit, is the holding company for three U.S. railroads: Grand Trunk Western Railroad, the Duluth, Winnipeg and Pacific Railway, and Central Vermont Railway, Inc.

Corporate Flight, Inc. is a business aviation company with 17 years of management experience in operating corporate aircraft and chartering service for executives in southeastern Michigan.

LOWELL, MA (OCT. 31) PR NEWSWIRE - Wang Laboratories, Inc. (AMEX: WAN) today introduced the DX100 and DX200, two UNIX(R) systems based on Wang high-performance industry-standard personal computers (PCs) that offer users a convenient, cost-effective starting point for running the thousands of application solutions available under The Santa Cruz Operation's (SCO)(tm) UNIX System V/386 Release 3.2 operating system.

Extending Wang's DYNAMIX Series of UNIX multiuser systems, the entry-level DX100 and DX200 are preconfigured with a number of components to simplify ordering and installation. Like Wang's mid-range DYNAMIX DX2000 system, they run SCO UNIX System V/386 Release 3.2 giving users access to more than 3,500 off-the-shelf application software programs. The two systems will debut at UNIX EXPO, which will take place from Oct. 31 to Nov. 2 in New York.

Each DX100 and DX200 base system includes 4 megabytes (MB) of system memory, cache memory for improved CPU performance, an 8-slot chassis with one parallel and two serial ports, a 16-bit intelligent SCSI (Small Computer System Interface)-based controller, a 16-bit monochrome/color VGA controller, a 150MB 1/4-inch streaming cartridge tape drive, a 1.2MB or 1.44MB diskette drive, and a keyboard. Available in December, the DX100 is priced at $8,995 and the DX200 at $10,995. System Highlights

Like the mid-range DX2000 system, the new platforms are based on Intel microprocessorss. The DX100 offers a 33 megahertz (MHz) 80386 processor, while the DX200 is built on a 25MHz Intel 1486 processor. Both come with standard memory configurations of 4MB and optionally support up to 16MB of total system memory. Up to 16 active users running UNIX applications are supported on the DX100, and up to 32 active users on the DX200.

Both the DX100 and the DX200 offer customers great flexibility in configuring the base systems with added peripherals and communications options to suit the users' needs.

The SCSI interface supplied with the DX100 and DX200 supports all storage peripherals available for the mid-range DX2000, including 145MB, 320MB, and 650MB disk drives, as well as the 150MB tape drive. In addition to internal SCSI drives, two optional SCSI disk cabinets are also available.

By adding an intelligent asynchronous controller, users can connect up to eight RS-232 devices, such as asynchronous terminals and printers. Up to four controllers can be installed in a single DX100 or DX200 host. This makes arrangement of work groups easier by giving many users concurrent access to applications at a fraction of the cost of an individual PC for each user.

#90304p1731 10/31/1990 ~PR Newswire

SIMSBURY, CONN. (OCT. 31) PR NEWSWIRE - Kollmorgen Corporation (NYSE: KOL) today reported after-tax income from continuing operations of $1.7 million, equal to $.12 per common share (after payment of preferred dividends), on sales of $56.1 million during the third quarter ended Sept. 30, 1990. Comparable figures for the 1989 period were an after-tax loss from continuing operations of $4.0 million, or $.37 per common share, on sales of $51.9 million. Included in the 1990 third- quarter results is an after-tax charge of approximately $1.1 million, equal to $.11 per common share, for a plant closing and consolidation of operations.

After-tax income from continuing operations for the first nine months of 1990 was $3.0 million, or $.18 per common share (after payment of preferred dividends), on sales of $175.8 million, compared with an after-tax loss of $4.2 million, or $.40 per common share, on sales of $169.6 million in the prior period. In addition to the third-quarter plant closing and consolidation charges, the 1990 nine-month results included nonrecurring proxy contest and related costs of $1.8 million ($.17 per common share) and the previously announced settlement with Vernitron Corporation of $2.0 million ($.18 per common share).

Discontinued operations for the third quarter ended Sept. 30, 1990, resulted in an after-tax loss of $.9 million, or $.09 per common share, compared with an after-tax loss of $3.2 million, or $.30 per common share, for the comparable 1989 period.

For the nine-month period ended Sept. 30, 1990, discontinued operations resulted in net income of $14.7 million (principally from gains on the sale of assets), or $1.39 per common share ($1.11 on a fully diluted basis), compared with a net loss of $11.3 million, or $1.07 per common share, for the comparable period in 1989.

Thus, total net income for the first nine months of 1990 was $17.7 million, or $1.57 per common share ($1.54 on a fully diluted basis), compared with an after-tax loss of $15.6 million, or $1.47 per common share, for the comparable 1989 nine-month period. Total operations for the third quarter of 1990

resulted in net income of $.8 million, or $.03 per common share, compared with the total third-quarter 1989 after-tax loss of $7.2 million, or $.67 per common share.

The company also announced that its board of directors has authorized the purchase of up to $15 million of the company's common stock from time to time in the open market or in private transactions subject to market conditions and other relevant factors. There are approximately 10.3 million shares of the company's common stock currently outstanding. The company has appointed The First Boston Corporation as its authorized agent for this program.

Kollmorgen Corporation has continuing operations in two business segments: special purpose servo motors and controls and electro-optical instruments.

SAN FRANCISCO (OCT. 31) PR NEWSWIRE - Landor Associates, the leading international identity management consulting firm, has named Ned Brown managing director of Landor's New York operation, which recently moved to 230 Park Ave. South.

As managing director of Landor's New York operation, Brown will be responsible for more than 50 marketing, design and support personnel.

"Ned Brown's experience in senior new business and client services positions with Young & Rubicam adds to an already terrific organization. We have high growth expectations for New York over the next few years, and we intend to invest the necessary resources," said Don Casey, president and CEO of Landor Associates.

Prior to joining Young & Rubicam in 1986, Brown held senior marketing positions with Doyle Dane Bernbach, Kenyon & Eckhardt and the Ford Motor Company.

Founded nearly 50 years ago, Landor Associates helps its clients to understand and use the power of their corporate and consumer brands. Through its network of offices in 15 countries, Landor provides corporate identity, brand identity/packaging, retail identity, research and consulting services to some of the world's best known companies, such as Coca-Cola, Hyatt, IBM, Northwest Airlines, Philip Morris, Mercedes-Benz and McDonald's.

DALLAS (OCT. 31) PR NEWSWIRE - Maxus Energy Corporation (NYSE: MXS) reported third quarter net income of $4.1 million, or after preferred dividends, a loss of 6 cents per common share, compared with a loss of $20.0 million, or 35 cents per common share, in the third quarter of 1989.

"The positive net income this quarter is primarily attributable to higher crude oil prices," said C.L. Blackburn, chairman and chief executive officer.

Sales for the recent three months of 1990 were $173.8 million compared to $147.1 million in the same quarter a year ago. Discretionary cash flow was $59.8 million this quarter compared to $31.6 million in the third quarter last year.

Results for the nine months were a net loss of $8.8 million, or after preferred dividends, a loss of 45 cents per common share, compared to a loss of $27.0 million, or 69 cents per common share, during the same period in 1989. Last year's results benefited from the sale of the company's Canadian subsidiary.

Nine-month sales were $474.6 million in 1990 compared to $442.8 million in 1989. Year-to-date discretionary cash flow was $159.3 million compared to $107.9 million in the first nine months of 1989. The 1990 nine-month discretionary cash flow has already exceeded full- year 1989 discretionary cash flow of $148.2 million.

Commenting on third quarter operations, Blackburn said: "Worldwide crude oil and liquids production was 56,900 barrels per day (bpd) compared to 58,800 bpd in the third quarter of 1989. The average worldwide oil price received was $21.08 per barrel versus the 1989 third quarter price of $16.92 per barrel.

"Maxus' share of total Indonesian crude oil and liquids production was 46,500 bpd compared to 48,500 bpd in the third quarter of 1989. Production from Southeast Sumatra, where the Intan-A and B platforms are now producing, was 28,800 bpd compared to 20,600 bpd in last year's third quarter. Production in Northwest Java was lower than a year ago because of the sale of a partial interest late last year.

"U.S. natural gas production was 252 million cubic feet per day (mmcfpd) compared to 248 mmcfpd reported in last year's third quarter. The average gas price received in the U.S. was $1.72 per thousand cubic feet (mcf) compared to $1.64 per mcf a year ago."

SANTA ANA, CA (OCT. 31) PR NEWSWIRE - Tracor Flight Systems, Inc., has been awarded a $1.7 million contract with options totaling approximately $8.6 million from the U.S. Air Force Tactical Air Command (TAC) for the operation and maintenance of a dart tow system. Tracor Flight Systems will provide aircraft, pilots, crews, and maintenance to perform simultaneous aerial gunnery target-tow services at up to three TAC locations in the continental United States.

Donald L. Fagan, president of Tracor Flight Systems, said, "This contract reinforces Tracor Flight Systems' position as the world's premier high-performance gunnery target contractor."

As the incumbent contractor, Tracor Flight Systems will continue to base the program's operations at Holloman Air Force Base, N.M.

Tracor Flight Systems, a subsidiary of Tracor, owns and operates one of the largest fleets of high-performance jet aircraft in the world and provides comprehensive testing, aircraft modification, and special services for a broad range of government and commercial customers.

Tracor, owned by privately held Westmark Systems, Inc., is an international technological products and services company with headquarters in Austin, Texas. The company is a significant engineering and support contractor in sonar, communications, and aviation; a leader in the development and production of electronic countermeasures systems and other advanced defense electronics; and a major manufacturer of electrical components.

RIVIERA BEACH, FLA. (OCT. 31) PR NEWSWIRE - Consulier Engineering, Inc. (NASDAQ: CSLR) (the "company") (formerly Consulier Industries, Inc.) of

Riviera Beach, Fla., announced net income of $122,818 ($.00 per share) for the quarter ended Sept. 30, 1990, which compares to a net loss of $446,829, or $.02 per share, for the same 1989 quarter. Revenues for the quarter ended Sept. 30, 1990 were $320,914, compared to revenues of $307,577 in the 1989 quarter. Results of operations for the nine month period ended Sept. 30, 1990, showed a net loss of $450,137 or $.02 per share as compared to a net loss of $1,638,771 or $.06 per share in the same nine month period in 1989. Revenues for the nine month period ended Sept. 30, 1990 were $937,378 compared to $494,022 in the 1989 period.

The company pointed out that with respect to the reported quarterly profits and losses, the 1989 period included the results of its automobile business which was sold on March 31, 1990. The results of operations for the quarter ended Sept. 30, 1990 do not reflect any automobile business activity. Additionally, the company noted that continuing operations for the nine month period ended Sept. 30, 1990 showed a net profit of $239,422.

Consulier Engineering, Inc.'s common stock and warrants trade on the over-the-counter market under the NASDAQ symbols CSLR and CSLRW, respectively.

SANTA ANA, CALIF. (OCT. 31) PR NEWSWIRE - Tracor Flight Systems, Inc. has been awarded a $1.1 million contract with four option years totaling $5.5 million by the U.S. Naval Supply Center Naval Sea Systems Command (NAVSEA) for subsonic and supersonic flight services.

Under the contract, Tracor Flight Systems will provide a minimum of two F-4 aircraft, pilots, crew, and maintenance to support the training of crews and testing of equipment on board Naval combatant ships.

To assist NAVSEA in presenting threat-representative targets for the tests, Tracor Flight Systems will provide launching services of AQM-37 series high/fast training targets. These targets are launched at a speed of Mach 1.5 at 50,000 feet altitude.

In addition, Tracor Flight Systems will provide supersonic target scenario rehearsals and perform manned aircraft raids to fulfill NAVSEA's testing and training objectives.

Tracor Flight Systems, a subsidiary of Tracor, owns and operates one of the largest fleets of high-performance jet aircraft in the world and provides comprehensive testing, aircraft modification, and special services for a broad range of government and commercial customers.

Tracor, owned by privately held Westmark Systems, Inc., is an international technological products and services company with headquarters in Austin, Texas. ATLANTA (OCT. 31) PR NEWSWIRE - Scientific-Atlanta Inc. (NYSE: SFA) today announced a back-up system for its SkylinX.25(TM) (Very Small Aperture Terminal) network that can quickly re-establish communications in case of equipment downtime, satellite outage or climatic interruptions.

Called RESTORE(TM), the system enables Scientific-Atlanta's VSAT networks to recognize, initiate and automatically switch over to a terrestrial dial-up network to maintain communications in the event of a loss of the satellite link or failure of the VSAT transmission equipment. The switchover takes place automatically in a matter of seconds without any human intervention.

In the event of a loss of remote satellite communications, the RESTORE system automatically signals a modem which in turn dials a previously stored telephone number. Modems as the network's hub "answer" the calls and are connected to host ports on the hub's packet switch or to a concentrator with a high-speed connection to the hub switch.

Switchover of the system to dial restoral occurs automatically due to the addressing capability associated with the LAPB protocol in the X.25 environment, a feature unique to the SkylinX.25 network. Once the X.25 connection is restored over the telephone lines (at a rate up to 19.2 kbps) all four user ports and the remote (supporting multiple protocols) can re-establish communications through a single dial connection. This is also made possible because of the switched architecture of the SkylinX.25 product line.

Scientific-Atlanta's new RESTORE system uniquely enables dialing back to the hub's packet switch which is relatively inexpensive and recovers the communication link transparently to the host, FEP and host computer operations.

The system can be installed on existing sites as well as new VSAT installations. It can also be implemented for a single site, any subset of sites, or the entire network. Normally 100 percent of the network's remote sites do not require back up. Therefore, the remote site modems can share a pool of answering modems at the hub. A typical number of shared modems is 5 percent of the total number of remotes in a user's network.

Scientific-Atlanta Inc. is a leader in cable television electronics and satellite-based communications networks and is a key supplier of electronic instrumentation for industrial, telecommunications and government applications worldwide.

GREENVILLE, S.C. (OCT. 31) PR NEWSWIRE - National microcomputer distributor Gates/FA Distributing (NASDAQ: FACO) has signed a distribution agreement with National Semiconductor of Santa Clara, Calif.

Under the terms of the agreement, Gates/FA will distribute the complete line of products by National Semiconductor's Computer Enhancement Group to resellers nationwide.

With its combined QUADRAM, Macintosh enhancement, and XICOM gateway products, National provides one of the industry's broadest selections of PC- and

Mac-compatible products, and has over one million products installed.

Connectivity products are central to National Semiconductor's Computer Enhancement Group, and include the MainLink family of micro-to- mainframe 3270 emulation boards, PC EtherNODE local area networking boards for PC and Macintosh computers, and LAN MicroNode gateway products.

Phil Ellett, executive vice president of Gates/FA, believes that National Semiconductor will sustain high visibility in the marketplace. According to Ellett, "As the world's largest manufacturer of chip sets, National has established a solid reputation for being technology innovators. They are continually carving out new ground, as they will again do next January when they add to their line the new twisted pair PC/Mac EtherNODE product."

Nick Roche, vice president of sales for National Semiconductor's Computer Enhancement Group, is pleased to have Gates/FA reselling the line. "We're really excited about Gates/FA. Because of its strong reputation in the connectivity marketplace, Gates/FA is a key distributor in the United States with major importance to National. This is a very strategic move for us," said Roche.

Gates/FA Distributing is a national distributor of a select number of high-quality microcomputer product lines. Serving only the reseller, Gates/FA offers "Next Day/No Extra Cost!" delivery from its centralized-hub warehousing facility. The corporate headquarters are located in Greenville, S.C. at 803-234-0736. The national toll-free sales telephone number is 800-332-2222.

#90304p1758 10/31/1990 ~PR Newswire

SIMI VALLEY, CALIF. (OCT. 31) PR NEWSWIRE - Datron Systems Incorporated (NASDAQ: DTSI) today reported a loss for the second quarter ended Sept. 30, 1990 of $277,000 or 10 cents per share on sales of $15,769,000 compared with net income of $1,023,000 of 36 cents per share on sales of $10,632,000 for the second quarter last year.

The second quarter results include a nonrecurring pretax charge of $1,500,000 for estimated losses on the company's contract for Threat Emitter Systems which was canceled by the company's customer in late October 1990 for failure to deliver within the time specified under the contract. The failure to deliver was due to a subcontractor's inability to deliver a significant component of the contract. The company has filed a legal action against the subcontractor seeking to recover damages for breach of contract.

The company also announced its receipt in October 1990 of a Subpoena from the

Office of the Inspector General for the production of documents in connection with a Defense Contract Audit Agency (DCAA) audit of a U.S. Navy contract for WSC-1 antennas completed in 1989. The company has been informed that the DCAA has submitted a report to the contracting officer citing deficiencies in the information provided to the government at the time the contract was negotiated and recommending a reduction in the contract value of $2.7 million. The company is confident that its actions have been appropriate at all times. The company believes that the conclusions in the DCAA report are erroneous; the company intends to challenge the report and its conclusions vigorously. Due to extensive administrative proceedings, the company does not expect early resolution of this matter.

For the six months ended Sept. 30, 1990 the company reported a loss of $107,000 or 4 cents per share on sales of $24,160,000 compared with net income of $1,889,000 or 63 cents per share on sales of $21,227,000 for the six months ended Sept. 30, 1989.

The company reported that new orders for the quarter were approximately $15 million and all three operations, excluding the nonrecurring charge referred to above, were profitable in the quarter.

Datron Systems Incorporated is a leading designer/manufacturer of specialized communications systems and high-quality radio products.

HOUSTON (OCT. 31) PR NEWSWIRE - Tescorp, Inc. (NASDAQ: TESC) today reported net income for its second quarter ended Sept. 30, 1990 of $323,000, or $0.03 per share, compared with a net loss of $144,000, or $0.02 per share, for the corresponding period last year. Revenues this quarter were $5,867,000, about 28 percent higher than the second quarter of last year. In September 1990, Tescorp declared a regular quarterly dividend of $0.125 per share paid Oct. 11 1990 on its Series 1990 convertible preferred stock.

According to C. Robert Bunch, president and chief executive officer of Tescorp the positive results in the second quarter ended Sept. 30, 1990 are attributable to improved performance by the company's geophysical products segment compared with last year.

Tescorp, Inc. is an oil service company engaged in the manufacture and sale of geophysical products, and the manufacture and distribution of various oil and gas production products.

In addition to its common stock Tescorp's Series 1990 preferred stock (NASDAQ: TESCP) and 1993 warrants (NASDAQ: TESCW) are listed for trading.

#90304p1765 10/31/1990 ~PR Newswire
NEW YORK (OCT. 31) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) today entered into a consent agreement with the Alpha Chemical and Plastics Corporation, of Newark, N.J., to settle a complaint issued for violations of Section 313 of the Emergency Planning and Community Right to Know Act (EPCRA). The company was cited for not filing Toxic Release Inventory forms for 1987. EPA will collect $29,400 in penalties.

"The Toxic Release Inventory is designed to give citizens a better understanding of the kinds of chemicals being released into their community," said Constantine Sidamon-Eristoff, EPA's regional administrator.

"The failure of Alpha Chemical to report its emissions violated the intent of the act and undermined EPA's ability to use this data in its environmental protection efforts."

For fiscal year 1990, EPA issued 30 complaints against firms for not filing Toxic Release Inventory forms. Since the program's inception in 1988, 72 complaints have been issued and $431,830 collected in fines.

The Emergency Planning and Community Right to Know Act, also known as Title III, was passed in 1986 as part of the Superfund Amendments and Reauthorization Act (SARA). The law encourages and supports emergency planning for responding to chemical accidents and provides local governments and the public with information about chemicals in their community.

Under Section 313, facilities with ten or more employees that manufacture, process or use more than "threshold" amounts of certain chemicals are required to report their chemical emissions into the environment to EPA and their states.

DURHAM, N.C. (OCT. 31) PR NEWSWIRE - Harrier, Inc. (NASDAQ: HARE), announced today that the organ preservation experiments conducted at a major U.S. medical center demonstrated that a living animal heart could be successfully supported outside the body in an Oxywater solution.

Oxywater is a product developed by Harrier, Inc., consisting of water with a significantly greater amount of oxygen than is found in its natural state. Patent applications are pending in the United States and in other countries.

The team of scientists conducting the study concluded: "Currently, there is no commercially available oxygenated cardioplegia that can be continuously perfused to meet metabolic demands of the arrested heart. Experiments determining the ability of an Oxywater-based cardioplegia to maintain adequate tissue oxygenation in the hypothermic, continuously perfused, arrested heart are (therefore) exciting."

The company believes that Oxywater may have application in cardiac surgery as well as in preserving organs intended for transplantation. Ongoing studies at the medical center seek to determine Oxywater's clinical usefulness as an effective substitute for current medical practices.

Harrier, Inc., specializes in developing unique products in the healthcare and environmental fields.

HOUSTON (OCT. 31) PR NEWSWIRE - Zapata Corporation (NYSE: ZOS) has completed

the previously announced sale of its offshore drilling rig fleet and related assets to Arethusa (Offshore) Limited for $298 million, Zapata Chairman and Chief Executive Officer R. C. Lassiter said today.

Lassiter said that under the terms of the sale Zapata has purchased an 8.75 percent interest in Arethusa, a newly formed Bermuda company, and will continue to manage the 12 rigs under a management contract.

"With the sale of the rig fleet, Zapata is well on its way toward completing the comprehensive restructuring outlined at the company's annual stockholders meeting earlier this year," he said.

At the June 26 stockholders meeting, Zapata announced a three-part debt restructuring program that called for the sale of its offshore rig fleet, with most of the proceeds plus an additional issue of stock being used to reduce the company's debt to a manageable level. Zapata's approximately $560 million in bank debt is to be reduced to $115 million with the banks receiving $160 million in cash and 94.5 million shares of common stock to increase their ownership to approximately 80 percent of the company.

The third part of the restructuring plan consists of tender offers for Zapata's 10-1/4 percent and 10-7/8 percent subordinated debentures, which total approximately $78 million. The cash offers, which have not yet been commenced, will offer $480 for each $1,000 debenture tendered.

"The successful completion of the restructuring program depends upon the tender offers being successful and approval of the overall plan by the company's stockholders," Lassiter said. "With the restructuring done, Zapata will be able to concentrate on improving the financial performance of its remaining businesses."

Zapata Corporation is a Houston-based company that conducts commercial menhaden fishing operations that produce fish meal and edible oil, produces oil and natural gas, and manages a fleet of offshore drilling rigs. Zapata is also the largest shareholder in Zapata Gulf Marine Corporation, the world's leading operator of marine service vessels.

BOSTON (OCT. 31) PR NEWSWIRE - Uno Restaurant Corporation (AMEX: UNO) today announced that revenue rose 39 percent to $15.8 million for the fourth quarter. Revenue results reflected steady sales at established restaurants, increased royalties from franchised restaurants and the opening of nine new company units during fiscal 1990. For the year, revenue increased to $54.7 million, up 35 percent from fiscal 1989. The company expects that earnings for the quarter and for the fiscal year ended Sept. 30, 1990 will meet analysts' expectations. The consensus earnings estimate of analysts is currently 14 cents per share for the fourth quarter, ranging from 13 cents to 15 cents per share. For the corresponding period last year, earnings were 11 cents per share. The final report of earnings is expected to be announced by the company on Nov. 14.

Uno Restaurant Corporation operates and franchises a chain of casual dining, full-service restaurants under the name "Pizzeria Uno Restaurant & Bar." The restaurants feature gourmet, Chicago-style deep dish pizza and a variety of entrees, sandwiches, appetizers, salads, desserts and beverages. It currently owns and operates 34 Pizzeria Uno restaurants (three of which have opened since the end of the fiscal year) in Massachusetts, New York, New Jersey, Rhode Island, New Hampshire, Maryland, Missouri and Washington, D.C., and has 47 franchised restaurants in 16 states.

NEW YORK (OCT. 31) PR NEWSWIRE - Paramount Communications Inc. (NYSE: PCI) today announced the promotion of Alan Cole-Ford to the newly created position of vice president, corporate development. Cole-Ford had been senior vice

president, business development, for the Television Group of Paramount Pictures.

In his new position, Cole-Ford will be active in exploring new business opportunities with particular emphasis on new entertainment, information and distribution technologies across all of PCI's entertainment and publishing interests, including Paramount Pictures, Simon & Schuster and Madison Square Garden. In addition he will supervise the company's investor relations activities. He will report to Ronald L. Nelson, executive vice president and chief financial officer. James Parent, vice president, is leaving to pursue other interests.

Martin S. Davis, chairman and chief executive officer, said, "Alan's impressive business skills, coupled with his broad knowledge of our operations will be a great asset to Paramount Communications as we seek business opportunities for the future. We are grateful to Jim Parent for his contribution to the company and we wish him success in his future endeavors."

Cole-Ford, 44, became vice president, video distribution for Paramount's Video Division in 1985 and has served in his most recent position since 1988. Prior to joining Paramount, Cole-Ford was an industry analyst at Paul Kagan & Associates specializing in motion picture finance and pay television. Before that, he was the managing director of the Barrett, Cooper, Cole-Ford and Ragan advertising agency, and earlier served as a market research analyst at CBS.

EAST RUTHERFORD, N.J. (OCT. 31) PR NEWSWIRE - Cambrex Corporation (NASDAQ: CBAM), announced today that its common shares have been approved for listing on the American Stock Exchange. Trading is expected to begin in early November pending approval by the Securities and Exchange Commission. The ticker symbol will be CBM. The company's shares currently trade in the NASDAQ National Market System under the symbol CBAM.

Cyril C. Baldwin, Jr., chief executive officer of Cambrex, said "We believe our listing on the American Stock Exchange will provide our shareholders with the benefits of greater liquidity and visibility as a result of the auction environment that this major securities exchange employs."

Cambrex Corporation manufactures a broad line of specialty chemicals, fine chemicals and commodity chemical intermediates. The chemical families of castor oil, pyridine, organometallics, succinic anhydrides, organobromines and ammonia reaction chemistry are used by the company to produce compounds for its five product categories: Urethane Systems and Additives, Coatings, Health and Cosmetic Products, Agricultural Chemical Intermediates, and Specialty and

Fine Chemicals.

ATLANTA (OCT. 31) PR NEWSWIRE - The board of directors of Aaron Rents Inc. (NASDAQ: ARON), the nation's largest furniture rental and sales company, has authorized the company to repurchase up to 400,000 additional shares of Aaron Rents common stock.

The company during the past three-and-one-half years has repurchased 1,050,000 shares of its common stock with 255,000 of those shares acquired within the past four months. The authorization for repurchasing 400,000 additional shares is effective immediately. The company currently has 4,318,397 shares of common stock outstanding.

"The directors feel that repurchasing shares is an excellent investment opportunity for the company as the current share market price is significantly below book value," said R. Charles Loudermilk Sr., chairman of the board and chief executive officer of Aaron Rents.

Aaron Rents Inc., based in Atlanta, operates 163 stores in 50 metropolitan areas of 28 states for the sale and rental of residential and office furniture. The company produces furniture at five plants in Georgia and Florida.

MELBOURNE, FL (OCT. 31) PR NEWSWIRE - The Goldfield Corporation (AMEX: GV) announced today that it has acquired a 50 percent interest in a 12,000 acre gold project in Hidalgo County, New Mexico. The property encompasses most of the Lordsburg Mining District including the Banner and 85 mines which had historic production of approximately 3 million tons averaging 3 percent copper and 0.1 ounces of gold per ton. A joint venture, The Lordsburg Mining Company, has been formed between a new Goldfield subsidiary, Goldfield-Hidalgo Inc., which will manage the project, and Federal Resources Corporation, a previous operator.

Production by the joint venture commenced in March 1990 from existing stockpiles and a portion of the reserve estimated to contain 85,000 tons averaging 0.53 percent copper, 1.47 ounces per ton of silver, and 0.118 ounces per ton of gold. The initial mining was from an open pit, but underground

development for rubber-tired access has commenced. It is anticipated that a production rate of 90,000 tons per year will be sold directly to nearby copper smelters as gold bearing siliceous smelter flux.

The property includes various underlying leasehold interests and patented and unpatented mining claims and support facilities which are owned by The Lordsburg Mining Company. The joint venture agreement provides for recovery of pre-production and operating expenses by Goldfield-Hidalgo, Inc., from sales revenue and an equal split of net proceeds thereafter with Federal Resources.

John Sottile, president of Goldfield, notes that the new venture should expand the company's market area for siliceous flux products and increase gold sales. Goldfield also produces copper, silver, gold and zinc from other mining properties, receives royalties from gold and coal production, and is engaged in electrical construction in Florida.

#90304p1792 10/31/1990 ~PR Newswire

BLAKESLEE, PA (OCT. 31) PR NEWSWIRE - Blue Ridge Real Estate Co. and Big Boulder Corp. announced today that it will extend its offer to purchase shares of Blue Ridge/Big Boulder common stock from its shareholders who owned an aggregate of 50 or fewer unit certificates at the close of business on Aug. 3, 1990.

The offer has been extended from Oct. 3 to Dec. 31, 1990. Robert J. Sule, president and chief executive officer of Blue Ridge/Big Boulder said the offer was initially made to shareholders on Aug. 20 because the companies "are aware of the expenses and inconveniences when selling small holdings. Brokerage commissions often absorb a disproportionate percentage of the proceeds of such sales." Sule also said the Blue Ridge/Big Boulder's purchase program "provides that no brokerage commission or other expenses will be deducted from the sale proceeds. There is no requirement to open a brokerage account as all the mechanics of the sale are accomplished by a letter of transmittal created by the companies' transfer agent, Joel Harpel at First Valley Bank in Bethlehem, Pennsylvania, who should be contacted for more details."

Gary A. Smith, chief financial officer of Blue Ridge/Big Boulder added that the companies "value all of our shareholders but the companies are conscious of the relatively high cost to Blue Ridge/ Big Boulder of servicing its smaller shareholder accounts, including transfer agent and registrar fees, printing, postage and other related costs. The purchase program is expected to provide substantial cost savings for Blue Ridge/Big Boulder."

The price Blue Ridge/Big Boulder will pay for each combined unit certificate

representing one share of Blue Ridge common stock and one share of Big Boulder common stock it purchases will be $13.

#90304p1793 10/31/1990 ~PR Newswire

MIAMI (OCT. 31) PR NEWSWIRE - Columbia Laboratories, Inc. (AMEX: COB) today reported a significant increase in revenues to $4,507,841 for the third quarter, compared with revenues of $1,861,969 in the similar 1989 period. Third quarter sales of Replens(R), the company's innovative product introduced in the first quarter 1990 for the treatment of post-menopausal vaginal dryness climbed to $2,690,188, up 47 percent over the prior 1990 quarter.

"The rapid growth of Replens in the United States is extremely gratifying," said Norman M. Meier, Columbia president and chief executive officer. "We see three major factors driving this success: strong recommendations of the product by gynecologists; prominent placement of the product in the feminine hygiene section of more than 42,000 drugstores across the country; and, of course, the fact that Replens provides the only effective non-hormonal solution to a chronic women's health care problem," Meier said.

Meier noted that the company's plans for international marketing of Replens advanced during the third quarter. "We officially introduced Replens to British consumers in September, and we'll soon be distributing the product to pharmacies in England. Currently, we have gained regulatory approval to market Replens in 14 European countries, and we are now making plans to launch Replens on a country-by-country basis," he said. "The European market for Replens is almost double the size of the U.S. market."

Sales of Columbia's traditional OTC products, including Legatrin(R) and Diasorb(R), also increased during the third quarter 1990 over the comparable quarter last year. "These products continue to generate cash to support operations and the development of new products," Meier added.

A net loss of $3,152,627 or 31 cents per share, was reported for the quarter, compared with a net loss of $1,402,947 or 15 cents per share, in the third quarter 1989. Third quarter 1990 results reflect an increase in expenses relating to the U.S. launch of Replens, as well as start-up expenses from Columbia's European operations.

Cash and cash equivalents as of Sept. 30, 1990 were $708,529, compared with $419,140 at June 30, 1990.

Columbia Laboratories, Inc. is a U.S.-based international pharmaceutical company, established in 1987, dedicated primarily to developing and marketing women's health care products based on its patented bioadhesive drug delivery

system. The company's first proprietary product, Replens, is a vaginal moisturizer introduced to U.S. consumers during the first quarter 1990.

RICHARDSON, TEXAS (OCT. 31) PR NEWSWIRE - Rubicon Corporation (NASDAQ: RBCN) today reported earnings before extraordinary items increased 345 percent to $129,000 for the three month period ended Sept. 30, 1990. Operating income increased to 15 percent of revenue for the period from seven percent during the same period last year. Net earnings were $196,000, or $.04 per share, on revenue of $1,513,000 for the three months ended Sept. 30, 1990. Revenues for the quarter increased by $502,000, or 50 percent from the quarter ended Sept. 30, 1989. The results for the three months ended Sept. 30, 1990 included a $67,000 extraordinary item relating to the utilization of net operating loss carryforward.

Reflecting the continued profitability and cash flow positive operations, the company's shareholders equity increased by 17 percent in the quarter. Gary K. Freedman, chairman and chief executive officer said, "We are pleased with the continued profitability of the company. The progress of the last five quarters has enabled us to begin to reinvest in the business using internally sourced funds. This reinvestment, which began this quarter, will position us for continued future controlled growth."

Rubicon's intRlab(R) laboratory systems products operate on Digital Equipment Corporation's PDP and VAX computers and use Digital Standard MUMPS language to

provide highly stable, maintainable turnkey solutions.

Rubicon is a 15-year-old Richardson, Texas based developer of computerized laboratory information management systems for independent laboratories, hospitals and health maintenance organizations.

#90304p1809 10/31/1990 ~PR Newswire

MONTREAL (OCT. 31) PR NEWSWIRE - Dominion Textile announced today a net loss of $15.4 million, or $0.55 per share, for the first three months of fiscal 1991, ended Sept. 30, 1990, compared with net income of $4.7 million, or $0.12 per share, for the same period last year.

Consolidated sales in the quarter totalled $299.4 million, compared to $348.2 million in the corresponding period last year. Last year's first quarter included sales of $39.6 million by the bed fashion unit which was sold and the engineered fabrics business which was joint ventured.

Charles H. Hantho, president and chief executive officer, said these results reflect the continued pressure of weaker demand for many of the company's products, particularly in North America. The combination of reduced volume, competitive pricing and continuing high cotton costs are having a major impact on operating margins.

"The continuing softening of the North American retail business is having a direct impact on volume and pricing of our denim, yarn and apparel fabrics sales," said Hantho. "Retailers are dealing with weak consumer spending by lowering their inventories and delaying orders."

The corporation's North American industrial products businesses are being affected by weaknesses in the housing, home furnishings and automotive industries. However, Dominion Textile is reporting higher sales and increased margins for nonwoven fabrics in the U.S.

In Europe, results for Dominion Textile's Klopman Group are being impacted by weaker market conditions. On the other hand, the other European-based businesses in technical fabrics and denim began the new year with strong sales and profits.

Hantho said ongoing efforts are being implemented to reduce overheads, improve margins and increase efficiencies throughout the company. In addition, the board of directors declared a quarterly dividend of 7 cents per share, compared with 15 cents per share in the preceding quarter. The dividend is payable on Jan. 11, 1991 to shareholders of record as of Dec. 11, 1990.

MONTREAL (OCT. 31) PR NEWSWIRE - Dominion Textile (Montreal: DTX) announced at its annual meeting today that, effective Nov. 8, shareholders may purchase shares of the corporation for the balance of the 1990 calendar year through optional cash payments under its dividend reinvestment and share purchase plan.

The maximum amount of optional cash payments under the plan is $4,000 per calendar quarter. The remaining 1990 investment dates are Nov. 21 and Dec. 21. Shareholders may make one payment of $4,000 or payments each month up to a total of $4,000. Payments received after Dec. 20 will not be accepted and will be returned immediately to shareholders.

For eligible Quebec residents, common shares of Dominion Textile purchased through optional cash payments qualify for inclusion in a Quebec stock savings plan. This entitles shareholders to a deduction in computing taxable income for 1990 Quebec income tax purposes equal to 75 percent of the acquisition cost of the shares.

#90304p1814 10/31/1990 ~PR Newswire

KINSTON, NC (OCT. 31) PR NEWSWIRE - Hampton Industries, Inc. (AMEX: HAI) reported that sales for the thirteen-weeks ended September 29, 1990 were $52,893,000 as compared to $54,204,000 during the same period last year. Net earnings for the period were $1,280,000, or $.33 per share as compared to net earnings of $2,101,000, or $.53 per share last year.

For the thirty-nine weeks ended September 29, 1990, sales were $117,360,000 as compared to $133,951,000 in 1989. The Company had a net loss of $632,000, or $.17 per share for the year to date, as compared to net earnings of $4,423,000 or $1.12 per share during the same period in 1989.

Mr. David Fuchs, Chairman and Chief Executive Officer of the Company, stated that costs attributable to excess capacity continued to have an adverse effect on profit margins. In an effort to reduce such costs in the future, the Company closed one of its sewing plants effective October 26, 1990. The Company did not incur any special charges in connection with closing. Cost containment programs continue to be the highest priority of the Comapny's managers and their associates.

He also indicated that the Comapny's advance bookings of orders is presently

$66,600,000 as compared to $71,500,000 at this time last year.

#90304p1821 10/31/1990 ~PR Newswire

DUBLIN, OHIO (OCT. 31) PR NEWSWIRE - Wendy's International, Inc. (NYSE: WEN) today reported stronger earnings than a year ago for the third quarter ended Sept. 30, 1990. Net income rose 45 percent to $12.7 million or $.13 per share compared to $8.7 million or $.09 per share in the same period of 1989.

Revenues for the quarter were $257.5 million, less than the $269.2 million of a year ago. Wendy's had 74 fewer company-operated restaurants than last year, most of which were sold to franchise owners.

James W. Near, CEO, president and COO, said a comparison of year-to- year quarterly earnings indicates that company operations on all levels have improved substantially in the last 12 months. Restaurant operating margins improved to 12.7 percent from 10.7 percent in the third quarter of 1989.

He attributed the company's higher operating margins to a combination of stronger company operations and across-the-board reductions in operating expenses -- among them lower food costs, a reduction in the use of discount coupons and a continued long-term emphasis on cutting costs throughout the company.

Systemwide sales, or sales of both company and franchise restaurants, were $788 million for the quarter and $2.31 billion for the nine months versus $787 million and $2.30 billion a year ago, respectively.

The company's per share earnings for the first three quarters of 1990 have already exceeded those of the entire last year. Earnings for the first three quarters were $31.5 million or $.33 per share compared to $24.7 million or $.26 per share a year ago and $30.4 million or $.32 for all of 1989. Year-ago earnings included a one-time, nonoperating FASB 96 gain of $5.2 million or $0.05 per share.

Dividend Declared The board of directors approved a quarterly dividend of $.06 per share, payable Nov. 27 to shareholders of record Nov. 12.

MINNEAPOLIS (OCT. 31) PR NEWSWIRE - LaserMaster Technologies, Inc. (NASDAQ:

LMTS) announced that its first-quarter sales for fiscal 1991 were $11.2 million, as compared to sales of $3.1 million in the first quarter of fiscal 1990.

The company further reported that losses for the first quarter were lower than anticipated. Losses were $392,000 for the first quarter fiscal 1991 compared to $273,000 for the corresponding period in fiscal 1990.

Mel Masters, chief executive officer, stated, "The company had projected substantial losses for the first quarter as a result of regular seasonal fluctuations in our international business and increased expenses associated with increasing our sales organization. In view of world events, expansion and staffing plans were reduced from previously scheduled ramp-up. This, combined with a strong and profitable September, resulted in losses lower than anticipated."

LaserMaster Technologies, Inc. designs, manufactures and markets laser printer and display systems and subsystems for high-quality electronic printing and desktop publishing applications. LMT's products include high-performance printer controllers, plain-paper desktop typesetters and integrated electronic publishing systems which feature the company's proprietary TurboRes(tm) resolution enhancement technology. The company has recently announced allowance of certain patent claims protecting its TurboRes resolution enhancement technologies and introduction of additional high-resolution laser printer products based on this technique.

DUBLIN, OH (OCT. 31) PR NEWSWIRE - Wendy's (NYSE: WEN) is serving up a slice of business ownership to more than 5,000 employees through a new stock option plan called WeShare. The program is designed to make employees part owners of the company, encourage retention, and increase productivity.

The WeShare stock option plan gives all eligible full-time corporate and field administrative staff and restaurant employees at the assistant manager level and above the option to purchase stock at a specified price over the next 10 years. The company plans to grant stock options to employees annually, which are in addition to existing compensation and benefit programs.

Although many companies offer stock options for key executives, the Wendy's WeShare program reaches deeper into the organization than most other stock option programs.

"WeShare shows employees they're very important. It's an incentive for them to improve profitability. They directly benefit when the price of Wendy's stock rises, and their extra efforts can help maximize the value of our stock for every shareholder," he added.

Through the WeShare program, employees will be granted options totaling 10 percent of their total cash compensation for the previous calendar year.

This year's options give the employee the right to buy the company's stock at the Aug. 2, 1990 price within the next 10 years. New options are planned to be issued annually, meaning that additional options can be exercised each year as long as the full-time employee remains with the company.

For the program to be effective, employees must understand how it affects them individually. Therefore, Wendy's is making a major effort to explain details of the program through corporate and regional meetings, printed and audiovisual materials, and staff resource personnel.

"We want our people to understand the financial benefits possible in the years to come for themselves and their families so they can take full advantage of WeShare," Near explained. "When our employees are committed to improving productivity, our earnings should grow leading to increased shareholder value."

PITTSBURGH (OCT. 31) PR NEWSWIRE - Donald L. Foster, 34, has been named general sales and marketing manager of plate and structural products in the USS division of USX Corp. (NYSE: X), the company said today. The appointment was announced by Frank M. Walker, general manager-plate and structural products.

Foster's promotion to the newly created position brings him back to Pittsburgh after serving nearly three years as a USS district manager in the Chicago sales district.

"Foster comes into the structural and plate sales unit with the critical skills needed to guide the marketing effort for this key product line," Walker said. "This solid background in product marketing and line sales will benefit our efforts to assure quality and service to our customers in the key heavy products area," Walker added.

Foster joined USS at the Detroit sales office in 1979, and was named to a management position as inside sales representative there in 1980. Later that year he was promoted to sales representative, covering the Milwaukee territory.

In 1983, Foster moved to the Chicago sales office as a district product manager, and later was named resident manager. He was promoted in 1989 as marketing manager for the USS Fairfield Works in the Pittsburgh sheet product marketing unit.

Foster next was named industry marketing manager, and in 1987 he became manager of hot rolled product marketing. Later that year, he was appointed district sales manager in the Chicago sales office. Foster is a member of the American Institute of Steel Construction.

NEW YORK (OCT. 31) PR NEWSWIRE - Following the successful completion of the merger between Willis Faber p.l.c. and Corroon & Black Corporation, the directors of Willis Corroon plc (ADR - NYSE: WCG) have declared an interim dividend of 3.3 pence (net) per share (4.4 pence gross) to be paid on Jan. 3, 1991, to all shareholders registered at the close of business on Dec. 6, 1990.

The intention to declare this dividend, which is in respect of the fourth quarter of 1990, was announced in the documentation sent at the end of August to shareholders of Willis Faber p.l.c. and Corroon & Black Corporation in connection with the merger.

Holders of Willis Corroon ADRs will receive this dividend after it has been converted into U.S. dollars by the Depositary. Payments to such holders who are resident in the United States for tax purposes will include a refund of the associated U.K. tax credit in respect of dividend. The payment will be subject to U.K. withholding tax, equal to 15 percent of the gross dividend, and will be made on Jan. 10, 1991.

Corroon & Black Corporation, now an operating division of Willis Corroon plc, is headquartered in New York City. Corroon & Black is one of the world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business, and industry. It has offices across the United States and affiliated offices throughout the world. Willis Corroon traces its origins to 1828, with the establishment in London of Henry Willis & Company. Its Corroon & Black division was founded in 1905 in New York City.

#90304p1843 10/31/1990 ~PR Newswire

BETHLEHEM, PA (OCT. 31) PR NEWSWIRE - Bethlehem Steel Corporation (NYSE: BS) today released the following:

Bethlehem had net income of $10 million and $53 million for the third quarter and first nine months of 1990 compared to net income of $47 million and $196 million for the same periods in 1989. The decline in results for the third quarter of 1990 compared to the third quarter of 1989 was due to lower steel prices, higher operating costs and lower shipments. Net income for the first nine months of 1989 was reduced by $105 million of unusual charges principally for restructuring and downsizing the operations of our BethForge and Baltimore Marine Divisions.

Segment Results

-- Basic Steel Operations: The Basic Steel Operations segment had income from operations of $27 million and $83 million for the third quarter and first nine months of 1990 compared to $59 million and $342 million for the same periods in 1989.

Results for the third quarter of 1990 compared to the year earlier period were adversely affected by a significant decline in steel prices, particularly for structural products, and to a lesser extent for other products, and by higher operating costs at most of our steel plants. In addition, our Sparrows Point plant incurred higher costs in connection with the planned 25-day outage of its hot strip mill as part of its modernization project and for accelerated coke oven repairs. These costs are expected to continue in the fourth quarter of 1990 and in 1991. An additional outage of the hot strip mill immediately prior to completion of the modernization project is scheduled for the first half of 1991. In the third quarter of last year, we incurred higher costs and lost production resulting from a blast furnace outage and from unauthorized work stoppages at our coal operations in connection with a labor dispute at an unrelated company.

This segment's steel shipments were approximately 6 percent lower in the third quarter of 1990 than in the year earlier period. The decline in shipments was primarily attributable to reduced shipments from our Sparrows Point plant, due in part to blast furnace problems during the first half of the year.

Severe market and competitive pressures continue to affect the Bar, Rod and Wire Division, the Rail Products and Pipe Division and the Structural Products Division. During the third quarter of 1990, Bethlehem announced that it was considering a plan to improve the competitiveness of the Bar, Rod and Wire Division and return it to long- term profitability. The plan includes more

than $100 million in major facility improvements, but is dependent upon obtaining a more competitive agreement on labor costs with the United Steelworkers. In addition to the plan under consideration at the Bar, Rod and Wire Division, Bethlehem is considering a wide range of restructuring alternatives for the Structural Products Division and the Rail Products and Pipe Division which could also result in significant capital expenditures and/or material charges to income.

Dividends

The board of directors today declared dividends of $.10 per share of common stock, $1.25 per share of $5.00 cumulative convertible preferred stock and $.62-1/2 per share of $2.50 cumulative convertible preferred stock, each payable Dec. 10, 1990, to holders of record on Nov. 12, 1990.

WALL, NJ (OCT. 31) PR NEWSWIRE - New Jersey Natural Gas Company (NJNG) will issue a one-time billing credit of about $40 per residential heating customer sometime during the last calendar quarter of 1990.

The New Jersey Board of Public Utilities (BPU) today approved the one-time credit to NJNG customers totaling about $14 million. The credit represents the pass-through of a refund the utility has received from its primary natural gas supplier, the Texas Eastern Transmission Corporation.

At the same time, the BPU also approved the continuance of NJNG's existing LGA rate at 6.6 cents per therm through September 1991. NJNG realizes no profit from the LGA, which is simply a pass-through of costs the company pays for natural gas from its pipeline suppliers, plus gross receipts and franchise taxes.

The LGA rate is based on the company's projected gas costs for the 12-month period beginning Oct. 1. It is reviewed each year by the BPU and adjusted if necessary.

"We're pleased that the Texas Eastern refund will allow us to provide a credit to our customers," said NJNG President and Chief Executive Officer Philip H. Reardon. "We are also pleased that our projected gas costs will permit us to maintain our existing LGA rate for the next year. Because of the 12-month leveling effect of the LGA, as well as the company's long-term gas contracts, gas customers are insulated from the dramatic spikes in prices experienced by fuel oil customers each winter."

NJNG serves more than 305,000 customers in virtually all of Monmouth and Ocean counties and parts of Morris and Middlesex counties.

#90304p1846 10/31/1990 ~PR Newswire

BLUE BELL, PA (OCT. 31) PR NEWSWIRE - Unisys (NYSE: UIS) has announced that its Voice Messaging System for residential voice mail has been delivered and made available for service to 1.6 million San Francisco-area residents.

This represents the first major implementation for the enhanced services market of the Unisys Network Applications Platform (NAP), an innovative hardware and software system for the telecommunications industry.

Unisys new voice mail service requires no special equipment to be installed in individual residences. Customers simply use their touch tone phones to dial the Pacific Bell Message Center which uses NAP's high-capacity voice processing system.

NAP's flexibility allows customers to have the convenience of basic call answering, which accepts voice messages when the phone is not answered or when it is busy. The Message Center also offers additional features.

Unisys is the first supplier to provide a high-capability platform for multiple, enhanced services. Since it was introduced in May 1989, NAP has received an enthusiastic response from the telecommunications industry in the United States and international PTTs as telephone companies continue their drive to tap customers' demand for new services.

NAP integrates a digital telecommunications switch and Unisys processors that span small systems to large mainframe power. A comprehensive service creation environment to facilitate the rapid development and deployment of services is provided on the platform. This service creation environment incorporates productivity tools, advanced database languages, including semantic models, voice and administrative systems, and the Unisys Integrated CASE tool, LINC II to develop applications, as well as C, Cobol and other languagues.

The NAP system is capable of handling both residential and business voice mail in the San Francisco area. NAP allows 24 to 4080 circuits to be connected, and up to 210,000 hours of voice to be stored on the platform. This system is capable of retaining more than 200,000 messages.

Unisys announced important extensions to NAP in April 1990, including the ability of users to develop new service applications on UNIX-based platforms, which can be connected to NAP via standard Open System Interconnect (OSI) protocols. This extension allows third party software developers or other vendors to develop applications using a variety of platforms and databases and

then integrate with NAP.

TULSA, Okla. (OCT. 31) PR NEWSWIRE - Unit Corp. (NYSE: UNT) reported net income during the third quarter of 1990 of $671,000, 3 cents per share. The third quarter profit enabled the first nine months operations of 1990 to show a net income of $20,000. This compares to a $614,000 net loss for the third quarter of 1989 and a net loss of $1,509,000 for the first nine months of 1989. The profits were due to increased natural gas production and higher average oil and natural gas prices.

The company reported revenues of $15,844,000 for the third quarter of 1990, up 71 percent from $9,282,000 for the third quarter of 1989. Revenues for the first nine months of 1990 were $42,427,000, up 54 percent from the first nine months of last year.

Unit reported oil and gas production of 1,023,000 equivalent barrels during the first nine months of 1990, up 34 percent from 1989 production of 765,000 equivalent barrels.

Rig utilization for the third quarter and the first nine months of 1990 was 44 percent, up from 38 percent and 37 percent, respectively, for the same periods in 1989.

STAMFORD, CT (OCT. 31) PR NEWSWIRE - Vestron Inc. (NYSE: VV) today announced that the company had entered into definitive agreements with LIVE Entertainment Inc. (NYSE: LVE) in which LIVE has agreed to acquire substantially all of Vestron's operating assets and liabilities in exchange for a package of LIVE equity securities.

The agreement with LIVE requires a "consensual" pre-negotiated Chapter 11 filing and a confirmed plan of reorganization before the acquisition can be consummated. Vestron expects to commence bankruptcy proceedings to approve the plan of reorganization shortly. Certain key holders of Vestron's $115 million of subordinated debt have entered into agreements to support the acquisition agreement with LIVE and the plan of reorganization.

The agreement with LIVE provides for the payment or the assumption by LIVE of all Vestron royalty obligations and trade creditors in full.

Under the agreement with LIVE the holders of Vestron's subordinated debt will receive LIVE convertible preferred stock with a liquidation value of $21 million, plus the unpaid cash interest payment which was due Sept. 1, 1990. Holders of Vestron's debentures will also be issued contingent rights representing the right to receive future payments in LIVE common stock or cash if net revenues realized by LIVE from the exploitation of Vestron's program rights exceed certain levels. Holders of Vestron's common stock will receive 10 percent of the contingent rights.

The convertible preferred stock to be issued by LIVE is expected to have a liquidation value of $20 per share, a conversion price of between 115 percent and 130 percent of the market price of LIVE common stock when issued, and a dividend rate of between 8 percent and 10 percent per annum.

#90304p1860 10/31/1990 ~PR Newswire

HOUSTON (OCT. 31) PR NEWSWIRE - U.S. Home Corp. (NYSE: UH) today announced that its housing operations continued to be modestly profitable for the quarter ended Sept. 30, 1990. The company's core housing operations have seen improvments in gross margins and a reduction in selling, general and administrative expenses during the third quarter.

For the quarter ended Sept. 30, 1990, net income was $1,587,000, or 4 cents per share, compared to net income of $466,000 or 1 cent per share, for the third quarter of 1989. Total revenues for the quarter were $154,052,000 compared to revenues of $174,130,000 for the quarter ended Sept. 30, 1989.

For the nine months ended Sept. 30, 1990, the company sustained a net loss of $14,007,000, or 31 cents per share, compared to net income of $1,293,000 or 3 cents per share, for the nine months ended Sept. 30, 1989. Total revenues for the nine months ended Sept. 30, 1990 were $455,556,000 compared to revenues of $509,248,000 for the same period last year. The loss for the nine months ended Sept. 30, 1990 resulted from provisions taken in the second quarter relating to litigation costs, disposition of excess land and housing inventories in markets where the company has reduced its operations and for discontinued operations.

The Sept. 30, 1990 backlog was $204,278,000 compared to the Sept. 30, 1989 backlog of $251,506,000. The average price of homes delivered in the third quarter of 1990 was $129,700 compared to $118,300 last year. Homes delivered during the third quarter of 1990 were 1,236 compared to 1,408 in the third quarter of 1989, which included 127 homes and 52 homes, respectively, delivered by joint ventures in which the company participates. New orders taken in the third quarter of 1990, including new orders by joint ventures, were 842 compared to 1,522 new orders taken during the comparable period last year.

While the company's housing operations and net results for the quarter ended Sept. 30, 1990, were profitable, revenues, backlog, new orders and deliveries declined from the comparable period last year, mirroring the general downturn in the real estate industry. Consumer confidence, due to the general state of the economy and uncertainty brought about by tighter credit and the conflict in the Middle East, is extremely low as evidenced by an even greater decline in housing sales nationwide since the events in the Middle East in early August. This is coupled with an unprecedented "credit crunch" precipitated by

the savings and loan crisis and significant real estate loan losses on the part of commercial banks, both exacerbated by tighter regulatory scrutiny.

Faced with weakening demand, a reduction in available credit to finance land acquisition and development and a widespread decline in residential land values, the company is reviewing its land holdings and option contracts to purchase land. The company will seek to extend the terms of existing options to purchase land to coincide with the company's projected land usage. If such requests for reduced and extended take downs are not agreed to by option holders, the company would have to decide whether to permit options to expire and write off its investment in the associated option deposits and predevelopment costs. Such write offs would be non-cash charges.

The company's principal financing source has been an unsecured commercial banking agreement which has been renewed annually for 17 years. In connection with the 1990 renewal of the credit agreement, the company agreed to consider a secured agreement if such an agreement provided a longer maturity, increased availability and realistic amortization provisions. Any such secured financing must be carried out in a manner consistent with the terms of the indentures pursuant to which the company's publicly held notes were issued and may require the amendment of certain of those indentures. Pending completion of the restructuring of the existing credit agreement, the company has requested the banks to consent to reschedule the Dec. 15, 1990 amortization payment required under the existing credit agreement. There is no assurance that such consent will be obtained or that the company can negotiate a satisfactory restructuring of the current credit agreement.

#90304p1864 10/31/1990 ~PR Newswire

NEW ORLEANS (OCT. 31) PR NEWSWIRE - The board of directors of Entergy Corp. (NYSE: ETR) today voted to boost the regular quarterly stock dividend by 20 percent, from 25 cents to 30 cents per common share.

This increase marks the second time that the dividend has been raised since payment of a dividend was resumed in 1988. The dividend will be payable Dec. 3 to stockholders of record as of Nov. 16.

Jerry D. Jackson, Entergy's executive vice president of finance and external affairs, stated that while future percentage increases may be smaller, this increase is consistent with the company's objective of implementing on an annual basis dividend increases which will result in reaching a dividend payout ratio that is typical of the electric utility industry.

Authorization to Repurchase Additional Company Stock The board also authorized the expenditure of up to $150 million to repurchase company common stock

through Jan. 31, 1991, depending on market conditions. Any such repurchases depend upon approval from the Securities and Exchange Commission (SEC) of the company's application last month to repurchase up to 10 percent of its common stock. The request is in addition to existing SEC authorization for stock repurchases of up to 20,458,109 shares.

Of that amount, over 18.8 million shares had been repurchased as of Oct. 30 at a total cost of nearly $371.6 million. These repurchases have reduced the number of shares outstanding to approximately 185.8 million.

Jackson explained that stock repurchases are made from time to time depending upon market conditions and authorization of Entergy's board of directors, and that there is no assurance of the actual amount of purchases that will be made.

Corporate Development Philosophy Described Jackson also briefed the board on the company's corporate development strategy. "While the electric utility business will continue to be the predominate focus of our attention," Jackson said, "we will also seek new opportunities where we are able to apply our core business skills and add value."

Jackson noted that any investments in related businesses would likely draw upon the company's skills in power generation and customer service as well as its strengths in the fuels area. "The areas we have identified for investment are in keeping with our strategy to concentrate on what we know best and do well," Jackson said. "Our strategy also contemplates that the total capital to be invested in related businesses will be small compared with Entergy's investment in utility operations."

PRINCETON, N.J. (OCT. 31) PR NEWSWIRE - GE American Communications, Inc. (GE Americom), announced today the signing of an agreement with Telesat Canada that will provide for additional space protection for its customers. Under the terms of the agreement, GE Americom maintains an exclusive option to purchase or lease Telesat Canada's ANIK D2 spacecraft, which it can exercise when ANIK D2 becomes available. GE Americom could use its exclusive option contained in the agreement to purchase capacity for customers on GE Americom's current Satcom fleet of satellites and for its next-generation customers on satellites -- Satcom C-1, C-5 (Aurora II), C-3, and C-4.

Walter Braun, GE Americom senior vice president, stated that GE Americom's agreement with Telesat Canada illustrates GE's commitment to customer service. "GE is committed to being the low risk service provider in the satellite industry. Telesat Canada's ANIK D2 spacecraft has excellent CONUS and Alaska coverage that can improve the transponder protection available to satisfy our

customers. Telesat Canada's ANIK D2 spacecraft also offers the significant advantage of already being in orbit and helps us provide continuous service."

GE Americom, located in Princeton, N.J., operates the Satcom fleet -- 5 C-Band and 2 Ku-Band satellites that service cable television, broadcast radio and television, Alascom Inc., as well as business information and government markets. GE Americom is a subsidiary of General Electric Company (NYSE: GE).

WESTBOROUGH, MA (OCT. 31) PR NEWSWIRE - New England Critical Care, Incorporated (NASDAQ: NECC) today reported record sales and earnings for the third quarter and the nine months ended Sept. 30, 1990.

Sales for the quarter were $31,051,000, an increase of 38 percent over the $22,559,000 reported for the same period in the prior year. Net income for the quarter was $3,185,000, a 41 percent increase over the $2,252,000 reported for the comparable period in 1989. Fully diluted income per share was 24 cents for the quarter as compared to 17 cents for the same quarter in 1989.

Sales for the nine months ended Sept. 30, 1990, were $85.5 million, an increase of 52 percent over the $56.1 million for the nine months ended Sept. 30, 1989. Net income for the nine months was $8.4 million, as compared to $5.6 million for the same period in 1989. Fully diluted income per share was 63 cents for the nine months ended Sept. 30, 1990, as compared to 45 cents for the comparable period in 1989.

The company also announced its decision to apply for listing of its shares on the New York Stock Exchange. Smith stated, "We believe that listing on the New York Stock Exchange will provide increased liquidity and a more stable trading environment for our shareholders."

Founded in 1981, NECC was one of the first companies to provide infusion therapies such as parenteral nutrition, antibiotic therapy, chemotherapy and pain management therapy to patients in their homes. As a leading provider of these services in the alternate site health care marketplace, NECC today offers more than 18 types of home infusion therapies, with specialized services to specific patient populations including AIDS and pediatrics. New England Critical Care's headquarters are located at 50 Washington St., Westborough, MA 01581. The shares of the company's common stock are traded over-the-counter on the NASDAQ National Market System under the symbol NECC.

HOUSTON, (OCT. 31) PR NEWSWIRE - Serv-Tech Inc. (NASDAQ: STEC) reported third quarter 1990 net income of $645,000, an increase of 127 percent compared with $284,000, before extraordinary credits, reported for the third quarter of 1989. Earnings per share were 15 cents for the third quarter 1990, more than double fully-taxed earnings per share of 7 cents in the third quarter 1989. Revenues were $9,023,000 in the third quarter 1990, up 42 percent from the $6,350,000 reported last year.

For the nine months ended Sept. 30, 1990, net income increased 103 percent to $2,654,000, or 60 cents per share, compared with net income of $1,309,000, or 38 cents per share, before extraordinary credits, reported for the first three quarters of 1989. Revenues were $30,086,000 for the first nine months of 1990 an increase of 31 percent compared with revenues of $22,918,000 for the 1989 period.

Including extraordinary credits for tax benefits resulting from the utilization of operating loss carryforwards, earnings per share for the three-and nine-month periods ending Sept. 30, 1989, were 11 cents and 58 cents respectively. There are no operating loss carryforwards available in 1990. The company's tax rate was 36 percent for the nine months ended Sept. 30, 1990.

Richard W. Krajicek, chairman of the board, said that he was extremely pleased with the 1990 third quarter results -- the best third quarter in the company's history. "Increased emphasis by our customers on high quality repairs has increased the scope of our jobs, leading to higher revenues and improved gross margins. Looking ahead, the level of committed work and present bid activity indicate strong demand for the company's services will continue well into 1991."

Following are the unaudited operating results for the three- and nine-month periods ending Sept. 30, 1990 and 1989.

#90304p1869 10/31/1990 ~PR Newswire
CLEVELAND (OCT. 31) PR NEWSWIRE - BP America announced today the results of the first phase of its Project 1990, including the realignment of support functions and the simplification of management structure. The company also announced that it has identified approximately 85 currently filled positions for elimination, but expects many of those employees to be placed elsewhere in the company.

"We've made excellent progress in making BP more productive and more

competitive," said James H. Ross, BP America's president and chief executive officer. "But with this structural change, we've only just begun the larger task of changing relationships throughout the company and the way we manage and behave. I believe the future is going to be exciting and challenging both for the company and for its employees.

"As we go into the next phases of Project 1990, our employees will see greater opportunities to contribute to the company's effectiveness, as well as to their own personal and professional goals."

BP's restructured regional headquarters in Cleveland will continue to constitute BP's corporate base in America.

Of the nearly 900 current corporate staff employees, 380 will now make up BP's corporate staff unit in America. Another 190 will be realigned within the businesses they support. The remaining 210 will be employed in a separate service organization in Cleveland to provide BP and other clients with building-related services.

No significant relocation of employees from Cleveland is anticipated as a result of the realignment.

CLEVELAND (OCT. 31) PR NEWSWIRE - Banner Aerospace, Inc. (NYSE: BAR), Cleveland-based supplier to the aviation aftermarket, today reported a 29

percent increase in earnings for the fiscal second quarter ended Sept. 30. Sales rose 26 percent.

Current year second quarter net income was $4,606,000, or 26 cents per share, on sales of $62,560,000. In the like period last year, pro forma earnings were $3,582,000, or 20 cents per share, on sales of $49,712,000. Banner Aerospace was a wholly owned subsidiary of Banner Industries, Inc. (NYSE: BNR) until Aug. 2, 1990, when Banner Industries sold a 53 percent interest in Banner Aerospace in an initial public offering.

Banner Aerospace net income for the first six months of the current fiscal year amounted to $10,372,000, or 58 cents per share, an increase of 51 percent over pro forma earnings of $6,858,000, or 38 cents, a year earlier. Sales were $128,834,000, up 33 percent over the $97,037,000 of the prior year period.

Samuel J. Krasney, Banner Aerospace chairman and chief executive officer, said that the earnings gains were largely attributable to the positive incremental effect of increased sales. He reported that both internal growth and the results of recent acquisitions contributed to the sales gains. Current year six month results included the operations of Austin Jet Corporation, purchased in July 1989, and Dallas Aerospace, Inc., acquired in September 1989. The results of operations of recently acquired Georgetown Jet Center, Inc. were included for part of the current year's second quarter.

Krasney said world-wide demand for its aviation aftermarket products and services is at good levels. Approximately 40 percent of total first half sales were international, he reported. In addition, Krasney said Banner Aerospace has continued its active acquisition search program, focusing on well-managed, privately-owned organizations with special niches in the aviation aftermarket.

Banner Aerospace is a leading distributor of a broad range of new and overhauled replacement parts to the aviation aftermarket. Products include fasteners, bearings, electrical items, avionics and other airframe components. The company also processes and sells insulated electrical wire and markets new and refurbished helicopters and refurbished corporate airplanes. Its customers include most of the world's commercial airlines and cargo carriers, original equipment manufacturers, distributors, aircraft overhaul facilities and corporate aircraft operators.

WOODCLIFF LAKE, NJ (OCT. 31) PR NEWSWIRE - Ingersoll-Rand Company (NYSE: IR) today announced that it has acquired ABG Strassenbaumaschinen, a Hameln, Germany, manufacturer of asphalt paving equipment and other road machinery.

Terms of the agreement were not disclosed.

"This acquisition underscores Ingersoll-Rand's continuing commitment to products needed for building and maintaining infrastructure and strengthens Ingersoll-Rand's strategic preparations for Europe 1992," said William G. Mulligan, executive vice president. "ABG provides European technology, expands our European manufacturing base and opens new opportunities in eastern Europe."

Mulligan said that Ingersoll-Rand expects world paving requirements to grow throughout the 1990s, and ABG equipment is designed to meet the most stringent paving guidelines in the world.

In 1989, Ingersoll-Rand's Construction Equipment Group acquired another German company, Ing. G. Klemm Bohrtechnik Gmbh, a German manufacturer of specialized rock drills. Klemm drilling equipment is manufactured and marketed by the company's Construction Equipment Group.

Ingersoll-Rand is a leading manufacturer of industrial machinery, including construction equipment, air compressors, mining machinery, pumps, tools, bearings, door hardware and security systems. Through joint ventures and its own operations, Ingersoll-Rand is a leading supplier of hydrocarbon production and processing equipment and services.

ATLANTA (OCT. 31) PR NEWSWIRE - The board of directors of Equifax Inc. (NYSE: EFX), at its regular quarterly meeting today, elected Dan W. McGlaughlin, Ph.D., to the Equifax board.

McGlaughlin, 54, Equifax senior vice president, will succeed Robert W. Scherer who is retiring from the board.

As head of Equifax's Information Technology Sector, McGlaughlin directs the centralization of operations and support of Equifax's technological resources. McGlaughlin's business career includes 24 years with IBM where he held numerous managerial positions including vice president for manufacturing and engineering.

Before joining Equifax in July 1989, he spent seven years as vice president of General Electric Corp. and president of Calma, a technology-based subsidiary of General Electric.

Scherer, retired chairman of the board of Georgia Power Co., has been a member

of the Equifax board since 1982. Scherer, who will be 65 in November, is retiring from the Equifax board in accordance with the retirement-age provisions of the company's bylaws.

J.V. White, chairman of the Equifax board, said, "Dan McGlaughlin's experience and expertise in the areas of technology and marketing will be valuable assets as we position our corporation for continued growth at home and abroad in the decade of the 90s. And, most certainly, we will miss Bob Scherer's active contribution to the direction of our company. We wish him well in his retirement."

Equifax Inc. is the leading provider of information for consumer financial transactions. Established in 1899 in Atlanta, Equifax today has 13,000 employees in 1,100 locations in the United States, Canada, and Europe. Equifax provides information services and automated systems that help customers grant credit, insure lives and property, select new employees, market products, and complete other transactions that benefit the economy, business and consumers. Equifax's revenues for the year ended Dec. 31, 1989 were $840 million.

#90304p1878 10/31/1990 ~PR Newswire

DAYTON, OHIO (OCT. 31) PR NEWSWIRE - At groundbreaking ceremonies today with union, city and state officials in attendance, Erick A. Reickert, chairman of Acustar, Inc., announced the company is investing $37.4 million in new construction and equipment at its Dayton (Ohio) Thermal Products Plant.

The $37.4 million is part of a $65.6 million total investment, which also includes engineering, research and development Acustar is making in future automotive heating, ventilation and air conditioning (HVAC) products.

Acustar, a wholly owned components subsidiary of Chrysler Corporation (NYSE: C), produces air conditioning condensers, evaporator coils, heater core assemblies, transmission oil coolers, radiators, air conditioner/heater unit assemblies, and vapor emissions canisters at the Dayton plant for Chrysler and other automotive companies.

A new 134,000-square-foot building will be constructed on the plant site, with a scheduled completion date of September, 1991. The new building will initially provide space for two new 1,000-ton plastic injection molding machines and support equipment, HVAC assembly and test modules, and engine cooling module assembly operations.

Several existing buildings, dating back to the Maxwell Car Company, are

currently being demolished and the site is being prepared for the new building. Construction is scheduled to start early next month.

Acustar said new work it has received for Chrysler's 1993 model year 'LH' passenger car program will help maintain employment levels at Dayton. The plant currently employs about 1,350 hourly and salary people.

The State of Ohio is providing $500,000 in funding for site preparation and additional financial assistance for training programs for the plant over the next several years. The City of Dayton has approved a 10-year tax abatement.

HACKENSACK, NJ (OCT. 31) PR NEWSWIRE - Script Systems, Inc., (NASDAQ: SCPT) reported record first quarter sales and the fourth consecutive profitable quarter. Sales rose 46 percent to $1,316,851 while earnings of $43,842 were realized. For the trailing 12 months, Script's sales rose 33 percent to a record $5,778,739 while earnings per share were a record. $.21 compared to a loss of ($.05) for the comparable period last year.

Barry Mindes, Script System's president, said the sales increase is due to price increases, higher volume in systems sold and a greater percentage of more expensive systems to medical practices rather than pharmacies. Earnings rose because of higher margins and decreased expenses on a per sale basis.

Script Systems provides automated systems to the health care industry, principally medical offices, clinics and hospitals, which perform clinical record keeping, billing and insurance claims processing, scheduling and administrative functions. Script's products and services are sold throughout the country from direct sales offices and a distributor network.

NEW YORK (OCT. 31) PR NEWSWIRE - Banco Comercial Portugues (BCP), Portugal's leading private commercial bank and the country's largest quoted company, and CARIPLO, one of Italy's leading banks and the world's largest savings bank, today announced an alliance involving reciprocal minority participations and partnership in a new subsidiary.

Under this agreement, which is subject to the approval of the authorities of both countries, CARIPLO will acquire 1.5 percent of BCP's equity, while BCP will take a stake in one of the financial companies of the CARIPLO Group.

One of the main features of this link is the launch of a 50/50 "joint venture" in the mortgage credit business in Portugal. Both institutions have also agreed on the establishment of cooperation mechanisms designed to support the activities of BCP in Italy and of CARIPLO in Portugal.

As of Dec. 30, 1989, CARIPLO had total assets of 84,365 billion lire ($66 billion) and shareholders' equity of 5,182 billion lire ($4 billion). CARIPLO in addition to controlling another commercial bank and a medium-term lending institution, is involved in merchant banking, leasing, factoring, fund management and other non-financial activities.

BCP had total assets of Esc 697 billion ($5 billion) and shareholders' equity of Esc 122 billion ($880 million) as of Sept. 30, 1990. Its subsidiaries include insurance, factoring, brokerage, property and asset management companies.

READING, Pa. (OCT. 31) PR NEWSWIRE - Carpenter Technology Corp. (NYSE: CRS) is confident about the future and is positioned for growth in the 1990s, Paul R. Roedel, chairman and chief executive officer, told 700 stockholders during the steelmaker's annual meeting today.

Roedel said that actions taken over the past three years have strengthened Carpenter, which now is prepared to manage its way through the nation's current economic uncertainty.

"We remain optimistic about our long-term success," he said. "We have made splendid progress. Fiscal 1990 has established a new base from which we can measure progress. We will work diligently to make the decade of the 90s a 'Carpenter Decade'."

Roedel addressed a decline in company earnings over the past two quarters from a year ago after 10 straight quarters of growth. He emphasized, "That performance reflects the poor economic environment that some of our customers are experiencing. However, our sales and marketing initiatives have helped offset the full impact of their reduced demand. Also helping us is the fact that demand from our aircraft engine customers, our oil and gas exploration customers, and our power generation customers is holding up very well.

"On balance, our business today is better than one would expect from reading the papers."

Carpenter will continue to follow three "key" strategies to meet its goals in the 90s, according to Roedel.

The first strategy is management of product mix, or upgrading the product line to the higher, more technically demanding products where Carpenter has special expertise, he said.

Second, the company will place even stronger emphasis on its commitment to Continuous Improvement, a philosophy and process of examination and modification in every phase of the company's operations to become even better. "Now is the time to concentrate our talents to assure that we are ready for the next up-cycle," he said.

Third, Carpenter will strengthen its commitment to the company's customers in product quality, technical assistance, service and on-time delivery. "We need to sharpen our customer commitment to assure that Carpenter is the company of choice for orders that will be placed," he stated.

In other business, the stockholders: -- Elected William E.C. Dearden, James A. Flick Jr., Carl R. Garr, Marlin Miller Jr., and S. James Spitz as corporate

directors for three- year terms.

-- Approved a Stock Option Plan for non-employee directors. -- Approved an amendment to the Incentive Stock Option Plan for officers and key employees.

-- Defeated a stockholder proposal to elect all directors annually. -- Elected Coopers and Lybrand as independent accountants.

HIGHLAND PARK, MI (OCT. 31) PR NEWSWIRE - Laurel Cutler, vice president-Consumer Affairs for Chrysler Corporation (NYSE: C), has been named one of America's most powerful women in the November issue of Ladies' Home Journal. Cutler is also vice chairman and worldwide director of Marketing Planning for FCB/Leber Katz Partners in New York.

At Chrysler, Cutler serves as a clearing house for information on consumer expectations and focuses management's attention on the consumer's perception of Chrysler and its products.

She participates on the Marketing and Planning senior management committees, and serves as advisor to Chrysler's Youth Committee and the Advisory Committee of the Women's Automotive Market.

Cutler also develops and analyzes customer satisfaction data and makes recommendations to strengthen Chrysler's customer satisfaction programs. She reports to Chrysler Motors Chairman Bennett E. Bidwell.

"Laurel Cutler's unique sense of the marketplace and her instincts for getting through to it have had an impact on Chrysler's marketing strategy, brand identification and advertising goals," said Bidwell. "It's no surprise to us she's on Ladies' Home Journal list of most powerful women. She's right at the top of ours, too."

A variety of sources outside the magazine were asked to name women who have real power, rather than being figureheads; who are most likely to get their phone calls returned, and most likely to leave a lasting impression.

DEARBORN, MI (OCT. 31) PR NEWSWIRE - Pledges by Ford Motor Company employees and a gift from the Ford Motor Company Fund will add a record $12 million to

the 1990 United Way for Southeastern Michigan Torch Drive.

Helen O. Petrauskas, vice president - Environmental and Safety Engineering, reported the contribution at a United Way luncheon today at the Westin Hotel.

Ms. Petrauskas, who served as Ford's campaign chair this year, said the combined total of $12 million is the largest single amount ever pledged to the United Way Torch Drive. Last year, Ford's combined contribution totaled $11.6 million.

Ms. Petrauskas thanked General Chairman Ken Whipple, the Ford Ambassadors, the UAW National Ford Department, and the Ford employees for the outstanding results. According to Ms. Petrauskas, "They proved that at Ford, the quality of life is Job No. 1."

The Ford executive also noted that the record Ford employee pledge of $10.7 million, up from last year's $10.35 million, is the single largest gift to any of the 2,200 United Ways in the country. That pledge, combined with the record Ford Motor Company Fund gift of $1.3 million, enabled the Ford drive to top last year's record total by $403,000. In the 42 years that Ford has participated in the United Way drive, employees and the company have contributed more than $242 million.

Ms. Petrauskas announced that adding the Ford contribution to the dollars reported earlier by Chrysler brings the automotive manufacturers' unit to $16,660,396.

#90304p1890 10/31/1990 ~PR Newswire

SAN FRANCISCO (OCT. 31) PR NEWSWIRE - Visa International today announced that Zivnostenska Banka in Prague issued its first internationally accepted Visa cards to Czechoslovakian citizens. The bank joined Visa in January 1990. In a related event, three Polish banks will issue internationally accepted Visa cards by June of 1991.

Zivnostenska Banka issued Visa cards to its customers with convertible, foreign currency deposits. These cards operate as deferred debit cards with the customer's account being debited the full card balance once a month. Beginning next year, cardholders will also be able to make Czech Koruna payments inside Czechoslovakia.

"The benefits of carrying a Visa card are significant for Eastern European citizens," said Charles T. Russell, chairman of Visa International. "Procedures which, in the West, we take for granted, such as checking into hotels, booking airlines, obtaining foreign currency and entertaining clients

are cumbersome and time-consuming for them. Visa cards will change this immediately. Our member banks in Czechoslovakia, USSR, Hungary and Poland are pioneering the issue of international payment systems in Eastern Europe."

In Poland, Bank Polska Kasa Opieki (PEKAO) SA, Bank Inicjatyw Gospodarczch (BIG) SA, both in Warsaw, and Bank Przemyslowo Handlowy (BPH) in Krakow will all issue Visa cards to customers with convertible, foreign currency deposit accounts.

Boguslaw Kott, Chairman of the Board of BIG SA pointed out that the lack of existing banking infrastructure in Eastern Europe had given them one advantage: "We will be able to deliver efficient electronic services without moving through the paper age."

Visa International, with 230 million cards in circulation including 126 million in the United States, is the world's largest consumer payment system.

LONG BEACH, CALIF (OCT. 31) PR NEWSWIRE - Alitalia, the national airline of Italy, today took delivery of its 49th and 50th MD-80 jetliners from McDonnell Douglas (NYSE: MD).

Bob Hood, president of the Douglas Aircraft division of McDonnell Douglas, said Alitalia is the first airline outside the United States to operate 50 or more of the popular short-to-medium-range twin jets.

Senior officials of Alitalia were in Long Beach to accept delivery of the new aircraft and to participate in the ceremonies.

Alitalia operates 25 of the aircraft and another 25 are flown by Aero Trasporti Italiani, a subsidiary of the airline.

"Alitalia is a long-time customer of Douglas twin jets," Hood told a large audience at the delivery ceremony, "and they have shown their confidence in our airplanes by helping to launch the McDonnell Douglas MD-11 trijet."

Michele Principe, president of Alitalia, said, "This long cooperation has been supported by the excellent flexibility, comfort and reliability offered by McDonnell Douglas aircraft to airline customers over the years. Specifically, the MD-80 has given the Alitalia fleet the best seat-to-size configuration for European traffic service."

Alitalia is one of the largest operators of MD-80 aircraft in the world. The airline ordered its first MD-80s in 1982, and the twin jet first went into

service with Alitalia in 1983. The airline has firm orders for 45 additional MD-80s and options for 25 more.

McDonnell Douglas has now delivered more than 790 MD-80s since the plane went into service in 1980. The company also has more than 430 firm orders for MD-80s and MD-90s, the company's next-generation twin jet, and has other commitments for nearly 500 additional twin jets.

FARMINGTON HILLS, MICH. (OCT. 31) PR NEWSWIRE - Medar, Inc. (NASDAQ: MDXR) reported net earnings for its third quarter ended Sept. 30, 1990, of $131,308, or $.02 per share, on net sales of $3,583,019, as compared to a third-quarter loss in 1989 of $215,207, or $.04 per share, on net sales of $3,928,279.

For the nine months ended Sept. 30, 1990, Medar, Inc. reported net earnings of $276,924, or $.05 per share, on net sales of $10,873,313, compared to a nine-month loss of $1,249,823, or $.23 per share, on net sales of $10,354,267 in 1989.

Medar, Inc. also announced that it has been selected by General Motors Corporation (NYSE: GM) to supply resistance welding control to GM's St. Therese Assembly Plant in St. Therese, Quebec. These controls will feature the RIO (remote input-output) technology obtained under license from Allen-Bradley. The General Motors order approximated $450,000 and represents the first in what is believed to be a multi-part order.

Prospects for both automotive and non-automotive business are excellent and the outlook for the remainder of 1990 and 1991 is considered strong.

Medar designs and manufactures computer-controlled automation equipment including vision gauging and inspection systems, resistance welding controls and computer communications systems. Medar's customers include major companies in the defense, aerospace, automobile, appliance, entertainment and consumer goods packaging industries.

DALLAS (OCT. 31) PR NEWSWIRE - Quest Medical Inc. (NASDAQ: QMED) and Clini-Therm Corp. (NASDAQ: CLIN; PSE: CLI) jointly announced today that Quest has notified Clini-Therm that it intends to exercise its option to participate in a further financial restructuring of Clini-Therm through a cooperative bankruptcy reorganization of Clini-Therm.

Pursuant to agreements between Quest and Clini-Therm, Quest has agreed to provide up to $820,000 to accomplish the reorganization, which includes a previously announced $320,000 advance to Clini-Therm prior to the filing of the bankruptcy petition. Quest has agreed to negotiate an agreement with Clini-Therm's secured lender and holder of all of its preferred stock.

It is currently anticipated that, as part of the reorganization, title to substantially all of Clini-Therm's assets will be transferred to Quest. Further, it is anticipated that, pursuant to the plan of reorganization, Quest would distribute up to 800,000 warrants to purchase Quest common stock to holders of Clini-Therm common stock, of which 600,000 are contingent upon pre-market approval by the FDA of a Clini-Therm hyperthermia system for non-surgical treatment of elderly men with enlarged prostate glands. Thomas C. Thompson, President of Quest, said, "The possibility of a treatment modality for a portion of the 400,000 men who are surgically treated for benign prostate hyperplasia (BPH) each year is the primary interest of Quest in this transaction."

The final terms of the plan of reorganization are subject to the approval of the Bankruptcy Court and, accordingly, could change.

Dallas-based Quest Medical develops, manufactures and markets proprietary products for the hospital market. For the first six months of 1990, Quest had revenues of $3.0 million. As of June 30, 1990, Quest had $10.9 million in cash, cash equivalents and short-term investments, equal to $1.97 per share, and stockholders' equity of $16.9 million, equal to $3.07 per share.

Clini-Therm, also based in Dallas, is a manufacturer of hyperthermia equipment for the heat-treatment of cancer and other disorders.

CLEVELAND (OCT. 31) PR NEWSWIRE - Momentum, Inc. (NASDAQ: MMNT) reported gains in both revenues and net income for the third quarter and nine months ended Sept. 30, 1990.

In the third quarter, revenues reached $12,251,390, an increase of 14.4 percent over the $10,708,688 reported for the same period of 1989. Net income for the quarter was $134,894, or $.01 per share, compared with a 1989 loss of $263,534, or ($.02) per share.

For the nine months ended Sept. 30, revenues were $34,717,498 versus revenues of $33,317,651 in the same period last year. Net income was $259,724, or $.02 per share, compared with a loss of $515,295, or ($.04) per share in 1989.

The Company credited its gains to growing business at its Aerosol Systems subsidiary.

Edwin M. Roth, chairman and CEO, said, "Demand remains high for our traditional aerosol products, as well as for barrier package products, particularly our proprietary items. We are experiencing continuing difficulties in receiving sufficient quantities of the specialized aluminum cans required for these products from our European supplier. Consequently, we are escalating research into other alternative package designs, so that we can be certain of meeting our growth requirements for this product line in 1991.

"Our restaurant margins are under pressure from the legally mandated increase

in minimum wage earlier in the year, but we have maintained our revenues while the industry generally seems to be falling off," Roth noted.

"Currently we have seen no evidence of any changes in the economy in our new order production. Our optimism about the Company's future and its continued progress remains high."

Momentum, through its subsidiary Aerosol Systems, Inc., is principally a formulator and aerosol packager of degreasers, lubricants, cleaners and other products for the automotive aftermarket and the industrial maintenance market. The Company also owns and operates five Chuck E. Cheese family oriented restaurants in Ohio.

LA JOLLA, CA. (OCT. 31) PR NEWSWIRE - Intermark, Inc. (AMEX: IMI) today announced that its Board of Directors elected James V. Iaco, Jr. (pronounced "Yacco") as Senior Vice President and Chief Financial Officer effective November 1, 1990. Iaco succeeds Frank C. Alexander as Chief Financial Officer who will continue to serve Intermark as Executive Vice President.

Iaco has twenty-two years of progressive experience in the areas of accounting and financial management, including senior management positions with MAXXAM Inc. (AMEX: MXM) and Deloitte & Touche (formerly Haskins & Sells). Iaco served MAXXAM, a Fortune 200 company, as Senior Vice President-Chief Financial Officer and Treasurer for the past eight years.

As a member of MAXXAM's top management team, Iaco contributed to the company's successful growth to a $3.2 billion asset, $2.4 billion revenue company in ten years. In addition, he was instrumental in the successful negotiation and closing of several major financing arrangements and strategic transactions, including the acquisition by MAXXAM of Kaiser Aluminum & Chemical Corporation and The Pacific Lumber Company. Overall, Iaco was employed by MAXXAM for seventeen years, serving in the additional positions of Vice President-Treasurer of Real Estate Operations, Assistant Corporate Controller, and Manager of Financial Reporting and Planning.

A Certified Public Accountant, Iaco served for four years as Senior Audit Accountant with Deloitte & Touche in Los Angeles and two years as Assistant Controller with Mitchum, Jones & Templeton, also in Los Angeles. Commenting on Iaco's election as CFO, Intermark President John C. Stiska said, "Our shareholders know that we are in the process of de-leveraging and restructuring our balance sheet to give us the foundation to grow in the '90s. Jim Iaco's experience, sophistication and financial savvy will provide our

senior management team with the dimension we need to build Intermark in this environment. We know of Jim's enviable track record through our long-standing relationship with MAXXAM management, and we are fortunate to have him join us."

Said Iaco, "I've long been an admirer of Intermark Chairman Red Scott and the Intermark record of growth. The level of professionalism within the organization and the talent of the management team is unmatched. I look forward to the opportunity to be part of Intermark and to apply my experience at this time in its development."

Intermark is a $1 billion operating/holding company whose business is to acquire a controlling interest in, operate through and add value to well-established, successful, mid-sized American growth companies in broadly diverse industries.

OAKHURST, CA (OCT. 31) PR NEWSWIRE - Sierra On-Line (NASDAQ: SIER) announced today that it has commenced preliminary testing of a new multi-player game technology. Sierra is in the process of testing a prototype product in the Los Angeles area with nearly 1,000 volunteer testers. Each of the testers has signed a nondisclosure agreement.

Ken Williams, president and chief executive officer of Sierra, stated "Sierra is interested in extending our core product development technology (SCI) to have multi-player capabilities. Our long-term goal is to have games, similar to those we now sell, which can be played simultaneously by large groups of people over a wide area network.

We have no plans currently to announce any particular product, any time table for roll-out or even any sense of what form a national roll-out might take, e.g., whether we would operate our own network or offer our product through some existing network. This announcement is only being made to correct misinformation that may have been leaked by our testers. Although we are very excited about this test, Sierra cannot speculate until next year whether it might lead to some marketable product."

Sierra On-Line develops and publishes premium-priced interactive animated adventure software for the high-end of the consumer market.

NEWTON, MA (OCT. 31) PR NEWSWIRE - Greenery Rehabilitation Group, Inc. (NYSE: GRG) today announced that preliminary indications of its financial results for its fiscal fourth quarter ended Sept. 30, 1990, show earnings between 9 cents to 12 cents a share. These results represent a decline from 25 cents a share in the quarter ended Sept. 30, 1989.

Earnings per share for the nine months ended June 30, 1990, were 58 cents a share compared to 41 cents a share in the nine months ended June 30, 1989. As a result, earnings for the year ended Sept. 30, 1990 are expected to exceed the 66 cents a share reported in the year ended Sept. 30, 1989.

Upon making this announcement, George Ferencik, president and chief operating officer, issued the following statement:

Greenery Group emphasized that the financial indications announced today are preliminary only and subject to audit verification. Audited financial results for the year ended Sept. 30, 1990 are expected to be available in December.

Greenery Group operates 12 rehabilitation and nursing care facilities located in Massachusetts, Connecticut, North Carolina, Maryland, California, Michigan, Washington State and Texas. Six of these facilities now specialize in

providing rehabilitation services to patients who have suffered traumatic brain injuries and several of the other facilities are expected to be converted to these specialized services.

PALO ALTO, CA. (OCT. 31) PR NEWSWIRE - Emery Worldwide announced today the appointment of two experienced air freight executives who will join the company in top operating and marketing positions.

Arthur C. Bass, chairman and chief executive officer of the $1.4 billion company, said that Michael J. Fitzgerald had been named executive vice president and chief operating officer and that Tucker Taylor had been named senior vice president -- marketing and sales.

Bass also announced that Donald G. Berger, 43, continues as president of Emery Worldwide Airlines, the company's certificated airline subsidiary. As president of EWA, Berger will have responsibility for all of Emery's aircraft operations as well as its contract for transporting Express and Priority mail for the United States Postal Service.

"Mike Fitzgerald and Tucker Taylor are seasoned veterans who have dedicated their entire professional careers to building companies," Bass said. "Their top priority is to ensure that Emery's service is at a level to allow the company to compete with all air freight products.

"Don Berger has been a tireless worker for both CF AirFreight and Emery for 20 years," Bass said. "His experience is highly valued. Don's appointment as president reflects the growing importance of Emery Worldwide Airlines."

Fitzgerald, Taylor and Berger each will report to Bass. As executive vice

president of Emery Worldwide, Fitzgerald, 54, will have responsibility for the company's worldwide freight operations, human resources and terminal facilities. Since 1982 he has been vice president of Business Services International of Annapolis, Md., an air transportation consulting firm, with clients that include Porsche, Pepsi Cola, North American Van Lines and Dillon Read Investments.

Fitzgerald is a former senior vice president of Federal Express Corp., where from 1973 to 1982 he was responsible for developing that company's field organization, including sales and service, as part of the Advance Planning and Research Group.

Prior to serving as a Federal Express executive, Fitzgerald was vice president -- operations for D.H. Overmyer Co., one of the nation's largest public warehousing and warehouse leasing companies.

Fitzgerald also worked 12 years with United Parcel Service, his final position as Northern Illinois operations manager.

He is a graduate of Northeastern University and will reside in the San Francisco Bay Area.

Taylor, 49, has been president of Kensico Associates Inc., a New York marketing and research firm, since 1982. The firm's clients have included Federal Express, SuperShuttle International, Western Airlines and DHL Inc. He is a member of the board of directors of SuperShuttle International and Flight Services Group Inc.

As senior vice president of Emery, he will have responsibility for Emery's worldwide marketing program, sales organization and customer service.

Taylor also is a former Federal Express executive, serving as senior vice president from 1974 to 1982 in a variety of key positions including Sales and Service, Industrial Relations and general manager of the Eastern Division.

He is a graduate of Yale University and will reside in the San Francisco Bay Area.

Berger most recently was president of Emery and before that was president of CF AirFreight, which merged with Emery in 1989. He is a 21-year veteran of the air freight business and a graduate of Hope College.

Emery Worldwide, based in Palo Alto, is a subsidiary of Consolidated Freightways Inc. (NYSE: CNF), a $4 billion diverisified transportation company with businesses in long-haul and regional trucking, air freight and intermodal rail and ocean services.

NEW YORK (OCT. 31) PR NEWSWIRE - Commodore International Ltd. (NYSE: CBU) today reported earnings of $7.0 million, or $.22 per share on sales of $200.3 million for the first fiscal quarter ended Sept. 30, 1990. This compares with a loss of $6.5 million, or $.20 per share on sales of $165.3 million in the year-ago quarter.

Net sales for the quarter increased by 21 percent, attributable to a 50 percent growth in unit sales of the Amiga product line and to favorable exchange rates of major European currencies. The significant growth in sales led to a substantial increase in gross profit while operating expenses were tightly controlled, increasing by only 6.5 percent compared to the prior year period. These factors resulted in net income for the quarter of $7.0 million.

Irving Gould, chairman and chief executive officer, commented, "We are pleased with our return to profitability and the strong performance of the Amiga product line worldwide. We expect our Amiga and PC products to continue to have growing appeal to a wide range of business and home users."

Commodore International Ltd., through its operating subsidiaries around the world, manufactures and markets personal computers to customers in the professional, government, education, and consumer market sectors. The company has three product lines: the Amiga multimedia computers, the MS-DOS PC compatibles, and the classic C64 computers.

ORINDA, CA (OCT. 31) PR NEWSWIRE - Sierra Club national Director Michele Perrault today demanded that print and radio ads funded by Waste Management Inc. opposing measure E be pulled immediately. The ads were called by Perrault "an infringement of the Sierra Club trademark and a violation of election laws."

Responding to a newspaper ad listing Sierra Club as a signer, on Oct. 25, Phil Berry, Sierra Club Vice President of Conservation Law, wrote a letter to Waste Management's Walnut Creek office informing them, "We view this as a misappropriation of the Sierra Club name and an attempt to mislead readers of the ad into believing that the position taken by the ad is a Sierra Club view and not merely that of someone who incidentally is a member of Sierra Club.

"We demand that any further of your ads or any campaign material of any sort not use the Sierra Club name or by any other means imply Sierra Club has taken a position contrary to or in any way different from what it actually has taken."

Sierra Club has endorsed Measure E, the initiative which would remove Marsh Creek from a list of sites being considered for a Contra Costa County dump site. Voters in Contra Costa passed a Sierra Club-endorsed initiative last November that designated Keller Canyon as the choice for the next county landfill site.

KANSAS CITY, MO. (OCT. 31) PR NEWSWIRE - Hallmark Cards Inc. and Paramount Cards Inc. announced today a licensing agreement enabling the two companies to jointly launch a line of Hispanic greeting cards.

Under the terms of the agreement, Hallmark will license the line's name, Primor, to Paramount for use on both companies' Hispanic card lines. Paramount will create, design and manufacture the cards, while Hallmark will provide expanded distribution of the cards.

Both companies will distribute the Primor line through retail outlets, including specialty shops and mass market outlets such as supermarkets, discount stores and drug stores.

Paramount, headquartered in Pawtucket, R.I., has produced Hispanic greeting cards since 1984. A unique aspect of Paramount Spanish-language cards is that they feature an English translation of the Spanish text. The verse is written in Spanish expressly for Hispanic audiences, not merely translated from existing English-language cards.

The Hispanic population is the fastest-growing market segment in the country, growing five times as fast as the population as a whole. The Hispanic population in this country now stands at 23 million and is expected to reach 35 million by the year 2010.

Hallmark Cards, founded in Kansas City, in 1910, is the world's largest greeting card manufacturer. Annual sales are in excess of $2.5 billion.

Hallmark, which has offered Hispanic greeting cards since the 1960s, also serves the Hispanic market through its subsidiary, Univision Holdings Inc., the nation's leading Spanish-language communications company.

The new Hispanic card line will be available in stores nationwide in mid-1991.

HOUSTON (OCT. 31) PR NEWSWIRE - Continental Express will inaugurate service between Ft. Collins/Loveland and Denver with the premiere of its "Sculpture Showcase" on Nov. 1. The showcase is a unique exhibit developed with the Loveland arts community that will tour Continental Express airport terminals throughout Colorado and Wyoming for two years. All shows will feature local artists from each area as well as original artists from Ft. Collins and Loveland.

The Ft. Collins/Loveland exhibit will include the work of 20 acclaimed sculptors and will feature a 50 inch tall, 300 pound bronze sculpture commissioned by Continental Express, entitled "Evolution of Flight." This piece illustrates the development of flight from the beginning of time to the aeronautic technology mastered by man today.

Lance Perrin, vice president of Marketing for Continental Express, said, "Continental Express is pleased to jointly sponsor this program with the City of Loveland. As the exhibit tours our terminals throughout the region, we're able to share the talent of these artists with our customers and the local communities."

The sculpture showcase will be on display for thirty days in each airport, with some of the pieces for sale. A portion of the proceeds from the sales will be utilized to purchase sculptures for permanent displays in airport terminals. Continental Express's program to support Colorado artists has drawn the praise of Governor Roy Romer, the Colorado Council on the Arts and Humanities, the Colorado Business Committee for the Arts, and the city of Loveland.

MELBOURNE, FL (OCT. 31) PR NEWSWIRE - The City of New York Department of Correction has awarded a $12.5 million contract to Harris Corporation (NYSE: HRS) to furnish and install a master telecommunications system at the Rikers Island prison complex.

Under the contract, Harris will install a private, automated branch exchange that will provide a security digital-telephone and voice-paging/public-address system for communications across the island. The system also will connect the island to public telecommunication systems on shore.

The contract was awarded to Harris Government Electronic Systems Division. The division will integrate equipment from Harris Digital Telephone Systems Division, Harris Computer Systems Division, and Cincinnati Bell Information Systems. The digital communications network will use fiber optics and standard telephone cable.

Rikers Island is the nation's largest jail complex, with more than 14,000 inmates and 7,000 administrative personnel. The complex consists of more than 30 inmate facilities and administrative buildings.

The existing telephone system, the core of which was installed 50 years ago, became obsolete with the complex's rapid growth during the last decade. Replacements for many of the old system's parts are no longer available.

Cecil Clarke, telecommunications director for the New York City Department of Correction, said, "This contract was awarded to Harris Corporation based on a combination of technical and price considerations, their strong reputation for quality in the telecommunications field, and their proven track record for delivering cost-effective systems on schedule. Harris' experience in providing complex software- and hardware-driven turnkey systems makes us confident the system will meet our needs well into the future."

Harris Government Electronic Systems Division is part of Harris Electronic Systems Sector, which conducts advanced research studies, develops prototypes and produces a broad range of state-of-the-art systems for government agencies and commercial organizations in the U.S. and overseas.

Harris Corporation, with worldwide sales of more than $3 billion, is focused on four major businesses: electronic systems, communications, semiconductors, and office equipment.

ACRE, ISRAEL, (OCT. 31) PR NEWSWIRE - Electrochemical Industries (Frutarom) Ltd. (AMEX: EIF) today reported results for the third quarter and nine months ended Sept. 30, 1990.

Net income for the nine-month period ended Sept. 30, 1990, amounted to NIS 8.6 million ($4.2 million) compared with a net income of NIS 6.0 million ($2.9 million) in the same period in 1989. Net income for the third quarter of 1990 was NIS 3.4 million ($1.6 million) compared to net income of NIS 1.3 million ($0.7 million) during the corresponding period a year ago.

Consolidated sales for the first nine months of 1990 amounted to NIS 180.6 million ($87.8 million), compared with NIS 183.4 million ($89.2 million) in the same period in 1989. Consolidated sales for the third quarter of 1990 were NIS 66.2 million ($32.2 million), compared with NIS 56.8 million ($27.6 million) during the same period in 1989. During the period reported, the flavors and fragrances division increased its sales by over 12 percent compared with the same period last year.

Joseph Geva, chief executive officer and vice chairman of EIF, explained that the decrease in sales during the nine months of 1990 was mainly due to a 5.6 percent drop in the company's export sales, while sales on the local market increased by some 4 percent compared with the same period last year.

Operating profit for the first nine months of 1990, before financial expenses, amounted to NIS 18.3 million ($8.9 million), compared with NIS 15.6 million ($7.6 million) in the first nine months of 1989. Operating profit for the third quarter of 1990 was NIS 8.4 million ($4.1 million), compared with NIS 3.2 million ($1.6 million) in the same period last year.

In August, the company received a permit from the Israeli Investment Authority to increase its approved investment program from NIS 25.6 million to NIS 40.4 million. At Aug. 30, 1990, the company's investments totaled NIS 24.6 million on account of the above mentioned sum. Based upon receipt of this permit, the company received government grants totaling NIS 4.9 million.

The Investment Authority also approved an investment program for the flavors and fragrances division in the amount of NIS 5.1 million, out of which NIS 1.8 million were invested as of Sept. 30, 1990.

The third quarter of 1990 was characterized by increased production at the

company's Acre facility following general upgrading and the installation of new equipment, which took place during the second quarter of this year. Ongoing efforts are being made to improve product quality. Accordingly, state-of-the-art equipment has been purchased and a special, quality control department established to ensure that the company's products meet the stringent requirements of international standards. In addition, considerable effort is being expanded in the area of ecology.

As reported previously, in August the company entered into an agreement to establish a U.S. subsidiary, Flavor Key 2000 Inc., for marketing the product line of the flavors and fragrances division.

Electrochemical Industries (Frutarom) Ltd. manufactures and markets chemicals, raw materials, flavors and essences for a wide variety of industrial applications. As one of Israel's leading firms, EIF is the country's sole producer of PVC, which it markets both domestically and overseas.

LAS VEGAS (OCT. 31) PR NEWSWIRE - ATI Medical Inc. (AMEX: ATI) today reported that net income for fiscal 1990 increased moderately over the prior year, despite a loss in the fourth quarter. Record revenues were up 27 percent over fiscal 1989.

Net earnings for the year ended July 31, 1990, rose to $2,375,000 or 43 cents per share, from $2,170,800 or 41 cents per share, in the prior fiscal year. Revenues for the year increased to $49.7 million from $39.1 million a year earlier.

For the three months ended July 31, 1990, ATI incurred a net loss of $353,000, or 7 cents per share, compared with net income of $663,700, or 13 cents per share, in the same period a year ago. Revenues increased 22 percent to $12.4 million from $10.2 million in the previous year.

Paul E. Stevenson, president and chief executive officer, said earnings improvement was restrained by non-recurring costs associated with its new Americare subsidiary serving the $3.0 billion home health care market. These expenses adversely affected pretax results by approximately $460,000, or 5 cents per share.

Also affecting results in the fourth quarter was the one-time effect of revised estimated employee benefit costs assessed by the government. In addition, seasonal softness affected equipment rentals in both hospitals and the entertainment industry. The prior year's fourth quarter results reflected

higher than usual entertainment industry volume due to accelerated production activity related to a pending strike.

Stevenson said that ATI's earnings growth rate in fiscal 1991 should outdistance that of the prior year. Revenues are expected to be up 20 percent to approximately $60 million, with much of the growth coming from the Americare subsidiary.

ATI Medical rents medical equipment primarily to hospitals as well as the entertainment industry through a total of 53 offices in major cities across the country. ATI also sells medical equipment and certain disposables. The new Americare subsidiary provides medical equipment for rental through exclusive home health care dealers covering 100 markets nationwide.

GREENVILLE, S.C. (OCT. 31) PR NEWSWIRE - Michelin announced today that it will implement a restructuring plan for its North American operations, including Mexico.

The restructuring plan is the result of task forces made up of representatives from both The Uniroyal Goodrich Tire Company, which was acquired in early May 1990, and Michelin's North American operations. Their unanimous recommendation was that certain operations of the two companies be consolidated.

Among the steps to be taken is the establishment in Greenville of a North American holding company, with Carlos Ghosn as chairman, president and chief executive officer. Since April 1989, Ghosn has been president and chief operating officer of Michelin Tire Corporation and Michelin Tires (Canada) Ltd. Previously, he has held various positions within the Michelin Group in Europe and South America.

This holding company will include four functions with management responsibility for North America. Heading these functions are:

1 -- Frederic Henry-Biabaud, marketing and sales. He has directed marketing and sales for Michelin Tire Corporation for the past two years.
2 -- Jean Paul Caylar, business development. Most recently, Caylar was the vice president for administration with Michelin Tire Corporation.
3 -- Manufacturing. To be appointed shortly.
4 -- James M. Micali, legal and financial. He has been Michelin Tire Corporation's general counsel since 1985.

Michelin Tire Corporation, The Uniroyal Goodrich Tire Company and Michelin Americas Research & Development Corporation (MARC) will continue to operate as separate legal entities under the holding company. However, the scope of their operations will change.

Michelin Tire Corporation will continue to be headquartered in Greenville. The president and chief operating officer of this company will be announced shortly.

The Uniroyal Goodrich Tire Company will be responsible for the replacement sales and marketing of all passenger and light-truck tire brands (Michelin, Uniroyal, BFGoodrich, and private and associate brands). All UGTC plants -- tire, textile and Ameripol/Synpol -- will continue to operate as part of UGTC.

Michelin Americas Research & Development Corporation (MARC) will provide all R&D support for Michelin's North American operations and remain in Greenville. It will have operations in Akron and Mogadore, Ohio, and Troy. Jean-Pierre Boca, who is the current president of MARC, will continue in that position.

A Michelin support company will be established to integrate, coordinate and consolidate various support functions, such as distribution, purchasing, information systems and accounting for all Michelin North American operations. The objective is to provide a greater degree of service, expertise and effectiveness to the group.

LOUISVILLE, KY. (OCT. 31) PR NEWSWIRE - Navistar International Transportation Corp. said today that it had been notified by the United Auto Workers union that the extension of the labor contracts between Navistar and the UAW will be terminated at the end of each second shift that starts on Nov. 2, 1990.

The labor agreements were scheduled to expire on Oct. 1, but by mutual agreement had been extended indefinitely subject to termination with at least 48 hours notice by either the company or the union.

Negotiators for Navistar and the UAW are continuing to meet in Louisville working towards new agreements covering 8,000 production, maintenance, clerical and technical employees at Navistar facilities in Georgia, Illinois, Indiana, Maryland, Ohio and Texas.

Navistar International Transportation Corp., the principal operating subsidiary of Navistar International Corp. (NYSE: NAV), is the leading producer of medium and heavy trucks in North America and the worldwide leader in the production of mid-range diesel engines.

MIAMI BEACH, FL. (OCT. 31) PR NEWSWIRE - Non-Invasive Monitoring Systems Inc. (NIMS) (NASDAQ: NIMU) today announced results for the year ended July 31, 1990.

For the year ended July 31, 1990, NIMS reported a net loss of approximately $970,000 on net sales of approximately $1,366,000 as compared to a net loss of approximately $830,000 on net sales of approximately $1,506,000 during the fiscal year ended July 31, 1989.

The decrease in sales and increased loss is due, in part, to a reduction in sales of NIMS's Respicentral systems to an affiliated party during fiscal 1990 which was partially offset by an increase in sales of Respitrak, Respisomnograph systems and disposables. In addition, operating expenses increased in fiscal 1990 in large part due to compensation expenses charged as a result of a one-time issuance of common stock to employees, as well as additional General & Administrative, Research & Development, and Selling & Distribution costs incurred.

NIMS, based in Miami Beach, is engaged in developing, manufacturing and marketing computer assisted, non-invasive monitoring devices designed to detect abnormal respiratory, cardiac and other medical conditions from sensors placed on the body's surface.

CHANTILLY, VA. (OCT. 31) PR NEWSWIRE - Banner Industries, Inc. (NYSE: BNR) announced today the sale of its waste water treatment operations for approximately $75 million in cash to North West Water Group PLC, headquartered in Cheshire, England. These operations consist primarily of Envirex Inc. of Waukesha, Wis., and General Filter Company of Ames, Iowa.

Banner had previously announced, on March 15, 1990, its intentions to sell these operations, stating that they were peripheral to its core aerospace and industrial businesses. The sale is subject to U.S. regulatory approval under relevant anti-trust guidelines, and the transaction is expected to close shortly thereafter.

Banner Industries, Inc. is a leading supplier of aerospace and industrial products, and communications services.

PHILADELPHIA (OCT. 31) PR NEWSWIRE - Ciociola & Company, a seven-and-a-half-year-old New York advertising agency with a roster of national clients and more than $32 million in annual billings, will open offices in Philadelphia on Thursday, Nov. 1.

Currently, out of its New York office, Ciociola & Company clients include Xerox Financial Services, San Pellegrino mineral water, Walt Disney's World On Ice, Thrifty Car Rental (a wholly owned subsidiary of Chrysler Corp.), Juvenia watches, Unilever (Brut and Faberge licensing), and The National Arthritis Foundation. The agency has also handled special projects for Piaget, Corum and Movado watches, Citicorp, Toys 'R Us, Almaden Wine, W.R. Grace and Matchbox Toys.

After starting his career at Philadelphia's Gray & Rogers agency, Ciociola spent more than 20 years creating award-winning advertising at major New York agencies including N.W. Ayer, Young & Rubicam and BBDO. Prior to opening Ciociola & Company in 1983, Ciociola was executive vice president/executive creative director at BBDO Chicago. He has worked on 20 of the nation's top 50 advertisers.

Ciociola has personally won dozens of industry awards for creative excellence, including CLIO, ANDY, EFFIE, THE ONE SHOW, Ad Age 100 Best, International Broadcasting Awards, and The Venice Film Festival.

Immediate plans for the Philadelphia office will include meeting and networking with the city's business and community leaders and taking an active

role in the city's civic and commercial mainstream. Ciociola added, "We are staffing our Philadelphia office with top-flight local talent in media and account management, and we will use our New York office to provide strategic and creative support in pursuing new business."

Ciociola's New York offices are located at 888 Seventh Ave., and employs 30 staff personnel.

The firm's Philadelphia headquarters will be located in the penthouse of the Radisson Suites Hotel, 18th Street and the Parkway.

#90304p1980 10/31/1990 ~PR Newswire

CHICAGO, (OCT. 31) PR NEWSWIRE - Inland Steel Co. today said it expects to be the first integrated steelmaker to use an innovative, environmentally acceptable cokemaking process to replace most existing byproduct coking facilities.

The announcement follows approval of an agreement between Inland and the Sun Coal Co., a subsidiary of Sun Co. (NYSE: SUN), to proceed with the design and engineering of new heat-recovery cokemaking facilities to be located at Inland's Indiana Harbor Works steel plant in East Chicago, Ind.

In conjunction with the cokemaking facilities, Inland and NIPSCO Development Co., a subsidiary of NIPSCO Industries (NYSE: NI), have agreed to undertake engineering work to jointly develop a comprehensive energy recovery and electric-generating program that utilizes the waste heat from the Indiana Harbor Works.

This project effectively addresses the environmental problems of the Harbor Works' cokemaking operations, the steel plant's major source of air and water pollutants. The new facility will meet all existing and anticipated environmental standards.

Assuming future approvals by the parent company boards, portions of the project are expected to be in operation by the mid-1990s.

Officials of Local 1010 of the United Steelworkers union and Inland Steel Co. have met to discuss the impact of the new facilities on existing coke plant employees. Once plans are completed further discussions will be held to satisfactorily resolve any employment issues.

Sun Coal already operates such an environmentally sound coke plant in Vansant, Va., and will supply the technology to Inland.

Unlike a conventional coke battery, the new Heat Recovery Coke Facility operates under negative pressure so that door leakage, which is the primary source of air emissions in conventional coke batteries, is eliminated. Since there is no byproduct component in the Heat Recovery Coke Facility, there are no process water discharges.

Waste heat from the facility will produce steam to drive adjacent electric generating equipment. Inland's primary power requirements will continue to be supplied by Northern Indiana Public Service Co., a subsidiary of NIPSCO Industries.

The project also anticipates the installation of pulverized coal injection at the steel plant's blast furnaces -- Numbers 5, 6 and 7; the recovery of gases from the blast furnaces and the No. 2 Basic Oxygen Furnace shop; and the construction of power-generation facilities. Pulverized coal injection at the three blast furnaces will reduce their coke requirements by roughly 30 percent and should be in operation by the end of 1992.

NIPSCO Development Co. is a diversified investment subsidiary of NIPSCO Industries Inc., whose primary subsidiary is Northern Indiana Public Service Co., the largest combination natural gas and electric utility in Indiana.

Sun Coal Co. is a subsidiary of Radnor, Pa.-based Sun Co., an energy resources company. Sun Coal has operations in the eastern and western coal regions of the United States.

Inland Steel Co., one of the six largest steel producers in the United States, is a subsidiary of Chicago-based Inland Steel Industries Inc. (NYSE: IAD)

#90304p1982 10/31/1990 ~PR Newswire

VALLEY FORGE, PA. (OCT. 31) PR NEWSWIRE - UGI Corp. (NYSE: UGI) today reported a seasonal loss of $7,630,000, or 41 cents a share after preferred dividend requirements, for the third quarter ended Sept. 30.

In last year's third quarter, the Pennsylvania gas and electric utility and national distributor of propane posted a net loss of $1,929,000, or 14 cents a share. Revenues increased to $51,051,000 from $46,564,000 in the same period a year ago.

James A. Sutton, chairman and chief executive officer, attributed the quarter's deeper loss primarily to UGI's share of a greater loss by its AP Propane joint venture, higher operating expenses in gas utility operations and

a higher seasonal loss in the company's wholly owned propane business.

Interest expense also increased in the period on higher levels of debt, Sutton said, while interest income declined because of lower temporary investments. The reduction in the company's cash and cash equivalent investments resulted from tax payments and deployment of approximately $60 million of the cash proceeds from industrial gases divestiture for propane acquisitions over the past year.

In a related acquisition development, UGI on Monday, Oct. 29, announced that it has agreed in principle to purchase all of the ownership interest of The Prudential Insurance Company of America in the AP Propane joint venture for $62 million.

Sutton said the joint venture's loss widened in the third quarter because of higher operating expenses and a limitation on the recognition of tax benefits attributable to the venture's year-to-date losses.

Operating income in the gas utility declined in the third quarter because of increased operating expenses which more than offset the effect of higher margins in large-volume interruptible markets, Sutton reported. Income in the electric utility was comparable to its performance in last year's third period.

He noted that deeper losses in the second and third quarter "will be the norm for UGI as we continue to grow our gas utility and propane businesses which essentially are distributors of energy for heating. At the same time, we expect to see our growth investments generate enhanced earnings in the high-profit heating season in the fourth and first quarters."

#90304p1989 10/31/1990 ~PR Newswire

MINNEAPOLIS (OCT. 31) PR NEWSWIRE - Orthomet, Inc. (NASDAQ: OMET) reported net sales of $3,251,000 for the first quarter ended Sept. 30, 1990, compared to net sales of $3,504,000 for the first quarter last year. Net sales were lower due to the elimination of sales of other manufacturers' products in fiscal 1991, while manufactured sales increased slightly, from $3,215,000 last year to $3,251,000 this year. Net earnings for the first quarter of fiscal 1991 were $20,000, or $.01 per share, compared to net earnings of $83,000, or $.03 per share for the first quarter of fiscal 1990.

Thomas A. Wiskow, the company's president, said, "The first quarter comparison reflects the shift in distribution channels which occurred during fiscal 1990, as the mix of discounted sales to stocking distributors increased significantly. This shift to stocking distributors resulted in unit volume increasing faster than revenues. The increased unit volume and the acceptance of the AXIOM Total Knee System has continued to outpace the speed with which we are able to increase our manufacturing capacity. Our back log was reduced slightly during the quarter, but we continued to have approximately $400,000 in orders that could not be filled.

"We are addressing our manufacturing issues with solutions that we believe will fundamentally improve our manufacturing capabilities, but we may continue to experience back-orders in the near term. This long- term approach, together with a growing market acceptance of our products and the continued expansion of our domestic and international distribution network, is expected to increase Orthomet's presence within the orthopedic implant market."

Orthomet, Inc. is in the business of designing, manufacturing and marketing selected orthopedic products, primarily reconstructive knee and hip implants and related surgical instrumentation.

Orthomet is traded on the NASDAQ national over-the-counter market under the symbol "OMET."

MIAMI (OCT. 31) PR NEWSWIRE - The board of directors of American Savings and Loan Association (NASDAQ: ASLA) announced today that it received a supervisory directive from the Office of Thrift Supervision dated Oct. 29, 1990. The directive has been issued in respect of certain borrowing arrangements between the Association and The Enstar Group, Inc. (NASDAQ: ENST) which owns 50 percent of the common stock of American Savings.

The Office of Thrift Supervision has requested that American Savings consent to the issuance of an order to cease and desist from any unsafe or unsound practice in its transactions with The Enstar Group, Inc. The board of directors and management of American Savings are presently working with the Office of Thrift Supervision and The Enstar Group to accomplish the objectives of the supervisory directive and the proposed cease and desist order.

In connection with the foregoing, the board of directors today accepted the resignation of Harris C. Friedman, its chairman of the board and chief executive officer. Stephen Lazovitz, a member of the American Savings' board of directors was named as the chairman of the board and acting chief executive officer. American Savings Vice Chairman Edward Mahoney was named the Association's president and chief operating officer.

American Savings continues to meet all current regulatory capital requirements. As of Sept. 30, 1990, American Savings had total assets of $4.87 billion, making it the largest Florida based savings and loan association.

American Savings currently operates a network of five mortgage offices and 55 retail banking offices in Dade, Broward, Palm Beach, Pinellas, Hernando and Pasco counties. American Savings is a member of the Federal Home Loan Bank System and its deposits are federally insured. American Savings' common shares are traded on NASDAQ under the symbol ASLA.

CARLSBAD, CA (OCT. 31) PR NEWSWIRE - Coded Communications Corporation, (Toronto: CCE) today announced operating results for the third quarter ended September 29, 1990 and the first nine months of fiscal 1990.

For the third quarter, the net loss was $152,800, or $.01 per share, compared to a net loss of $212,100, or $.02 per share, in the same quarter last year. Revenues in the quarter were $365,800, down from $473,500 in last year's third quarter.

For the first nine months of fiscal 1990, the net loss was $386,000, or $.04 per share, compared to a net loss of $644,900, or $.07 per share, in the same period last year. Revenues in fiscal 1990 were up slightly to $1,496,200 from $1,466,600 last year.

Robert Hillman, chief executive officer commented, ''Our financial results show marked improvements over last year. However, we continue to experience delays in booking larger system orders for our mobile and status terminal products. As previously announced, we have been selected as the successful bidder on a potential contract to supply a specialized digital radio system. Our customer, a major aerospace and defense contractor, recently completed the testing and evaluation phase of its contract with their customer. We are optimistic the end use customer will elect to move forward on this project before the end of the year.''

He added, ''In the third quarter we installed the first pilot system for our new CMX 5000 mobile data terminal for a courier service operating in San Francisco, California. Installation of the full system is expected before the end of the year. A demonstrable, operating system for the CMX 5000 should help us close a number of opportunities for the CMX 5000.''

CCC Coded Communications Corporation manufactures and designs digital communications equipment used in land mobile radio systems.

HARTFORD, Conn. (OCT. 31) PR NEWSWIRE - George P. Rutland, chairman of the board of Northeast Federal Corp. and Northeast Savings, F.A., announced today that Abraham D. Gosman has resigned from both boards of directors. Rutland indicated the reason Gosman gave was that he had recently repurchased his former company, Mediplex, from Avon and this has created enormous demands on his time and energy and would preclude him from regularly attending board meetings. Gosman said, "Once the demands on my time are alleviated, I would like to consider returning to the board as I have enjoyed working with you as well as our fellow directors".

"Mr. Gosman has been an outstanding director and the company has benefitted from his wise advice and counsel. We regret his leaving and he will be sorely missed" Rutland said.

Northeast Savings, F.A., a subsidiary of Northeast Federal Corp., is one of the largest thrift institutions based in New England with 156 yearsof continuous service to its customers. Northeast Savings has retail branches in New York, Connecticut, and Massachusetts and mortgage lending offices in California through a subsidiary.

#90304p2007 10/31/1990 ~PR Newswire

MIAMI BEACH, FLA. (OCT. 31) PR NEWSWIRE - Jefferson Bancorp, Inc. (NASDAQ: JBNC), a publicly held bank holding company headquartered in Miami Beach, today reported its financial results for the quarter and nine months ended Sept. 30, 1990.

Consolidated net income for the three months ended Sept. 30, 1990 was $332,366 compared to $311,718 for the same period in 1989, an increase of 7 percent. Consolidated net income for the nine months was $1,180,655 compared to $1,569,126 for the same period in 1989, a decrease of 25 percent. The third quarter figures include provision for loan losses of $296,000 as compared to $86,382 for the same period in 1989. Figures for the nine months ended Sept. 30, 1990 include provision for loan losses of $794,000 as compared to $367,382 for the same period in 1989. This increase in loan loss provision for the three and nine month periods ended Sept. 30, 1990 was needed to support the company's planned loan growth in 1990 and as a precautionary measure in the uncertain economy. This growth is reflected in the increase of net loans from $194,528,981 at Sept. 30, 1989 to $226,227,275 at Sept. 30, 1990, an increase of 17 percent. Consolidated net income for the nine months ended Sept. 30, 1989 included profit from securities transactions of $317,590 net of income taxes as compared to profit of $72,488 during the same period in 1990. There were no such transactions during the third quarters of 1990 and 1989.

Consolidated assets increased to $358,354,703 as of Sept. 30, 1990, from $354,585,674 a year earlier. Consolidated deposits increased to $305,843,558 as of Sept. 30, 1990 from $299,897,639 a year earlier. Stockholders' equity increased from $34,335,470 as of Sept. 30, 1989 to $34,982,151 as of Sept. 30, 1990 ($36,607,851 before taking into consideration the $.50 cash dividend per share paid to the company's stockholders in the first quarter of 1990). Book value per common share increased from $10.34 at Sept. 30, 1989 to $10.40 at Sept. 30, 1990.

All per-share figures for 1989 have been retroactively adjusted to reflect a 3 percent stock dividend distributed in the second quarter of 1990.

Jefferson Bancorp, Inc., a publicly held bank holding company, owns and

operates three banks with 12 offices in Dade, Broward and Palm Beach counties.

NEW YORK, (OCT. 31) PR NEWSWIRE - Redlaw Industries Inc. (AMEX: RDL) and Galtaco Inc. announced the completion of the sale of the remainder of the tangible assets relating to their former operations in Brantford and Paris, Ontario, Canada, by the sale today of the Brantford foundry to Western Foundry Company Limited. The Orillia operations were sold in 1989 to Dorr-Oliver Canada Limited.

The total sales price for both transactions was Cdn. $9,300,000 which approximates the proceeds of disposition which management projected to receive in respect of these assets. Today's transaction concludes the disposition of all of the tangible Canadian assets of the Galtaco-Redlaw group of companies.

Redlaw will continue to be a supplier to the automotive industry of sheet metal stampings and assemblies through its wholly owned subsidiary, GRM Industries, Inc. and will continue to own its 47.24 percent interest in Johnston Industries, Inc. which is engaged in the manufacture of industrial and apparel textiles.

#90304p2015 10/31/1990 ~PR Newswire

FLINT, MI (OCT. 31) PR NEWSWIRE - Buick General Manager Edward H. Mertz will introduce the 1991 Roadmaster Estate Wagon and 1992 Roadmaster sedan at a news conference Friday (Nov. 2) at the South Florida Auto Show in Miami.

Roadmaster, one of the great names in Buick history, will appear for the first time in more than three decades as a family of full-size, rear-wheel-drive models powered by V-8 engines.

This will be the first appearance for both models on the auto show circuit. However, they were on display at the Texas State Fair last month because Roadmaster sedan will be built in Arlington, Texas. (Roadmaster Estate Wagon is built in Willow Run, Mich.)

The projected EPA fuel-economy rating for the wagon is 16 mpg city and 25 highway. The sedan rating is not yet available but is expected to at least match the wagon's.

First, late this fall, Buick will introduce the completely redesigned 1991

Roadmaster Estate Wagon. Then, in the spring of 1991, the all-new 1992 Roadmaster and Roadmaster Limited sedans will make their debuts.

The 1991 Roadmaster Estate Wagon is an aerodynamic eight-passenger vehicle -- the first major redesign since 1978 of the most luxurious wagon offered by General Motors.

The sedans will be Buick's first rear-drive automobiles, except Estate Wagon, since the 1987 Regal. They will be the first Buicks, except Estate Wagon, with a standard V-8 engine since the 1985 Riviera.

The Roadmaster name first appeared in 1936 on premium Buick sedans. During the boom years following World War II, Roadmasters were famous for their power, ride and distinctive design.

Roadmasters in that period had four portholes -- officially ventiports -- and other Buick styling features of the late '40s and early '50s: massive "carnivorous" vertical-bar grilles, "sweepspear" side moldings and "hardtop convertible" (no center side pillar) styling on some models. The Roadmaster name was discontinued at the end of the 1958 model year as Buick shifted to new names across its line-up.

BASKING RIDGE, N.J. (OCT. 31) PR NEWSWIRE - NYCOR, Inc. (NASDAQ: NYCO) announced it filed with the Securities and Exchange Commission today a Schedule 13D, reporting beneficial ownership of 2.2 million shares, or approximately 8.2 percent of the total shares outstanding, of Zenith Electronics Corporation (NYSE: ZE).

NYCOR believes that it is the single largest stockholder of Zenith. NYCOR has acquired the shares as an investment and intends to review the business affairs and financial position of Zenith. NYCOR will take future action regarding its ownership position as is deemed appropriate in light of its evaluations and prevailing economic, industry and securities markets conditions.

NYCOR's future actions may include offering to make a direct capital investment in Zenith or seeking to nominate and elect directors to the board of directors of the company or to acquire control of the company through a tender offer, exchange offer, merger proposal, proxy or consent solicitation or such other actions as NYCOR may deem appropriate, and also may include the purchase of additional shares in the open market or in privately negotiated transactions. Alternatively, such actions may involve the sale of all or a portion of NYCOR's holdings of shares in the open market or in privately

negotiated transactions to one or more purchasers.

NYCOR currently has no operating businesses and is principally engaged in a search for businesses to acquire and operate. NYCOR's objective is to purchase underperforming manufacturing assets that fit well with management's experience in manufacturing and marketing.

#90304p2035 10/31/1990 ~PR Newswire

BIRMINGHAM, AL (OCT. 31) PR NEWSWIRE - Energen Corp. (NYSE: EGN), the leading coalbed methane operator in Alabama, is pleased that the tax credit on coalbed methane production has been extended for two years, according to Chairman and Chief Executive Officer Rex J. Lysinger.

"Development of domestic energy sources must be a part of our national energy policy," Lysinger said, "and the tax credit extension should enhance opportunities for future coalbed methane development by offering economic returns sufficient to warrant investment."

The tax credit extension is part of the 1991 budget package approved by Congress on Saturday and awaiting the signature of President Bush. The credit is designed to stimulate development of domestic energy resources which could not be economically produced under current market conditions.

The new deadline by which a well must be drilled in order to qualify for the tax credit is Dec. 31, 1992, and the credit now applies to production through the year 2002.

For every thousand cubic feet of coalbed methane produced, the tax credit currently reduces investors' income tax liability by approximately 86 cents, and the credit increases annually with inflation.

"We believe Energen's prospects for future coalbed methane development are excellent, given our operating expertise and extensive knowledge," Lysinger said.

Through Taurus Exploration, Energen is involved in four major coalbed methane development projects in the Black Warrior Basin. These projects will represent 850 to 875 wells. Taurus will operate more than 725 of the wells, which represent an investment of more than $220 million by Amoco Production Company, Chevron U.S.A., TECO Energy Inc., Gulf States Paper Corp., and Energen. Over the life of these four projects, Taurus's portion of ultimate recoverable reserves could exceed 85 billion cubic feet.

Energen Corp. is a diversified energy holding company based in Birmingham, Ala. Its primary lines of business are gas distribution and oil and gas exploration and production.

BLOOMINGTON, MN (OCT. 31) PR NEWSWIRE - Mall of America Company announced today that it has completed the loan closing process with Mitsubishi Bank Limited, Mitsui Trust and Banking Company Limited, Chuo Trust and Banking Company Limited, and Teachers Insurance and Annuity Association of America. The $625 million loan is for construction of the 4.2 million square foot project.

"We're proud that some the largest and most respected financial institutions in the world have committed themselves to this tremendous project," said

Herbert Simon, president of Melvin Simon & Associates. "Their association with Mall of America is a clear indicator that this is a world-class project with strong potential.

"Closing a loan of this magnitude has been a long and tedious process," Simon added. "We're happy that all the t's have been crossed and the i's dotted as final confirmation of what we've known all along, that this project is a 'go.'"

Arthur W. Spellmeyer, senior vice president of Melvin Simon & Associates, developer of Mall of America, said, "We are extremely pleased that the loan process has been concluded. This announcement is an important milestone in the project's development. Having the loan close means that all the pieces are finally in place and we can proceed with our plans to open this world-class center."

Spellmeyer also commented that, "Mall of America is an exceptionally large and complex project. While a signed commitment from our lenders has been in place for some time, it has required a great deal of time to review all the intricate details of the project."

Melvin Simon & Associates' vice president of development, E. Robert Horn, added, "Construction at Mall of America is well underway and right on schedule. We're beginning construction on our major anchor stores -- Bloomingdale's, Macy's, Nordstrom and Sears. With regard to leasing, we have commitments for about half of the smaller store spaces in the project. The response to Mall of America from U.S.-based and international retailers has been very strong. Our leasing team has made several visits to Europe and is leaving shortly for Tokyo to meet with Japanese specialty stores. International retailers have shown great interest in Mall of America."

Currently, more than 300 construction workers are putting 13,300 tons of structural steel into place at the Mall of America site. Working through winter and spring, crews will begin enclosing and roofing the entire mall structure. Two seven-level parking decks will be constructed over the next year as well and by the Fall of 1991, developer's expect nearly 3,000 construction workers to be working on site. When opened, Mall of America will employ an estimated 10,000 people.

Mall of America Company is a partnership between subsidiaries of Indianapolis-based Melvin Simon & Associates and Triple Five Corporation, Ltd. based in Edmonton, Alberta.

#90304p2040 10/31/1990 ~PR Newswire

FRESNO, CA (OCT. 31) PR NEWSWIRE - Community First Bank's holding company, Pacific Bancorporation (NASDAQ: PABC), announced third quarter 1990 consolidated net earnings of $274,291 or $.18 per share, compared to $78,120 or $.02 per share during the same period in 1989.

For the nine months ending Sept. 30, 1990, consolidated net earnings were $578,963 or $.34 per share. During the same period in 1989, net earnings were $636,798 or $.39 per share.

Book value rose to $7.76 as of Sept. 30, 1990, compared to $7.43 a year earlier. Both deposits and loans increased from the comparable prior year nine-month period. Deposits rose to $198,786,758 from $186,820,547, while loans increased to $142,729,654 from $138,488,370.

Bank Chairman of the Board Henry L. Wheeler noted that interest income for the nine-month period was up $358,307 from the comparable 1989 period as a result of increased loan demand. The additional income, however, was not sufficient to offset a $385,944 interest expense increase in the cost of funds.

Wheeler attributed the higher net earnings for the quarter to a successful expense reduction plan instituted earlier in the year and to increased loan demand. "We expect to continue to see positive results during the remainder of the year from our efforts to curtail expenses while increasing our loan portfolio," Wheeler said.

Bakersfield-headquartered Community First Bank serves the San Joaquin Valley and adjacent areas through 19 branches from Atwater to Taft.

IRVINE, CA (OCT. 31) PR NEWSWIRE - Mazda Motor of America today announced a price increase on some of its 1991 passenger cars and trucks sold in the United States. On a sales-weighted average, the increase is 2.4 percent, or $312.

Prices on vehicles in existing dealer stocks are not affected. The price increases are effected for vehicles arriving at Mazda dealers on or after Nov. 1.

Said Clark J. Vitulli, chief operating officer for Mazda Motor of America Inc. "Despite this price increase, the typical, as-equipped price of many of our 1991 models is actually less than the same 1990 vehicle with the same equipment, thanks to our Value pack strategy.

"Mazda's philosophy is to market well-equipped, attractively priced vehicles

that will enhance our reputation for exceptional value. Our entire 1991 pricing strategy, including Value Packs, reflects this position," added Vitulli. "The fact that Mazda sales are up 10.4 percent for the model year to date, and 3.6 percent for the calendar year to date reflects that the consumer has been receptive to this approach."

The price of the latest addition to Mazda's product line, the Navajo sports utility vehicle, is unchanged, as are the prices of the 323 Hatchback, Mazda's lowest-priced vehicle, and the Protege 4WD compact sedan.

1991 MAZDA PASSENGER CARS

LOS ANGELES (OCT. 31) PR NEWSWIRE - Angeles Corp. (AMEX: ANG) has announced the conclusion of its offering to Angeles unitholders to exchange a portion of their units (AMEX: ANG.E) for Angeles common stock. The offering closed Oct. 26, 1990.

Angeles said that preliminary results show that approximately 160,000 units were tendered, representing 9 percent of the total outstanding units. All units tendered are being accepted for exchange. Final numbers will be announced as soon as they are available.

In the exchange offering, tendering unitholders received 3.1 shares of Angeles common stock for each unit tendered. Each Angeles unit consists of one-half share of Angeles common stock, subordinated indebtedness in the form of one fiftieth of a $1,000 12 1/2 percent subordinated debenture maturing in 2005 and the cash payment of a total of $.875 of principal to be paid over the next three-and-one-half years. (A principal payment of $.125 per unit was paid Oct. 15, 1990.)

Angeles Corp. is a diversified investment management company whose subsidiaries manage in excess of $4 billion of securities, real estate, mutual fund and leased equipment assets for corporations, institutions and 127,000 individual investors.

#90304p2052 10/31/1990 ~PR Newswire
LANHAM, MD. (OCT. 31) PR NEWSWIRE - Range Rover of North America, Inc. announced today that the 1991 British-built, luxury sport utility vehicle will have more standard equipment, a longer warranty and revised suspension tune. The manufacturer's suggested retail price is $42,400, an increase of 1 percent over a comparably equipped 1990 model.

"We feel the '91 model represents an even better long-term value considering its versatility, improved driving characteristics and longer warranty coverage " said Charles R. Hughes, president.

Among practical advances in the aluminum-bodied four-by-four are the addition of front and rear anti-sway bars, revised shock absorber valving and spring rates. There is an 8-percent increase in driving range thanks to a larger fuel tank and an increase in the full vehicle limited warranty from 3 years/36,000 miles to 3 years/42,000 miles.

Features made standard in the '91 model include leather upholstery, choice of exterior finish colors, interior wood and leather trim, seven speaker premium sound system, and auto-dimming rear view mirror. New features include heated door locks, improved soundproofing and an optional glass sunroof that results in greater headroom.

"When buyers consider the level of luxury combined with structural security, high driving position and pride of ownership, the 1991 Range Rover is an outstanding automotive investment," said Hughes.

All Range Rovers have a 3.9-liter fuel-injected 178 horsepower aluminum V-8 engine, anti-lock four-wheel disc brakes, a viscous coupled two-speed transfer case, permanent four-wheel drive and automatic transmission.

Since its introduction in 1987, more than 14,000 Range Rovers have been sold in the United States. Monthly sales records were set in July and August of 1990. More information can be obtained by calling 1-800-FINE-4WD.

Sold through a network of 79 dealers in the U.S. and Canada, Range Rover is imported by Range Rover of North America, Inc., Lanham. The vehicle is manufactured by the Rover Group Ltd. at the Land Rover facilities in Solihull, England.

#90304p2055 10/31/1990 ~PR Newswire
RESTON, VA (OCT. 31) PR NEWSWIRE - Freddie Mac (NYSE: FRE) today announced

record third quarter net income of $123 million, or $2.05 per share, up 10 percent over $112 million in net income, or $1.86 per share, for the same period a year ago.

For the first nine months of 1990, Freddie Mac's net income was $352 million, or $5.87 per share, up 9 percent over $322 million in earnings, or $5.37 per share, reported in 1989. Per share amounts for 1989 are restated to reflect the retirement of all 100,000 shares of non-voting common stock in February 1990.

Freddie Mac also reported an after-tax market value of assets in excess of liabilities of $4.9 billion at Sept. 30, 1990, compared with $2.1 billion in stockholders' equity under generally accepted accounting principles (GAAP) for the same period. The increase in mark-to-market value after taxes, from $4.4 billion for the second quarter of 1990 to $4.9 billion for the third quarter of 1990, is due to a combination of the increased value of servicing on passthrough-financed mortgages, additional Mortgage Participation Certificate (PC) settlements and enhancements to estimation methods.

"The continued growth in our net interest margin shows the underlying strength of our revenue stream, a vital on-going measure of our performance," said Leland C. Brendsel, Freddie Mac's chairman and chief executive officer. "We also view the mark-to-market value of our assets over liabilities as a crucial measure of performance and financial strength."

Robert J. Quinlan, Freddie Mac's senior vice president of control, financial reporting and tax, attributed net income growth between the third quarters of 1989 and 1990 primarily to a $45 million, or 16 percent, increase in net interest margin. This included:

-- an $18 million increase in management and guarantee fees, primarily due to a 19 percent increase in the average balance of the sold portfolio;

-- a $17 million increase in net return on retained mortgage and investment portfolios, primarily due to a significant increase in spreads resulting from the decline in short-term borrowing rates; and

-- a $10 million increase in net float benefit due to higher prepayments, offsetting a decline in short-term reinvestment rates.

Freddie Mac is a stockholder-owned corporation chartered by Congress in 1970 to create a continuous flow of funds to mortgage lenders in support of home ownership and rental housing. By linking the capital markets with the mortgage markets, Freddie Mac brings the efficiencies and lower costs of the secondary mortgage market to the lender, the investor and the homebuyer. Over the years, Freddie Mac has helped finance one in eight American homes, including more than 700,000 apartment units.

#90304p2058 10/31/1990 ~PR Newswire

PORTLAND, ORE. (OCT. 31) PR NEWSWIRE - Riedel Environmental Technologies Inc. (RET) (AMEX: RIE) announced today earnings of $449,000, or 13 cents per share, for the quarter ended Sept. 30. This amounts to an earnings increase of 10 cents per share compared to the same period a year ago. New revenue records were set for the third quarter and nine-month period of 1990 with third-quarter revenues of $28.3 million and nine-month revenues of $72.5 million.

Riedel President and Chief Operating Officer J.H. Dastur stated, "These earnings reflect a dramatic turnaround from the past three quarters. Our environmental services and engineering operations, buoyed by several large projects, have rebounded very positively."

A nine-month 1990 loss of 15 cents per share compared to income of 31 cents per share in 1989 was posted by RET. This loss is the result of lower profit margins recorded in the first six months of the year. Several oil spills and a landfill operation contributed to 1989's higher profits.

In announcing the record revenue levels Dastur said revenues increased substantially in spite of a decline in EPA contract revenues, reaffirming the company's commitment to a marketing program aimed at the private sector.

Dastur continued, "We are very pleased with the improved results of this quarter and we remain highly enthusiastic about the future. In addition to our many opportunities in the U.S., our projects in Taiwan continue to expand rapidly and we are in the process of establishing an international branch in Taipei." The company previously announced that through a joint venture with Riedel International, an affiliated marine and heavy civil construction and dredging company, a contract had been signed with Chinese Petroleum Corp. for groundwater decontamination system design and services.

SEATTLE (OCT. 31) PR NEWSWIRE - Immunex Corp. (NASDAQ: IMNX) today announced the public offering of 1.5 million shares of the company's common stock at a price of $23 per share. The First Boston Corp., Invemed Associates Inc., and Hambrecht & Quist Inc. managed the underwriting syndicate offering the stock.

The underwriters have been granted an option to purchase up to an additional 225,000 shares to cover over-allotments.

Immunex intends to use the net proceeds of the offering to fund construction of manufacturing facilities, working capital requirements, expenses associated with development, clinical testing and marketing of pharmaceutical products, and general corporate purposes. Following the offering, Immunex will have approximately 11.8 million shares outstanding (assuming no issuance of the over-allotment shares).

Immunex is a leading biotechnology firm focused on the research, development, manufacture and marketing of immunological therapeutic products. In 1989 Immunex began accelerating its strategic plan to become a biopharmaceutical company engaged in manufacturing, marketing, selling and distribution of products as well as research. Immunex began expanding its proprietary product portfolio through product acquisitions, and in 1990, filed Product and Establishment License Applications with the U.S. Food and Drug Administration for its first proprietary product, LEUKINE(TM) granulocyte macrophage colony stimulating factor (GM-CSF).

#90304p2067 10/31/1990 ~PR Newswire

HOUSTON (OCT. 31) PR NEWSWIRE - NL Industries, Inc., (NYSE: NL), a major producer of titanium dioxide pigments and specialty chemicals, announced that its third quarter 1990 net income was $16.4 million, or $.25 per share. Net income for the same quarter of 1989 was $65.8 million, or $.99 per share. Net sales for the 1990 quarter were $221.0 million compared to net sales of $249.5 million ($231.9 million for comparable units) for the 1989 quarter. Net income for the first nine months of 1990 was $81.9 million, or $1.23 per share on net sales of $679.3 million, compared to net income of $152.5 million, or $2.30 per share, on net sales of $761.5 million ($691.6 million for comparable units) for the first nine months of 1989.

Operating income of the titanium dioxide pigments segment in the third quarter of 1990 was $49.1 million compared to $70.7 million for the comparable 1989 period primarily due to lower sales volumes and selling prices and higher production costs. Operating income for the first nine months of 1990 was $181.1 million compared to $211.7 million for the comparable 1989 period primarily as a result of lower sales volumes. The declines in 1990 sales volumes were primarily in the European and export markets. Customers' reductions in inventory levels due to the improved availability of titanium dioxide pigments contributed to the decline in sales volumes.

Specialty chemicals segment operating income for comparable units in 1990, excluding a charge in the third quarter related to the settlement of certain

patent infringement litigation, approximated 1989 amounts. Operating income for the first nine months of 1989 included $6.0 million related to NL's former U.S. specialty resins unit which was sold in August 1989. Pre-tax gains on disposition of business units aggregated $33.5 million in 1989, including $25.0 million in the third quarter, relating to the sale of the U.S. specialty resins unit.

Securities transactions include gains from the sale of Georgia Gulf Corporation securities in 1990 and 1989. Interest and dividend income increased due to higher levels of funds available for investments. The increase in interest expense in 1990 is attributable to additional Deutsche Mark financing obtained by a subsidiary of the company.

General corporate expenses increased in the first nine months of 1990, due principally to expenses associated with the company's solicitation of proxies for Lockheed Corporation's 1990 annual meeting of stockholders and related litigation. The comparable 1989 period included expenses incurred related to an organizational restructuring of the company's non-U.S. operations.

Extraordinary items relate principally to the early redemption of certain sinking fund debentures in the third quarter of 1990 and to the income tax benefits of utilization of net operating loss carryforwards in 1989.

At Sept. 30, 1990, NL had recorded a $231.5 million cumulative charge to common shareholders' equity, including $95.6 million recorded during the third quarter, resulting from the decline in market value of NL's 19.8 percent holding of Lockheed common stock.

As previously reported, NL's board of directors has authorized the purchase of up to 5 million shares of NL's common stock, over an unspecified period of time, to be held as treasury shares available for general corporate purposes. During October 1990, NL purchased 1.8 million shares of its common stock on the open market for $20.7 million (average $11.23 per share).

SALT LAKE CITY (OCT. 31) PR NEWSWIRE - American Stores Company (NYSE: ASC) announced today that its wholly owned subsidiary, Skaggs Alpha Beta Inc., completed the sale of its Buttrey Food and Drug Division to an investment group led by the management of Buttrey and Freeman Spogli & Co., a Los Angeles-based merchant banking firm.

American will receive an aggregate of $184 million from the sale, $180 million of which will be cash proceeds and $4 million of which will be in the form of capital lease assumptions. American will retain existing debt obligations

related to the Buttrey Division in the approximate amount of $36 million for mortgages and trade payables.

The Buttrey Food and Drug Division is headquartered in Great Falls, Mont., and operates 44 food and combination food/drug stores in six states with annual sales of approximately $475 million.

Freeman Spogli & Co. has been exclusively devoted to organizing and investing in management buyouts since 1983 and has arranged 14 management-led acquisitions with aggregate transaction values in excess of $2.4 billion.

American Stores Company is headquartered in Salt Lake City. Following the sale of the Buttrey Division, it will operate 1,847 food and drug stores in 37 states.

#90304p2071 10/31/1990 ~PR Newswire

CALGARY, ALBERTA, (OCT. 31) PR NEWSWIRE - In the first nine months of 1990, Asamera Minerals Inc. (Montreal, Toronto: AUA) had net income of $2,169,000, compared with $2,618,000 in the same period in 1989. Net income in the third quarter of 1990 was $1,568,000, compared with $1,159,000 in the third quarter of 1989. Net revenues were down slightly for the nine-month period, and up 6 percent for the quarter, compared with the same periods in 1989, as a result of differences in ore grades mined. Operating expenses increased 7 percent for the nine-month period, and decreased 3 percent for the quarter. This was attributable to the Gooseberry Tailing Project, which became operational in the third quarter of 1989.

Cash flow provided by operations was $8,873,000 for the first nine months of 1990, compared with $10,499,000 for the same period in 1989. Cash flow for the third quarter of 1990 was $3,981,000 compared with $3,232,000 for the third quarter of 1989. The differences reflect the variations in net income, and the proceeds from the settlement of an insurance claim received in 1989.

Total shipments for the first nine months were 61,969 net ounces of gold and 336,996 net ounces of silver, a decrease of 3 percent and an increase of 1 percent, respectively, compared with the first nine months of 1989. Third quarter shipments were 23,889 net ounces of gold and 97,845 net ounces of silver, an increase of 4 percent and a decrease of 22 percent, respectively, compared with the third quarter of 1989. The silver decline was due primarily to lower-grade ore at the Gooseberry mine.

A highlight of the third quarter was the 14-hole drilling program at Asamera Minerals' joint venture on the Meliadine River in the Northwest Territories.

The drilling was done as follow-up to the company's July announcement of a gold discovery at the site, and 11 of the holes encountered gold mineralization. Additional exploration is planned for 1991.

#90304p2077 10/31/1990 ~PR Newswire

GREAT FALLS, MONT. (OCT. 31) PR NEWSWIRE - The completion of the acquisition of the Buttrey Food and Drug chain, a division of American Stores Company (NYSE: ASC), by a management-led investor group was announced by Buttrey management and Freeman Spogli & Co. today. The investor group includes Buttrey's management, Freeman Spogli & Co. and institutional investors. The purchase price paid to American Stores Company of $184 million included a cash payment of $180 million and the assumption of capital leases totaling $4 million.

Buttrey Food and Drug Company operates 44 combination food/drug stores and two distribution centers in Montana, Wyoming, Washington, North Dakota, Idaho and Utah. Revenues for the 53-week fiscal year ended Feb. 3, 1990, were $475.9 million. The company is headquartered in Great Falls, Mont., and employs 4,500 people.

Ed Agnew, president and CEO of Buttrey Food and Drug Company, said, "This purchase is the right thing for our customers, the communities we serve and, especially, our employees. The new ownership structure allows us maximum

flexibility to run our business in both the short- and long-term.

"Our ability to offer our employees wages and benefits which mirror what was in place, along with the creation of a new profit sharing plan, allows us to retain our dedicated existing employees and, at the same time, attract high quality new employees. The success of the new Buttrey depends upon our ability to maintain the tradition of service to our customers, and so it is critical that we have that strong experience base going forward.

"Buttrey began business in Montana in 1896 and started a legacy of providing quality products and friendly home-town service. The move back to private ownership affords us the opportunity to rededicate ourselves to that tradition."

Buttrey was family-owned until 1966 when it was acquired by Jewel Companies. American Stores Company acquired Jewel Companies in 1984. Buttrey Food and Drug was operated as a division of American Stores Company. In 1986, the management of Buttrey was consolidated with other divisions of American Stores Company in Salt Lake City. In late 1987, local management of Buttrey was re-established in Great Falls, Mont.

Freeman Spolgi & Co. is a private merchant banking firm with offices in Los Angeles and New York exclusively dedicated to organizing and investing in management buyout acquisitions. Freeman Spogli & Co. has arranged 14 management buyouts valued at more than $2.4 billion since 1983. FS Equity Partners II, L.P. is a $425 million investment partnership formed in 1988 to invest in management buyouts organized by Freeman Spogli & Co. Investors in the partnership include some of the largest institutional investors in the United States, including corporate and public pension funds, insurance companies, commercial bank holding companies and other public corporations.

Financing for the acquisition of Buttrey Food and Drug was provided through a combination of loans from a bank group led by Bankers Trust Company and Morgan Guaranty Trust Company, subordinated notes from a group of insurance companies and the sale of common stock. Investors in the common stock include Buttrey's management, FS Equity Partners II, L.P., affiliates of Bankers Trust Company and Morgan Guaranty Trust Company, and purchasers of the subordinated notes.

#90304p2078 10/31/1990 ~PR Newswire

CALGARY, ALBERTA, (OCT. 31) PR NEWSWIRE - Encor Inc. (Toronto: ECR) today announced that it has signed a gas supply letter agreement to provide natural gas on a long-term basis for power generation in northern Ontario.

Under the terms of the letter agreement, approximately 140 billion cubic feet of natural gas will be sold over a twenty-year period at prices which will be redetermined periodically. Natural gas deliveries are expected to commence in 1993 at rates of approximately 20 million cubic feet per day.

In September 1990, Encor was selected to supply natural gas to the Vancouver Island core market at an initial rate of 5 million cubic feet per day starting in the fall of 1991.

Both agreements are subject to the execution of formal contracts and the obtaining of the necessary regulatory approvals.

''These gas sales opportunities represent penetration into new market areas for Encor," stated Charles W. Fischer, president of Encor, ''which emphasize Encor's overall gas marketing strategy of buyer and market diversification.''

Encor is a senior Canadian public company actively exploring for and producing oil and natural gas in western Canada and internationally. At year end 1989, Encor reported established reserves of 146 million barrels of liquids and 1.3 trillion cubic feet of gas.

#90304p2083 10/31/1990 ~PR Newswire

EVERETT, WA. (OCT. 31) PR NEWSWIRE - INTERMEC Corp. (NASDAQ: INTR) today announced a restructuring of its senior staff to accommodate future growth.

Joseph E. Beebe has been named executive vice president and chief operating officer, assuming full responsibility for day-to-day operations of the corporation, including field sales operations.

Gregory L. Tannheimer has been named senior vice president, assuming full responsibility for worldwide marketing, sales channel development, product strategy and new business ventures.

Both Beebe and Tannheimer will continue reporting directly to John W. Paxton, chairman and chief executive officer. Paxton characterized these changes as "necessary to continue to meet the unique requirements of our customers and to fully address both our long-term strategic needs and the increasing demands of our day-to-day operations."

INTERMEC began as a pioneer in bar code technology over 20 years ago with a handfull of employees working out of renovated Edmonds grocery store. The company today is a worldwide leader in automated data collection systems and support, with over 1,600 employees and $168 million annual revenue.

Beebe and Tannheimer both are prepared to take advantage of the anticipated growth. Beebe has been a vice president of operations and senior vice president involved in day-to-day operations at INTERMEC for four years. His responsibilities have included all manufacturing, engineering, quality assurance and materials. Prior to joining INTERMEC, he was general manager of unit operations at Midland Ross Corp., Aerospace/Grimes Division. Beebe holds a BSEE degree from Indiana Institute of Technology and has done post-graduate work at Arizona State University.

Tannheimer joined INTERMEC six years ago as director of national sales and for the last five years has served as vice president of domestic sales and marketing and vice president of sales and service operations. During his tenure, Tannheimer oversaw the successful acquisition of INTERMEC's domestic sales channel, a key component of INTERMEC's long-term growth strategy which was widely heralded by industry analysts as an astute venture and an accomplishment which positioned the company for rapid growth. Prior to joining INTERMEC, Tannheimer was director of marketing for HICOMP Computer Corp., and director of marketing at Data I/O Corp. He received a BBA from the University of Wisconsin, where he also did post graduate work.

"I am confident," Paxton said, "that all of our 1,600 team members will respond well to these improvements and take advantage of the growth opportunities available to us in the years ahead."

For further information, contact INTERMEC Corp., 6001 36th Avenue West, P.O. Box 4280, Everett, WA, 98203-9280, telephone 206-348-2600, telex 3794197, or FAX 206-355-9551.

A pioneer in bar code technology and a world leader in solutions for data collection, INTERMEC is a fully-integrated data collection systems company which designs, manufactures and markets the most comprehensive line of data collection hardware, software, media products, systems and services available for computer integrated transaction processing worldwide.

CONTACT: Geoffrey Abdian of INTERMEC Corp., 206-348-2600

#90304t0775 10/31/1990 ~ts

MOSCOW (OCT. 31) TASS - THE LAUNCHING OF THE ALMAZ NEW-GENERATION SATELLITE WILL OPEN NEW VISTAS FOR COSMONAUTICS. THE SATELLITE DESIGNED TO PERFORM ALL-WEATHER RADAR PROBING OF THE EARTH'S ATMOSPHERE AND THE WORLD OCEAN IN THE INTERESTS OF THE SOVIET ECONOMY, IS SCHEDULED FOR BLAST-OFF IN LATE NOVEMBER-EARLY DECEMBER, HEAD OF THE SOVIET SPACE AGENCY GLAVKOSMKOS ALEXANDER DUNAYEV TOLD JOURNALISTS TODAY.

DUNAYEV DWELT ON PROBLEMS ENCOUNTERED BY GLAVKOSMOS AS THE COUNTRY SWITCHES TO A MARKET ECONOMY.

"GIVEN THE PRESENT BUDGET, IT IS DIFFICULT EVEN TO PRESERVE THE EXISTING LEVEL OF SCIENTIFIC RESEARCH INTO SPACE," DUNAYEV SAID. "OUR TASK IS TO PRESERVE SCIENTIFIC POTENTIAL, NOT TO LOSE PERSONNEL. THE UTILISATION OF OUR SCIENTIFIC POTENTIAL AND THE ACCUMULATED EXPERIENCE IN SPACE EXPLORATION WILL PLAY AN IMPORTANT ROLE IN INTERNATIONAL COOPERATION. WE BEAR IN MIND HERE NOT ONLY THE USE OF OUR DEVELOPMENT PROJECTS AND TECHNOLOGIES BY FOREIGN SCIENTISTS, BUT ALSO THE FULFILMENT OF ORDERS FROM FOREIGN PARTNERS," DUNAYEV SAID.

SPECIALISTS EMPHASISED AT THE BRIEFING THAT THE SCIENCE OF THE EARTH AS WELL AS MANY BRANCHES OF THE SOVIET ECONOMY CANNOT DEVELOP EFFECTIVELY TODAY WITHOUT COMPREHENSIVELY APPLYING THE RESULTS OF EARTH EXPLORATION FROM SPACE.

THE MULTIZONAL SURVEY OF THE EARTH'S SURFACE AND THE WORLD OCEAN FROM SPACE WITH THE AID OF THE RESURS REMOTE PROBING SYSTEM PROVIDES SPECIALISTS WITH VALUABLE INFORMATION WHICH IS USED IN THE INTERESTS OF THE ECOLOGY, GEOLOGY, OCEANOLOGY, FORESTRY, AGRICULTURE AND LAND MANAGEMENT. AREAS STRUCK BY FLOODS, FOREST FIRES AND VOLCANO ERUPTIONS CAN BE PERIODICALLY OBSERVED AND NATURAL CALAMITIES MONITORED ONLY FROM SPACE.

THE EFFICIENCY OF THE REMOTE PROBING OF THE EARTH FROM SPACE CAN BE JUDGED BY THE FACT THAT ONE PICTURE TAKEN FROM SPACE COVERS AN AREA OF THE EARTH'S SURFACE 36,000 SQUARE KILOMETERS IN SIZE.

IT TAKES A SATELLITE ONLY THREE TO FIVE MINUTES TO BEAM BACK THE NUMBER OF PHOTOS WHICH AN AIRCRAFT MAKES DURING TWO YEARS. THE COST OF PHOTOGRAPHING ONE SQUARE KILOMETER FROM SPACE RANGES FROM 28 TO 99 KOPECKS AND OF AEROPHOTOGRAPHY - FROM 1.2 TO 2.7 ROUBLES.

SPECIALISTS ARE PRESENTLY SWITCHING TO A COMPREHENSIVE SURVEY OF WHOLE REGIONS. THEY HAVE ALREADY COMPLETED THE SCANNING OF TADZHIKISTAN, THE KALMYK REPUBLIC, STRAVROPOL TERRITORY AND THE TVER REGION, CENTRAL RUSSIA. WORK TO PROBE THE NOVGOROD REGION, THE CENTRAL PART OF THE RUSSIAN FEDERATION, IS NOW BEING FINALIZED.

-30- 2655

#90304t0777 10/31/1990 ~ts

MOSCOW (OCT. 31) TASS - THE SOVIET PARLIAMENT TODAY APPROVED A TOUGH LAW AGAINST PROFITEERING, ILLEGAL TRADING AND ABUSES IN TRADE. AS ITS PREAMBLE NOTES, IT WILL OPERATE "DURING THE STABILISATION OF THE SOVIET ECONOMY IN THE PERIOD OF TRANSITION TO A MARKET ECONOMY".

SUBMITTING THE NEW VERSION OF THE BILL AMENDED AFTER THE FIRST READING LAST WEEK, CHAIRMAN OF THE COMMITTEE ON LAW AND ORDER AND CRIME CONTROL YURI GOLIK SAID THAT THE ACT WOULD HELP PROTECT SOCIALLY LOW PRICES SET BY THE STATE.

"COMING TO A STATE-RUN SHOP, CONSUMERS MUST BE SURE THAT STATE-SUBSIDISED

GOODS WILL GET TO THEM AND NOT TO A SECOND-HAND DEALER WHO WOULD LIKE TO LINE HIS POCKETS FROM THE DIFFERENCE IN PRICES," GOLIK SAID.

HE STRESSED THAT PROFITEERING IN THE USSR IS ASSUMING MORE ORGANISED AND PROFESSIONAL FORMS. INDIVIDUAL PROFITEERS ARE BEING OUSTED FROM THE BLACK MARKET BY CRIMINAL GROUPS. IT IS POSSIBLE TO DETECT A CLEAR TREND TOWARDS A CRIMINAL MONOPOLY ON PRICES, GOLIK SAID.

FOR THIS PURPOSE, "SECOND-HAND DEALERS BUY UP HUGE CONSIGNMENTS OF GOODS, STASH THEM AWAY FOR SOME TIME AND THEN DICTATE PRICES," HE CONTINUED.

GOLIK STRESSED THAT THE ACT INTERPRETS PROFITEERING AS THE CORNERING IN OF GOODS FOR WHICH STATE RETAIL PRICES ARE SET, AND THEIR RESALE TO SKIM PROFITS.

SUCH ACTIONS ARE PUNISHABLE BY PRISON TERMS OF UP TO THREE YEARS OR CORRECTIONAL LABOUR OF UP TO TWO YEARS WITH POSSIBLE CONFISCATION OF PROPERTY, OR A FINE OF UP TO 5,000 ROUBLES.

STIFFER PENALTIES ARE PROVIDED FOR REPEAT OFFENDERS OR FOR PROFITEERING ON A LARGE SCALE, OR IN COLLUSION WITH A GROUP OF PEOPLE, AS WELL AS FOR TRADE WORKERS MISUSING THEIR OFFICIAL POSITIONS: A FINE UP TO 15,000 ROUBLES OR PRISON TERMS OF UP TO TEN YEARS.

SPECIAL PENALTIES ARE PROVIDED FOR THE ILLEGAL SALE OF GOODS FROM WAREHOUSES OF TRADING ESTABLISHMENTS.

-30- 1999

#90304t0792 10/31/1990 ~ts

MOSCOW (OCT. 31) TASS - THE RUSSIAN GOVERNMENT INSISTS ON BEGINNING THE FULFILLMENT OF THE "500-DAYS" PLAN TO STABILISE THE ECONOMY AND INTRODUCE MARKET RELATIONS ON THURSDAY, NOVEMBER 1, RUSSIAN PRIME MINISTER IVAN SILAYEV TOLD THE RUSSIAN PARLIAMENT TODAY.

HE NOTED THAT THE RESOLUTION ON URGENT MEASURES TO STABILISE THE ECONOMY AND THE PLAN FOR THE TRANSFER TO MARKET RELATIONS, PASSED BY THE SOVIET PARLIAMENT ENVISAGED "A CERTAIN DEGREE OF ECONOMIC INDEPENDENCE OF SOVIET REPUBLICS" AND "A VERY HIGH DEGREE OF REPUBLICAN RESPONSIBILITY FOR THE SOCIAL SITUATION OF WORKING PEOPLE AND FOR THE CONSUMER MARKET".

AT THE SAME TIME, THE RESOLUTION ENVISAGED "AN EXTREME CENTRALISATION OF MATERIAL, CURRENCY AND FINANCIAL RESOURCES, DEPRIVING REPUBLICS OF THE POSSIBILITY TO ENSURE THE ACCOMPLISH OF TASKS ENTRUSTED TO THEM".

SILAYEV STATED THAT UNDER PRESENT CONDITIONS THE "500 DAYS" PLAN, AND ESPECIALLY ITS FIRST PART DEALING WITH THE STABILISATION OF THE ECONOMY, COULD NOT BE IMPLEMENTED IN FULL. SOME OF THE STEPS ENVISAGED BY THE PLAN WILL HAVE TO BE REPLACED BY SUPPLEMENTARY, VERY HARD MEASURES TO PROTECT WORKING PEOPLE

AGAINST INFLATION AND UNEMPLOYMENT.

AS REGARDS LAND, HOUSING AND SOCIAL REFORMS AND PRIVATISATION, THEY CAN AND WILL BE REALISED IN FULL AS STIPULATED BY THE "500 DAYS" PLAN. BUT FOR THESE REFORMS TO BE ACCOMPLISHED, SILAYEV SAID, IT IS NECESSARY TO EXERCISE THE REPUBLIC'S SOVEREIGN RIGHTS PROCLAIMED BY THE FIRST CONGRESS OF RUSSIAN PEOPLE'S DEPUTIES.

-30- 1675

#90304t0805 10/31/1990 ~ts

KIEV (NOV 1) TASS - THE DECISION ON "THE PROTECTION OF THE CONSUMER MARKET IN THE UKRAINE" BY THE REPUBLICAN GOVERNMENT WHICH WAS PUBLISHED BY THE LOCAL PRESS, PROVOKED CONTRADICTORY FEELINGS AMONG THE UKRAINIAN POPULATION.

THE DECISION WAS DISCUSSED BY THE REPUBLICAN PARLIAMENT ON WEDNESDAY. IT PROVIDES FOR THE INTRODUCTION OF COUPON BOOKLETS ON NOVEMBER 1, GIVING CONSUMERS THE RIGHT TO PURCHASE INDUSTRIAL GOODS AND FOODSTUFFS WITH COUPONS.

UNDER THE DECISION, WAGES AND SALARIES WILL BE FULLY PAID. HOWEVER, 70 PER CENT OF WAGES AND SALARIES WILL BE PAID IN COUPONS AND THE REST IN ROUBLES.

COMMENTING ON THIS ACTION, UKRAINIAN DEPUTY PRIME MINISTER VITOLD FOKIN, A CO-AUTHOR OF THE DECISION, SAID THAT THE ACTION IS AIMED AT PROTECTING THE CONSUMER MARKET IN THE REPUBLIC AND CONTROLLING THE SHADOW ECONOMY AND PROFITEERING.

IN HIS OPINION, COUPONS WILL HELP LEVEL QUANTITIES OF CASH AND GOODS IN THE POSESSION OF UKRAINIANS AND PREVENT THE OUTFLOW OF GOODS FROM THE REPUBLIC, SINCE ONLY UKRAINIANS WILL HAVE SUCH COUPONS.

ON THE OTHER HAND, VICE-PRESIDENT OF THE UKRAINIAN PARLIAMENT VLADIMIR GRINEV BELIEVES THAT THE DECISION WILL NOT HELP THE REPUBLIC PULL OUT OF THE CRISIS.

MANY UKRAINIANS, INCLUDING LAWMAKERS, WERE PUZZLED BY THE FACT THAT, AS WAS THE CASE IN THE SO-CALLED STAGNATION YEARS, THE GOVERNMENT HAD DRAFTED AND ADOPTED A DECISION IN COMPLETE SECRECY WITHOUT TAKING ADVICE OF THE PEOPLE AND OF THE REPUBLICAN PARLIAMENT.

HOWEVER, PRESIDENT OF THE UKRAINIAN PARLIAMENT BELIEVES THAT THERE IS NO NEED TO SUBMIT EVERY IMPORTANT DECISION BY THE GOVERNMENT FOR THE CONSIDERATION OF PARLIAMENT.

OTHERWISE, SOME DEPUTIES WILL TRY TO PARALYSE THE GOVERNMENT'S ACTIVITIES OR TO SHIFT THE BLAME FOR ITS MISTAKES ONTO PARLIAMENT.

THE GOVERNMENT SPENT 1.5 MILLION ROUBLES TO ISSUE COUPONS FOR NOVEMBER. ON NOVEMBER 1, TRADING ORGANISATIONS WILL RECEIVE, TOGETHER WITH ROUBLES, THEIR

EQUIVALENT ISSUED BY PRINTSHOPS.

AFTER THE DEBATE WHICH ENDED ON WEDNESDAY EVENING, THE SESSION DECIDED THAT COUPONS WILL BE INTRODUCED ON NOVEMBER 1. HOWEVER, ADJUSTMENTS ARE POSSIBLE IN FUTURE.

#90304u0002 10/31/1990 ~United Press International

(OCT. 31) UPI - President Bush begins a six-day, cross-country campaign blitz tomorrow on behalf of G-O-P congressional and gubernatorial nominees. Bush will try to help Republicans hurt by his decision to drop his ''NO new taxes'' pledge.

A federal appeals court in Chicago has upheld federal regulations that ban pilots over the age of 60 from the cockpits of planes carrying 30 or more passengers. But the court left the door open for further challenges, saying the F-A-A's proof that skills deteriorate past 60 is NOT overwhelming.

Americans made more- and spent an even greater amount- last month. The Commerce Department says U-S personal income climbed one-half of one percent in September while personal consumption rose one-point-one percent over August.

Iran says Bahrain's foreign minister arrived in Tehran today for two days of talks on the Persian Gulf crisis. The minister is quoted by Iran's official news agency as calling for collective cooperation among the gulf states.

Copies of the strike-plagued New York Daily News were almost impossible to find today in midtown Manhattan. Dealers say they either are NOT getting or had refused deliveries. Said one dealer- ''It's NOT worth the trouble.''

If you're thinking about having a tummy tuck or a nose job, you may want to it soon. The five-year deficit-reduction plan awaiting President Bush's signature will eliminate cosmetic surgery as a tax deductable expense.

While U-S troops take part in Operation Desert Shield in Saudi Arabia... country music stars are putting on an Operation Desert Song in Nashville, Tennessee. The effort involves sending donated cassette tapes to U-S soldiers.

An upstate New York woman says her family views her Halloween plans as ''kind of morbid.'' But Jody Hawley adds- ''It's my wedding.'' Hawley dressed as the Countess tonight in marrying Nelson Nieves, dressed as Count Dracula. There's NO word on whether Nieves kissed his bride on the lips or on the neck.

The White House is expecting royalty. Presidential spokesman Marlin Fitzwater says Britain's Queen Elizabeth plans to visit the United States next spring. The queen will arrive sometime in May, but the exact date was NOT announced.

#90304u0070 10/31/1990 ~United Press International
(OCT. 31) UPI - Iraqi President Saddam Hussein warned his generals to prepare for imminent hostilities but President Bush signaled continued reliance on economic pressure and military intimidation during talks with congressional leaders.

The official Iraqi News Agency, or INA, Tuesday quoted Saddam as warning his military commanders during an emergency meeting that they must be on ''high alert'' and said an attack could come within days.

Saddam also warned the U.S.-led forces in the gulf that if they attacked, they risked door-to-door fighting with heavy casualties in Kuwait, the tiny gulf emirate overrun by Iraqi invasion forces on Aug. 2.

It was not clear whether Saddam had intelligence that the West was planning a military strike to force him out of Kuwait or was simply sending yet another warning signal to the international alliance against him.

Bush, meeting with congressional leaders and his national security advisers, mapped out a ''stay-the-course'' strategy with a continued buildup of U.S. forces for possible use if Saddam's troops cannot be pressured out of Kuwait.

Sen. William Cohen, R-Maine, said Bush did not indicate economic sanctions, meant to punish Iraq for invading its neighbor, were nearing a make-or-break point and added, ''I don't have any impression we're moving closer to war.''

Meanwhile, the Pentagon said U.S. forces will be conducting amphibious exercises in the north Arabian Sea through Nov. 8. The exercises, which began Tuesday, involve 20 airplanes and 75 helicopters but Pentagon officials would not disclose the number of ships or Marines involved.

A steam explosion killed 10 sailors Tuesday aboard the USS Iwo Jima as the ship was on its way to take part in the amphibious exercise in the North Arabian Sea, U.S. military officials said.

The explosion on the 602-foot, 18,000-ton amphibious assault ship took place at 12:15 a.m. EST Tuesday, just after the vessel had undergone routine maintenance in Manama, Bahrain. Six sailors were killed instantly, and four others who were critically injured in the accident died later.

Navy spokesman Lt. Cmdr. Alan Dooley said steam leaked from the Iwo Jima's boiler system as the helicopter carrier left after a routine port call.

In another accident, a U.S. Marine was killed and three others injured when a multipurpose ''humvee'' vehicle overturned during a night exercise in Saudi Arabia, a Marine spokesman in Washington said.

The deaths brought to 42 the number of American forces who have been killed accidentally in Operation Desert Shield, the Pentagon said.

On the diplomatic front, Iraqi Foreign Minister Tariq Aziz said Tuesday that Soviet President Mikhail Gorbachev had contributed to the search for a peaceful solution to the Persian Gulf standoff.

''There were certain positive elements regarding the search for a peaceful solution and the recognition of the existence of a link between regional issues,'' Aziz told state-run Baghdad Radio.

Gorbachev, the winner of the 1990 Nobel Peace Prize, told reporters that war in the gulf is unacceptable and the crisis must be settled peacefully. He suggested Saudi Arabia work toward an ''inter-Arab'' solution.

Gorbachev's statement came a day after a Soviet envoy failed to win a promise from Iraq that it would end its nearly 3-month-old occupation of Kuwait.

The Palestine Liberation Organization welcomed Gorbachev's proposal. ''There is a serious attempt going on now to reach an Arab solution to the gulf crisis '' PLO official Nabil Shaath told reporters in Cairo. ''And there has also been an encouraging Iraqi response.''

An Iraqi Airways jet that brought 262 French citizens home from Iraq and Kuwait left for Baghdad with ''a few tons'' of medicine. The plane also carried three Iraqis who had been stranded in France, foreign ministry sources said.

Iraqi Airways said Tuesday one of its carriers was scheduled to pick up a shipment of medicine in Geneva Thursday. The Swiss government is allowing the flight because medicine is considered humanitarian supplies allowed under U.N. sanctions against Iraq.

-30- 4355

#90304u0072 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - President Bush, facing sinking polls and a divided GOP, is trying to rally Republicans for next Tuesday's elections by blaming the Democratic controlled Congress for the tax hikes in the new budget deal.

And Democrats are fighting back. They angrily reject Bush's contention that they are responsible for the taxes and says his policies have long favored the rich.

Bush is to attend a fund-raising event in Alexandria, Va., Wednesday for Rep. Stan Parris, R-Va., and leaves Thursday for a six-day, cross- country campaign swing ending Election Day in his adopted hometown of Houston.

A key election issue is the fiscal package that Congress passed Sunday after more than six months of stormy debate. It includes tax increases and spending cuts totaling $492 billion over the next five years.

Most of the Republicans in both the House and the Senate opposed the compromise plan, which has been sent to Bush for his promised signature.

At an ''Election Countdown'' pep rally Tuesday, Bush blamed Democrats for the tax hikes in the new deficit-cutting budget, which the president says he was forced to accept by Democrats playing power politics.

''For six months this Congress stalled the budget agreement and, in my view, risked stalling the economy,'' Bush said. ''All in the name of politics and higher taxes.''

Addressing a few hundred party faithful, Bush said voters Tuesday will have ''the opportunity to send that crowd ... a message by sending more Republicans to Congress.''

Democratic congressional leaders quickly lashed back, accusing Bush of a ''deliberate distortion of the truth.''

Senate Democratic leader George Mitchell of Maine charged that the ''tax policies of the Republicans over the past decade have been to soak the middle class.''

House Democratic leader Richard Gephardt of Missouri said Bush wanted a ''good deal for the wealthy, a raw deal for the elderly and a double deal for the middle class.''

Tuesday's pep rally of a few hundred people was sponsored by several GOP organizations, including the Republican National Committee and the National Republican Congressional Committee.

Noticeably absent was Ed Rollins, co-chairman of the NRCC. Rollins recently raised Bush's ire by suggesting that House Republicans oppose the president's flip-flop in favor of a tax increase for the rich to reduce the deficit.

Last week, an angry Bush appeared ready to seek Rollins' dismissal, but since then a more forgiving president has indicated he would just as soon let Rollins keep the post - at least for now.

Gary Koops, a spokesman for Rollins' commmittee, said the co-chairman was unable to attend because he was busy planning campaign strategy.

In his address, Bush blamed congressional Democrats for forcing him to raise taxes and said more Republicans would have permitted him to have obtained a

better budget.

''More Republicans in Congress means more men and women fighting against raising taxes and against the big spenders,'' he said. ''More Republcians means a better deal for America.''

A year ago, with the president's approval rating regularly upwards of 70 percent and the economy stronger, the GOP viewed the 1990 election as a chance to pick up some seats in Congress.

But those hopes have been dashed by recent polls that show the president battered and bruised by the budget battle, which saw him drop his no-new-taxes pledge, and the sluggish economy.

A Newsweek poll released Sunday showed Bush with the lowest approval rating of his presidency, just 48 percent, down by more than 20 points from a month ago.

Bush has the dubious distinction of having the fewest number of Republicans, 175, in the House than any first-term GOP president this century. He may likely have even less next January when the new Congress is sworn in.

There are now 258 House Democrats and two vacancies. Democrats enjoy a 55-45 margin in the Senate, and they too are expected to pick up a few seats next week when a third of the Senate and the entire House will be up for grabs.

(OCT. 31) UPI - The Pentagon says U-S forces will be conducting amphibious exercises in the north Arabian Sea through the middle of next week. The exercises that began Tuesday involve 20 airplanes and 75 helicopters. However, military officials are NOT disclosing the number of ships or Marines taking part. In a related word, a steam explosion killed 10 U-S sailors Tuesday aboard the U-S-S Iwo Jima as it headed to the exercises in the Arabian Sea.

U-S Supreme Court Justice David Souter appeared skeptical about a government effort to bar health workers at federally funded clinics from discussing abortion with clients. Souter questioned Solicitor General Kenneth Starr during oral arguments before the high court Tuesday. Opponents say the government canNOT prohibit freedom of speech because it funds a project.

President Bush is trying to change what can only be viewed as a dubious distiniction. Bush has the fewest number of Republicans in the House than any first-term G-O-P president this century. Bush plans campaign stops across the nation before elections are held Tuesday in the hopes of having more Republicans in Washington when the new Congress is sworn in next January.

A Detroit woman says she didN'T have much, but now she does NOT- in her words- ''have a damn thing.'' The woman spoke while watching her home on the city's west side burn down in flames. City workers and volunteers are trying to dampen the spree of arson that annually sweeps Detroit around Halloween. However, there were fires and dozens of youths were jailed Tuesday night.

A snub-nosed gun is the cause of a court battle nearly 23 years after it was used in the killing of Lee Harvey Oswald. Earl Ruby... the brother of Jack Ruby... claims ownership of the gun his sibling used to kill the suspected assassin of President Kennedy. But Jack Ruby's executor, Jules Mayer, says he is due a hefty fee if the .38-caliber Colt Cobra is sold. Mayer's attorney told a Dallas jury Tuesday- quoting now- ''A gun is NOT a pretty thing to fight about. But history is history and that gun has value.''

#90304u0153 10/31/1990 ~United Press International

MANILA, Philippines (OCT. 31) UPI - Police arrested the leader of a left-wing trade union that spearheaded last week's violence-marred general strike and charged him with sedition, officials said Wednesday.

Manila police chief Col. Ernesto Diokno served an arrest warrant on Crispin Beltran, the fireband chairman of the left-leaning May One Movement, or KMU, Tuesday night after a television talk show in which they were both guests.

Military officials have accused the KMU of being a front of the outlawed Communist Party of the Philippines and its military arm, the New People's Army which openly supported the strike.

The military blamed the NPA for the burning of 24 buses and the bombing of two oil firms during the strike that began Wednesday to press demands for higher wages. At least 10 people were killed in the violence.

Beltran, 57, who has denied any participation in the violence, was charged before a Manila prosecutor Wednesday with inciting to sedition and illegal assembly, said police Capt. Honrato Laurel.

Beltran also is facing charges of ''illegal association'' for the alleged links of KMU with the underground communist movement, fighting the government for the past 21 years. The case was filed in 1989 in the central city of Cebu.

The strike last week disrupted transportation and operations in some factories but failed to paralyze the nation as the organizers had planned. It fizzled out after one day although demonstrations continued in Manila.

Labor leaders suspended the strike Friday, pending further negotiations on their demands for a $1.48 increase on top of the daily minimum wage of about $3.46. They vowed to resume their mass actions in November if no agreement was reached.

#90304u0171 10/31/1990 ~United Press International

(OCT. 31) UPI - President Bush Wednesday is scheduled to attend a fund-raising event in Alexandria, Virginia, for Representative Stan Parris, and leaves Thursday for a six-day, cross-country campaign swing ending Election Day in his adopted hometown of Houston.

The United Auto Workers reached a tentative three-year agreement with Chrysler Corporation after a 28-hour bargaining session that ended Tuesday. The union has scheduled a meeting of its 100-member Chrysler Bargaining Council for Monday in Detroit.

The space shuttle Columbia is finally back in service after passing a critical fueling test without springing any dangerous hydrogen leaks Tuesday. The

successful test sets the stage for an early December launch attempt.

A workhorse Delta rocket successfully boosted a 90-Million-dollar mobile communications satellite into orbit Tuesday after a picture- perfect launch. The launch was the 200th flight in the booster program's 30-year history.

Thousands of volunteers took to the streets of Detroit at dusk Tuesday in an effort to dampen Devil's Night, which traditionally results in many more arson fires than usual. So far, an average number of fires has been reported.

Police in the Philippines have arrested the leader of a left-wing trade union that spearheaded last week's violent general strike. The man was charged with sedition. At least 10 people were killed in the violence.

Researchers at the University of Michigan report that they have used gene therapy to lower cholesterol in animals for the first time, possibly opening a new era in treating hardening of the arteries and liver disease.

SUBIC BAY NAVAL BASE, Philippines (OCT. 31) UPI - Forty-five Filipino fishermen rescued by a U.S. Navy ship arrived here Wednesday and said they had no food for two days after their outriggered boat was crippled by giant waves in the South China sea.

Five other fishermen were still missing after the 90-foot Sto. Nino Gloria suffered leaks and its engine conked out Friday in the Scarborrough Shoal, about 200 miles from the Philippine coast.

The tanker USNS Ponchatoula, which was dispatched to the area after a U.S. Navy plane located the disabled boat Sunday, picked up the fishermen Monday, ship skipper Capt. Peter Brent told reporters. Earlier reports said the boat had capsized.

Brent said the ship, attached to the military sealift command, searched the area for the missing fishermen Tuesday before before returning to port.

The survivors were turned over to the local government in the liberty town of Olongapo where they were confined at a hospital for medical check-up.

''It's good we saw them before dusk,'' Brent said, adding that the boat had no lights, was taking in water because of two leaks and its outriggers were broken. He said they tried to tow the boat but the rope snapped and it sank.

Randy Sagarino, 14, said their boat was battered by huge waves Friday. He said said five fishermen, including his father and a brother, were unaccounted for after they transferred to a smaller vessel being towed by their boat but which

was separated.

''We took turns in taking the water out of the boat using a pail,'' Sagarino said. ''We had no food for two days.''

Another fisherman, Leovigildo Caguete, 26, said a private plane had dropped leaflets telling them a Philippine Navy ship was en route to rescue them. ''It never came,'' he said.

(OCT. 31) UPI - Around the world, around the clock, the latest news from U-P-I...

Fires were reported last night on Detroit's near east and west sides... with police reporting 246 youths arrested. The blazes and arrests came during a citywide clampdown to dampen Devil's Night... an orgy of arson that traditionally sweeps Detroit each year around Halloween.

A prosecutor says he will press for the gas chamber when Ramon Salcido is sentenced next week in one of the most vicious murder rampages in California history. Salcido was found guilty yesterday of killing seven people- including his two daughters- in a jealous spree last year in California's wine country.

A 90-Million-dollar mobile communications satellite is in orbit... following the 200th launch of the Delta rocket. Last evening's flawless mission from Cape Canaveral is the 22nd success in a row for rocket- builder McDonnell Douglas Space Systems of Huntington Beach, California.

U-S crude oil prices slipped toward the end of the day Tuesday, with a rumor-weary market unable to muster the strength to support a buying momentum. One analyst says he believes traders are ''sick and tired'' of buying and selling based on unconfirmed reports and rumors about the Middle East.

The United Auto Workers say the union reached its goal in negotiating a tentative three-year contract agreement with Chrysler. U-A-W President Owen Bieber describes the pact as patterned after earlier contracts with the other two Big Three carmakers. Both sides are declining to detail the agreement.

Chess challenger Anatoly Karpov managed a draw in Game Eight of the World Chess Championship last night in New York City. Officials say Karpov made four moves that were incredible'' in the last two minutes. Karpov and champion Gary Kasparov will play Game Nine tonight.

One of 45 Filipino fishermen rescued by a U-S Navy ship says their boat was crippled by giant waves in the South China sea. The fisherman adds that the group had NO food for two days before an American vessel rescued them Monday.

Five fishermen remain missing about 200 miles from the Philippine coast.

People who opt for spending the night at Indiana park inns will find an anti-Bible pamphlet along with the standard book of religious reading. The state says it is reviewing a decision to allow the pamphlets in the inns. The pamphlet describes the Bible as a- quote- ''violent, racist and sexist fable.''

BANGKOK, Thailand (OCT. 31) UPI - A cliff at a stone quarry in central Thailand collapsed Wednesday, burying 11 workers under tons of stone, a police officer said.

The workers were starting to drill holes for explosives at the base of a cliff when the ledge fell on them, said Capt. Pairat Vijitlegkarn, a local deputy police investigator at Na Pra Lan district of Saraburi Province, 80 miles north of Bangkok.

''Suddenly it collapsed. We have so far collected five bodies but we believed that the six others are dead because we have heard no sound from them,'' he said.

''Some rocks are as big as 10-wheel trucks,'' he said.

Pairat said all victims were male workers and the cause of the incident is under investigations.

#90304u0241 10/31/1990 ~United Press International

HONG KONG (OCT. 31) UPI - A group of 205 Vietnamese boat people voluntarily traded life in Hong Kong's crowded camps for a return to Hanoi Wednesday amid efforts to launch a new non-voluntary return program before the end of November.

The group boarded a chartered jet bound for their homeland, raising to 4,899 the number of boat people who have returned through the U.N.- sponsored voluntary repatriation program.

It was the largest group of voluntary returnees since August - a fact which some observers attributed to a new multi-lateral agreement to repatriate boat people who did not volunteer but did not object to returning.

The scheme, which came out of a late September meeting between Britain, Vietnam and the United Nations High Commission for Refugees, was a compromise bid to aid Hong Kong in emptying its cramped detention centers, which are home

to about 54,000 refugees.

Officials in the British colony had hoped to begin the program by the end of October but said logistical problems had delayed the launch.

''It is a new program so it has had a slow start, but the UNHCR is working very hard to recruit people and their efforts are now bearing fruit,'' said Refugee Coordinator, Clinton Leeks. ''We hope to have it in operation soon, I would certainly say by the end of November.''

Only those boat people who can prove that they face political persecution if returned to their homeland are granted refugee status in Hong Kong and made eligible for resettlement in the West. The rest - an estimated 80 to 90 percent of the Vietnamese - face continued life in the camps or a one-way ticket to Hanoi.

The British colony has maintained that its 1 1/2-year-old voluntary repatriation program was not doing enough to solve the financial and political burden created by the Vietnamese.

Officials had pressed for a return to a short-lived mandatory return program, which forced 51 refugees back to Vietnam in late 1989.

Hanoi, shocked at the worldwide condemnation of the move, refused to accept any more boat people returned against their will.

Under the new initiative, U.N. officials are responsible for coaxing screened out Vietnamese into returning to their homeland. Hanoi has pledged to accept boat people returned through the new program as long as no force is used in the operation.

#90304u0247 10/31/1990 ~United Press International

(OCT. 31) UPI - Halloween costumes that came with rubber boots and raincoats were the order of the day Wednesday in the Pacific Northwest where record rainfall continued, while the rest of the nation was mostly clear and cool.

Showers with a chance of thunderstorms covered the Northwest and the wet weather was to continue through the day in Washington and Oregon.

The storm came a day after record rain fell in Oregon. On Tuesday, 2.75 inches of rain soaked Eugene Airport, shattering the previous record of 1.07 inches set in 1956. In Portland, 0.59 inches of rain fell at Portland International Airport, breaking a 50-year-old record of 0.50 inches.

To the south, light winds and scattered clouds covered Southern California and temperatures were in the mid 50s.

Denver had clear skies with a wide range of temperatures stretching from the upper 60s to the west and the low 40s in other areas.

North and northwest winds pushing 30 mph prompted a small craft advisory for the coastal waters from Eastport, Me., to the Merrimack River in Massachusetts. Seas averaged 2 to 4 feet.

Temperatures warmed slightly in New York City where the low was in the upper 40s, while in Atlantic City, skies were clear and lows in the mid 30s inland to mid 40s along the shore. Winds were light.

In the South, thick fog blanketed southwest Louisiana, cutting visibility to near zero, especially on roads near grassy fields and in low lying areas. Most of the rest of the South was clear and cool.

#90304u0259 10/31/1990 ~United Press International

BEIJING (OCT. 31) UPI - A prominent Shanghai writer and government critic, released after being jailed for more than a year for links to the 1989 pro-democracy movement, said Wednesday he was not mistreated and spent most of his confinement reading.

Wang Ruowang, 72, was freed Monday from a Shanghai detention center where he had been jailed since mid-September of last year.

Reached by telephone in Shanghai, family members said he had been freed after acknowledging ''mistakes,'' but Wang himself refused to confirm this in a telephone conversation. He said he was in good health.

''We're all very happy,'' said one family member.

A novelist and journalist who is one of China's most prominent liberal writers Wang was among intellectuals who took part in street demonstrations in Shanghai in the spring of 1989 at the height of the pro-democracy movement.

After Chinese troops fired on protesters in Beijing on June 3-4, and the government cracked down nationwide on the unrest, police in Shanghai first placed Wang under house arrest in July and later took him into custody.

Wang said he was kept in a cell with two or three other prisoners and was not mistreated, adding ''the treatment was humane.''

He said he spent most of his time reading, including 20 volumes of Chinese history, literary theory and psychology.

''This was a good opportunity for me to study,'' he chuckled.

Wang is the second prominent detainee freed recently. Wu Xiaoyong, an executive at the state radio service jailed in Beijing in connection with last year's unrest, was freed in mid-September to the custody of his father, Vice Premier Wu Xueqian.

Dozens of other people arrested last year are also still believed held in Shanghai, and hundreds more in Beijing.

A year ago, Shanghai's state-run newspapers had sharply attacked Wang, accusing him of having spread rumors, given ''counterrevolutionary'' speeches to student protesters and taken part in demonstrations.

He was also criticized for articles that appeared during the protests in Hong Kong magazines and student leaflets critical of the government.

''I admit I wrote articles,'' Wang said. ''These are facts.''

A longtime government critic, Wang became a Communist Party member in 1937 but was expelled in 1957 during the ''anti-rightist campaign'' for having spoken out against the government during Mao Tse-tung's short- lived ''Hundred Flowers'' movement.

He rejoined the party in 1980 after the Cultural Revolution but continued to criticize corruption and the party's ideologues.

After nationwide student protests during the winter of 1986-1987, Wang was again expelled from the party in January 1987, along with the dissident astrophysicist Fang Lizhi and the famed journalist Liu Binyan.

Both Fang and Liu have since left China. Fang was exiled earlier this year after a yearlong refuge in the U.S. Embassy in Beijing.

#90304u0260 10/31/1990 ~United Press International

DETROIT (OCT. 31) UPI - Despite a small army of volunteers patrolling the streets, dozens of Devil's Night arson fires lit up the sky in scattered sections of the city Tuesday night, some of them destroying occupied homes.

The lower east side - one of Detroit's poorest areas - seemed to be hardest hit by the traditional arson orgy that has plagued the city on the night before Halloween for nearly a decade.

''I think it's a disgrace to our neighborhood,'' said Taron Harris, 14, as he stood watching an abandoned structure go up in flames. ''It ain't right. It ain't right to start fires in your own neighborhood.''

There were no reports of deaths or serious injuries, but several families were left homeless when flames spread from abandoned buildings to occupied houses.

''I handed a hose to someone, went back for my wife and when we came out ... this was what happened,'' said John Holcolm as he watched as his east side home burn down.

''I didn't have much, but now I know I don't have a damn thing,'' said one unidentified woman whose home on the west side was in flames.

City officials, who mounted a massive campaign to combat the arson spree for the sixth straight year, were attempting to assess the damage Wednesday. They said no official figures would be released until after the three-day Halloween period.

Early, unofficial speculation on the number of fires ranged from 60 to 75 - about average for a 24-hour period - to more than 100.

Charlie Williams, coordinator of the city's Devil's Night task force, said he was optimistic that the number of fires would be lower than last year.

But some city workers in the field said the blazes seemed worse than last year.

''It's crazy, chaotic,'' a Fire Department battalion chief who was supervising a section of the city told the Detroit Free Press.

''It's much worse than they anticipated. We're stretched thin,'' said the battalion chief, who spoke on condition of anonymity for fear of losing his job.

Fire Chief Harold Watkins, however, had a different assessment. ''This is pretty much under control, we believe ...'', he said early Wednesday. ''The number of people the mayor has out in the streets is bound to help us.''

Mayor Coleman A. Young deployed more 35,000 volunteers into the streets Tuesday night and slapped a 6 p.m. to 6 a.m. curfew on unescorted youths under 18 as part of the campaign to dampen the arson spree.

Stung by the widespread negative publicity Detroit receives each year on Devil's Night, Young forbids city departments and officials from releasing any specific fire totals. The official figures are released by his office after the three-day Halloween period.

Police said they arrested 91 youngsters for curfew violations Tuesday night, down sharply for more than 150 a year ago. Monday night, the first night the curfew was in effect, 154 youths were arrested, down from 165 in 1989.

One of the earliest and worst fires was at the New Galilee Spiritual Church, a

storefront church on Detroit's east side. More than 25 fire fighters battled the two-alarm blaze, which engulfed the structure and sent flames shooting through the roof, more than 25 feet into the air.

Since the Devil's Night mobilization began five years ago, fires have dropped 72 percent since the peak in 1984, when a record 810 blazes burned during the three-day Halloween period. Last year, there were 223 fires during the same period.

A hotline, 96-ARSON, also was established this year for residents to report individuals starting fires with a $1,500 reward going to the person who turns in an arsonist.

And 11 cable television companies in the Detroit area unscrambled their signals Tuesday night so customers could receive without cost premium channels such as HBO, Cinemax, The Movie Channel and the sports station PASS.

Department of Public Works crews have razed more than 600 abandoned buildings in the past several weeks, and the Police Department has towed abandoned cars that might attract arsonists. One recent count showed Detroit had more than 15,000 abandoned homes and buildings.

-30- 4334

#90304u0393 10/31/1990 ~United Press International

(OCT. 31) UPI - About 35-thousand volunteers and 35-hundred block clubs are patrolling the streets of Detroit during the three-night Devil's night curfew. Officials say there have been arrests and fires, but for the most part, the streets are calm.

Speaking in Pittsburgh last night, former national security adivsor Zbigniew Brzezinski says it would NOT be in the best interest of the United States to go to war with Iraq over Kuwait. But he said U-S presence in the Gulf ''is necessary.''

A Pentagon spokesman says officials do NOT believe that the number of accidental deaths during Operation Desert Shield is UNusual because of the size of the U-S force in the Persian Gulf. 42 American troops have died accidentally so far. 10 sailors died in a boiler room accident on the U-S-S Iwo Jima yesterday.

Detectives in New York are investigating the death of a baby found in a Bronx hospital with its throat tube disconnected and its heart monitor cut off. The eight-month old boy was found dead by a nurse Monday, but police say the death was NOT immediately reported to them.

A cliff at a stone quarry in central Thailand collapsed today, burying 11 workers under tons of stone. Police say they have recovered five bodies so

far. It's believed that the other six workers are dead.

(OCT. 31) UPI - Stock prices on the Tokyo Stock Exchange eased slightly in light trading Wednesday as rumors and worries over the Middle East crisis and

a weakening Japanese yen sent professional investors to the sidelines.

The blue chip Nikkei Average of 225 selected issues, which lost 86.91 points Tuesday, slipped 48.30 points to 25,194.10.

The broader-based Tokyo Stock Exchange Price Index, a measure of all major listed shares, lost 9.12 points to 1,856.12. TOPIX dropped 10.83 points Tuesday.

Volume was again sparse as an estimated 400 million shares changed hands, down from 411 million shares Tuesday.

Declines edged out advances 508 to 457 while 137 issues remained unchanged.

Elsewhere in Asia, stocks on the Hong Kong Stock Exchange sank in thin trading as increasing worries over tension in the Gulf kept most investors on the sidelines.

The leading Hang Seng Index, which tumbled 51.88 points Tuesday, lost another 20.69 points falling below the 3,000 level to close at 2,990.96.

Among the narrower indexes, financials lost 23.31 points, industrials shed 30.48, utilities gained 14.48 and properties dropped 42.22 points.

Volume was very light as an estimated 720 million shares changed hands, down from 860 million on Tuesday.

In Singapore, stock prices slumped in light trading on the Singapore Stock Exchange with local investors cautious over the situation in the Persian Gulf.

The closely-watched Straits Times Industrial Index, which lost 12.28 points Tuesday, fell another 10.88 points to 1,153.95. The broader-based All Singapore Index, which slipped 2.53 points Tuesday, fell 4.61 points to 319.60.

Volume amounted to around an estimated 36 million shares, compared with 27.4 million shares changing hands Tuesday.

In Bangkok, stocks fell on the Thailand Stock Exchange on fears that war could flare up in the middle east.

In Manila, stocks closed higher on the Manila Stock Exchange.

In Seoul, stocks closed broadly lower in active trading on the Korean Stock Exchange.

In Australia, stocks closed slightly lower in light trading on the Sydney Sharemarket.

#90304u0414 10/31/1990 ~United Press International

PARIS (OCT. 31) UPI - Eight French workers were hurt in an accident in the tunnel under the English Channel a short time after tunnelers from England and France linked up for the first time, ending Britain's ''Splendid Isolation,'' company officials said Wednesday.

A small locomotive carrying the workers along a light railroad track in the French side of the tunnel lurched off its rails and hurtled into a convoy of wagons Tuesday night at around 10 p.m., a spokesman for the company Transmanche Link said.

The accident happened some 90 minutes after workers using the French boring machine Brigitte made contact through a 2-inch hole with the tunnel dug by the British machine Robbins, climaxing three years of construction work.

French media hailed that event by claiming Britain no longer was an island and Le Figaro newspaper headlined its report ''The end of British 'Splendid Isolation.''' Le Figaro said the event reinforced the credibility of the project despite costs far exceeding initial estimates.

Rescue workers took about 45 minutes to reach the men injured in the accident. Six were hospitalized, four of them with serious injuries - broken legs and head injuries, according to firefighters who helped rush them to the hospital. A company spokesman said none of the four were in critical condition.

Two others were able to return home after receiving first aid at the company's infirmary.

The cause of the crash was not immediately known. But a company spokesman said the management would convene a meeting of its health and safety committee Nov. 5 to investigate the incident.

Transmanche Link engineers said first studies indicated the alignment of the two tunnels only was some 1 foot, 6 inches off, an engineering feat they described as ''exceptional.''

Engineers will study further the alignment over the next 24 hours before starting up anew the two tunneling machines now some 100 yards apart.

Brigitte eventually will be taken apart, with only its carcass left behind as part of the wall of the service tunnel. Robbins will be buried and covered in cement after digging its own grave.

The rest of the tunnel will be completed mainly by manual labor and smaller machine tools.

British and French workers are expected to meet up in the second half of November before the official link-up to be attended by President Francois Mitterrand and British Prime Minister Margaret Thatcher.

Le Figaro said the link-up Tuesday seemed to indicate with the completion of 71 miles of the 93 miles of tunnels to be dug, the risky project ''largely has passed the point of no-return.''

Bankers financing the project also appear to agree, having agreed to additional capital to meet the cost of the chunnel - and estimates $15 billion compared to the $9 billion that was estimated at current prices in 1985.

-30- 3078

#90304u0464 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - The judge who presided over Mayor Marion Barry's drug and perjury trial criticized some jurors in the case for disregarding ''overwhelming'' evidence of guilt because they were determined to acquit him from the start.

U.S. District Judge Thomas Penfield Jackson made his first public comments about the case during a student forum Tuesday at the Harvard Law School in Cambridge, Mass.

Jackson, who sentenced Barry to six months in prison last Friday for a misdemeanor cocaine possession conviction, said Barry should have been convicted on more than one count.

In August, the jury acquitted Barry of a second drug possession charge but deadlocked on 12 other charges, including three counts of perjury.

''I am not happy with the way the jury addressed the case,'' Jackson told the students. ''Some people on the jury ... had their own agendas.''

Jackson said he believes four jurors had planned to acquit Barry regardless of the evidence and ''obviously did not tell the truth'' during jury selection when asked about possible bias.

Jackson said while the jury could have acquitted Barry on two drug possession counts, including one that stemmed from a Jan. 18 FBI sting at a downtown Washington hotel, the evidence on all other counts, including perjury, was ''overwhelming.''

Jackson, who told Barry at his sentencing that he gave ''aid, comfort and encouragement'' to the city's drug culture, said his decision to issue an unusually tough penalty for a first-time misdemeanor conviction was because of his belief that the mayor is guilty of crimes beyond drug possession.

The judge said he accepted the jury's not-guilty verdict but felt free to draw his own conclusions about the counts in which the jury deadlocked.

Long-standing legal doctrine gives judges latitude in reaching such conclusions.

Throughout the trial and sentencing, supporters of Barry and Barry himself have maintained that his prosecution was racially motivated.

But Jackson, a Reagan appointee, said he was ''quite sure that neither race nor politics played any part'' in the case.

Barry, who is completing his third term as mayor and running for City Council as an independent, is appealing his conviction. The mayor was scheduled to appear Wednesday on Phil Donahue's talk show to discuss his case.

#90304u0473 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - The world champion Cincinnati Reds, who swept the Oakland A's after becoming the first team in Major League history to lead the league the entire season, got a hero's welcome Tuesday from President Bush.

Missing, however, from the Rose Garden ceremony was star outfielder Eric Davis who left a Cincinnati hospital Tuesday to recuperate from a kidney injury at home.

Davis, who stayed in an Oakland hospital after the Reds left, chartered a plane to take him home earlier this week and blasted Reds owner Marge Schott for not picking up the cost of the charter.

But on a sunny day at the White House, there were no negatives.

''Today we are talking baseball and a team that won 91 games in the regular season, leading wire-to-wire the first time in league history,'' Bush said. ''We are talking the team that beat a marvelous Pirates club in the playoffs, and they were good.

Bush also said the Reds may be able to provide solutions to major domestic and international problems.

''And I hope our guided missiles are as straight as Eric Davis' throw to nab Bobby Bonilla,'' he said.

He said the World Series MVP, Jose Rijo, ''yielding all of one run in 15-plus innings, maybe he can help us with the interest rates. Get the ERA down, now it's the interest rate (laughter); and then Billy Hatcher, seven straight hits nine-for-twelve in the Series; and yes, Eric the Red, whom I wish continued

recovery and when I talk to Mr. Gorbachev about offensive weapons, I am going to tell him that No. 44's bat is not negotiable.''

Bush singled out a number of other players, including Glenn Braggs, Barry Larkin, Joe Oliver and Chris Sabo, ''He's off in Japan, but his three home runs are still in orbit someplace, and Paul O'Neill and yes, Tom Browning, the man who combined a World Series and the birth of his son, batting 1.000 along the way.''

Also attending the ceremony were the four Babe Ruth League champions, from Youngstown, Ohio, the New York City borough of Staten Island and two teams from Oakland.

Referring to the youngsters, Bush told the Reds, ''You guys better watch out for your jobs, some of these people.''

He also got a laugh when he introduced the umpires that worked the World Series.

''Seldom do the players and families cheer the umpires, but we're glad you're here, delighted you're here,'' he said. ''Just a minute, a little dissent. I think I can handle it.''

PARIS (OCT. 31) UPI - Interior Minister Pierre Joxe said Wednesday he would consider dissolving a secretive police intelligence unit implicated in a ''frankly disgusting'' scandal over the mysterious death of a renegade homosexual pastor.

Joxe told Europe 1 Radio he would be prepared to dissolve the 3,900 strong General Information unit if the prefect of police for Paris ''judges it useful.''

Joxe said police authorities long have been in the process of reorganizing the powerful unit, which has been implicated in the disappearance of homosexual Protestant pastor Joseph Douce July 20 and the discovery of his body Oct. 18 in the forest of Rambouillet south of Paris.

Joxe described the climate of scandal surrounding the incident as ''frankly disgusting'' and said he would continue a ''housecleaning'' among the police force as necessary.

Witnesses said Douce last was seen the evening of July 19 leaving his apartment with two men with police badges who asked the pastor to follow them.

Jean-Marc Dufourg, an inspector assigned to surveillance of Douce, said he

himself was involved in a project by General Information to use homosexual prostitutes to seek to compromise former Justice Minister Pierre Arpaillange and Philippe Guilhaume, head of the state-run Antenne 2 television network.

Arpaillange said Tuesday he would sue for slander the inspector, accusing the police of launching ''a campaign of calumny ... to besmirch and discredit me.'' Douce had been defrocked by French Baptist and Protestant authorities because of his militant defense of homosexuals and other sexual minorities.

The police unit reportedly began watching Douce as part of an investigation into alleged pedophilia.

''If there are some police officers of who in the past one has asked to spy on political parties, and if certain of them have continued to do this kind of thing that is not in the (public) interest and is reprehensible in the eyes of the law, it has proven that one must continue with the house-cleaning,'' Joxe said.

TOKYO (OCT. 31) UPI - Komatsu Ltd., the world's leading construction machinery maker, Wednesday posted favorable sales and profits for the half year ended Sept. 30, thanks to brisk overseas sales, mainly in Southeast Asia.

The Tokyo-based company said earnings rose to $67 million, or seven cents a share, up 17.2 percent. The company said sales surged 14.0 percent to $2.414 million, with overseas sales accounting for $900 million, up 22.3 percent.

The company said sales of construction equipment rose to $1.94 billion, with overseas sales accounting for $814.7 million, up 28.9 percent. Sales of industrial machinery increased 13.2 percent to $263.2 million, but overseas sales plummeted 31.5 percent to $42.8 million, the company said.

The company predicted net income of $152.2 million on sales of $4.96 billion for the year ending March 31.

#90304u0589 10/31/1990 ~United Press International

NEW DELHI, INDIA (OCT. 31) UPI - Security forces were kept on alert in many parts of India Wednesday but failed to avert further violence that claimed at least 49 lives after radical Hindus stormed a Moslem mosque and tried to begin construction of a temple.

The tense situation, which is linked to Prime Minister V.P. Singh's ongoing struggle to keep his coalition government in power, was most apparent in northern Uttar Pradesh state where numerous towns remained under curfew and security forces patrolled city streets, the Press Trust of India news agency reported.

Security forces also were on alert in the western Gujarat state towns of Ahmedabad, Baroda and Godhra where fresh violence erupted.

At least 18 people were killed in different parts of India Wednesday in violence related to the temple dispute, raising the number of deaths since Tuesday to 49, the Press Trust said.

Eleven people died in Gujarat, six others were killed in the northern Madhya Pradesh state town of Indore and one person died in the southern Andhra Pradesh state capital of Hyderabad, the news agency said.

The violence came one day after hundreds of Hindus in the Uttar Pradesh state town of Ayodhya, 345 miles southeast of New Delhi, broke through barricades surrounding a complex where a 460-year-old Moslem mosque is located.

The crowd slightly damaged some portions of the structure, but failed to carry out a right-wing Hindu Bharatiya Janata Party plan to begin construction of a Hindu temple at the site.

BJP president L.K. Advani, who spearheaded the campaign to build the temple, was arrested Oct. 23 after he failed to heed a government warning to call off the plan.

The arrest prompted the BJP to withdraw its crucial support from Singh's five-party National Front coalition government, plunging the administration into its worst crisis since it assumed power 11 moths ago.

The BJP has 86 members in the Lok Sabha, or the lower house of Parliament, and its support is necessary for the survival of Singh's coalition. The BJP is not a member of the coalition, but extended critical support to the government.

President R. Venkataraman subsequently asked Singh to prove his majority in Parliament Nov. 7. But regardless of the outcome of that special session, many political analysts are convinced that India is heading for elections, probably in early 1991.

Also Wednesday, the Vishwa Hindu Parishad (VHP), a radical Hindu group which is closely linked to the BJP, warned of ''serious consequences'' if New Delhi did not permit construction of the temple at Ayodhya.

Giriraj Kishore, VHP joint general secretary, issued a statement blaming the government of exercising an ''authoritarian attitude'' that could ''further inflame the people's anger,'' the Press Trust said.

The statement said that senior VHP leaders scheduled a meeting for Friday to discuss future plans for construction of the temple, the news agency reported.

Hindu radicals claim that the mosque that occupies the Ayodhya site was built by the Moghul emperor Babbar after he destroyed a temple marking the birthplace of Lord Rama, one of the most important gods in the vast Hindu pantheon.

Moslem leaders refute the claim and contend that no temple ever existed at the disputed place.

The Ayodhya dispute has been smouldering since February 1986, when a court agreed to allow Hindus to worship in the mosque. The move led to widespread communal riots in northern India.

#90304u0596 10/31/1990 ~United Press International

STOCKHOLM, SWEDEN (OCT. 31) UPI - Farmers in southern Sweden hire illegal workers from Poland for less then a third of what the Swedes are being paid for a similar job, a Swedish newspaper reported Thursday.

The report, in the respected southern Swedish daily Skanska Dagbladet reported the latest case discovered was in the town of Sjobo, a rural community which in 1988 voted overwhelmingly against housing 40 foreign political refugees.

The controversial local referendum provoked a national outrage for stirring racist sentiments.

Sjobo's local Farmer's Union told Skanska Dagbladet that use of illegal Polish labor has been practiced throughout southern Sweden for several years.

''We get calls all the time about illegal and underpaid (foreign) workers, but we're unable to do anything about it,'' union spokeswoman Britt-Inger Nilsson told Skanska Dagbladet. ''Every time our car arrives at a farm, we see the backs of people running over the fields to hide.''

Swedish law stipulates an employer using temporary foreign workers must pay them in accordance with general pay tariffs. But the newspaper reported Polish workers are being paid about $2.30 an hour - less than a third of what a Swede would be paid for a similar job.

Also, both employer and employee need a permit from the national immigration board - a process that can take months.

''If an employer seeks permission in January to hire foreign workers over the summer, it's usually approved in November,'' said Staffan Hallo of Sjobo the public employer office in Sjobo. ''It would be better if the local employer offices could issue permits.''

''It's terrible that people are making money out of the difficult situations of others,'' he said. ''It gives our country a bad name.''

Some 500 Poles have received permission to work in Sweden in 1990. But Hallo said the true number of Polish workers in Sweden was much higher.

JOHANNESBURG (OCT. 31) UPI - The Import-Export Bank of America, which finances foreign trade, is to loan black business in South Africa $85 million to alleviate the effect of sanctions against the country, a coordinator of the deal said Wednesday.

Several U.S. companies, including McDonald's Corp. and Johnson & Johnson, are also planning investments by extending franchises to local black businessmen, Johannesburg business consultant Willie Ramoshaba said through a spokesman.

The spokesman said Ramoshaba coordinated a U.S. trip this month of 65 black South African businessmen and ''various people linked to black business'' to seek finance for local ventures ''to alleviate the effect of anti-apartheid sanctions.''

The funding from the Import-Export Bank of America, or Eximbank, at 10.8

percent interest, is exempt from 1986 U.S. sanctions legislation, the U.S. Consulate in Johannesburg confirmed.

Ramoshaba's spokesman said local black businessmen were ''confident'' President de Klerk's racial reforms, launched February, would undercut the sanctions legislation before the end of 1991.

The visit of the black business group to the United States was eased by a letter in July from black leader Nelson Mandela to Congressmen William Gray, a leading U.S. anti-apartheid legislator, asking him to support the group's mission.

CAIRO, EGYPT (OCT. 31) UPI - A bomb exploded Wednesday at the home of a Moslem fundamentalist sought by police, seriously wounding a woman, a security source said.

The source said the fundamentalist, identified as Sayed Abdelaziz Ahmad escaped when the charge went off and wounded his sister Amal Ahmad in Bani Suwaif, about 65 miles from Cairo.

Authorities in Egypt have arrested hundreds of Moslem fundamentalists in a crackdown spurred by the assassination three weeks ago of Egyptian Speaker of Parliament Rifaat El Mahgoub in Cairo. Twelve of the fundamentalists arrested have been accused of carrying out the assassination.

Sources said Ahmad was a member of the Holy War Islamic extremist group linked to Mahgoub's assassination. The same group was found responsible for the 1981 assassination of former President Anwar Sadat.

#90304u0617 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - Factory orders edged up 0.1 percent in September to $244.51 billion in the weakest showing since June, the Commerce Department said Wednesday.

''Price increases in the petroleum refining industry continued to heavily influence the data,'' the department's Census Bureau reported. ''Excluding petroleum, orders were down 1.1 percent.''

Private economists anticipated an increase of 0.2 percent for last month following a revised advance of 1.7 percent in August and a gain of 1.5 percent in July. In June, factory orders tumbled 1.9 percent.

September orders for durable goods - products made to last three or more years

- fell by about $1.8 billion, or 1.4 percent, in the third decline in the last four months.

''Transportation equipment and electrical machinery each had large declines,'' the Commerce Department said. ''Transportation was down $12.4 billion or 6.8 percent.

''Large declines in motor vehicles and parts and defense and shipbuilding followed significant increases in these categories in the previous month,'' the department said.

But there was a bright spot. Orders for aircraft and parts increased by about $2.1 billion in September - or 20.4 percent - to $12.4 billion, reflecting the huge backup of orders by airlines replacing their aging and less fuel efficient fleets.

In August, orders for durable goods were off 0.9 percent, but increased 2.7 percent in July.

Excluding transportation equipment, total orders were up 1.2 percent in September. Excluding defense hardware, total orders were ahead 0.3 percent.

In the category of non-durable goods, meanwhile, orders advanced 1.6 percent in September following gains of 4.7 percent and 0.2 percent, respectively, the government report said.

Factory shipments declined 0.7 percent in September, following an increase of 3.3 percent in August and a drop of 0.7 percent in July. Unfilled orders crept up 0.1 percent in September after dipping 0.2 percent in August and advancing 0.5 percent in July.

#90304u0620 10/31/1990 ~United Press International

BANGKOK, THAILAND (OCT. 31) UPI - The Vietnamese-backed Cambodian government toughened its demands Wednesday for a role in the leadership of a Supreme National Council in a dispute that has stalled progress towards a political settlement of the 12-year-old Cambodian conflict.

Earlier, Australian Deputy Foreign Minister Michael Costello, fresh from visits to Phnom Penh and Hanoi, met with resistance leader Son Sann as part of a diplomatic shuttle attempting to end the Cambodian impasse.

Official Phnom Penh radio broadcast a letter from government officials to Son Sann responding to his appeal for new meetings to settle differences over the leadership of a Supreme National Council (SNC) that is a key part of a peace plan worked out by the five permanent members of the U.N. Security Council.

The SNC formed last month brings together representatives from all four contending factions in Cambodia. The first SNC meeting broke down over resistance demands that former head of state Prince Norodom Sihanouk be elected chairman.

The Phnom Penh government, however, said Sihanouk could be chairman only if its leader, Prime Minister Hun Sen, were elected vice chairman. The resistance rejected the demand, arguing it would give legitimacy to the government installed by the 1978 Vietnamese invasion.

The letter, signed by Hun Sen and the other five other Phnom Penh representatives on the Council, indicated that Hun Sen would insist on equality with Sihanouk.

It said three options for the leadership of the Council were possible: co-chairmen, rotating co-chairmen, or rotating chairmen, dropping the option of making Hun Sen the vice chairman.

''At no moment have either the five powers or the UN Security Council insisted that this or that person be the SNC chairman,'' it said.

In fact, the members of the Security Council have said they would welcome the election of Sihanouk, a resistance leader who was once king of Cambodia, as the leader of the council, but said the chairmanship should be decided by the Cambodians.

The letter read over the radio pointed to a provision in the U.N. peace plan that said no party should occupy the dominant position in the peace process.

''Therefore, accepting Prince Sihanouk as SNC chairman would be contrary to this principle,'' it said.

''The SNC has not been created to specially appoint a chairman,'' the letter said. ''The principal objective of the SNC is to arrive at a final agreement that would end the civil war, permit the holding of free and democratic elections and, thereby, bring about the peace that our people want so much.''

It suggested that the Council move on to consider the selection of an SNC delegation to the United Nations, a voluntary cease-fire and the end of outside military assistance which were more urgent than the election of a chairman.

In Bangkok, Richard Butler, the Australian ambassador to Thailand, said Costello met with Son San, the leader of one of the three resistance groups, to discuss efforts to resume progress towards peace in Cambodia.

Butler said Costello then flew to Beijing to hold talks with leaders in China, which is the main military supplier of the resistance. The deputy minister

hoped to continue his shuttle around the region with talks in Pyongyang with overall resistance leader Sihanouk, he said.

''These consultations are a continuation of the role that we have been performing as catalysts (for a political settlement) and as an originator of ideas, that have had the purpose of maintaining momentum towards a comprehensive settlement of the Cambodian conflict,'' Butler said.

He acknowledged Costello's talks with the various antagonists ''take place at a time when there has been an acknowledged impasse on certain matters under consideration in the Supreme National Council.''

#90304u0623 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - U.S. personal income increased 0.5 percent in September while personal consumption leaped 1.1 percent over August, the Commerce Department said Wednesday.

The income figure was in line with private forecasts, but the consumption figure was higher than expected and appears to reflect increased costs for oil in the wake of the Iraqi crisis.

In August, personal income edged up 0.2 percent while personal consumption was up 0.5 percent, according to the department's Economics and Statistics Administration.

September's savings rate was 3.5 percent of income, lower than a rate of about 4.1 percent in August, the government said.

A government spokesman said September's 3.5 percent savings rate was the lowest since 3.3 percent in October 1987, and that the 1.1 percent increase in consumption was the largest since a 1.2 percent hike in June.

In July, personal income gained 0.5 percent, personal consumption increased 0.6 percent and the rate of savings was 4.4 percent.

The Commerce Department also reported that disposable personal income, which is income after taxes, increased 0.4 percent in September after inching up 0.2 percent in August. In July, it gained 0.4 percent.

In September, personal savings totaled $4.7 trillion for the month, an increase of $23.8 billion. Personal outlays for the month totaled $3.8 trillion, an increase of $40 billion.

''Wages and salaries increased $17.4 billion in September, compared with an increase of $600 million in August,'' the Commerce Department said. ''Personal tax and non-tax payments increased $6.2 billion in September, compared with an

increase of $3.4 billion in August.''

#90304u0635 10/31/1990 ~United Press International
(OCT. 31) UPI - A small army of volunteers patrolling the streets of Detroit last night did NOT preven dozens of Devil's Night arson fires in scattered sections of the city. Some of the fires destroyed occupied homes. The lower east side, one of Detroit's poorest areas, seemed to be hardest hit by the traditional arson fires before and after Halloween.

Celebration quickly turned to tragedy in the tunnel under the English channel last night. Just 90 minutes after tunnelers from England and France linked up for the first time, eight workers were injured when a small underground train went off its tracks and plowed into them. Four workers were injured seriously.

Police in New York are investigating the mysterious death of a baby in a hospital. Eight-month-old Nigel Bostick was found dead by a nurse Monday at Montefiore Hospital. His throat tube was disconnected and his heart monitor was cut off. Police say the hospital did NOT immediately reported the death. The child was admitted to the hospital in September suffering from breathing problems.

As the strike against the New York Daily News continues, a Daily News truck driver reported this morning that he was followed by two cars on the Long Island Expressway. The truck driver said that one car driver pointed a gun at him and he heard what he thought was a gunshot. Police say there was NO confirmation of any weapon being fired.

The United Auto Workers union has scheduled a meeting of its 100- member Chrysler Bargaining Council for Monday in Detroit. The council must approve a tentative agreement reached yesterday between the union and Chrysler before workers vote on it. Union officials say they reached their goal of a settlement similar to the ones reached with the other two Big Three automakers.

Official Hanoi radio says the Dutch beer company Heineken and the German airline Lufthansa have signed agreements to operate in Vietnam. Heineken is one of the most popular beers in Vietnam. The radio report said that Vietnam Airlines and Lufthansa of Germany have agreed to open an air route from Ho Chi Minh City to Frankfurt.

Sources at the presidential palace in France say President Mitterrand will have a meeting with King Hussein of Jordan Monday to discuss the situation in the Persian Gulf. King Hussein is expected to arrive in France Sunday for a 48-hour working visit.

Security forces are on alert in many parts of north India today after violence that has claimed at least 36 lives since yesterday. The deaths came after

radical Hindus stormed a mosque and tried to begin construction of a Hindu temple. The tense situation is linked to Prime Minister V-P Singh's on-going struggle to keep his coalition government in power.

BAY CITY, MI (OCT. 31) UPI - Thelma Bellows wants her 10 McMillion dollars back.

Bellows claims McDonald's handed her a raw deal when it announced her as the winner of a $10 million prize only to take it back hours later when the restaurant chain learned her daughter worked under the Golden Arches.

Rules in the ''McMillions'' contest prohibit any prizes going to immediate family members of employees of McDonald's, NBC-TV or their franchises.

A lawsuit filed by Bellows Tuesday in Bay County Circuit Court seeks $10 million in damages against McDonald's Corp., NBC-TV, a local McDonald's franchise and a Detroit accounting firm.

Her lawyers base their claim on a Utah Supreme Court decision that found married, adult children who had moved away from their parent's home were not immediate family members as defined in a similar promotional contest.

According to the suit, Bellows and her husband, Charles, went into a McDonald's restaurant in Auburn, near Bay City, on Oct. 11, purchased a meal and got the McMillions ticket.

Their married daughter, Charlene Saunders, was working in the restaurant's drive-up window at the time but did not wait on them and did not give them the ticket, the suit states.

Later that night, the couple learned from an NBC broadcast that they had the winning numbers. After receiving instructions from a McDonald's operator, they drove to Detroit to claim their prize.

According to the suit, Tom Peters, a regional marketing manager for McDonalds, at first told the couple their married daughter's job at McDonald's was no problem. But later the same day, the suit states, he was reversed by higher-ups at the fast-food chain and the prize was withdrawn - after the couple had given several media interviews and posed for photographs.

''We still feel very strongly that we deserve the prize,'' said Charles Bellows. ''We feel we haven't done anything wrong.''

Bellows said the couple even offered to donate a ''substantial portion'' of the prize to the Ronald McDonald House ''but we haven't had any response.''

Charles Rubner, a McDonald's vice president, told the Detroit News on Oct. 13 that ''a misunderstanding occurred'' because contest auditors were not aware thatCharlene Saunders worked at the Auburn franchise.

But Thomas Ludington, a Midland attorney representing Thelma Bellows, said he thinks McDonald's executives were concerned about image problems that could result from awarding the prize to a relative of a McDonald's employee.

MANILA (OCT. 31) UPI - The Philippine peso, under pressure from Manila's serious scarcity of foreign exchange, registered this years sharpest fall Wednesday, depreciating from 25.75 to 28 to the dollar.

A statement by the Central Bank said the new level represented an 8.74 percent drop from the 25.75 value that had prevailed during the last six weeks at the trading floor of the Bankers Association of the Philippines.

CB said the depreciation took place due to the Philippines' widening trade deficit, which amounted to $2.56 billion, and a current account deficit of $1.69 billion during period January to August.

Both deficits were more than 50 percent higher than last year.

Officials were under pressure in recent weeks to devalue the peso to encourage more exports and larger remittances of overseas contract workers.

The peso's fall in value by 2.25 pesos was the biggest single drop recorded this year. In August, the peso registered a one-peso decline.

CB also said that at the new rate of 28 pesos, the peso has depreciated by a cumulative amount of 27.39 percent since February 1986 when the exchange rate was 21.979 pesos to the dollar. The peso suffered a much bigger depreciation of 107.52 percent between 1983 and 1985.

There were speculations the peso would further drop this year as a result of higher crude prices triggered by the Gulf crisis. The Philippines, heavily dependent on oil imports, increased local oil prices by 29 percent last month.

#90304u0659 10/31/1990 ~United Press International

BUDAPEST, HUNGARY (OCT. 31) UPI - A senior Soviet military official Wednesday denied a link between a recent cutback in oil supplies to Hungary and a dispute over the financial arrangements for the withdrawal of Red Army troops.

But Col. Anatoly Kirilov, deputy commander of the Soviet Southern Army Group, conceded the two governments have made little progress on resolving the dispute, which centers around Moscow's demands for payments for Soviet-built barracks and equipment the troops will leave behind.

The Soviets have put in a claim for $800 million as compensation for lost property. Hungary, however, is refusing to pay anything, saying the barracks are in poor condition and not suitable for civilian use.

The Hungarians also maintain that Soviet troops caused millions of dollars worth of damage to the environment in the past few decades.

Kirilov told a news conference the financial dispute had no bearing on Moscow's decision earlier in the fall to unilaterally reduce shipments of Soviet oil contracted for delivery to Hungary.

The cutback forced Hungary to use precious hard-currency reserves to purchase oil on the world market. It also contributed to last week's sharp rise in gasoline prices, which triggered three days of nationwide demonstrations by taxi and truck drivers, who blocked border crossings and major transit routes.

Relations between Moscow and Budapest have deteriorated in recent months following the government's announcement that it plans to withdraw from the Warsaw Pact. Earlier this year the two countries signed an accord calling for the withdrawal of all Soviet troops from Hungary by the middle of next year.

In another development in Hungary, Budapest's municipal assembly named a prominent opposition leader Wednesday as the city's first democratically elected mayor in more than 40 years.

Mayor Gabor Demszky is a member of the executive committee of the liberal Alliance of Free Democrats, which gained considerable ground on the Democratic Forum, the senior partner in the conservative coalition government, in last month's nationwide municipal elections.

The polls were the first free local elections since the Communists took power in 1948.

In an acceptance speech, Demszky cited the taxi and truck driver protests as evidence that Hungarians were dissatisfied with the current leadership.

NEW YORK (OCT. 31) UPI - An original copy of the 13th Amendment to the Constitution abolishing slavery, signed by Abraham Lincoln, was sold at auction for $220,000 and will go on tour around the United States and Eastern Europe, it was announced Wednesday.

The 1865 document, also signed by 148 congressmen and other government officials, was purchased Tuesday at Sotheby's auction gallery by New Jersey dealer Seth Todd Kaller on behalf of a New York collector he described as a Wall Street investment banker who collects Lincoln items.

The 13th Amendment was a followup to the Emancipation Proclamation. Lincoln did not live to see it ratified but he signed the handwritten copy sold at Sotheby's as a souvernir of the kind used for fund-raising or for the collections of individual members of Congress.

The $220,000 purchase price was the highest ever paid for a copy of the amendment signed by Lincoln, of which there are seven others.

Kaller said the document will go on national tour as part of a Freedom and Democracy Exhibit after being exhibited at the New-York Historical Society in New York and the State Museum and Library in Albany in conjunction with the publication of Gov. Mario Cuomo's book, ''Lincoln and Democracy.''

The exhibit schedule includes visits to Eastern Europe in 1991 and 1992. The document will be exhibited alongside an original copy of the Emancipation Proclamation signed by Lincoln.

WASHINGTON (OCT. 31) UPI - A Washington Post reporter trapped in Kuwait after Iraq's invasion was among four women named Wednesday to receive a new journalism award for showing bravery and dedication while covering hazardous events.

The 1990 Courage in Journalism Award was created by the International Women's Media Foundation, a non-profit organization, and includes $5,000 for each recipient.

Washington Post reporter Caryle Murphy, the only U.S. reporter to receive the award, remained in hiding for 26 days after Iraq invaded Kuwait Aug. 2, sending dispatches to the newspaper by using friends able to leave the country.

The other award winners were Maria Jimena Duzan of Colombia, Florica Ichim of Romania and Lilyanne Pierre Paul of Haiti.

Men also are eligible for the award even though it went to four women this year, a spokeswoman said.

Murphy's stories on post-invasion Kuwait City ran on the Post's front page without her byline, a move designed to protect her from possible reprisals by Iraqi troops. She was the only American reporter in Kuwait after the invasion.

In its citation, the foundation said Murphy ''astonished the world with her courageous reporting from Kuwait, where she hid for 26 days in August 1990 after Saddam Hussein invaded that country.''

The foundation said Duzan frequently faced danger while covering drug wars in her country for the newspaper Espectador. Ichim, a key reporter at Romania's largest opposition newspaper, Romania Libera, has ''displayed courage'' since her career began in the late 1960s, the group said.

Pierre Paul, correspondent for Radio Haiti Inter since 1977, has become a

major and outspoken critic of the Duvalier regime and subsequent Haitian governments, the foundation said.

The four women will receive their awards at a dinner Nov. 11 at the National Museum of Women in the Arts in Washington.

The International Women's Media Foundation, set up last year, is dedicated to strenghtening press freedoms and improving professional opportunities for women in communications.

MARIETTA, Ohio (OCT. 31) UPI - Cable television pioneer Ted Turner warned Tuesday the nation's budget deficit could result in the worst economic depression in the country's history.

''I would sure hope that the leadership of this country would stand up and say 'We are mad as hell; we're just not going to take it anymore. We are just not going to let our futures go down the drain,''' he said.

Turner, 51, chairman of the board and president of Turner Broadcasting System, addressed about 400 business leaders attending a Tuesday meeting of the Economic Round Table of the Mid-Ohio Valley.

He said the nation's debt could collapse like a house of cards and result in a recession, leading to a depression.

Turner was critical of the management of the economy by both Ronald Reagan and George Bush.

''I'd love to see a way you can create something out of nothing,'' he said. ''I have done it, but I don't think you can do it by spending someone else's money and spending more than you've got coming in,'' Turner said.

Turner said he has no aspirations to become a politician.

''I think I can make a greater contribution in global communications than I could with a political career in one country,'' he said. ''I want to be free.''

''Politics, particularly in this country, but most everywhere, is just one big series of compromises.'' said Turner, who was awarded the first Bernhard P. McDonough Award for Excellence in Leadership during his visit. The late McDonough was a self-made industrialist in nearby Parkersburg, W.Va.

Turner, who organized the Goodwill Games, also said he hopes the international athletic event will continue.

''The relationship between the superpowers will need a lot of contact,'' said Turner, who credited the games with helping to thaw U.S.-Soviet relations.

#90304u0710 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - Declining home prices and rising family income boosted housing affordability to a two-year high in September, the National Association of Realtors reported Wednesday.

The association's housing affordability index, which measures the ability of the average family to buy a home, reached 110.9 in September, meaning that the family would have more than enough income needed to qualify for conventional financing.

The index stood at 107.5 percent in August, the association said. The national median family income rose to $35,239 last month from $35,125, while the median price of a home dropped to $94,300 from $97,100. The income needed to qualify for a conventional mortgage dropped to $31,778 last month from $32,666 in August.

Changes in median home prices, median family income and the average mortgage rate between August and September caused a $19 decline in September's average monthly mortgage payment of $662.

Because the national median income in September was greater than the qualifying income, a family earning the median income could purchase a home priced at $104,578, or $10,278 higher than September's median price, and the highest price on record that the median family could afford.

Norman Flynn, the association's president, said September's affordability index indicates that the economic slowdown gripping much of the nation may not be as severe as first thought.

"Although some buyers seem to be putting their home buying plans on hold due to the slow down of the economy, the housing affordability index indicates that conditions are better than people think," Flynn said.

Flynn said fears of an "imminent housing crash" are unfounded, but added that the association is predicting a "mild" recession to last through the second quarter of next year.

"There is no reason for people to feel like the best place to put their money is under their mattress," he said. "Homeownership remains a solid investment with innumerable social benefits attached." Still, Flynn noted, the lure of more affordable housing has not been strong enough to pull buyers into the market.

Tuesday, the Commerce Department reported that sales of new single-family homes slipped six percent in September from August and slid a sharp 21 percent from year-earlier levels. So far this year, new home sales are down 15 percent.

According to the association's index, a family earning $20,000 would have enough income to qualify for a $59,300 house with a $47,400 loan. A family earning $30,000 would qualify for an $88,900 house with a $71,100 loan and a family earning $40,000 would have sufficient income to qualify for a $118,500 home with a $94,800 loan. Families earning $50,000 would have enough income to qualify for a $148,100 home using a $118,500 loan.

(OCT. 31) UPI - Dozens of fires lit up the night sky in Detroit last night as the traditional Devil's night arson spree hit once again. There were NO reports of deaths or serious injuries, but several families were left homeless when flames spread from abandoned buildings to occupied houses. The fires occurred despite the presence of thousands of volunteers on city streets.

Egyptian President Hosni Mubarak doesN'T think much of Soviet President Gorbachev's call for an inter-Arab solution to the Persian Gulf crisis. Gorbachev told reporters in France this week that Arabs should come up with their own solution to the problem. But Mubarak said any new Arab meeting without a specific agenda would become a summit of insults.

The Drug Enforcement Administration reportedly is investigating whether the December 1988 bombing of a Pan American World Airways jumbo jet over Scotland was linked to one of the agency's undercover operations. A broadcast report said the government is looking into an allegation that the bomb that killed 270 people might have been placed in the baggage of a Lebanese American acting as a D-E-A courier.

A search continues this morning in Louisiana's Barataria Bay for two workers missing after a gas well explosion. Three other workers were killed and a fourth was injured. Coast Guard vessels and helicopters recovered three bodies in the area. A Coast Guard spokesman said the crew was capping an abandoned gas well in the bay about 15 miles north of Grand Isle when the explosion occurred last night.

The Delta rocket program added to its history of successes last night. A Delta rocket lifted off without a hitch, then boosted a 90 Million-dollar mobile communications satellite into orbit. It was the 200th flight in the booster program's 30-year history. The flawless mission was the 22nd success in a row for rocket-builder McDonnell Douglas Space Systems of Huntington Beach, California.

A prominent Shanghai writer and government critic has been released after

being jailed for more than one year for links to the 1989 pro- democracy movement in China. 72-year-old Wang Ruowang said today he was NOT mistreated and spent most of his confinement reading. Family members said he was freed after acknowledging ''mistakes,'' but in a telephone conversation, Wang himself refused to confirm that. .

#90304u0747 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - No longer will a headstone mark the grave of an American veteran when taps sound for him one last time - unless his family or friends pay for it.

The nation for which he fought, and sometimes bled, in World War I, World War II, Korea and Vietnam won't contribute anything.

Buried deep in the deficit-cutting legislation that Congress passed before it adjourned was the elimination of the $85 allowance for a headstone or marker for the graves of veterans not buried in a national cemetery.

By eliminating the headstone allowance and limiting burial plot allowance, the government will save $30 million in fiscal 1991 and $166 million over the next five years.

This new frugality on behalf of the dead veteran is only a portion of what Congress did and did not do in the closing hours of the session for America's former servicemen and servicewomen.

As part of the deficit-cutting package, Congress ordered cutbacks in numerous programs for veterans that will save $621 million the first year and $3.7 billion over five years.

If that were not enough, Congress then failed to approve a veterans' benefits and health care package, denying 2.1 million disabled veterans a 5.4 percent cost-of-living increase.

It was the first time disabled veterans did not get an increase when it was given Social Security recipients.

Taken together, passage of the deficit-reduction bill and failure to pass the benefits bill was tantamount to a carpet bombing of the veterans.

Dennis Cullinan, speaking for the Veterans of Foreign Wars, said that his organization did not like the cuts in the deficit-reduction program, adding, ''Veterans have done their part through the years in the attempt to balance the budget.''

He acknowledged, however, that those cuts were better than the ''total

devastation'' that would have struck veterans if across-the-board cuts had been imposed. That, he said, would have totaled $1.3 billion in fiscal 1991 alone.

Cullinan said the VFW was ''absolutely outraged'' at Congress's failure to pass the benefits bill and called it ''a slap in the face for the veterans of the nation.''

''Since Congress had time to vote themselves a pay raise, put money into S&L bailout and COLAs for Social Security recipients, it is the worst kind of neglect to fail to pass COLAs for veterans through last minute maneuverings,'' Cullinen said.

The benefits bill was blocked in a bitter dispute over provisions in the bill dealing with exposure to radiation and the defoliant Agent Orange and the types of cancer they are believed to cause.

But, in addition to losing the cost-of-living increase, the veterans were denied a lot more when the legislation was killed - in the areas of expanded health care, education and employment.

"It is tragic that the admant refusal of such a very, very few has frustrated the will of both House on the Agent Orange issue - along with so many other provisions - and prevented the enactment of this very valuable legislation,'' said Sen. Alan Cranston, D-Calif., chairman of the Senate Veterans Committee.

Congress can attempt to enact the benefit bill next year - and certainly will try - but there is nothing that can be done about the sweeping cuts in the deficit-reduction package.

One of those provisions ''rounds down'' to the next lowest dollar the 5.4 percent COLAs - should Congress ever approve them - and would delay paying them for one month, netting an estimated $91 million in savings over five years.

Medical expenses for veterans, except for those with service- connected disabilities who have incomes of less than $17,214, will increase through first-ever charges of $10 a day in hospitals and $5 a day in nursing homes and a new $2 monthly fee for out-patient drugs.

The package suspends compensation for mentally incompetent veterans if they have estates of $25,000 until the estate drops to $10,000 and cuts off benefits for any secondary effects from alcohol or drug abuse.

The bill eliminates the presumption that a disabled veteran is totally disabled when he reaches 65; and cuts to $90 a month pensions to veterans in nursing homes who get help through Medicaid, the health insurance for the poor.

In housing, the fee for VA housing loans will increase from 1.37 percent to 1.87 percent for one year and, in jobs, vocational rehabilitation will be limited to veterans with disability ratings of 20 percent or more.

And if the widow of the veteran who lies in an unmarked grave remarries and that marriage ends, she would be denied a resumption of survivor's benefits.

#90304u0750 10/31/1990 ~United Press International

MIAMI (OCT. 31) UPI - Two men were rescued after drifting for at least 25 days in the Atlantic Ocean aboard their disabled 25-foot fishing boat, the Coast Guard said Wednesday.

Medics aboard the Coast Guard cutter Escabana were treating the younger man, Claude Ballu, 24, for severe dehydration and malnutrition. His weight dropped from about 150 pounds to about 95 pounds during the ordeal, Petty Officer Joe Dye said.

''He was given food and sugared liquid and his condition is now stable,'' Dye said.

His uncle, Irimi Ballu, 57, was in better condition and insisted on remaining aboard the disabled boat, which was under tow by the Escabana.

''They gave him food and water. He was alert and able to tell them what happened,'' Dye said.

The men, both from the French Caribbean island of Martinique, left the capital city of Fort de France aboard their 25-foot boat, Ruth, on a fishing trip. They were reported overdue Oct. 4, Dye said.

''Their boat became disabled sometime around Oct. 4 and the men have been adrift ever since,'' Dye said.

A passing sailboat, the Sasanac, picked them up Tuesday about 300 miles northeast of San Juan. They were transferred to the Escabana, and were to be transferred later to the Coast Guard cutter Vashon for the remainder of the trip to San Juan.

The men were expected to arrive in Puerto Rico Thursday, Dye said.

There was no word how they obtained drinking water or what they ate during the ordeal, Dye said.

''They both speak French and there was a little bit of a communication problem '' he said.

#90304u0770 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - Three months after Iraq's takeover of Kuwait, U.S. mainline churches are forging a consensus on American Middle East policy that could soon put them at odds with President Bush and the administration.

At the heart of the churches' stand is an opposition to any unilateral military action by the United States and a demand that American policy exhaust all possible peaceful solutions to the conflict.

The mainline church stances could be critical for Bush in maintaining public support for his gulf policies. In the late 1960s and early 1970s, church opposition to the war in Vietnam helped make the anti-war movement respectable and provided thousands of middle-aged, middle-class demonstrators at anti-war protests.

Most recently, the church council of the middle-of-the-road 5.3 million-member Evangelical Lutheran Church in America adopted a lengthy two-page resolution on the crisis calling on the U.S. government to ''reflect the consensus within the international community that a peaceful resolution of the conflict be sought and that international law be enforced.''

The ELCA is the nation's fourth largest Protestant religious bodies and draws much of its strength from rural and mid-America.

Its statement on the crisis, also called for a ''just resolution of all conflicts in the region'' - a reference to the Israeli-Palestinian problem - and an end to ''transfers and sales of destabilizing military armaments to all of the nations of the Middle East.'' It closely tracks recent statements by leaders of the Episcopal Church and the Methodist Church as well as by coalitions of church groups.

In particular, church groups are pressing to bring the military force arrayed against Iraq under United Nations control.

The Lutheran resolution, for example, urged that the United States ''negotiate

with the United Nations with the goal of bringing the military forces in the region under United Nations authority and control as soon as feasible.''

That echoes a letter sent to selected members of Congress by 14 church groups organized as Churches for Middle East Peace which said ''U.S. forces have served their stated purpose and should be reduced. Forces designed as a deterrent to Iraq should at the earliest possible date come under full U.N. authority and control.''

In addition to warning against U.S. unilateral military or diplomatic actions and urging continued U.N. and Arab efforts to negotiate a settlment, elements of the church consensus also include:

-A universal condemnation of Iraq for its Aug. 2 invasion of Kuwait and a call for it to return to its pre-invasion borders.

-A linking of efforts to solve the gulf crisis with the Israeli- Palestinian problem. ''We ask our people and the government of the United States to increase their attention to the peace process involving Palestinians and Israelis in recognition that no peace is possible in the Middle East without security for the Palestinian people,'' the House of Bishops of the Episcopal Church said.

-Opposition to including food, medicine and other humanitarian goods for the Iraqi and Kuwaiti people in the economic embargo sanctioned by the United Nations. ''U.S. inistence on including food and medicine in the embargo will strengthen the prvailing opinion within the Arab world that the United States is concerned not for Arab people's lives but only with oil,'' the Churches for Middle East Peace said.

-A call for a comprehensive U.S. energy policy that reduce U.S. dependence on foreign fuel supplies. The ELCA statement called for the United States to ''develop and abide by a sound energy policy in the very near future'' to reduce its dependence on oil.

''For what reason has our nation unleashed the greatest military force since the Vietnam War,'' Edmond Browning, presiding bishop of the Episcopal Church asked in an Oct. 5 statement. ''Are we not justified in suspecting that the reason is primarily economic, having to do with unimpeded access to oil?

''Let us examine our national priorities and our addiction to unnecessary consumption,'' Browning said.

NEW YORK (OCT. 31) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 81.00-86.20 c- lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 131.70 c-lb.

Lead, common, U.S. primary producers 41.00-52.00 c-lb.; U.S. non- primary (secondary) producers 45.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $210.00-$240.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $102.00-$107.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $421.50-$459.00; dealer- approx., $437.00-$460.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $111.83 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 295.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 80.00 c-lb.

#90304u0778 10/31/1990 ~United Press International

ABIDJAN, IVORY COAST (OCT. 31) UPI - Liberian rebels led by Charles Taylor pleaded Wednesday for a cease-fire in the 10-month-old civil war, but contended the five-nation peacekeeping force has compromised its neutrality by becoming a party to the revolution.

Taylor's chief spokesman and defense minister, Tom Woweiyu, said the National Patriotic Front of Liberia is prepared to stop shooting if the five-nation Economic Community of West African States, a peacekeeping force in Liberia, halts its advance against the NPFL.

''We will cease firing within 10 minutes if the ECOWAS force agrees to cease-fire as well,'' Woweiyu said Wednesday in Abidjan.

But he rejected the conditions laid down by ECOWAS that led to the failure of peace talks in the Gambian capital of Banjul last Thursday and to the cancellation of talks in Bamako, Mali, due to open Wednesday.

The Banjul ceasefire agreement, which was accepted by another rebel faction led by Prince Johnson, would have given ECOWAS the right to post its soldiers throughout Liberia to monitor the truce.

Taylor refused to accept this because his forces control up to 90 per cent of the country. ''The conditionalities of the agreement absorb the sovereignty of Liberia,'' said Woweiyu.

Woweiyu claimed there are countries in the region that do not want a settlement, but he did not identify them.

''Why did ECOWAS send soldiers if talking is the procedure?'' NPFL foreign

affairs spokesman Ernest Eastman said at the Abidjan meeting Wedensday. The NPFL contends ECOWAS cannot adopt a monitoring role because it has become a part of the conflict following its attacks on Taylor's forces in recent weeks. Taylor contends ECOWAS troops should be party to the cease fire.

Woweiyu said: ''Discussion with all the ECOWAS countries is fine, except those fighting in Liberia. We will be prepared to convene a meeting with the ECOWAS heads of state that includes all the member countries, so that ECOWAS is diluted.''

The refusal of the NPFL to accept the mediating role of ECOWAS while its forces are fighting in Liberia led to the cancellation of the meeting in Bali that was to convene Wednesday.

''The content of the ECOWAS force and their behaviour does not make them in any way neutral,'' said Woweiyu.

''We should stop talking to this mediation group because they are not mediating. We are not being intransigent. A ceasefire should be the first thing, then we can continue to talk. This mediation group is the same group that we are fighting and we can't expect anything out of it,'' he said.

The mediation committee is composed of Nigeria, Mali, Togo, Gambia and Ghana. The meetings are also attended by Guinea and Sierra Leone, two of the countries most affected by refugees from the war. The Bamako meeting was to be attended by heads of state from Gambia, Mali, Nigeria and Ghana.

Woweiyu said Taylor is expected to attend a full meeting of ECOWAS heads of state in Bamako on Nov. 27.

The revolution began in December 1989, but did not come to light until January when Taylor led a coup against President Samuel Doe's government. Doe was subsequently killed but not before Prince Johnson deserted Taylor's rebels and set up his own faction.

#90304u0793 10/31/1990 ~United Press International

DHAKA, BANGLADESH (OCT. 31) UPI - The government Wednesday night imposed an indefinite curfew on older sections of the city amid mounting tension over the storming of a Moslem mosque by Hindus in Ayodhya, India.

An announcement read over radio and television urged people residing in predominantly Hindu neighborhoods of Dhaka to stay at home and not leave without without written permission from the authorities.

About 84 percent of the population of Bangladesh are Moslems, while Hindus constitute about 12 percent.

The curfew was ordered after a attempt by protesters to set fire to Hindu temples in old sections of Dhaka. Police foiled the attempts, but the demonstrators seized cameras of newsmen outside on temple, witnesses said.

President Hussain Muhammad Ershad and religious leaders in separate statements appealed to the public to maintain order. The government Wednesday banned a popular Bengali language newspaper for 15 days, for publishing allegedly provocative news accounts and editorials on the mosque incidents.

Maulana Fazlul haq Amini, chief of the Islamic Fundamentalist party Khelafat Andolan, protested a recent attack on the Babri mosque in India, but warned that any harm to Hindus in Bangladesh or damage to their property is not permissible under Islam.

He called on his audience of about 10,000 followers in front of the National Press Club to maintain calm.

Another curfew clamped early Wednesday on Chittagong city, about 215 miles southeast of Dhaka, was withdrawn later in the day as the situation returned to normal, officials said.

#90304u0798 10/31/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (OCT. 31) UPI - The government lifted sweeping emergency regulations in 11 black townships around Johannesburg Wednesday, citing a sharp drop in black factional fighting which prompted the measures in late August.

But Law and Order Minister Adriaan Vlok said the special rules, giving police wide powers of search and arrest and imposed in 27 townships on Aug. 24, would be maintained in 16 other areas because they were still experiencing sporadic violence.

The violence left at least 800 people dead during August and September.

At the same time as Vlok's announcement, 31 unidentified victims of the violence were being buried in a mass but low-key ceremony in the nation's largest black township of Soweto.

The move also came as a police statement said a senior member of the exclusively Zulu Inkatha movement was gunned down in broad daylight Tuesday in the center of the troubled Natal province city of Pietermaritzburg.

President Frederik de Klerk lifted a 52-month-old state of emergency in Natal on Oct. 18, also crediting a tailoff in violence. Police said Wednesday the latest killing was ''part of this region's small and regular black-on-black

outbursts.''

Vlok, announcing the lifting of special measures in the 11 Transvaal townships said, ''A large measure of calm'' had returned.

''This has allowed us to lift the regulations stipulating them unrest areas,'' he said. He said of the other townships around Johannesburg affected by the rules, including Soweto, ''There is still sporadic violence.''

''It is of cardinal importance that law and order be maintained to make peaceful change in the country possible,'' Vlok added, apparently referring to suggestions from the African National Congress that the strife threatened its fledgling talks with the government on ending white minority rule.

Pretoria imposed the emergency measures after more than two weeks of factional fighting killed some 500 people. But the battles continued and the major violence was only quelled after another month and 300 deaths by the introduction of the military-style Operation Iron Fist.

Most Iron Fist measures, including roadblocks, heavily armed army and police patrols and cordoning off flashpoint areas, are still in effect.

ANC Deputy President Nelson Mandela called the emergency regulations and Iron Fist rules ''totally useless'' and said they did not address the root causes of the problem.

Government officials characterized the violence chiefly as tribal- based, between Inkatha and the multi-tribal support of the ANC. But Mandela said a shadowy ''third force,'' possibly backed by rightist security force elements, was fomenting the fighting.

The ANC also accused Inkatha leader Mangosuthu Buthelezi of exporting the violence from the Zulu power-base of Natal, where fighting between Inkatha and the ANC has killed as many as 4,000 people since 1987.

#90304u0801 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - Constance and Howard Clery transformed grief over their daughter's brutal murder in her Lehigh University dormitory room into a bittersweet victory in their determined fight for strengthened campus security.

President Bush will soon sign legislation, drafted at the Clery's urging, requiring all colleges and universities receiving federal aid to provide campus crime statistics to students and campus employees annually and to prospective students upon request.

''It's a great relief. Now we know our daughter's life was not in vain and

that her tragedy is sparing other victims in this country of the terrible agony that never ends when you are a victim of mental or physical violence,'' Constance Clery said in a telephone interview from Security on Campus Inc. in Gulph Mills, Pa., near Philadelphia.

The Clerys organized the group to help victims cope with college campus crime after their daughter, Jeanne, was robbed, raped, slashed and suffocated in her dorm room April 5, 1986, by a fellow student.

The couple discovered during the murder trial the ''horrifying'' extent of violent crime occurring on seemingly quiet campuses across the country.

The group has been successful in getting 11 states to pass laws requiring colleges and universities in the state to report crime statistics.

The bill that just cleared Congress will require all colleges and universities receiving federal assistance to tally statistics on murder, rape, robbery, aggravated assault, burglary, motor vehicle theft, liquor law violations, drug abuse violations and weapons possession violations. No tally, no federal aid. The Education Department will compile the information.

The bill also requires reporting of graduation rates, the rate at which graduates enter the labor market in fields for which they were trained, and the school's revenue from and spending for athletic activities.

Rep. William Goodling, R-Pa., chief sponsor of the bill, said he hopes the crime information will help students make wise choices to avoid becoming a statistic.

''We hope this will drive colleges and universities into providing better security, because now the statistics will be out in the open and there will be no place to hide,'' he said.

Clery said if Jeanne had known about the prevalence of crime at her school, ''she would not have left her door open. ... These colleges that look safe are not safe, and it doesn't matter if it is a surburban, rural or urban campus.''

But some educational associations expressed reservations about the bill's eventual impact.

Gay Clyburn, spokeswoman for the National Association of State Colleges and Universities, said the data could be misleading, contending a reported crime might have occurred near or off campus.

''It may give people an inaccurate view of the safety on a campus,'' Clyburn said.

And Victor Milani, a criminal law professor at Bay Path College near

Springfield, Mass., who doubles as the Brimfield, Mass., police chief, has spoken out vociferously against the measure. He thinks it may discourage schools from prosecuting minor crimes to keep their public image intact.

While campus crime has remained fairly stable during the last three years, officials at the National Campus Violence Prevention Center at Towson State University in Baltimore are expecting to report increases when current data is compiled, especially in bias-related violence against homosexuals, women, Jews and other minorities.

The center's director, Jan Sherrill, attributed the anticipated increase to greater reporting of crimes as well as an actual crime surge.

Rape between people who know each other, often called ''date rape,'' appears to be on the upswing as well.

''With greater reporting of this type of crime, there is a rising awareness amongst men, however slight, that there are different kinds of relationships, and 'no' means 'no,''' said David Stormer, president of the International Association of Campus Law Enforcement Administrators. He is Penn State University's assistant vice president for safety.

In the 1989-90 school year at Penn State, Stormer said, there were seven reported rapes, six of which were between acquaintances. Three were prosecuted netting one conviction.

Since September 1990, 13 cases of date rape at the University of Wisconsin-Madison were reported to counseling services or the dean of students. No criminal complaints were filed.

''This is no big increase over last year or the year before. So sexual assault-wise on campus property, it's a pretty safe place to be,'' said Ralph Hanson, the Madison campus police chief.

Constance Clery wants campuses to be more than ''pretty safe'' and feels confident the new law will help.

''I just know that Jeanne's death now has helped others to live. So I'm grateful,'' she said.

#90304u0808 10/31/1990 ~United Press International

NEW YORK (OCT. 31) UPI - The publisher of Random House who reportedly gave Donald Trump a $2 million advance on his foundering second book has been replaced, but an executive denied Wednesday that the Trump book had anything to do with it.

"Anybody who thinks I would have made the decision to replace Joni Evans on the basis of the Trump book doesn't know anything about publishing, said Alberto Vitale, chief executive of Random House, the nation's largest publisher of general interest books. "Her record is sterling."

Vitale said Evans, 48, would become publisher of books under her own label at Random House and would be president of the division. She has been replaced as the firm's publisher by Harold Evans, no relation, editor-in-chief of Conde Nast Traveler, former editor of the Times of London, and husband of Vanity Fair Editor Tina Brown.

During 1990, Joni Evans' third year as Random House publisher, the firm had a record 18 best sellers including books by Dr. Seuss, Kevin Phillips and William Styron. It also published Trump's "Surviving at the Top," which hit the best seller lists for three weeks then lost its sales impetus and the chance to earn the $2 million paid Trump in advance.

Joni Evans came to Random House in 1967 after her divorce from Richard Snyder, chairman of Simon & Schuster, a competing publishing firm. She had been trade book publisher at that firm. Random House is owned by Advance Publications, an S.I. Newhouse family firm which also owns Knopf, Ballantine, Pantheon and Crown book firms and Conde Nast magazines.

WASHINGTON (OCT. 31) UPI - President Bush said Wednesday that he does not feel pushed toward military action in the Persian Gulf. Between the lines, however, lay growing concern for the plight of American hostages that could force his hand.

In a burst of sharp words that stopped short of direct threats, Bush vented anger at Saddam Hussein for the treatment of American diplomats holed up in the U.S. Embassy in Kuwait City, cut off from food, water and other supplies.

And while he insisted hostages will not be used as ''a pretext'' for military action and said their fate will not drive U.S. policy, he made clear they could become an even larger factor in determining his future actions.

''The American flag is flying over the Kuwaiti embassy and our people are being starved inside by a brutal dictator,'' he said. ''And do you think I'm concerned about it? You're darned right I am. And what I'm going to do about it? Let's just wait and see, because I have had it with that kind of treatment of Americans and I know others feel that way.''

Speaking to reporters before and after a campaign appearance in suburban Virginia, Bush bristled at ''indecent'' suggestions his administration has turned hawkish toward Iraq in the last week in a bid to bolster his sagging

popularity and GOP chances in next week's elections.

Branding such allegations ''the ultimate of cynicism,'' he said, ''I don't think even the most cynical would ever suggest that a president would play politics with the lives of American kids halfway around the world.''

Vice President Dan Quayle later chimed in that it was ''just totally erroneous'' to think Bush was racheting up his rhetoric on the gulf crisis for domestic political reasons.

In fact, there has been little overt political sniping over the gulf crisis in recent days. Only Tuesday, Bush received a somewhat edgy vote of bipartisan confidence from congressional leaders, despite concern by some that the hostages not provoke the United States into a military response before all other forms of pressure on Saddam have failed.

Bush said there were ''varying estimates'' of how long the Americans in the embassy in Kuwait City can hold out and added there was no ''drop-dead date or pullout date'' for closing the compound, which has remained occupied in defiance of Iraq's claim of annexation.

On the strength of a U.N. Security Council resolution earlier this week, demanding that Iraq permit the resupply of embassies in Kuwait City, Bush said U.S. officials were ''looking at every possibility'' for doing so and advised Saddam ''think very carefully about what he's doing there.''

Asked whether a refusal by Saddam to permit the resupply of the embassy would constitute the kind of provocation that could lead to war, Bush said, ''It would not be good for me to signal what I might or might not do.''

''We're still moving forces and we have a significant coalition of armed forces on the ground and we'll just have to wait and see,'' he said when asked where events might lead. ''In the meantime, we will send a steady, strong message to Saddam Hussein that we are not going to tolerate this aggression.''

Over the last week, the administration tone has turned hawkish in part to bring the gulf crisis back into focus after weeks of domestic political warfare over the budget and to dispel any doubts in Baghdad about the firmness of U.S. resolve.

Talk of deals and diplomatic solutions prompted Bush to reaffirm his stand that there will be no compromise from the fundamental U.S. demand that Iraq withdraw from Kuwait before any of its political, economic or territorial grievances are addressed.

Bush denied losing patience with the economic sanctions he hoped to see force a retreat by Saddam, but conceded they ''haven't driven the man to do what he should have done, which is to get out of Kuwait and reverse this aggression.''

While insisting he has not ''been thinking in terms of timelines,'' he said his willingness to ''wait and see'' whether those measures work was in effect only ''at this juncture.''

-30- 4352

#90304u0873 10/31/1990 ~United Press International

(OCT. 31) UPI - President Bush vented his anger against Saddam Hussein today at a campaign stop in Virginia for Representative Stan Paris. A visibly upset Bush said he deplored the treatment of U-S hostages and diplomats who have been trapped inside the American Embassy in Kuwait City since Iraq invaded the emirate on August 2nd. Iraq has cut off food, water and power to the U-S diplomatic compound.

Bush told reporters that he will NOT let the fate of the hostages drive his foreign policy, but adds- ''I have had it with that kind of treatment of Americans, and I know others feel that way.'' Bush accused the Iraqi dictator of trying to starve the Americans. And he said he is sending Saddam a steady, strong message ''that we are NOT going to tolerate this aggression.''

The Commerce Department says U-S personal income climbed one-half of one percent in September, but personal consumption jumped one-point-one percent, an apparent reflection of increased costs for oil. The income increase is line with private predictions, but the consumption figure was higher because of the Persian Gulf crisis.

The government also reported this morning that factory orders increased a slim one-tenth of one percent last month... about one-half of what private economists had expected. Factory orders climbed a revised one-point-seven percent in August, and the reduced growth rate in September is seen as another indicator of the effects of the Gulf crisis and its increased oil prices.

Residents of Detroit's lower east side woke up this morning to see what damage occurred during dozens of arson fires that lit up the sky last night. Some of the homes destroyed were occupied, leaving several families homeless. This is all part of what has become an UNwelcome tradition in Detroit, six years of so-called ''Devil's Night'' fires during Halloween. More than 35-thousand volunteers patrolled Detroit streets last night.

Yet another cease-fire has been declared for Lebanon... this one by rival Shiite militias who have decided to end three years of bloody fighting that claimed more than one-thousand lives. The pro- Iranian Hezbollah, or party of God, and the Syrian- backed Amal militia say they will exchange prisoners. Representatives from both sides plan to meet today to discuss how to evacuate all of the wounded from the battle areas.

Some members of the jury that convicted Washington Mayor Marion Barry came

into the courtroom at the beginning with plans to acquit him. That's the charge leveled by the person who presided over the trial, federal Judge Thomas Jackson. Jackson lashed out at jury members yesterday in his first public comments on the trial. Barry got a six- month sentence after being found guilty of misdemeanor cocaine possession. Jackson says he believes four jurors planned to acquit Barry NO matter what evidence was presented.

The South African government today lifted sweeping emergency regulations in 11 black townships around Johannesburg, citing a sharp drop in the black factional violence that led to the measures in August. But the nation's law and order minister says the regulations giving police wide powers of search and arrest will remain in effect in 16 affected areas. At about the same time, authorities reported the assassination of a senior member of the Zulu Inkatha movement in Natal Province.

Tunnelers digging under the English Channel from France and Britain linked up yesterday for the first time. A French digging machine punched a two-inch hole between the two shafts of a service tunnel, climaxing three years of construction. 90 minutes later... eight workers were injured in an accident on the French side when a small locomotive derailed and rammed a number of cars. Six workers were hospitalized, four in critical condition.

#90304u0875 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - Scientists have pinpointed a rare, genetic flaw that makes people unusually sensitive to sunlight and predisposes them to skin cancer, it was reported Wednesday.

A Japanese team headed by Kiyoji Tanaka at Osaka University said it has discovered and made copies of a gene that when defective causes the most common type of a disease called xeroderma pigmentosum.

About one in 250,000 people suffer from xeroderma pigmentosum, an inherited disease in which skin cells lack the normal ability to repair the damage the sun's ultraviolet light inflicts on genetic material.

People with xeroderma pigmentosum must avoid exposure to sunlight. If they fail to do so, they run a high risk of developing skin cancer and potentially blinding growths on the eyelids and cornea.

At least eight genes are believed to be linked to the disease. But the genetic defect singled out by the Japanese team on chromosome 9 is believed to be the most common, accounting for about one-quarter of cases.

The latest discovery, published in the British journal Nature, comes on the heels of a Dutch team's findings that a gene on chromosome 2 appears to cause a very rare type of xeroderma pigmentosum.

#90304u0882 10/31/1990 ~United Press International
COLUMBUS, OH (OCT. 31) UPI - The Ohio Supreme Court Wednesday disbarred convicted lawyer Thomas Root, whose plane went down in the Atlantic after he was mysteriously shot last year.

Root was convicted of securities fraud in connection with a North Carolina media company's activities and the high court took action after he failed to respond to an order to show why he should not be disciplined.

Root, who lives in Virginia, was sentenced to 15 years in prison in North Carolina last week and fined $5,000 after pleading no contest to 364 counts of securities fraud, conspiracy and related charges.

He first came to national attention when his small plane went down in the Atlantic Ocean in 1989 with no explanation and he emerged with a gunshot wound.

Last June, a Nash County, N.C., grand jury handed up a lengthy indictment containing 2,695 counts against Root and other officials of Sonrise Management Services and Telemedia Inc., a company that helped form partnerships to obtain federal licenses for low-power FM radio stations.

Root was disbarred by his own consent in the District of Columbia.

SIDON, LEBANON (OCT. 31) UPI - A PLO official said Wednesday Palestinian fighters disengaging rival Shiite militias in southern Lebanon since last December will not withdraw unless the Lebanese government begins talks on future ties between the two factions.

PLO representative in Lebanon Zeid Wehbeh said a Lebanese-Palestinian dialogue that should result in the reopening of the organization office in Beirut was a pre-condition to any Palestinian pullout from the Iklim Al Tuffah region, east of the port city of Sidon, 24 miles south of Beirut.

Some 1,700 Palestinian fighters loyal to PLO Chairman Yasser Arafat sprung out of the nearby refugee camp of Ein El Helweh on the outskirts of Sidon and took up positions in some areas in the Tuffah region last December.

The move was aimed at disengaging the Iranian-backed Hezbollah and the pro-Syrian Amal movement, which engaged in fierce battles for control of the strategic region.

''There will be no change of positions in the Tuffah region except after a legitimate Lebanese-Palestinian dialogue because the Palestinian presence in any position is part of the whole Lebanese cause,'' Wehbeh said.

His statement came less than 24 hours after both the Hezbollah and Amal declared ''a complete and comprehensive cease-fire'' to end their bloody three-year dispute.

More than 1,000 people have been killed and thousands wounded and displaced since Amal and Hezbollah started fighting three years ago for the control of Lebanon's estimated 1.5 million Shiites.

The inter-Shiite violence first erupted in Beirut's southern suburbs, and then expanded to the Tuffah region, prompting the expansion of a Palestinian military presence in the south.

According to Palestinian sources, more than 180 Palestinians of the disengagement force were killed during the battles since December.

Analysts said at the time the Palestinian move was prompted by fears that the Hezbollah gunmen, who drove the Amal out of five villages, would gain more territory in the south at the expense of the PLO.

Syria and Iran have been negotiating for months on a final settlement for the inter-Shiite dispute. Many attempts in that direction had failed in the past.

The truce preceded a scheduled visit by Iranian Foreign Minister Ali Akbar Velayati to the Syrian capital aimed at finalizing an agreement that would close the inter-Shiite file.

The cease-fire agreement between Amal and Hezbollah, which was reached in Beirut late Tuesday, boosted hopes that a plan by the Lebanese government to send army troops to the embattled region would soon be materialized.

But Wehbeh's statement dealt a harsh blow to the ongoing efforts. ''We will not be an obstacle in the way of the Lebanese Army but there will be no change in positions in the Tuffah region except after a Lebanese-Palestinian dialogue '' Wehbeh said.

The Palestinian official said the role of the Lebanese army should not be limited to the Tuffah region but expanded to Israel's self- declared ''security zone.''

Israel established the ''security zone'' after it withdrew the bulk of its troops in 1985. The zone, 9 square miles along the Lebanese- Israeli frontier, is patrolled by Israeli troops and their surrogate South Lebanon Army militia.

Observers said Wehbeh's remarks came in response to those last week by U.S. Ambassadors to Syria Edward Djerjian, who said that all armed groups including Palestinian factions should be dissolved.

#90304u0898 10/31/1990 ~United Press International

NEW ORLEANS (OCT. 31) UPI - Louisiana is about to elect its first black congressman in more than 100 years.

On Nov. 6, voters in New Orleans will choose between state Sen. William Jefferson and attorney Marc Morial to represent the 2nd Congressional District. Both are black Democrats. But the similarities end there.

The contest is a combination family feud between the city's two strongest political camps and classic struggle of experience vs. youth, self-made man vs. privileged scion, veteran officeholder vs. new challenger.

The 2nd District seat is being vacated by Democratic Rep. Lindy Boggs, the only white member of Congress representing a predominantly black district. Her retirement from politics after 17 years in the House ends a 50-year hold on the seat begun by her husband, Hale Boggs, who was lost in an Alaskan plane crash in 1972.

White flight over the years has turned the district predominantly black, although Boggs, 73, was so well-respected she never encountered more than token opposition in previous races.

Jefferson and Morial finished first and second respectively in a 12- candidate field in Louisiana's Oct. 6 open primary.

Under the open primary system, all candidates of all parties run on the same ballot. If no candidate wins a majority of more than 50 percent, the top two vote-getters compete in a runoff.

The primary contest setting up the historic election was obscured by the highly charged U.S. Senate race, in which incumbent J. Bennett Johnston held off a stronger-than-expected challenge from former Ku Klux Klan leader David Duke.

Since then, the congressional race has become equally emotional with each side blaming the other for below-the-belt politics.

Voter registration in the 2nd Congressional District is 55 percent black, whose turnout was a major factor in Johnston's defeat of Duke.

Johnston won re-election with 54 percent of the vote compared to 44 percent for Duke, who captured 60 percent of the white voters statewide. In New Orleans, however, Johnston whipped Duke by a ratio of nearly 4- to-1.

While New Orleans blacks were united in their support of Johnston and favored black candidates in the congressional race - white School Board member Woody Koppel ran fourth - they remain sharply divided between Jefferson and Morial.

Black voters are split almost evenly between the Jefferson camp, backed by Mayor Sidney Barthelemy, and the Morial camp. Morial is the son of the late Mayor Dutch Morial, the first black mayor of New Orleans, whose rivalry with Barthelemy extended back to their high school days.

The result is neither side can win without substantial support from the white minority community.

Morial, 32, claims Jefferson epitomizes the politics of the past. His latest campaign ads zero in on Jefferson's indebtedness and defaults of bank loans. Morial claims much of the income for Jefferson's law practice comes from conflict-of-interest contracts with public agencies, such as the state's Southern University, that are under legislative control.

Several weeks ago, Morial called a news conference to publicly reveal he is the father of an 8-year-old girl born out of wedlock and living with her mother in Africa. He said he did so because of a campaign by unidentified opponents who circulated court documents concerning the paternity before the

primary election.

Jefferson, 43, denied any involvement but has emphasized his own status as a family man, married 20 years and having five children.

Jefferson has portrayed Morial as a political neophyte raised in privilege and trading on the name of his father.

#90304u0963 10/31/1990 ~United Press International
WASHINGTON (OCT. 31) UPI - The Federal Reserve, in its latest ''beige book'' analysis of the economy, said Wednesday that economic growth is deteriorating across the United States, along with business and consumer confidence.

''Economic activity appears to have grown slowly in most Federal Reserve districts since early August but seems to have declined somewhat in others,'' the report said.

The analysis, by the Fed's 12 district banks, said there were widespread indications of a ''weakening in business and consumer confidence'' and found retail sales ''were sluggish or down in most of the country.''

Manufacturing activity was ''mixed to weaker,'' and commercial and residential construction declined although home sales increased in some regions of the nation, the report said.

Loan activity at banks was ''lackluster'' nationwide, but agricultural prices were strong and higher energy prices, a result of the Persian Gulf crisis, ''appeared to be stimulating oil drilling, although some shortages of skilled workers were reported,'' the Fed said.

Here is a summary of conditions in the 12 Federal Reserve regions:

-BOSTON - Growing uncertainty about economic conditions. Retailers,

wholesalers report weak sales. Intense price competition, tightening cost-control measures. Manufacturers ''battening down the hatches.''

-NEW YORK - Continued weakness. Retail sales down. Residential construction weak. Market for office space, while soft, appears to have improved. Unemployment up but below national averages.

-PHILADELPHIA - Further weakening in manufacturing, retail trade. Mixed reports from banks. Consumer lending up but commercial and industrial loans continued to fall. Manufacturers expect business to drop.

-CLEVELAND - Outlook has deteriorated because of higher oil prices. But region not believed to be in recession. Inflation prospects have worsened. Growth supported by manufacturing. Housing weaker than usual.

-RICHMOND - Economy weakened further. Business attitudes more pessimistic. Retail, manufacturing activity slowed. Commercial construction at a standstill. Loan demand weak. But port traffic up, and farms healthy.

-ATLANTA - Slower growth. Slower retail sales. Defense and oil- related businesses report increased orders. Realtors report weakening residential and commercial sales.

-CHICAGO - Economy expanding slowly. Consumer spending stronger than in rest of nation. Financing for ''speculative'' construction projects has virtually ceased. Buyers taking longer to pay bills.

-ST. LOUIS - Economy showed little or no expansion. Growth in consumer spending offset by declining activity in construction and manufacturing of durable goods. Farm conditions mixed.

-MINNEAPOLIS - Economy showing signs of weakness. Automobile sales down sharply. Construction and manufacturing mixed. Wage and price increases generally moderate.

-KANSAS CITY - Economy continues to grow slowly. Farm sector remains strong, supported by good fall crops and high cattle prices. Oil and natural gas drilling increasing at moderate pace.

-DALLAS - Economic output flat to slightly down. Manufacturing activity has slipped, particularly in the construction-related and electronics industries. Service sector growing. High oil prices have yet to motivate drilling.

-SAN FRANCISCO - Growth continues, but at slower pace. Lenders pessimistic about prospects for national growth in 1991. Manufacturing, banking mixed. Agricultural conditions remain solid.

#90304u0968 10/31/1990 ~United Press International
(OCT. 31) UPI - Egyptian President Hosni Mubarak rebuffed Wednesday Soviet President Mikhail Gorbachev's call for an Arab solution to the Persian Gulf crisis, and President Bush warned that he has ''had it'' with Iraq's treatment of American hostages in the Middle East.

Also Wednesday, Iraq's ambassador to the United States accused the CIA of conspiring with Kuwait to destroy Iraq long before Iraq's invasion of Kuwait, a charge the CIA denied.

Gorbachev told reporters this week a military option to drive Iraq out of Kuwait, which it invaded Aug. 2, is unacceptable and Arabs should devise their own solution to the problem.

His position contrasted sharply with U.S. and British policy, which follows the military option as laid out in the U.N. charter as a last resort if Iraqi President Saddam Hussein refuses to pull his troops from Kuwait.

Mubarak said previous Arab summits called to deal with the crisis achieved nothing and another one without a specific agenda would become an exercise in invective.

''The Arab countries have tried a lot and we're still trying. If these (Soviet) proposals call for a peaceful solution then it should be borne in mind that there isn't a big or small country, Arab or Western, which doesn't want a peaceful solution,'' he told reporters in Cairo.

''If we call for an Arab summit and there is no clear vision for that summit, then it will be a summit of insults and we cannot accept that.''

Mubarak challenged Gorbachev to make specific proposals for an Arab solution and pointed out Gorbachev's own envoy, Yevgeny Primakov, met with Saddam last week and came away empty-handed.

''If there is a (Soviet) call for an Arab summit, then we want to ask if the Soviet mediator has achieved any specific result, so the summit can be held to discuss this,'' Mubarak said.

Mubarak's Foreign Minister Esmat Abdel Meguid flew to Saudi Arabia to discuss Gorbachev's vague proposal with his Syrian and Saudi counterparts. Syria, like Egypt, has sent troops to the gulf to deter further Iraqi aggression.

Iraq's ambassador to the United States, Mohamed Al-Mashat, told a news conference in Washington that the United States and Kuwait conspired against Iraq before the invasion. He cited what he said was a memo recovered from Kuwaiti security forces written by Brigadier Al- Fahd, director of Kuwaiti security, and detailing a conversation with CIA Director William Webster in

Washington in November 1989. Also at the meeting was a Colonel Shadad, a key aide to Al-Fahd.

Al-Mashat said that in the memo, the Kuwaitis ''agreed with the American side that it was important to take advantage of the deteriorating economic situation in Iraq in order to put pressure on that country's government to delineate our common border. The CIA gave us its view of appropriate pressure, saying that broad cooperation should be initiated between us ... on condition that such activities are coordinated at the high level.''

He said U.S. troops are in Saudi Arabia to destroy Iraq and to ''serve the interest of Israeli expansionism and to establish control over oil in order to influence the economies of Western Europe and Japan.''

CIA spokesman Mark Mansfield said Webster did not meet with Al-Fahd or Shadad, but that Sheik al-Sabah, deputy director general of Kuwaiti state security, paid a courtesy call on the director in November 1989.

''There was nothing discussed at that meeting concerning Kuwait's relations with Iraq or any other country. Those statements in the documents, purported to be from the U.S. side or Kuwaiti state secuity, are total fabrications and without foundation,'' he said.

Bush, in a campaign appearance for a Virginia congressman, vented his anger Wednesday at Hussein's treatment of American hostages and for the diplomats who have been holed up in the U.S. Embassy in Kuwait City since the Aug. 2 invasion, cut off from food, water and power.

''The American flag is flying over the Kuwaiti Embassy and our people inside are being starved by a brutal dictator,'' Bush said. ''And do you think I'm concerned about it? You're darned right I am.

''And what am I going to do about it? Let's just wait and see, because I have had it with that kind of treatment of Americans and I know others feel that way.''

Bush insisted he does not feel pressure to launch a military response and maintained he will not allow the fate of the hostages to drive U.S. policy.

''I'm prepared at this juncture to wait to see if economic sanctions will work - at this juncture,'' he said.

''We have a significant coalition of armed forces on the ground and we'll just have to wait and see. In the meantime, we will send a steady, strong message to Saddam Hussein that we are not going to tolerate this aggression,'' Bush said.

#90304u0977 10/31/1990 ~United Press International

ISLAMABAD, PAKISTAN (OCT. 31) UPI - The head of the army-backed alliance that won last week's parliamentary elections Wednesday received his party's nomination as prime minister, making it virtually certain he will assume the post.

The Pakistan Moslem League, the main component of the Islamic Democratic Alliance, a loose coalition of parties opposed to ousted prime minister Benazir Bhutto, nominated Nawaz Sharif at a meeting.

Sharif, 42, is a wealthy industrialist and, as chief minister of Punjab, Pakistan's most populous province, was Bhutto's main adversary during her term of office.

He would become Pakistan's first Punjabi prime minister. The position has traditionally been filled by natives of Sind because of the southern province's ethnic sensitivities.

IDA leaders are expected to endorse Sharif's nomination Thursday. The National Assembly, where the IDA is the largest grouping, is then almost certain to confirm him as prime minister at its first session, expected to be held within the next week.

Observers say Sharif drew support from his party for the nomination over caretaker prime minister Ghulam Mustafa Jatoi through his prominent role in the IDA's convincing Oct. 24 election victory over Bhutto's Pakistan People's Party.

Bhutto has charged the IDA had indulged in ''gross rigging.'' Most international observer teams said they had found no evidence to support her allegations. But a team from the Paris-based International League of Human Rights said ''a highly sophisticated fraud mechanism'' was partly responsible for the IDA win.

The head of the government's Election Commission, Justice Naeemuddin, Wednesday rejected the charges, saying the members of the French team ''based their observations on information fed to them.''

''These allegations have been leveled with the purpose of maligning the good name of the election commission and casting doubts about its impartiality,'' the official charged.

President Ghulam Ishaq Khan sacked Bhutto's 20-month-old government on Aug. 6, accusing it of corruption and nepotism and of failing to control law and order and dissolved the National Assembly. He appointed opposition leader Jatoi to head an interim government until the elections.

The president also set up Special Disqualification Courts to try Bhutto and members of her administration on corruption charges. If found guilty they could be barred from politics for seven years.

The PPP also suffered crushing defeats to the IDA and its allies in elections last Saturday for provincial governments in Punjab and Northwest Frontier.

In its stronghold of Sind, PPP emerged as the largest single party from Saturday's vote. But it failed to get an overall majority and it appeared likely the IDA would be able to cobble together a coalition government in the province.

In Baluchistan Province, the IDA and its allies had more seats than the PPP, but it was still not clear who would form the next government.

#90304u0989 10/31/1990 ~United Press International
(OCT. 31) UPI - During a campaign stop in Virginia this morning, President Bush brought up the question of American diplomats surrounded by Iraqi troops in Kuwait City. Bush talked about the U-S flag flying over the U-S Embassy in Kuwait and about his anger with Saddam Hussein for leaving the Americans inside cut off from food, water and power.

Government statistics show Americans had a little more money to spend in September... and they spent it and more. The Commerce Department reports that personal income was up one-half of one percent in September. But personal spending jumped one-point-one percent, reflecting higher prices for oil.

The September savings rate dipped to three-and-a-half percent, the lowest savings rate in three years. Income after taxes was up four- tenths of one percent. In other economic news, factory orders posted their weakest showing since June, up just one-tenth of one percent last month.

Security sources in Egypt report that a Moslem fundamentalist sought by police escaped after a bomb exploded in his home, wounding his sister. The suspect is a member of the Holy War Islamic extremist group linked to the assassination three weeks ago of the Speaker of the Egyptian Parliament.

A small army of volunteers patrolled streets in Detroit last night but still could NOT stop dozens of so-called ''Devil's Night'' arson fires that lit up the sky in parts of the city. The pre-Halloween arson outburst left several families homeless when flames spread from abandoned buildings to their homes and apartments.

Two warring Lebanese militias are observing ''a complete and comphrensive cease-fire,'' ending three years of fighting that killed more than one-thousand people. Official sources say the pro-Iranian Hezbollah and the

Syrian-backed Amal militia also will exchange all prisoners.

Parts of northern India remain under curfew today as security forces try to prevent more violence between Hindus and Moslems. The Press Trust of India says at least 49 people have died since Hindu radicals stormed a 460-year-old Moslem mosque in an attempt to build a temple. At least 18 people were killed in religous violence in different parts of India today.

Pravda says that self-styled vigilantes in the Soviet republic of Moldavia have been seizing Communist Party buildings in an effort to stir up anti-Communist sentiment in the area. Police had earlier blocked the Moldavians from trying to enter what has become a break-away Turkish-speaking region of the republic.

Most of the nation was dry this Halloween, but costumes that include rubber boots and raincoats are the order of the day in the Pacific Northwest, where record rainfall is reported. Rains is forecast throughout the day in the Washington state and Oregon. Two and three- quarter inches of precipitation fell at Eugene Airport in Oregon yesterday.

A Michigan woman is suing McDonald's for her 10-Million-dollar ''McMillions'' prize. It was withdrawn after it was found that her married daughter worked at the McDonald's where the ticket was given out. The woman's attorney argues that a Utah court found that adult children NOT living at home are NOT considered immediate family members.

#90304u1028 10/31/1990 ~United Press International

JERUSALEM (OCT. 31) UPI - Israeli soldiers and South Lebanon Army militiamen Wednesday discovered a car packed with 330 pounds of explosives in Israel's self-declared ''security zone'' in southern Lebanon, the army said.

A joint Israeli-SLA forces on a routine patrol seized the car and arrested two suspects inside the vehicle in the eastern sector of the security zone near Tel Hamas, the army spokesman said.

A demolition unit from the Israeli-backed SLA blew up the car.

On Oct. 19, 1988, seven Israeli soldiers were killed and eight wounded when a carbomb went off near the Metulla border crossing. On Aug. 19, 1989, the following year, a carbomb in the security zone wounded five Israeli soldiers and one SLA militiaman.

#90304u1090 10/31/1990 ~United Press International

LONDON (OCT. 31) UPI - Rumors that a cut in Britain's key base lending rate

was in store sent stock prices broadly higher in moderate trading Wednesday on the London International Stock Exchange.

Stocks also gained in Paris and Frankfurt.

London's blue-chip Financial Times 100-stock index, which tumbled 28.2 points, or 1.4 percent, Tuesday, rebounded 16.4 points to 2,050.3. The narrower top 30 industrial average gained 17.6 points to 1,592.9.

Volume amounted to around an estimated 468 million shares, up from the 385 million that changed hands Tuesday.

Analysts said stocks catapulted from the opening bell amid unconfirmed rumors of a cut in Britain's base lending rate to 13 percent from the current 14 percent level.

Speculation that monetary officials would react to recessionary fears by dropping interest rates spurred trading, despite a denial from the Bank of England that any shifts in rates was imminent, analysts said.

Rates were slashed in the United Kingdom from 15 percent to the current 14 percent level Oct. 8.

A Confederation of British Industry report issued Tuesday that said industrialists were in their gloomiest mood about prospects for their businesses since the early 1980s spurred the talk of interest rate cuts, analysts said.

After five days of downward movement, market analysts noted stocks were due for a technical rebound.

Among widely traded stocks, media group Reuters Holdings fell 66 cents to $10.85 after announcing it would postpone the launch of its Dealing 2000 automated trading system by at least six months and plans to cut 300 jobs in the company's corporate finance and administrative ranks.

Marks & Spencer, the clothing and food retailer, gained 12 cents to $4.47 after reporting its latest pretax profits for the six months ended Sept. 29 climbed 10 percent.

The company said increased earnings in the U.K. and Europe offset declines in North America.

Issues of companies that do a considerable amount of overseas business were boosted by the interest rate speculation as well. Imperial Chemical Industries the bellweather chemical stock, gained 29 cents to $15.86 and Guiness climbed 27 cents to $13.44.

In Germany, stocks closed slightly higher in light trading on the Frankfurt Stock Exchange.

The closely watched German Stock Index of 30 selective issues, which plummented 23.35 points Tuesday, inched back by 2.68 points to 1,433.82.

Market watchers said the Frankfurt market drifted slightly higher despite local investors appearing unwilling to expand positions amid ongoing uncertainty over the military situation in the Persian Gulf.

Elsewhere in Europe, stocks closed sharply higher in active trading on the Paris Bourse following a 0.25 point easing of France's Central Bank's credit rates.

The French CAC-40 Index, which fell 20.61 points Tuesday, climbed 31.98 points to 1,645.57.

Analysts said stocks surged following the Bank of France's unexpected slashing of its benchmark interest rate to 9.25 percent.

Investors in Paris will take a break from the action on Thursday as banks, markets and major businesses close for the All Staints Day holiday. Trading will resume on Friday.

#90304u1092 10/31/1990 ~United Press International

DALLAS (OCT. 31) UPI - The executor for Jack Ruby's estate, caught in a contentious 23-year battle over rights to the weapon used to kill Lee Harvey Oswald, testified Wednesday Ruby's possessions were worth less than $200 at the time of his 1967 death.

''You might say the world has put a higher value on the memory of Jack Ruby,'' said executor Jules Mayer, 81. ''Nobody thought some old clothing, odds and ends, and a certainly an old and cheap gun, would ever be of any value.''

The gun, a .38-caliber Colt Cobra, was valued at $35 when Mayer first filed probate papers, he testified.

Today the weapon, brought to court in the same manila envelope it was stashed 23 years ago, is worth between $100,000 to $130,000, he said.

Mayer said the Ruby estate consisted of the gun, a diamond ring (valued at $100 in 1967), a wristwatch ($50), and the clothing on his back, considered worthless at the time.

A burlesque club owned by Ruby in a low-rent fringe of downtown was seized by authorities to pay debts shortly after his arrest for killing the suspected

assassin of President John Kennedy.

''Jack always insisted that I pay off his debts first,'' said Mayer. ''And he knew I was primary among those creditors.''

Attorneys representing Ruby's heir, brother Earl Ruby, questioned how Mayer could run up legal expenses exceeding $50,000 and why he placed such a low value on the gun initially.

''All I knew was that it was a cheap-looking pistol,'' said Mayer. ''It was several years later that I realized collectors would pay well for it.''

Mayer wants to sell the gun to pay his expenses, largely incurred by fighting suits brought by Earl Ruby. Ruby wants proceeds from the gun for himself, and to pay Mayer only small fees, estimated at a few hundred dollars, incurred when the will was submitted for probate.

''I'm Jack's closest blood kin,'' said Ruby, ''and the gun should be mine to whatever I want with it.''

Mayer seemed ill at ease during testimony and snapped repeatedly at questions. At one point, Probate Judge Robert Price threatened him with contempt.

''You are here as a witness, not an attorney, and you must comport yourself appropriately,'' said Price. ''If you don't I will be forced to take action.''

The rebuke was prompted by an exchange between Mayer and attorney Doug Larson over the value of Jack Ruby's clothing.

''Do you believe clothing appreciates in value?'' asked Larson.

''Depends on the clothing,'' said Mayer. ''Some does. Some doesn't. Jack Ruby's did.''

''What about something like a jock strap?'' asked Larson.

''Well, Mr Larson, it depends. In your case you probably wouldn't need a very big one.''

On Tuesday Earl Ruby, 75, revealed he cleaned out his brother's club- office desk and kept the papers.

''There were a number of contracts, a number of papers,'' he told the three-man, three-woman jury. ''But I felt they were mine to keep or to sell since I was the one who put him in business.''

''In fact, Jack still owes me.''

#90304u1108 10/31/1990 ~United Press International
LONDON (OCT. 31) UPI - The Iraqi military has built a 150-mile-long ''obstacle belt'' of mines, wire fences and tank-traps across occupied Kuwait, and its tanks are so well dug into the desert that aircraft will have a difficult task locating Baghdad's armored legions, officials said Wednesday.

British Defense officials, who gave a briefing on condition of anonymity, said by mid-November, American, British and allied Arab forces would have in their theater a formidable array of airpower, but would still be outnumbered by the ground forces of Iraqi President Saddam Hussein.

Within two weeks, they said the U.S.-led multinational force now numbering 256,000 personnel would have about 1,600 tanks, 750 artillery pieces, 310 attack helicopters and some 1,110 combat aircraft.

Iraq, which invaded Iraq on Aug. 2, now has about 390,000 troops in and around Kuwait, along with 3,600 tanks, 2,300 artillery pieces, 125 attack helicopters and about 800 combat aircraft, the officials said.

Elsewhere, the commander of the British forces in the gulf, Air Chief Marshall Sir Patrick Hine, said upon returning to Britain that ''it was looking increasingly unlikely'' that Saddam would withdraw from Kuwait.

He said the British forces ''were devoting more time to the question of how we would fight,'' and that by mid-November, Britain ''would be ready to fully support offensive operations should the political decision be taken.''

In the briefing, the officials gave a sober analysis of the prospective conflict with Iraq, declining to speculate on how many casualties would be sustained among the British forces - which will number 16,000 within two weeks - but offering no illusions that combat would be easy or bloodless.

''If we had to be pushed into war, the allies would try not to make it protracted,'' one of the senior officials said. ''We have to live with the situation afterwards. We would have to do it as clinically and as efficiently as possible.''

They said the Iraqi military had placed itself in three defense echelons.

Just across the border inside Kuwait, the Iraqis have constructed an ''obstacle belt'' of minefields, tank-traps, ditches and barbed wire.

The barrier spans some 150 miles from the gulf waters to the Iraqi- Kuwaiti border in the west. Recently, Iraqi troops extended the defense works into Iraq, apparently fearing the multinational force would try and outflank the obstacles, they said.

''The longer that they are there, the better these defenses will become,'' one official said. ''We have seen evidence that the Western line is going up quite fast.''

They said behind the obstacle belt lay a first echelon of troops in static positions to guard possible entry points through the barrier.

The second echelon, also spanning the width of Kuwait, is of armored and mechanized forces, whose mission would be to move against any penetration of the obstacle belt and first echelon, they said.

Behind them lies the third echelon of troops, guarding the north-south route to Kuwait city and ready to counterattack if there is any breakthrough.

Saddam has placed a reserve force, mostly of crack revolutionary guards, astride the Kuwaiti border. Analysts believe he is aware the loss of his most competant soldiers could cause the military command to collapse, so he has shrewdly kept them away from areas that would presumably bear the brunt of multinational airpower.

But the officials stressed that multinational pilots had a potentially difficult task.

''Ground forces that are dug in don't present a very good target from the air '' one high-ranking official said. ''That would be quite difficult.

''When you have tanks that are dug in and well dispersed, you actually have to hit it right on, and can't drop a bomb 20 yards to one side,'' he explained. ''If they are on the move, it becomes a lot simpler. But so long as they are protected and well-dispersed, it could be a protracted campaign.''

The officer declined to discuss tactics to dislodge Iraqi troops from their fixed positions and start moving, making them vulnerable to airpower in the vast, featureless desert.

Some analysts say the only way of dislodging the armor is to carpet- bomb the area with B-52 aircraft, whose 2,000-pound bombs would shake the ground so much that earthworks would collapse. But other experts say this is impractical given the dispersed formations.

#90304u1126 10/31/1990 ~United Press International

(OCT. 31) UPI - President Bush says he does NOT feel pressured to launch military action against Iraq, but he is running out of patience. Bush turned up the heat on Saddam Hussein today during a campaign appearance in suburban Virginia, verbally attacking the Iraqi dictator for the treatment of American

diplomats at the U-S Embassy in Kuwait City. An angry Bush says the Americans have been without food, water and other supplies since Iraq's August invasion and that he's ''had it with that kind of treatment of Americans...''

The Iraqi ambassador to the United States told a news conference in Washington D-C, that a document seized after the invasion of Kuwait proves U-S involvement in efforts to de-stabilize Iraq. Ambassador Mohamed Al-Mashat says the document is a report on a meeting between a Kuwaiti security official and C-I-A Director William Webster. He says the report indicates that the plan was to take advantage of Iraq's economic problems following the long war with Iran. The C-I-A says NO such meeting ever took place.

Egypt is expressing caution over Soviet President Gorbachev's call for an all-Arab solution to the Persian Gulf standoff. Egyptian President Mubarak says Arabs have tried summits to deal with the crisis before and NOTHING was achieved. He says another Arab summit without a clear vision and a specific agenda would be an exercise in futility. Gorbachev has called war in the Gulf unacceptable and says Arabs should come up with a solution of their own.

Two men from the French Caribbean island of Martinique are telling a tale of survival at sea after drifting in the Atlantic for at least 25 days aboard their disabled fishing boat. A passing sailboat picked up the pair yesterday about 300 miles northeast of Puerto Rico. Coast Guard medics say the younger man lost more than 50 pounds. He's being treated for severe dehydration and malnutrition. His uncle was in better shape and insisted on staying aboard the 25-foot boat, which was under tow. The boat was reported overdue on October 4th.

A New York collector described only as a Wall Street investment banker who collects Lincoln items has paid 220-thousand dollars for an original copy of the 13th Amendment signed by Abraham Lincoln. It is one of seven known to exist. It will go on a national tour of the United States and Eastern Europe. The document was auctioned yesterday at the Sotheby gallery in New York. The 13th Amendment was a follow-up to the Emancipation Proclamation, but Lincoln NEVER lived to see it ratified.

The National Association of Realtors is out with its latest look at housing affordability and it reports the September figures show that the average family has more than enough income to quality for conventional financing. The index jumped to a two-year high last month, thanks to higher median family income and a lower median price for a home. The price of a home dropped by almost three-thousand dollars, to 94-thousand 300 dollars, while average median income nationally was up by 104 dollars, to 35-thousand 239 dollars a year.

Officials at the New York publishing giant Random House say replacement of Toni Evans as publisher after three years is NOT tied to the two-Million-dollar advance given Donald Trump for a second book that hit the

charts for three weeks and then disappeared. Evans is to become publisher of books under her own label at Random House and she will be president of the division.

New York City detectives are investigating the death of a baby found in a Bronx hospital with its throat tube disconnected and a heart monitor turned off. A nurse found eight-month-old Nigel Bostick Monday afternoon. The child had been admitted to the hospital in September with breathing problems. A police spokesman says the medical examiner was to have a determination on the cause of death some time today.

#90304u1147 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - The disease that recently killed more than 400 dolphins in the Mediterranean Sea closely resembles the disorder that afflicted seals in the North Sea in 1988, researchers said Wednesday.

Reporting in the British journal Nature, Irish and Spanish scientists said they have determined that the disease that is plaguing striped dolphins in the western Mediterranean is caused by a virus similar to the phocine distemper virus that infected common seals in the North Sea.

The phocine distemper virus, which creates respiratory problems and swelling of the brain, are related to the virus that causes distemper in dogs.

The research team, headed by S. Kennedy of the Department of Agriculture's Veterinary Research Laboratories in Belfast, Ireland, is now trying to determine if the current illness outbreak among dolphins directly spread from

the North Sea to the Mediterranean.

Wildlife experts are concerned that the latest outbreak, which appears to be moving from the Spanish coast to France and Northern Africa, may strike endangered populations of the Mediterranean Monk Seal.

#90304u1151 10/31/1990 ~United Press International

JERUSALEM (OCT. 31) UPI - Four Israeli soldiers convicted of beating a Gaza Strip Palestinian who later died of his injuries were demoted and sentenced Wednesday to prison terms of up to two months.

A military court convicted the three soldiers from the Givati Brigade Oct. 1 of assaulting Ayad Akal, 21, who was beaten and died the same day during the first months of the Palestinian uprising. Their commanding officer was convicted of sanctioning the beatings.

The year-long court martial, known as the ''Givati II'' trial, raised questions about the orders given by senior officers to use force on Arab demonstrators and whom to hold responsible for the excesses that occurred.

The ''Givati II'' defendants claimed they were following orders given by senior officers to beat Palestinians. In the sentence, the three military judges said they wanted to believe that the incident was ''not characteristic but a solitary case.''

On Feb. 7, 1988, soldiers, including three of the accused, were convicted of beating Akal at his home in the Bureij refugee camp. He and his brother were then taken to a secluded olive grove where they were severely beaten. Because Akal's body was taken from the hospital and buried before the cause of death was established, the defendants were not charged with murder.

In the sentences, the judges noted that the defendants showed no remorse.

''They are completely immersed in the distorted conception that they are allowed to do everything for the goal of a military mission,'' the jurists said.

In their verdict, they said it had not been proven at the trial that the senior officers had ordered ''the use of beatings as punishment, but it is clear that this was a result of the general atmosphere that prevailed among the various discussion among high-ranking officers.''

A joint statement by left-wing Parliament members Yossi Sarid and Dedi Zucker said Wednesday's sentences indicated that senior military command and political leaders should come forward and take responsiblity for alleged illegal orders.

Justice Minister Dan Meridor declined to comment on the severity of the sentences. However, former Judge Advocate Gen. Zvi Ledar told Army Radio the sentences were heavy.

''If they demote a major in the professinal army to lieutenant and give him another three months suspended, that seems heavy to me,'' he said.

Maj. Yitzhak Levite, a battalion commander not directly involved in the beating, was demoted to lieutenant and given three months suspended sentence, Army Radio reported. After being convicted he charged the defendants were ''scapegoats'' for policies held throughout the army in the early days of the uprising.

Lt. Ofer Reshef was demoted to sergeant and sentenced to five months with three suspended. Eli Shukrin and Gadi Zinba were demoted to privates and each given five months suspended prison sentences, the radio said.

The defendants plan to appeal the convictions.

Early Wednesday in an unrelated incident, a soldier on patrol was lightly wounded when Palestinian gunmen opened fire and threw two grenades, the army spokesman said. The army closed off the area and searched for the gunmen.

A Gaza Strip resident, Fayik Abu Erjela, 28, was stabbed to death by masked Arabs on his way home Wednesday, Palestinian sources said. Erjela was suspected of collaborating with Israeli authorities, they said.

Later in the day, a Palestinian driver was wounded and his 12-year- old brother slightly injured by soldiers who opened fire at the vehicle during a police chase, the spokesman said.

Palestinian sources said the driver could not obey police orders to stop because his brakes failed.

#90304u1159 10/31/1990 ~United Press International

NEW YORK (OCT. 31) UPI - Hundreds of striking reporters rallied outside the Daily News building Wednesday, calling for advertisers to boycott the paper as the violence-ridden strike moved into its sixth day with no end in sight.

Daily News Columnist Jack Newfield met with other media reporters and announced that he had resigned. "...My conscience and self-respect just can't allow me to ratify the breaking of unions with my labor and my name," he said in his resignation.

The News claimed that 250 members of the 750-member Newspaper Guild had

crossed the picket lines and gone back to work. Barry Lipton, president of the Guild, disputed the figure, saying no more than 70 had crossed the lines.

As Newfield spoke in front of the News, several hundred health care workers from District 1199 joined the picketing and carried signs urging businesses not to advertise in the News. "Boycott Scab News," they chanted.

In a another development, Mayor David Dinkins said he met with News Publisher James Hoge Wednesday morning at Gracie Mansion. Also at the meeting were Police Commissioner Lee Brown, City Labor Relations Commissioner Eric Schmertz and City Corporation Counsel Victor Kovner, he said.

Dinkins, who described the meeting as "fruitful," quoted Hoge as saying he was "very satisfied" with police performance, but was concerned about threats against vendors. "I deplore all violence," he said. "We will not tolerate it under any circumstance."

In the meantime, the News was almost nonexistent in midtown Manhattan. Some news stands said they were not getting or had refused deliveries, others said they had chosen not to or had been asked not to sell the paper.

In an editorial Wednesday, the News described New York as "Dodge City," and quoted news dealers as saying they had been threatened if they sold the paper. "I can't take the paper or they will kill me," the paper quoted a Brooklyn stationer as saying.

On Staten Island early Wednesday, about 30 striking workers ambushed seven men driving three Daily News trucks, beating them with baseball bats in the parking lot.

Police charged 11 pickets with riot, criminal mischief and illegal possession of a deadly weapon after they found some powerful firecrackers taped to the cars of non-striking workers.

Police said more than two dozen striking News workers have been arrested since the walkout was first declared Thursday. The bitter confrontation has seen delivery trucks firebombed and scores of replacement workers pelted with bottles, stones, and eggs.

The bitter walkout brought to a boil a simmering dispute that began ten months ago when the Tribune Co., the Chicago-based communications concern which owns the News, opened contract talks vowing to seek millions of dollars in cost reductions and impose sweeping control of hours and working conditions.

Nine of the newspaper's ten unions, which had been working without contracts since March 31, last week joined the strike that was declared following a dispute over a worker's claim he had medical justification for sitting down at his job.

Less than an hour after the walkout began, the News bused in replacement workers and have been steadily hiring substitute workers to fill the 2,200 jobs left open by the striking employees.

#90304u1164 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - A senior citizen lobby said Wednesday bold action must be taken to reign in the nation's health costs projected to soar to $1.4 trillion by the year 2000, but Health Secretary Louis Sullivan says he won't be rushed into a decision.

A report by Families USA Foundation, a non-profit group representing senior citizens, found that 1990 health costs are 2 1/2 times what they were in 1980 and projected a $1.47 trillion tab for health costs by the year 2000. That translates into an average payout of $5,515 per person by 2000 - a 542 percent increase during the 20-year period.

''Unless the United States takes bold action now, the explosion in health care costs will mean a declining standard of health care and a declining standard of living for all of us,'' said Families USA Executive Director Ron Pollack. ''If we want a healthy America for your family and mine, we've got to get these health costs under control.''

Sullivan is talking to groups around the country and waiting for several studies to be completed about the high cost of health care and possible solutions. He says he will not issue any recommendations until he feels there is a national consensus on a particular option. But one thing is certain - he has ruled out national health insurance.

''All of us want to move as expeditiously as possible, but we don't want to be slaves to a clock ... otherwise, we run the risk of taking action that will not be sustainable,'' Sullivan told a small group of reporters recently. ''We don't want to take action for action-sake.''

The secretary conceded he is searching for both a national and political consensus.

Families USA said the five states with the highest per capita spending on health in 1990 were:

-Massachusetts, with $3,031. In 1980, it also ranked No. 1, with $1, 284. The study projected the state will spend $6,890 per person in the year 2000.

-California, with $2,894. In 1980, it ranked No. 4, with $1,186. The study projected the state will spend $6,584 in the year 2000.

-New York, with $2,818. In 1980, it ranked No. 2, with $1,257. The study projected the state will spend $6,408 in the year 2000.

-Nevada, with $2,757. In 1980, it ranked No. 8, with $1,109. The study projected the state will spend $6,272 in the year 2000.

-Rhode Island, with $2,707. In 1980, it also ranked No. 5, with $1, 184. The study projected the state will spend $6,153 in the year 2000.

''The escalating cost of health care in America is an outrage of tragic proportions. The current system not only fails to provide citizens with basic, affordable care, but it is bankrupting our country, our families and our businesses,'' Robert Brandon, vice president of Citizen Action said. Brandon said that he fears quality health care will be beyond the reach of many Americans and businesses.

The study also said the number of uninsured Americans is swelling, with an estimated 32 million in 1988, up from 24.5 million in 1980, a nearly 30 percent increase.

-30- 3248

#90304u1172 10/31/1990 ~United Press International

(OCT. 31) UPI - Americans celebrated Halloween Wednesday with revels in Washington's historic Georgetown under the watchful eyes of beefed-up police patrols, a parade in New York's bohemian Greenwich Village and a party for homeless children in Detroit.

Tons of candy delighted trick-or-treating children. Some dentists counter attacked, promising to to pay for candy not consumed by kids.

Two days after a fully mobilized police force struggled to keep order at a Ku Klux Klan rally and counter demonstration, Washington police geared up to handle an anticipated invasion of the city's fashionable Georgetown district.

Police and business associations urged revelers to stay away from narrow sidewalks and crowded streets. Shopkeepers were asked to close early.

''We're trying to tone down Halloween festivities here in Georgetown, '' businessman Peter Armato said.

''Everyone's welcome in Georgetown but it's gotten so crowded on Halloween that customers can't even get into bars and restaurants,'' he said. ''A lot of (proprietors) have said because of congestion in the past, Halloween has not been a very profitable day for sales.''

Thousands were expected to jam New York's annual Greenwich Village Halloween Parade spectacle Wednesday night. The tradition is to wear outrageous costumes.

In Huntington, on New York's Long Island, the pre-school kids stole a march on other trick or treaters, hitting houses on their block as early as noon.

Four-year-old Mark Schneider, dressed in brown and green as one of the Teenage Mutant Ninja Turtles, was raring to go.

''I like chocolate,'' he said. ''I know what to say - trick or treat, smell my feet and give me something good to eat.''

In Los Angeles, supposedly safer alternatives to traditional Halloween trick-or-treating abounded, with shopping malls, city officials and politicians handing out goodies to keep kids off the streets at night.

Safety also was on the minds of police who for the second year warned would-be revelers to stay away from the traditional Halloween street party in Hollywood where vandals, looters and other rowdies rampaged in 1987, prompting a massive police response ever since.

In Detroit, a special Halloween party was arranged for homeless children ages 2 through 14 with transportation provided by businesses and private citizens.

There was an unwanted tradition in Detroit as well - the torching of buildings.

Despite an army of volunteers patrolling streets, dozens of Devil's Night arson fires lighted the sky in scattered sections of the city Tuesday night, destroying some houses.

The city mustered its volunteers again Wednesday for a final Halloween stand against the arsonists.

Mischief night also took its toll in New Jersey, where Camden police made 80 arrests, including 50 youths, for setting about 25 fires in vacant lots and breaking windows.

In Trenton, N.J., some 300 revelers pelted police with bricks and eggs when they tried to break up a street fight.

In Florida, an outbreak of St. Louis encephalitis has put a crimp on Halloween festivities. The state's chief health officer asked communities to ban trick-or-treating after 6:30 p.m. and move community parties indoors to reduce exposure to the night-feeding mosquitos that carry the virus.

Florida has recorded 65 confirmed cases and three deaths since the outbreak began last summer.

In Santa Rosa, Calif., pediatric dentist Stephen Berger bought Halloween candy from kids for $1 a pound. Last year, he purchased 967 pounds.

''We're doing it to help parents with all the candy and to bring attention to some of the health problems associated with too much sugar in the diet,'' Berger said.

A Philadelphia dentist also offered to pay children who dump their Halloween treats into his ''Cavity Can.''

Dr. Raymond Solomon said he would give 50 cents a pound for candy and offered sugarless treats to trick-or-treaters to keep them away from sweets. He promised to make donations to Childrens' Hospital of Philadelphia as part of the effort.

#90304u1197 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - The Resolution Trust Corp. Wednesday assured potential purchasers of its guaranteed student loan portfolios that the loans will be backed by the Education Department.

The RTC currently holds about $500 million worth of student loans obtained from failed thrifts. The Department of Education has agreed to provide buyers of these loans with reinsurance guarantees for the loans.

The agency said the agreement was intended to assure potential purchases that the loans will be reinsurable. "The reinsurance will be provided despite any due diligence violations that may have occurred before the portfolios became part of the RTC's asset inventory," the RTC said.

The Education Department has determined that the cost of providing reinsurance for the loans would be less than the loss the RTC would suffer if it could not sell the portfolios.

PRAGUE, CZECHOSLOVAKIA (OCT. 31) UPI - McDonald's golden arches will soon stretch nearly to Wenceslaus Square, where a mass demonstration led to the overthrow of communist rule last year, a Czech tourism official said Wednesday.

Two of the fast food factories will be located on side streets off the square, while a third will probably be situated on the former Red Army Square, now the Square of Victory, he said.

''The people of McDonald's would like to have a restaurant on Wenceslaus Square, but we want Wenceslaus Square to stay as it is, without their signs, and up to our architectural standards,'' said Pavel Franek, of the tourism ministry.

The restaurants are expected to open next spring, he said.

Wenceslaus Square is the historic center of Prague, and last November it was the site of the huge but peaceful protests that forced the communist government to relinquish power.

It is also the commerical heart of Prague, and many of its 18th- and 19th-century buildings were replaced after World War II by faceless office blocks.

At night, it resembles New York City's Times Square, as prostitutes, pickpockets and money changers mingle with tourists under the glow of neon signs.

Franek said negotiations on the deal were temporarily stalled by a Czech request that McDonald's serve beer after 8 p.m. McDonald's officials were unavailable for comment.

''The first McDonald's would be for tourists, mainly,'' said Franek, ''but in the second stage, we expect restaurants in Brno and other provincial towns.''

Franek said that initially McDonald's would not repatriate its profits, but would invest them in more restaurants across the country.

Franek said he did not fear country would fall victim to a ''Big Mac attack.''

''The people who eat our food will still go their typical Czech pubs. Only young people and tourists will go to McDonald's,'' he said.

''I am 45 years old, of course I will not be going to McDonald's. I prefer my local pub where I can sit and have my beer in peace. My 15- year-old daughter, she would go to McDonald's.''

The speedy service and spic-and-span atmosphere of McDonald's are certain to come as a novelty to Czechs who are used to queuing for hours for a beer or in the self-service cafeterias that offer their version of fast food.

Franek said the locations of the restaurants would be decided in the second

half of November.

He was unable to give a dollar figure for the size of the deal, and said many details, including the ownership of the restaurants, has yet to be decided.

#90304u1232 10/31/1990 ~United Press International

TORONTO (OCT. 31) UPI - The Canadian government is being sued for breach of trust over the prospective sale of Boeing Co.'s de Havilland division to a European consortium, union officials said Wednesday.

Jerry Dias, president of Local 112 of the Canadian Auto Workers, said the lawsuit is intended to protect workers' jobs rather than to stop de Havilland from being sold.

Dias said the union wants job security provisions to be a part of any deal reached between the Seattle-based Boeing and any party interested in buying de Havilland.

There are some 5,300 employees at de Havilland, with two CAW locals representing about 4,300 of the workers. Local 112 represents 3,600 aircraft production workers.

Boeing announced in July that it was holding discussions with France's Aerospatiale and Italy's Aeritalia, which jointly run ATR, a manufacturer of commuter aircraft, concerning the future of de Havilland.

Dias said the union expected Boeing to make an announcement on de Havilland's future in a couple of weeks. Employees were told in a company leaflet distributed Friday that a deal to sell the division was nearing completion.

The union's statement of claim - filed in the Federal Court of Canada in Ottawa on Monday - focused on de Havilland being operated with "the stated goal of establishing and maintaining a strong, self-reliant, long-term Canadian aerospace industry."

Lawrence Mandel, a lawyer representing the union, said the suit will attempt to prove that the Canadian government and Boeing may have already or might, as a result of a sale, breach this goal.

Mandel said the union initiated the proceedings to ensure that the government and Boeing keep their obligations to assist Canada's aerospace industry, build aircraft in Canada and maintain jobs for Canadians.

The Canadian government bought de Havilland from Britain's Hawker Siddeley Aviation in 1974 and kept the division's manufacturing facility under its control until January 1986, when Boeing bought de Havilland.

Since 1974, the statement of claim said, the Canadian government has provided more than $700 million in equity financing and defense program funds to de Havilland, which builds the Dash 8 36-seat Series 100 and 50-seat Series 300 regional airliners, to develop its short takeoff and landing aircraft technology.

Union officials and analysts have raised the possibility that ATR might close de Havilland in order to eliminate a competitor in the commuter airliner market.

According to Dias, 14 Dash 8 orders have been cancelled since July and no new orders announced. He also said plans to develop a Dash 8 70-seat Series 400 aircraft have been put on hold after Boeing made it known talks about de Havilland were taking place with ATR.

#90304u1257 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - Researchers reported Wednesday they have used gene therapy to lower cholesterol in animals for the first time, possibly opening a new era in treating hardening of the arteries and liver disease.

Scientists accomplished the feat using rabbits that suffer from an inherited genetic flaw that prevents the liver from clearing a form of artery-clogging cholesterol called low-density lipoprotein or so-called ''bad cholesterol.''

One of every 1 million Americans is afflicted by the same genetic defect as the rabbits - called familial hypercholesterolemia. If untreated, the condition's very high cholesterol levels lead to hardening of the arteries and an extremely high risk of heart attack and stroke.

Such patients may have blood cholesterol counts as high as 650 milligrams per deciliter, compared with the recommended level of under 200 milligrams per deciliter. The only treatments for such patients now are risky liver transplants or plasmapheresis, in which a patient's blood is circulated through a machine to remove cholesterol.

''This is an attempt to provide an alternative to a liver transplant for that population of patients. If it works, it should make a big difference,'' said Dr. James Wilson of the University of Michigan in Ann Arbor, who led the study. Liver donors often are in short supply, and transplants pose problems of organ rejection and require patients take immune-suppressing drugs, he noted.

Dr. John Kane, an expert on familial hypercholesterolemia at the University of California-San Francisco medical school, said people with the disease usually die before the age of 20 if they are not treated.

Although gene therapy is not yet practical for helping such patients, Kane said he considers it ''a worthwhile venue'' to explore. If the approach holds up under further research, ''it could change the outlook for these patients,'' he added.

About one in 500 Americans suffer from a milder form of the inherited defect. They are treated with strict diets and combinations of cholesterol lowering drugs, but that regimen also is far from perfect and they often suffer early heart attacks.

In their study, Wilson and colleagues from Albert Einstein and Whitehead Institute for Biomedical Research in Cambridge, Mass., used a crippled virus to insert a normal gene that codes for naturally occurring cholesterol-clearing molecules into rabbit liver cells in the test tube. The genetically altered liver cells then were infused into the rabbits through a vein that feeds into the liver.

The blood cholesterol levels of the seven rabbits that received the genetically altered cells fell 30 percent from their pre-treatment level, compared with virtually no change for the six rabbits that received infusions of liver cells that did not contain the cholesterol- clearing gene.

There was a major drawback: The cholesterol-lowering effect was only temporary and the rabbits' cholesterol returned to pre-treatment levels after two weeks.

In the study published in the Proceedings of the National Academy of Sciences, researchers said they suspect cholesterol levels shot back up because the rabbits' livers rejected the infused liver cells, which came from other rabbit donors. The scientists are now trying to avoid such rejection by using liver cells surgically removed from a rabbit, genetically altered in the laboratory, then returned to the same rabbit.

Dr. Jacques Rossouw, a cholesterol expert at the National Heart, Lung and Blood Institute in Bethesda, Md., said a 30 percent drop in cholesterol levels probably would have a ''significant effect'' on the condition of a person afflicted by with severe familial hypercholesterolemia. But patients likely would still be at greater- than-normal risk for heart attack and stroke unless blood cholesterol was cut about 50 percent.

''In cases like this where a single gene is at fault, this probably is the direction of the future,'' Rossouw said. ''But in most cases of elevated cholesterol, the problem probably stems from multiple genetic factors,'' which would be harder to fix by gene therapy.

Under the methods used in the latest study, Wilson said it would be difficult to justify performing gene therapy in people with milder forms of hypercholesterolemia.

But his team is developing ways of delivering genes directly to the liver that may be less complicated. If that works, it may be possible to insert genes to correct not only for high cholesterol but other liver- based disorders.

#90304u1266 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - Federal prosecutors Wednesday welcomed provisions in the new anti-crime bill giving them greater power over savings and loan offenders. "These specific statutes dealing with specific problems will be very helpful," said Larry Urgenson, head of the Justice Department's fraud section.

President Bush is expected to sign the bill into law, although White House officials said the president has not yet received the measure. Since Bush is busy stumping for GOP candidates, the bill is unlikely to get his signature until after next week's elections.

Urgenson's boss, Attorney General Dick Thornburgh, criticized the crime bill passed by Congress Saturday as "a considerable disappointment," but said he was pleased with its white collar crime provisions. "Dishonest savings and loan executives will feel the pain of these new arrows in our law enforcement quiver," said Thornburgh.

Sen. Tim Wirth, D-Colo., a key backer of institutional fraud legislation, described the crime bill as "one of the toughest white collar crime measures ever passed by Congress."

"Fraud and insider abuse were an important part of many thrift failures," Wirth said, "and the crime bill takes significant steps to pursue and punish those who looted our S&Ls."

The bill creates two new offenses aimed at bank fraud: concealing assets from a federal banking agency and obstructing an examination of a financial institution.

The bill will also raise from $50 million to $162.5 million the annual Justice Department appropriation for fraud investigations. Executives convicted under a new "kingpin" provision would receive from ten years to life in prison and fines up to $10 million for an individual to $20 million for organizations. The bill also:

- allows federal prosecutors to step in to stop suspected illegal activity, rather than waiting for an indictment that could come long after an S&L has been plundered.
- formalizes the position of James Richmond, the special counsel who has been coordinating federal efforts to catch thrift crooks and recover assets under the auspicies of the Financial Institutions Fraud Unit.
- creates an eight-member commission to study the thrift crisis and propose solutions.
- rewards whistle-blowers and lawyers who sue S&L cheats.

The awards to the whistle-blowers would be paid on a sliding scale based on the amount of money seized, which could result in bounties in the tens of thousands of dollars, or even into the millions "in certain kinds of instances " said Urgenson.

Even if there are no assets to collect, tipsters who help the Justice Department track down and convict financial wrongdoers could be eligible for rewards of up to $50,000. In addition, private lawyers could earn contingency fees based on the amount of stolen thrift assets they recoup for the government.

#90304u1280 10/31/1990 ~United Press International

(OCT. 31) UPI - President Bush stopped short of direct threats today but had sharp words for Iraqi leader Saddam Hussein and his treatment of U-S diplomats holed up in the Embassy in Kuwait City. Iraqi forces have cut water, food and electrical power to the Western embassies that remain in the Kuwait. Bush told reporters before and after a campaign appearance in suburban Virginia that he is concerned about the Americans in Iraq and Kuwait, but he insisted that the

hostages will NOT be used as a ''pretext'' for military action.

The South African government is lifting emergency regulations in 11 black townships surrounding Johannesburg. But Law and Order Minister Adriaan Vlok says special rules giving police sweeping powers to search and arrest will remain in effect in other areas because of continuing violence between warring black factions. The black-on-black violence has claimed at least 800 lives since August.

31 victims of the violence were buried today at a mass funeral service in the sprawling Soweto township. That after a senior member of the Zulu Inkata movement was shot down in broad daylight yesterday in strife-torn Natal province.

Liberian rebel leader Charles Taylor is pleading for a truce in the 10-month-old civil war. A spokesman says Taylor's National Patriotic Front is ready to stop shooting if a five-nation west African peace- keeping force halts its advance. Taylor says the peace-keeping force has compromised its neutrality. Taylor earlier refused to accept a cease- fire offer that would have given the peace-keeping force the right to station troops in Liberia to monitor a truce.

Officials in Detroit are mobilizing their volunteers again today to patrol streets of the city in efforts to block an epidemic of arson fires that has become an unwanted Halloween tradition in Motown. Dozens of so-called ''Devil's Night'' fires lit the skies over sections of Detroit last night, leaving several families homeless. There were NO reports of deaths or serious injuries.

Mounting tensions between Hindus and Moslems in neighboring India have prompted the government of Bangladesh to impose a curfew in mostly Hindu sections of Dhaka. Radio and television broadcasts began urging residents of the mostly Hindu old section of the city to remain at home after Moslem protesters tried to set fire to a Hindu temple. Moslems are upset by the storming of an ancient mosque in Ayodhya, India. Bangladesh is about 84 percent Moslem and 12 percent Hindu.

The White House says Queen Elizabeth will visit the United States in May on the invitation of President Bush. A spokesman says the queen will be accompanied by Prince Philip. The exact dates of the visit have yet to be determined.

#90304u1285 10/31/1990 ~United Press International

NEW YORK (OCT. 31) UPI - Texaco Inc., the third-largest U.S. oil company, launched a multi-million dollar ad campaign Wednesday to encourage energy conservation nationwide, saying supplies this winter could reach uncomfortable levels.

"While Texaco expects manageable, but perhaps not comfortable, supplies of gasolines, home heating oil and other fuels this winter, we believe the individual conservation efforts of consumers and businesses can significantly enhance the margin of safety," said Texaco President James Kinnear.

Because supply interruptions "due to unexpected cold weather and other contingencies" are possible, "Texaco strongly supports the call to conserve and we want to do our part," Kinnear told a news conference.

Although supplies of heating oil are higher than last year, crude oil stocks have declined sharply in the last seven weeks as a result of the fall-off in imports caused by Iraq's Aug. 2 invasion of oil-rich Kuwait.

Texaco's advertising campaign will begin next week in national magazines, key regional newspapers and on major-market radio stations in the Northeast corridor and will include 15-second spots on national television starting in mid-November.

Texaco also will offer a nationally known expert on home improvements for local television and radio shows to discuss energy conservation measures that would reduce families' energy bills.

#90304u1299 10/31/1990 ~United Press International

DALLAS (OCT. 31) UPI - The top thrift regulator in Texas was wined and dined and provided with female escorts by Vernon Savings & Loan - an institution his office was investigating at the time - a convicted Vernon executive testified Wednesday.

"We knew (Linwood) Bowman was a crucial contact," said Pat Malone, former Vernon vice president at the fraud trial of Vernon owner Don Dixon. "We tried to put on the dog for him."

During the 1985-86 period when Bowman was Texas savings and loan commissioner, the thrift paid to fly him to Kansas to hunt and to California to visit S&L properties.

During the California trip, Bowman was escorted by a female crew member, one of two flown in from a Vernon yacht, the High Spirits, berthed in Florida. "We were told to get Mr. Bowman a date, and we did," said Malone. "He seemed to appreciate having a woman on his arm." Bowman, who later resigned from office, admitted the trips, but said he was physically incapable of sex and did nothing illegal.

In a 38-count indictment, the government alleges Dixon fraudulently hid payments used to pay prostitutes, make political contributions and support his high living. In 1987 Vernon collapsed, causing $1.3 billion in losses.

Malone testified Bowman was picked up in a Falcon 50 corporate jet and flown to Southern California along with three bank officers. They were met by four women, including the two yacht employees.

During the March 1985 trip, Bowman and the Vernon officials dined at pricey restaurants, drove antique cars and stayed at posh hotels, including San Francisco's Fairmont. There, Bowman and Dixon shared a large suite with two women who were registered as the men's wives, he said.

"Was the woman listed as Mrs. Dixon actually Mrs. Dixon?" asked lead Justice Department prosecutor Robert Hauberg. "No," said Malone. "That was just something we put down to register her."

Dana Dee, Dixon's wife, sitting in the front row of the spectator section, showed no expression as the prosecution hammered at Dixon's sexual activities. "Did everybody have a woman each night?" asked Hauberg. "Yes," said Malone. "We were led to believe the women were there for us."

Malone said the two yacht employees stayed at the Fairmont for several days, compliments of Vernon, after the thrift officials and Bowman flew home. "All the expenses were put on (the) Vernon American Express master account," said Bowman. "The company picked up everything."

In January 1985, Vernon executives took Bowman to a hunting resort in Kansas, said Malone. The trip included catered meals and female escorts. "He seemed to appreciate our attention," Malone testified.

Bowman, whose office was investigating Vernon at the time, later justified the trips as ways to see Vernon properties and talk frankly with thrift executives.

#90304u1330 10/31/1990 ~United Press International

HARTFORD, CT (OCT. 31) UPI - The Travelers Corp., a major, multi-line insurance company, blamed the country's declining real estate market for a $499.3 million third-quarter loss reported Wednesday.

Travelers joins a growing list of insurers who, like many of the nation's big banks before them, are seeing the effects of the real estate market's slump on their earnings.

The insurer said the results reflected losses from a previously disclosed $650 million charge it took for reserves for possible losses in real estate and mortgage loans. The loss compared with profit of $94.2 million, or 89 cents a share, in the same period last year.

Operating profit for the quarter, which excludes investment losses, rose almost 26 percent to $85 million in the quarter ended Sept. 30, compared with the year-earlier period. But the company wrote less business, with premiums totalling $1.8 billion, down 5 percent from $1.9 billion in premiums a year earlier.

For the year so far, Travelers has lost $306 million, compared with a profit of $306.1 million or $2.95 a share in the first nine months last year. Also, premiums are down 15 percent for the first nine months to $5.8 billion from $5.9 billion in the first three quarters last year.

#90304u1339 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - Despite Saudi Arabia's recent windfall oil profits the United States should not ask the Saudis to lower prices because world markets would be disrupted, several experts told a Senate hearing Wednesday.

Since Iraq's invasion of Kuwait Aug. 2, skyrocketing oil prices have been a bonanza for Saudi Arabia, which is being protected by some 200,000 U.S. soldiers.

M.A. Adelman, an economics professor at the Massachusetts Institute of Technology, said Saudi oil profits have increased at a rate of $50 billion a year since the invasion.

Sen. Joseph Lieberman, D-Conn., the only senator who attended a hearing following congressional adjournment over the weekend, suggested that Saudi Arabia should be asked to decrease oil prices because it is being protected by so many American troops.

But John Lichtblau, head of the Petroleum Industry Research Foundation, said lower Saudi oil prices would cause "tremendous distortions" in the worldwide supply system. A lower price "couldn't stay there," Lichtblau said, and Saudi oil would quickly have to be rationed because it would be widely sought.

A better solution is to ask the Saudis to pay a greater portion of U.S. costs for the massive Operation Desert Shield mobilization, Lichtblau said. Adelman agreed in testimony to the Senate Committee on Governmental Affairs.

"Make them cover a bit more of the costs of the current operation," the MIT professor said. Trying to push down Saudi oil prices would distort the market "and probably push prices up further in the long run," Adelman said.

Lieberman, who has called numerous news conferences and hearings to castigate major oil companies for their gasoline prices and profits since the invasion of Kuwait, asked what would happen to the price of oil if war breaks out in the Middle East.

"I wouldn't be surprised if oil prices tripled (to $100 a barrel)," said Fariborz Ghadar, an international business professor at George Washington University.

Adelman agreed, saying, "There's no limit to how high it would go in the short

run. It could go up to a damaging degree." But if Iraq withdraws from Kuwait, oil prices would initially drop to near the pre-invasion price of less than $20 a barrel, Lichtblau predicted.

Lieberman asked whether the Soviet Union could help supply American oil needs. An international trade consultant, Paul Freedenberg, said although the Soviets are the world's largest oil producer with an output of 12 million barrels a day, their production has been dropping.

The Soviet oil operation is plagued by labor and political strife, Freedenberg said. "Some U.S. analysts think that the Soviet Union's oil industry 'is on the brink of chaos."'

A healthy Soviet oil industry is important to maintaining worldwide price stability, Freedenberg said, and also critical for the survival of Soviet President Mikhail Gorbachev.

ATLANTA (OCT. 31) UPI - Laser surgery that blasts away microscopic bits of the cornea could someday replace glasses and contact lenses, eye experts said Wednesday.

The surgery to reshape the cornea - the outer part of the eye that acts as a lens - has been tested on about 300 patients in the United States and about 1,800 worldwide, the doctors said.

The results of the tests have been promising but there are still several problems, such as a hazy film that often develops in the cornea, the doctors said.

''I wouldn't have it done on myself, and I tell my patients that. I'm afraid of being the one-in-1,000 complication,'' said Dr. George Waring at an American Academy of Ophthalmology meeting.

Doctors also have noticed a thickening of certain eye tissue, and there is also little data available on how long the effect of the surgery lasts.

The procedure must be approved by the Food and Drug Administration before being made widely available.

The cost for the average patient is unclear but could be about $2, 000, said Dr. Manus Kraff, head of the American Society for Plastic and Reconstructive Surgery.

The procedure is performed with an excimer laser, a highly precise device capable of reshaping the cornea a millionth of an inch with each pulse of

energy.

''Really what we're doing is mimicking what the front surface of the contact lens does by reshaping the cornea,'' said Dr. Francis L'Esperance.

In about two-thirds of the patients, a ''haze'' develops after surgery. Only a few patients report noticing the haze, and even they usually consider it an improvement over their ability to see before the surgery, the doctors said.

The haze, caused by damaged cells near where the laser pulses strike, usually forms three to six weeks after surgery, and disappears over the next two to six months.

''If it doesn't go away, it leaves a scar, and therein lies the danger,'' Waring said.

Certain steroids taken after surgery to reduce inflammation may prevent development of the haze, the doctors said.

''Without that haze, we'd be very happy,'' said Dr. Stephen Trokel, a consultant with VISX Inc., one of the developers of the excimer laser. ''The patients would be very happy.''

#90304u1378 10/31/1990 ~United Press International

KHARTOUM (OCT. 31) UPI - Britain advised Wednesday that dependents of its expatriates in Sudan should leave the country as soon as possible, citing possible disturbances as a result of food shortages but provoking diplomatic speculation the move is linked to the Persian Gulf crisis.

Staunchly Islamic Sudan is one of only three Arab countries that has refused to condemn Iraq's Aug 2 invasion and subsequent annexation of Kuwait.

A British Embassy spokeswoman in Khartoum declined comment on the reasons for the advice and said steps would be taken, but not immediately, to move Britons out.

Most of the Britons working in Sudan are employed by aid organizations. Others work at Khartoum power stations and a few are businessmen.

A spokesman at the Foreign Office in London said the British ambassador in Khartoum would ''shortly'' circulate advice to the British community there that it was time to think about leaving.

''The gist of his advice will be that he thinks they have reached the moment when they should consider arranging for their families to leave Sudan,'' the spokesman said.

He said a ''combination of circumstances'' prompted the decision and it was complicated by difficult communications inside the East African country.

''The domestic situation is difficult, with food shortages, and the possibility of famine, perhaps civil disorder,'' he said.

The London spokesman made no mention of the gulf or of the possibiity that Britons mkght be at risk in Sudan if hostilities broke out in the gulf.

The spokeswoman in Khartoum said the embassy received a few telephone inquiries from the 856 Britons in Sudan about the announcement and was planning to hold a wardens' meeting Friday. The ''warden'' system allows embassies to monitor their citizens' safety through a few key individuals.

A number of young Britons, working for the British Voluntary Service Overseas aid organization - the equivalent of the U.S. Peace Corps - left Sudan last Friday. Diplomats who asked not to be identified said it followed parental worry about the safety of their children in Sudan.

The Sudanese military government, which seized power in a June 1989 coup, has recently criticized western countries, both because of the western military buildup in the gulf and because the government says food aid for up to 5 million people at risk of famine in Sudan is being tied to politics.

Sudanese Foreign Minister Ali Sahlul said Tuesday, however, his country's position on Iraq had been misrepresented.

''Our position may have been a bit distorted,'' he said. ''We don't go along with the occupation of Kuwait. We don't condone the occupation or annexation of other countries.

''Sudan is neutral,'' Sahlul said. ''We are using whatever contacts we have with Iraq to try to persuade them'' toward a peaceful solution, he said.

U.S. Ambassador James Cheek, who said his government has no plans for a similar evacuation, Tuesday cited the gulf situation as a factor under consideration in assessing the safety of citizens.

''We look at the situation in Sudan, its stability, and outside factors of which now the gulf crisis is one,'' he said.

''I'm not sure what they (the British) are doing,'' he said. ''We are not evacuating.''

Cheek said other factors are terrorism and the economic situation.

Sudan has a $4.6 billion budget deficit and a forecast harvest shortfall of

one million tons this year. It is also fighting a 7-year- old civil war in the South that costs it about $2 million a day.

OTTAWA (UPI) - The Canadian government moved Wednesday to block an attempt by the U.S. Congress to restrict trade with Cuba by Canadian subsidiaries of American companies.

An order, issued under the so-called Foreign Extraterritorial Measures Act, is aimed at countering the Mack amendment to the U.S. Export Act, recently passed by Congress.

The amendment prevents the issuing of any licenses for trade with Cuba and makes it illegal for any U.S. subsidiary to trade with Cuba.

''This action demonstrates our determination to block measures that infringe Canadian sovereignty,'' Justice Minister Kim Campbell said in a prepared statement. He said the Canadian government alone regulates international trade and commerce by companies based in Canada.

The order prohibits any corporation in Canada from complying with the U.S.

measure and requires them to report to the government any directives or instructions related to the measure, Campbell said.

External Affairs Minister Joe Clark said the Mack amendment was ''clearly unacceptable'' and would restrict trade which Canadian subsidiaries have built up with Cuba over the years.

Canada enacted the Foreign Extraterritorial Measures Act in 1984 to fight the extraterrorial application of foreign laws in Canada. Government officials said this was the first time a blocking order has been issued under the law.

(OCT. 31) UPI - Soviet Mideast envoy Yevgeny Primakov says that if all peace efforts fail, the Soviet Union will NOT oppose use of military force against Saddam Hussein. But, Primakov says the Red Army will NOT join the fighting. His remarks to a Cairo newspaper appear to contradict President Gorbachev , who calls a Persian Gulf war is unacceptable.

At a campaign stop in Virginia today, President Bush said he's had it with Iraq's treatment of American hostages in the Gulf. Bush vented his anger at Saddam for NOT allowing the United States to re-supply its diplomats trapped for three months in the American Embassy in Kuwait City.

Several experts told a Senate hearing today that the United States should NOT ask Saudi Arabia to lower crude oil prices because world markets would be disrupted. Since Iraq's August occupation of Kuwait, skyrocketing oil prices have provided a bonanza of windfall profits for Saudi Arabia that could reach 50-BILLION dollars a year.

A combined Israeli and South Lebanon Army patrol discovered a car packed with 300 pounds of explosives near the town of Tel Hamas inside Israel's self-declared ''security zone'' in southern Lebanon. Two suspects were arrested and the car was blown up. 12 days ago a car-bomb killed seven Israelis.

Under the new budget agreement, the government will NO longer pay for a headstone for veterans NOT buried in national cemeteries. The 85- dollar allowance for a headstone or marker was a casualty in the deficit-cutting plan that Congress passed before adjourning last week.

The government says it will save 30-Million dollars over five years by eliminating the marker allowance and limiting the burial plot allowance for vets. In all, Congress trimmed three-point-seven-BILLION dollars from veterans programs over five years.

Leaders of the unions striking the New York Daily News met with Cardinal John

O'Connor yesterday. After the session, the prelate urged Governor Mario Cuomo or the federal courts to intervene in the dispute and bring about a settlement. The paper began hiring replacements for strikers, leading some members of The Newspaper Guild to return to work.

An attorney for some of the 270 victims of the 1988 bombing of Pan Am Flight 103 over Lockerbie, Scotland, is skeptical of reports that the U- S Drug Enforcement Administration might have had a role in the tragedy. Attorney Lee Kreindler says the story appears aimed at diverting attention away from Pan Am security and the official inquiry into the disaster.

A Siegel and Gale Perplexity Poll survey says medical insurance claim forms... income tax forms... college financial aid applications, and hospital bills are the toughest documents to deal with these days. The survey asked 625 adults to rank common forms and documents according to difficulty, reader satisfaction and attitude toward those required to fill them out.

#90304u1431 10/31/1990 ~United Press International

SALEM, MA (OCT. 31) UPI - Houdini devotees armed with the magician's own handcuffs reached out to the Great Beyond Wednesday, but their annual Halloween seance failed once again to make contact with the famous escape artist.

While magicians were disappointed in their hopes to raise Harry Houdini from the dead, covens of witches prepared to mark the most important night of their year.

The site of the infamous witch trials of 1692, Salem becomes a Mecca for tourists each Halloween. ''The Witch City'' also was the scene of a performance by Houdini in 1906, so fans of the world's best-known magician felt it was the appropriate spot for this year's seance.

Houdini, who died on Halloween in 1926, won world fame for his ability to escape from any form of restraint, his most sensational feat being to free himself from an airtight tank filled with water. But the magician, who was born Ehrich Weiss in 1874, was skeptical of the claims of spirtualists and mediums. Before his death he arranged a test of the spiritualists' talents. Houdini and his wife agreed on a ten-word code which he would use if he were able to come back from the dead.

''Houdini never said he'd come back. He said if anyone could come back he would,'' said Sid Radner, 70, a former escape artist and protegee of Houdini's brother Hardeen.

The magician's widow, Bess, held a seance each year for a decade following his death, but finally gave up in 1936, Radner said.

''At that time, she said 10 years was long enough to wait for any man,'' he said.

About 300 people gathered at the Hawthorne Hotel in Salem while Radner and his colleagues began their seance at one minute after midnight. But although the group enlisted the help of Houdini's niece and nephew and several local ''witches,'' and borrowed a pair of Houdini's own handcuffs from a local museum, there was no sign of the great magician.

There was, however, a false alarm, Radner said.

''After we did fail to make contact, some of the witches and mediums suggested we hold a second seance,'' during which one of them claimed to have contacted Houdini but ''said he didn't want to come back,'' Radner said.

''I said I wanted to make sure I'm talking to Houdini,'' he said.

So Radner, a Holyoke resident who has an extensive collection of Houdini memorabilia and has been taking part in the annual seances since the late 1940s, said he asked the medium what Houdini used to call his brother. The medium had no response.

But despite the apparent hoax, Radner felt the seance was a success - in that the participants were carrying on Houdini's tradition of exposing the phoney spiritualists.

''People shouldn't believe so rapidly. We're debunking the mediums,'' he said.

The Houdini devotees were only one of several groups flocking to Salem to mark Halloween. At the Salem Chamber of Commerce, the staff was frantically trying to answer a deluge of calls from eager visitors.

''It rings off the hook,'' said Julie Soboczinski, administrative assistant at the chamber of commerce.

A haunted house on the town common, a witch trial trail walk, and a candelight tour at the House of Seven Gables - with the guides dressed as characters from the Nathaniel Hawthorne novel - were among several events planned, she said.

It was equally busy at the Salem Witch Museum.

''My staff is ready to drop in their tracks,'' said museum Director Patty MacLeod. ''The number of visitors is mindboggling.''

#90304u1433 10/31/1990 ~United Press International

ATHENS, GREECE (OCT. 31) UPI - Bahraini Foreign Minister Mohammed bin Mubarak al Khalifa arrived in Tehran Wednesday to seek Iranian cooperation in finding a solution to the Persian Gulf crisis, the official Iranian media said.

Al Khalifa, whose visit was the first by a Bahraini foreign minister to Tehran since the Iranian revolution in 1979, met President Akbar Hashemi-Rafsanjani and handed him a message from the emir of Bahrain, Tehran radio said.

The official Islamic Republic News Agency said the Bahraini minister would stay two days in Tehran and meet with Iranian leaders on the crisis caused by the Aug. 2 Iraqi invasion of Kuwait and its impact on the region.

He told the Iranian president Bahrain decided that recent developments in the region made it necessary for Manama to have closer relations with Iran.

Al Khalifa said Bahrain and its Arab neighbors on the southern shores of the Persian Gulf believed it would be profitable for them to cooperate more closely with the Islamic Republic.

Bahrain is a member of the six-nation Gulf Cooperation Council, which includes Saudi Arabia, Kuwait, the United Arab Emirates, Qatar and Oman.

The Iranian state radio quoted him a saying: ''As one family (of nations), we must have more cooperation in the region.'' Al Khalifa also met with Iranian Foreign Minister Ali Akbar Velayati, the radio said.

Earlier, he told IRNA regional countries should try their utmost to prevent a catastrophe.

IRNA quoted him as saying: ''The Iraqi invasion of Kuwait has exposed the region to serious dangers and this problem cannot be solved in the absence of collective cooperation (among) the littoral states'' of the gulf.

Tehran condemned the Iraqi invasion of Kuwait and pledged to comply with U.N. sanctions against Iraq, but has restored diplomatic relations with Baghdad and indicated it wished to avoid any conflict with Iraq.

Monday, Tehran radio expressed fears that the gulf was on the brink of an all-out war and that the presence of weapons of mass destruction in the area could draq all the regional states, including Iran, into the conflict.

During the 1980-88 gulf conflict, GCC member-states bankrolled Iraq's fight against Iran but since Baghdad's troops marched into Kuwait, the attitude of the states has changed.

Earlier this week, a high-ranking Saudi Arabian official was in Tehran with a message for Velayati from the Saudi foreign minister. Details of the message were not disclosed.

#90304u1445 10/31/1990 ~United Press International

PARIS (OCT. 31) UPI - World oil supplies are sufficient to meet current demand, although strained production capacity foretells possible risk in the coming months, the International Energy Agency said Wednesday.

"There were no conclusions because there are no fundamental changes," Ulrich Engelmann, chairman of the IEA Governing Board said after a meeting of the group to review the oil situation in light of the Persian Gulf crisis.

"Stocks are at a comfortable level. The world oil supply is sufficient to meet current demand and prices are unrelated to the market fundamentals," he said.

"The fact that price fluctuations are not related to the market fundamentals means that if the political situation eases, the oil price will react to it," Engelmann said. The IEA was formed by the 21 largest industrialized, oil-consuming nations to monitor world oil production and consumption.

As it did on three previous occasions since the Persian Gulf crisis was triggered by Iraq's Aug. 2 invasion of Kuwait, the IEA Governing Board found no need to ask governments to use their emergency stocks.

In a report released Wednesday, the agency said the outlook for the coming winter appeared "slightly eased" from September because of a moderate build in the stocks of industrialized nations, higher production by Mideast countries and an easing of worldwide demand.

"Despite the apparent easing of the supply and demand balance, the petroleum industry remains near capacity at almost every point in the production, refining and distribution system. Thus the oil market is still at the risk of further disruption," the report said.

It said that short of conservation and a draw on government-controlled stocks, "the draw of commercial stocks is practically the only possible response left to cope with unforeseen demand surges or supply disruptions." The report estimated that a draw of 700,000 barrels a day during the fourth quarter may be required to balance demand with available supplies.

The Paris-based agency said 3.5 million barrels a day of the 4.2 million barrels lost by the U.N. embargo on Iraqi and Kuwaiti oil was made up by Oct. 1. "It is entirely possible that all could be made up during the current quarter," it said.

The report said world demand in the fourth quarter was expected to decline by 300,000 barrels a day compared to the fourth quarter last year to 53.4 million barrels a day.

Consumption by the 24 industrialized countries that belong to the Organization for Economic Cooperation and Development is expected to drop by two percent during the period.

The agency estimated current world oil output at 53.4 million barrels a day, including the 22.6 million barrels a day produced by the Organization of Petroleum Exporting Countries. This does not include the oil output of the centrally planned economies of the former Communist bloc nations.

The IEA lowered its previous estimates of oil consumption in the fourth quarter because of higher oil prices and lower economic growth. Fourth quarter OECD oil consumption was expected to decline by 800,000 barrels a day, or two percent from the comparable period last year.

Daily consumption in the first quarter of 1991 was expected to drop a further 500,000 barrels to 37.9 million barrels a day. At the same time oil supplies were expected to be higher than had been estimated because of increased OPEC production. Saudi Arabia's production in September was 7.5 million barrels a day, up two million barrels from August.

The United Arab Emirates pumped 2.2 million barrels a day in September, up from 1.7 million in August. Iran's production was estimated at 3.4 million barrels a day, up from 3.3 million.

The report said that if Saudi production reached eight million barrels a day, the remaining OPEC spare production capacity, excluding Iraq and Kuwait, would be less than one million barrels a day.

"Thus a surge in demand for crude during a peak cold month in the fourth quarter could put considerable pressure on crude prices, because there would be little spare production capacity left," the report said. "The easier current supply and demand balance is not a signal for complacency."

-30- 4453

#90304u1455 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - There could be electricity shortages this winter in parts of the East where generating capacity may not be adequate to meet peak demands typical on extremely cold days, according to an Energy Department study released Wednesday.

The study said seven "electric regions" - ranging from New York to Florida - are vulnerable because they do not have the recommended five percent safety margin between highest expected demand and immediately available generating capacity. Other regions of the country have safety margins between eight percent and 58 percent, with most in ten percent to 25 percent range.

The study said power shortages could result from unusually cold weather or equipment failures, which often occur during frigid conditions. They are most likely to occur between 7 a.m. and 7 p.m., when electricity demand is highest.

While raising the possibility of shortages, the study said short-term purchases of electricity from other regions with greater safety margins could help alleviate problems.

The report follows repeated warnings by Energy Department officials and utility industry representatives that financial and environmental barriers to building new power plants were leaving some regions dangerously short of excess generating capacity.

Of the seven regions facing difficulties, the tightest supply situation is in the Cincinnati-Dayton-Hamilton area in southern Ohio, where available power exceeds potential peak demand by only 0.9 percent.

Two other regions, the Florida Coordinating Council and the Tennessee Valley Authority, both have safety margins of 5.2 percent, slightly above the recommended level.

But the study said projections still raised concerns about Florida, which experienced shortages and voltage reductions during last December's extremely cold weather. At that time, Florida utilities had a safety margin of only 0.4 percent. Despite the improvement in Florida's reserve capacity, the study said: "A repetition of the December 1989 incident should not be completely discounted.

"In addition, the ability of the Florida Coordinating Council region to obtain more purchased power than currently available, even if it is available at the source, is limited by constraints on transmission into Florida."

As for the TVA, which serves Tennessee and parts of Mississippi, Georgia, Alabama, Kentucky, and North Carolina, the study said it was on the potential problem list because of uncertainty about data relating to generating capacity.

The other vulnerable regions and their safety margins are: the Virginia-Carolina Group, which covers South Carolina, North Carolina, and most of Virginia, 2.6 percent; the Western Pennsylvania-North Central Ohio Group, 2.7 percent; the Allegheny Power System, covering West Virginia and central Pennsylvania, 3.9 percent; and the New York Power Pool, 4.1 percent.

#90304u1466 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - The notorious Capitol Hill pay grab will boost the lifetime pension income of the typical House incumbent who wins in next Tuesday's election by more than $424,000, a taxpayers advocacy group said

Wednesday.

The National Taxpayers Union (NTU) also reported that last year's congressional salary hike will increase the number of pension multimillionaires in the House, including a dozen eligible for lifetime payouts of $3 million. Fifty-seven will be eligible for $2 million or more.

The group noted that if voters toss out all incumbents listed in its report, they would save $120 million in lifetime pension benefits.

''The 40 percent pay raise turns into a golden parachute for House incumbents who hang on for two more years,'' said David Keating, the NTU executive vice president.

Annual salaries of $125,000 are scheduled to take effect Jan. 1. Despite a groundswell of public outrage, Congress rejected demands that it rescind its largest pay raise ever.

The pay grab, plotted in secret by leaders of both parties and carried out during a session in which Congress raised taxes and reduced government services, prompted an anti-incumbency groundswell.

Since pensions for House members are linked to pay in the last three years before retirement, the typical re-elected incumbent could retire with a $49,125 pension after 1993, compared with a $34,993 pension after 1991.

Average lifetime benefits rise from $1,098,735 after 1991 to $1,523, 263 after 1993, according to the NTU study.

By staying in office just two more years, the NTU said, as many as 14 lawmakers could boost their lifetime pensions by more than $1 million.

The NTU said that 231 House members could collect over $1 million in lifetime benefits after 1993, compaqred with 139 after 1991.

''The benefits are outrageously generous,'' Keating said, adding that after 1993 annual benefits over $50,000 would go to 100 members.

Congressional retirement benefits are calculated by multiplying the years of member service by 2.5 percent of the average of the three highest years' salaries. Members may start drawing pension benefits as early as age 50.

Members pay 8 percent of their salaries into the Civil Service Retirement System, which according to government estimates has an unfunded liability of more than $500 billion that eventually must be covered by the taxpayers.

Congressional pension benefits are fully protected from inflation with cost-of-living adjustments.

''Congress has protected itself from any economic harm that might result from its irresponsible spending policies,'' Keating said. ''Few private sector retirees have such protection from the ravages of inflation and recession.''

The Senate, after rejecting a pay raise and accepting only a cost of living increase, will get $104,600, effective Jan. 1.

House minority leader Robert Michel, R-Ill, could collect the largest initial annual pension after 1993 - $104,118, with estimated lifetime benefits of $2.2 million. Rep. Pat Schroeder, D-Colo., tops the list of projected lifetime benefits with a whopping $3.6 million.

''The day of reckoning is coming,'' warned consumer advocate Ralph Nader, who led the fight against the congressional pay raise. ''Members of Congress have no shame. Scandal, fraud and corruption are rampant in Congress and they gave themselves a raise.

''They think they're royalty,'' Nader said. ''The gap between the rulers and the ruled has never been greater. The royals in Congress are living like kings and queens.''

#90304u1493 10/31/1990 ~United Press International

WASHINGTON (OCT. 31) UPI - Economic sanctions are beginning to have a serious effect on Iraq's civilian economy, the State Department said Wednesday, but they are not yet having any real impact on Saddam Hussein and his behavior.

The assessment came at a time when the United States has raised the level of rhetoric against Saddam, without specifically saying what it would do if the sanctions failed to reverse Iraq's invasion of Kuwait.

President Bush, Secretary of State James Baker and Secretary of Defense Dick Cheney have all said this week that they rule nothing out, including ''the military option'' if the sanctions fail to achieve their goal.

At the State Department, spokeswoman Margaret Tutwiler said that the blockade of Iraqi oil exports has been almost totally effective, cutting 97 percent of them and costing the Iraqi government about $2.5 billion per month in lost revenues.

Before the invasion, the combined output of the Kuwaiti and Iraqi files was about 2 million barrels of oil per day. At current prices, that means Iraq is losing in the order of $75 million per day.

The sanctions on imports and the freezing of Iraq's overseas financial assets, she said, is hitting the civilian sector hard.

''We are beginning to see some signs of real shortages in Iraq as a result of the United Nations' sanctions,'' she said.

The U.N. sanctions forbid the shipping of any items to Iraq, with the exception of ''humanitarian supplies,'' which the United States interprets as medicine and medical items.

''Iraq's foreign assets have been frozen, severely limiting Baghdad's ability to pay for imports even if it finds sellers willing to circumvent the sanctions,'' said Tutwiler.

She said imports of industrial goods, foreign raw materials, semifinished goods, and machinery have been reduced by 90 percent to less than 10 percent of pre-invasion levels, leading to a steady decline in Iraqi industrial activity.

There have also been shortages of imported lubricants, spare parts, and chemicals, which are hampering machine operations and causing production difficulties at refineries, petrochemical plants and other industrial sites. The sanctions have brought most of Iraq's development projects to a virtual

halt, she said.

Iraq announced gas rationing two weeks ago, reportedly because it was lacking some vital additives that are required for the refining of gasoline and motor oil. But that rationing was canceled this week as a ''mistake,'' and the minister in charge of the petroleum industry was summarily fired and replaced by Saddam's son-in-law.

Tutwiler said that while food is still readily available, the Iraqi government is rationing basic commodities such as bread, sugar, and soap. The costs of some basic commodities, she said, have jumped 800 percent since the invasion.

But, she added, ''It is important to remember that the aim of these sanctions is to change the behavior of the government of Iraq. No one can say at this point how rapidly these shortages will translate into meaningful decisions, particularly since Saddam Hussein has made clear that his army will be the last to be touched by shortages and that he does not care how much the people of Iraq may suffer to protect that army.''

U.S. intelligence reports that the army and air force may be suffering from a shortage of some spare parts for its armored vehicles and aircraft, but since Iraq purchased some $46 billion in military weapons during the war with Iran, some kinds of spare parts are in stock.

In addition, the Iraqis captured some of Kuwait's weapons intact in the Aug. 2 invasion, including two batteries of U.S.-made Hawk surface- to-air missiles.

DETROIT (OCT. 31) UPI - Standard & Poor's Corp. affirmed the debt ratings of the nation's Big Three automakers and their finance subsidiaries Wednesday - but changed its outlook to ''negative'' from ''stable,'' meaning there is potential for significant future downgrades.

The New York credit-rating agency said debt outstanding at the end of the third quarter among General Motors Corp., Ford Motor Co., and Chrysler Corp. amounted to over $200 billion.

Big Three automakers lost a combined $2.09 billion during the latest quarter ended Sept. 30, compared with total profits of nearly $1.33 billion in the year-ago quarter.

Apart from the economic downturn, S&P said recent developments like the Mideast crisis and consequently higher fuel prices ''raise the likelihood'' that the auto industry could face a severe downturn.

''Even now, none of the Big Three are profitable in their core North American

automotive operations,'' S&P said, adding that higher costs of the new labor contracts and tighter regulation concerning safety, emission controls and fuel efficiency add to financial pressures.

S&P affirmed the senior debt ratings at GM and Ford at AA-minus, while Chrysler's senior debt rating was affirmed at BBB-minus.

Moody's Investors Service in New York also confirmed the senior debt rating of GM and its finance subsidiary Wednesday, saying the $2 billion third-quarterquarter loss posted by the automaker to formally close several assembly plants is partly non-cash related, and that the shrinking will have ''significant longer-term benefits'' to its profitability and cost structure.

The senior debt ratings for both GM and General Motors Acceptance Corp. were confirmed by Moody's at Aa-3.

Both S&P and Moody's lowered the senior debt ratings of Chrysler's finance unit this summer, based on Chrysler's industry performance.

Chrysler was one of the first to react to S&P's assessment.

HOUSTON (OCT. 31) UPI - A woman who gained national attention for using the men's restroom during a George Strait concert because the lines outside women's bathrooms were too long is to stand trial starting Thursday.

Denise Wells, 33, faces a $200 fine, but she hopes a municipal court jury will find her innocent of the charge that she used a bathroom reserved for the opposite sex in a disruptive manner.

The public's overwhelming positive reaction to her plight prompted her to fight the charge, Wells said.

''Women are calling in saying it's horrible - it's just the same thing all over,'' she said of a shortage of women's bathrooms in public places.

Her argument is that she only used the men's bathroom out of necessity and was not disruptive. Wells said she gave up the first time she went to the women's bathroom because the line was so long.

The lines outside the women's bathrooms at The Summit arena were even longer the second time, she said, adding she simply could not wait any longer.

Upon seeing a man take his girlfriend into the men's bathroom, Wells said she followed them. When she left the bathroom, a policeman gave her a ticket and threw her out of the concert, which she had paid $125 to attend.

City prosecutor Karl Rosette said Wednesday Wells was cited because men complained about her behavior.

''I'm confident she's guilty, and we have a strong case against her,'' he said. ''Basically, the state side has been untold. We have not participated in the interviews and (television) presentations she's made.''

Rosette said he believes the case does not deserve the national attention it has gained. Several people have been ticketed for the same offense in the past but usually do not contest the fine.

''Basically people know they're guilty and they pay the fine ... But in Texas, people have the right to a jury trial, even for parking fines, '' he said.

Since her arrest, Wells has appeared on the ''Tonight Show'' and has had her

story told in ''People'' magazine and ''Ladies Home Journal'' and in columns by Ann Landers and Erma Bombeck.

She reportedly has agreed to appear on the ''Geraldo'' show in early November, whatever the outcome of her trial.

Rosette said he expects to present his case within a couple of hours, but the defense attorney and judge estimate the trial could take about two days.
